22 INTRODUCTION

23 On June 15, 2001, Watermaster filed with the Court a set of Rules and Regulations that
24 were revised specifically to respond to comments provided by the Court's Special Referee. As
25 described in Part II.K. of the transmittal pleading of these revised Rules and Regulations, time
26 constraints prevented the parties from including a revised set of Forms in the transmittal to the
27 Court. Instead, the transmittal committed to delivering the revised Forms to the Court prior to the
28 July 19, 2001 hearing.

FORMS

Included as Exhibit "A" to this pleading is a complete non-redlined copy of the Watermaster Rules and Regulations which includes a set of Forms to be used by parties to make applications and provide various types of notice to Watermaster. These revised Forms follow the same essential structure as the previous Watermaster Forms, except that the new Forms have been revised to mirror the updated language used by the revised Rules and Regulations and to incorporate new requirements as described by the revised Rules and Regulations and the Peace Agreement.

These Forms have been approved by each of the three Pools. They will be presented for consideration by the Advisory Committee and Board on the morning of July 19, 2001. If there are any changes made to the Forms at the Advisory Committee or Board meetings, then Watermaster counsel will report these changes to the Court at the Hearing.

III.
MINIMAL PRODUCERS

The revised Rules and Regulations codify the Watermaster practice of defining minimal producers as those whose production does not exceed ten acre-feet per year. The Referee has correctly noted that this practice is not consistent with the Judgment which defines minimal producers as those producers whose production does not exceed five acre-feet per year.

In order to rectify this inconsistency, Watermaster will either (1) change the Rules and Regulations to define a minimal producer to be a producer whose production does not exceed five acre-feet per year, or (2) will seek a Judgment amendment to redefine a minimal producer as a producer whose production does not exceed ten acre-feet per year.

Watermaster staff is currently in the process of updating the Judgment. When this work is completed, the updated Judgment will be presented to the Court for adoption. While the updating process is not intended to result in any substantive changes to the Judgment, the amendment of the definition of minimal producers would be an appropriate correction to make. Therefore, if the

parties decide to pursue option (2) and amend the Judgment, this amendment will be brought before the Court with the updated Judgment.

IV.
CONCLUSION

The Watermaster parties have proceeded down a long road over the past year, and have made substantial progress. Implementation of the OBMP is on schedule, and Watermaster has recently issued a Request for Proposals to make full utilization of the storage assets of the Basin. An essential component of all of the Watermaster activities are the processes described by the Rules and Regulations. Indeed, it is the critical role of the Rules and Regulations which has justified the detailed care that has been taken in their drafting and subsequent revisions. This process completed, the parties now request the Court to provide final approval to the Rules and Regulations.

 - (b) Prior to each subcommittee meeting, Watermaster shall prepare a summary of the funds, loans or grants secured for the purpose of implementing the OBMP over the past three months and distribute any information it may possess regarding the availability of other potential funds, loans or grants

ARTICLE V PHYSICAL SOLUTION

- 5.0 Scope. This Article generally sets forth the standards for Watermaster implementation of the Physical Solution established by the Judgment, including the application of these standards to Watermaster conduct and decisions under the Judgment, these Rules and Regulations and the OBMP.
- 5.1 Physical Solution. It is essential that this Physical Solution provide maximum flexibility and adaptability to use existing future, technological, social, institutional and economic options to maximize beneficial use of the waters of the Chino Basin. [Judgment ¶ 40]
- 5.2 Watermaster Control. Watermaster, with the advice of the Advisory and Pool Committees, is granted discretionary powers in order to develop its OBMP [Based on Judgment ¶ 41]
- 5.3 Basin Management Parameters. Watermaster shall consider the following parameters in implementing the Physical Solution under Articles VI - X of these Rules and Regulations:

- (a) Pumping Patterns Chino Basin is a common supply for all persons and agencies utilizing its waters. It is an objective in management of the Basin's waters that no Producer be deprived of access to said waters by reason of unreasonable pumping patterns, nor by regional or localized Recharge of Replenishment Water, insofar as such result may be practically avoided [Judgment Exhibit "I"]
- (b) Water Quality Maintenance and improvement of water quality is a prime consideration and function of management decisions by Watermaster [Judgment Exhibit "I"]
- (c) Economic Considerations. Financial feasibility, economic impact and the cost of optimum use of the Basin's resources and the physical facilities of the parties are objectives and concerns equal in importance to water quantity and quality parameters [Judgment Exhibit "I"]

**ARTICLE VI
SAFE YIELD AND OPERATING SAFE YIELD**

- 6.0 Scope This Article sets forth the rules and procedures that are applicable to Watermaster's regulation, control, and management of Safe Yield and Operating Safe Yield
- 6.1 Annual Production Right. The Annual Production Right shall be calculated by Watermaster pursuant to the Judgment and the Peace Agreement
- 6.2 New Yield. The Judgment provides that Safe Yield may need to be periodically adjusted based on more accurate and updated data and based on evidence of increased capture of native water and increased return flow from use of Replenishment or Stored Water. Safe Yield can only be re-determined periodically when long-term data or evidence is developed in support thereof. In order to encourage maximization of Basin Water under the Physical Solution, New Yield shall be accounted for by Watermaster in interim periods between re-determinations of Safe Yield
 - (a) Proven increases in yield in quantities greater than the historical level of contribution from certain Recharge sources may result from changed conditions including, but not limited

to, the increased capture of rising water, increased capture of available storm flow, and other management activities. These increases are considered New Yield.

- (b) To the extent the New Yield arises from conditions, programs or projects implemented and operational after July 1, 2000, it is available for allocation by Watermaster as a component of the Annual Production Right for each member of the Appropriative Pool.
- (c) As part of the documentation for the assessments and annual report for each year, Watermaster will provide a summary and analysis of the historical recharge and whether there are changed conditions that have resulted in a quantity of New Yield.
- (d) Pursuant to the Peace Agreement, any New Yield shall first be assigned to offsetting Desalter Replenishment Obligations in the immediately following year and as reasonably required to satisfy expected future Replenishment Obligations arising from the Desalter. If there is water in the Watermaster Desalter Replenishment Account to satisfy the Desalter Replenishment Obligation for the year, the New Yield shall be made available to the Appropriative Pool to satisfy a Replenishment Obligation consistent with section 6.3(c) herein.
- (e) New Yield is expected to result from a variety of conditions, including but not limited to enhanced Basin management, increased stormwater Recharge, induced Recharge from operation of the Desalters, injection, and changes in land use patterns. Watermaster has established an initial baseline quantity of stormflow Recharged in the Basin under historical conditions in the amount of 5,600 acre-feet per year. Any party to the Judgment may request Watermaster to re-examine this initial estimate of the baseline quantity and to adjust the quantity in accordance with best available technology and substantial evidence.

6.3 Accounting of Unallocated Agricultural Portion of Safe Yield

- (a) In each year, the 82,800 acre-feet being that portion of the Safe Yield made available to the Agricultural Pool under the Judgment, shall be made available:
 - (i) To the Agricultural Pool to satisfy all demands for overlying Agricultural Pool lands;
 - (ii) To land use conversions that were completed prior to October 1, 2000;

- (iii) To land use conversions that have been completed after October 1, 2000; and
 - (iv) To the Early Transfer of 32,800 acre-feet from the Agricultural Pool to the Appropriative Pool in accordance with their pro-rata assigned share of Operating Safe Yield
- (b) In the event actual Production by the Agricultural Pool exceeds 414,000 acre-feet in any five years, the Agricultural Pool shall procure sufficient quantities of Replenishment Water to satisfy over-Production obligations, whatever they may be.
- (c) In the event actual Production from the Agricultural Pool does not exceed 82,800 acre-feet in any one year or 414,000 acre-feet in any five years but total Production from all the uses set forth in section 6 3(a) above, exceeds 82,800 acre-feet in any year, the members of the Appropriative Pool shall procure sufficient quantities of Replenishment Water to satisfy over-Production obligations, whatever they may be. The cost of the Replenishment Water, if any, shall be borne by the Appropriators as follows:
- (i) For Fiscal Years 2001-2002 through Fiscal Year 2005-2006, the cost of Replenishment Water shall be borne by Appropriators in accordance with their proportionate assigned share of Operating Safe Yield. Thereafter, the Appropriative Pool shall reconsider its method for apportioning the cost of Replenishment Water, if any, and
 - (ii) Notwithstanding 6 3(c)(i) if the sum of the actual Production from the Agricultural Pool, plus the 32,800 acre-feet from the Early Transfer, plus the land use conversions, exceeds the sum of 82,800 acre-feet plus any New Yield not dedicated to Desalter Replenishment pursuant to section 7 4(b) herein by more than 10,000 acre-feet in any Fiscal Year after 2003-2004, the Appropriative Pool shall establish the basis for apportioning the cost of Replenishment Water, if any. Therefore, the Appropriative Pool's reconsideration of the method of allocating the cost of the Replenishment Water attributable to this section may occur earlier than 2006-2007. Watermaster's allocation of Replenishment Obligations pursuant to Section 6 3(c)(i) shall not prejudice a member of the Appropriative Pool from requesting another method of allocation under the last sentence of 6 3(c)(i) above or this section 6 3(c)(ii) on the basis of benefits

received including consideration of any necessary amendments of the Peace Agreement as may be required.

- 6.4 Conversion Claims. The following procedures may be utilized by any Appropriator:
- (a) Record of Unconverted Agricultural Acreage Watermaster shall maintain on an ongoing basis a record, with appropriate related maps, of all agricultural acreage within the Chino Basins subject to being converted to appropriative water use pursuant to the provisions of this subparagraph
 - (b) Record of Water Service Conversion. Any Appropriator who undertakes to permanently provide water service to any portion of a legal parcel subject to conversion shall report such change to Watermaster. Watermaster shall ensure that when a partial conversion occurs, that the water use on the acreage is properly metered. For all or any portion of the legal parcel that is proposed for conversion, Watermaster shall thereupon verify such change in water service and shall maintain a record and account for each Appropriator of the total acreage involved. Should, at anytime, all or any portion of the converted acreage return to agricultural overlying use, Watermaster shall return such acreage that returns to agricultural use to unconverted status and correspondingly reduce or eliminate any allocation accorded to the Appropriator involved.
- 6.5 Recalculation of Safe Yield. The Safe Yield shall be recalculated in year 2010/11 based upon data from the ten-year period 2000/01 to 2009/10

ARTICLE VII RECHARGE

- 7.0 Scope This Article sets forth the standards that are applicable to Watermaster's review of Recharge actions by all persons that may be subject to the Judgment as well as Watermaster's efforts to administer, direct, and arrange for Recharge in accordance with the Judgment

7.1 In General

- (a) Watermaster shall administer, direct and arrange for the Recharge of all water in a manner pursuant to the Judgment, the Peace Agreement and the OBMP; and in a manner that causes no Material Physical Injury to any party to the Judgment or the Chino Basin. Nothing herein shall be construed as committing a Party to provide Supplemental Water upon terms and conditions that are not deemed acceptable to that party. This means that no party to the Judgment shall be individually and independently obligated to purchase or acquire Supplemental Water on behalf of another party to the Judgment. [Peace Agreement § 5.1(e)] Applications to engage in Recharge activities shall be processed in accordance with the provisions of Article X using the forms provided by Watermaster attached hereto as Appendix 1.

- (b) Watermaster shall exercise its Best Efforts to:
 - (i) Protect and enhance the Safe Yield of the Chino Basin through Replenishment and Recharge [Peace Agreement § 5.1(e).];
 - (ii) Ensure there is sufficient Recharge capacity for Recharge water to meet the goals of the OBMP and the future water supply needs within the Chino Basin [Peace Agreement § 5.1(e).];
 - (iii) Evaluate the long term Hydrologic Balance within all areas and subareas of the Chino Basin;
 - (iv) Make its initial report on the then existing state of Hydrologic Balance by July 1, 2003, including any recommendations on Recharge actions which may be necessary under the OBMP. Thereafter Watermaster shall make written reports on the long term Hydrologic Balance in the Chino Basin every two years;
 - (v) Use and consider the information provided in the reports under (iv) above, when modifying or updating the Recharge Master Plan and in implementing the OBMP;
 - (vi) Evaluate the potential or threat for any Material Physical Injury to any party to the Judgment or the Chino Basin, including, but not limited to, any Material Physical Injury that may result from any Transfer of water in storage or water rights which

is proposed in place of physical Recharge of water to Chino Basin in accordance with the provisions of section 5.3 of the Peace Agreement [Peace Agreement § 5.1(e)];

- (vii) Cooperate with owners of existing Recharge facilities to expand/improve/preserve Recharge facilities identified in the Recharge Master Plan; arrange for the construction of the works and facilities necessary to implement the quantities of Recharge identified in the OBMP Implementation Plan [Peace Agreement § 5.1(e)(ix)] and cooperate with appropriate entities to construct and operate the new Recharge facilities that are identified in the Recharge Master Plan;
 - (viii) Ensure that its Recharge efforts under the Recharge Master Plan are consistent with the Judgment, and the Peace Agreement;
 - (ix) Establish and periodically update criteria for the use of water from different sources for Replenishment purposes [Peace Agreement § 5.1(e)(v)];
 - (x) Ensure a proper accounting of all sources of Recharge to the Chino Basin [Peace Agreement § 5.1(e)(vi)];
 - (xi) Recharge the Chino Basin with water in any area where Groundwater levels have declined to such an extent that there is an imminent threat of Material Physical Injury to any party to the Judgment or the Basin [Peace Agreement § 5.1(e)(vii)];
 - (xii) Maintain long-term Hydrologic Balance between total Recharge and discharge within all areas and sub-areas [Peace Agreement § 5.1(e)(viii)]; and
 - (xiii) Use water of the lowest cost and the highest quality, giving preference as far as possible to the augmentation and the Recharge of native storm water [Peace Agreement § 5.1(f)].
- (c) Table 1 to the OBMP Implementation Plan shall serve as the Watermaster Recharge Master Plan until amended by Watermaster. Watermaster will evaluate whether any modifications to the Recharge Master Plan shall be required on or before July 1, 2001. Thereafter, Watermaster will update the Recharge Master Plan, in a manner consistent with the Peace Agreement, a minimum of every five years thereafter or earlier if warranted.

because of changed conditions. The fact that the first of the Watermaster reports under section 7.1(b)(iv) will not be made available until July 1, 2003 shall not alter Watermaster's obligations to prepare and evaluate the Recharge Master Plan as provided in this section 7.1(c)

- (d) Watermaster shall not own Recharge projects, including but not limited to spreading grounds, injection wells, or diversion works [Peace Agreement § 5.1(h).]
- (e) Watermaster may own and hold water rights in trust for the benefit of the parties to the Judgment. Subject to this exception, Watermaster shall not own land or interests in real property. [Peace Agreement § 5.1(h)] Watermaster shall obtain Court approval prior to acquiring any water rights in trust for the benefit of the parties to the Judgment. In addition, Watermaster shall conform all existing permits to ensure that title is held in trust for the benefit of the parties to the Judgment.
- (f) Watermaster shall arrange, facilitate and provide for Recharge by entering into contracts with appropriate persons, which may provide facilities and operations for physical Recharge of water as required by the Judgment and the Peace Agreement, or pursuant to the OBMP. Any such contracts shall include appropriate terms and conditions, including terms for the location and payment of costs necessary for the operation and maintenance of facilities, if any. [Peace Agreement § 5.1(h).]
- (g) Watermaster shall provide an annual accounting of the amount of Recharge and the location of the specific types of Recharge [Peace Agreement § 5.1(j)]

7.2 Recharge of Supplemental Water All Recharge of the Chino Basin with Supplemental Water shall be subject to Watermaster approval obtained by Application made to Watermaster in accordance with provisions of Article X. [Peace Agreement § 5.1(a).] In reviewing any such Application, Watermaster shall comply with the following

- (a) Watermaster will ensure that any person may make Application to Watermaster to Recharge the Chino Basin with Supplemental Water pursuant to Article X, including the exercise of the right to offer to sell In-Lieu Recharge Water to Watermaster as provided in the Judgment and the Peace Agreement in a manner that is consistent with the OBMP and the law [Peace Agreement § 5.1(b)]

- (b) Watermaster shall not approve an Application by any party to the Judgment under Article X if it is inconsistent with the terms of the Peace Agreement, or will cause any Material Physical Injury to any party to the Judgment or the Basin. [Peace Agreement § 5.1(b)]
- (c) Any potential or threatened Material Physical Injury to any party to the Judgment or the Basin caused by the Recharge of Supplemental Water shall be fully and reasonably mitigated as a condition of approval. In the event the Material Physical Injury cannot be fully and reasonably mitigated, the request for Recharge of Supplemental Water must be denied. [Peace Agreement § 5.1(b)]

7.3 Sources of Replenishment Water Supplemental Water may be obtained by Watermaster from any available source. Watermaster shall, however, seek to obtain the best available quality of Supplemental Water at the most reasonable cost for recharge in the Basin. It is anticipated that Supplemental Water for Replenishment of Chino Basin may be available at different rates to the various pools to meet their Replenishment Obligations. If such is the case, each pool will be assessed only that amount necessary for the cost of Replenishment Water to that pool, at the rate available to the pool, to meet its Replenishment Obligation. In this connection, available resources may include, but are not limited to:

- (a) Maximum beneficial use of Recycled Water, which shall be given a high priority by Watermaster [Judgment ¶ 49(a)];
- (b) State Project Water subject to applicable service provisions of the State's water service contracts [Judgment ¶ 49(b)];
- (c) Local Imported Water through facilities and methods for importation of surface and Groundwater supplies from adjacent basins and watersheds [Judgment ¶ 49(c)]; and
- (d) Available supplies of Metropolitan Water District water from its Colorado River Aqueduct [Judgment ¶ 49(d)]

7.4 Sources of Desalter Replenishment Water Notwithstanding the provisions of section 7.3 above, replenishment for the Desalters shall be provided from the following sources in the following order of priority [Peace Agreement § 7.5]:

- (a) Dedications by purchasers of Desalted water through Transfer or assignment, some or all of their Production rights to Watermaster for the purpose of satisfying Desalter replenishment. Such dedications shall result in a reduction in replenishment assessments as provided in section 4 8 of these Rules and Regulations
- (b) Watermaster Desalter replenishment account composed of 25,000 acre-feet of water abandoned by Kaiser Ventures pursuant to the "Salt Offset Agreement" dated October 21, 1993, between Kaiser Ventures and the RWQCB, and other water previously dedicated by the Appropriative Pool.
- (c) New Yield that may be made available to Watermaster through a combination of management programs, actions or facilities. On an annual basis, and beginning on July 1, 2003, Watermaster will credit the Desalter's replenishment account with any New Yield it determines has been developed after June 1, 2000;
- (d) Safe Yield of the Basin; and
- (e) Additional Replenishment Water purchased by Watermaster the costs of which shall be levied as an assessment by Watermaster

7.5 Method of Replenishment Watermaster may accomplish Replenishment by any reasonable method, including spreading and percolation, injection of water into existing or new facilities, in-lieu procedures and acquisition of unproduced water from members of the Non-Agricultural and Appropriative Pools. [Judgment ¶ 50]

7.6 Accumulations. In order to minimize fluctuations in assessment and to give Watermaster flexibility in the purchase and spreading of Replenishment Water, Watermaster may make reasonable accumulations of Replenishment Water assessment proceeds. Interest earned on such retained funds shall be added to the account of the pool from which the funds were collected and shall be applied only to the purchase of Replenishment Water. [Judgment ¶ 56]

7.7 In-Lieu and Other Negotiated Procedures. To the extent good management practices dictate that recharge of the Basin be accomplished by taking surface supplies of Supplemental Water in lieu of Groundwater otherwise subject to Production as an allocated share of Operating Safe Yield, the following in-lieu procedures or other additional procedures as may be negotiated by

Watermaster and approved by the Watermaster Advisory Committee shall prevail [Judgment Exhibit "H" ¶ 11.]:

- (a) Designation of In-Lieu Areas. In-lieu areas may be designated by order of Watermaster upon recommendation or approval of the Watermaster Advisory Committee. Watermaster has previously designated the entire Chino Basin as an in-lieu area. In-lieu areas may be enlarged, reduced or eliminated by subsequent order; provided, however, that designation of an in-lieu area shall be for a minimum fixed term sufficient to justify necessary capital investment. However, should in-lieu Area No 1, which has been established by the Court, be reduced or eliminated, it shall require prior order of the Court.

- (b) Method of Operation. Any member of the Appropriative Pool Producing water within a designated in-lieu area who is willing to abstain for any reason from Producing any portion of its share of Operating Safe Yield in any year, may offer such unpumped water to Watermaster on a form to be provided therefor. In such event, Watermaster shall purchase said water in place, in lieu of spreading Replenishment Water, which may be otherwise required to makeup for over Production. The purchase price for in-lieu water shall be the lesser of:
 - (i) Watermaster's current cost of Replenishment Water, plus the cost of spreading; or
 - (ii) The cost of supplemental surface supplies to the Appropriator, less
 - a) said Appropriator's average cost of Groundwater Production, and
 - b) the applicable Production assessment where the water is Produced

ARTICLE VIII STORAGE

8 0 Scope This Article sets forth Watermaster's obligations and responsibilities regarding the management, regulation and control of storage within the Basin

8 1 In General

- (a) Watermaster Control A substantial amount of available Groundwater storage capacity exists in the Basin that is not used for storage or regulation of Basin Waters. It is essential that the use of storage capacity of the Basin be undertaken only under Watermaster control and regulation so as to protect the integrity of the Basin. Watermaster will exercise regulation and control of storage primarily through the execution of Groundwater Storage Agreements [Judgment ¶ 11]
- (b) Categories of Groundwater Storage Agreements There are different categories of storage and different types of Groundwater Storage agreements. Only those Groundwater Storage agreements defined as “Qualifying Storage agreements” require *new* Watermaster approval. The agreements identified in section 8 1(f)(iii) herein do not require new Watermaster approval. Qualifying Storage agreements will be processed by Watermaster in accordance with the forms provided by Watermaster and attached hereto as Appendix 1
- (c) Court Notification and Approval Before it is effective, any Storage and Recovery Agreement entered into pursuant to a Storage and Recovery Program shall first receive Court Approval. With respect to all other Groundwater Storage Agreements, Watermaster shall notify the Court after approval.
- (d) Relationship Between Recapture and Storage Recapture of water held in a storage account will generally be approved by Watermaster as a component of and coincident with a Groundwater Storage Agreement for Qualifying Storage. However, an Applicant for Qualifying Storage may request, and Watermaster may approve, a Groundwater Storage Agreement where the plan for recovery is not yet known. In such cases, the Applicant may request Watermaster approval of the Qualifying Storage only and subsequently submit and process an independent Application for Recapture under the provisions of Article X
- (e) Storage of Safe Yield as Carry-Over Water Any member of the Appropriative Pool or member of the Non-Agricultural Pool who Produces less than its assigned share of Operating Safe Yield or Safe Yield, respectively, may carry such unexercised right forward for exercise in subsequent years. Watermaster shall be required to keep an accounting of Carry-Over Water in connection with said Carry-Over Rights. The first water Produced in any subsequent year, shall be deemed to be in exercise of that Carry-Over Right. If the

aggregate remaining Carry-Over Water available to any member of the Appropriative Pool, or member of the Non-Agricultural Pool with Safe Yield, in a given year exceeds its assigned share of Operating Safe Yield after its demands are met, such Producer shall, as a condition of preserving such Excess Carry-Over Water execute a Local Storage Agreement with Watermaster. A member of the Appropriative Pool shall have the option to pay the gross assessment applicable to said Carry-Over Right in the year in which it occurred. [Judgment Exhibit “G,” and Exhibit “H” ¶ 12]

- (f) Storage of Supplemental Water The rules and procedures for the storage of Supplemental Water are set forth as follows
- (i) Supplemental Water. Each party, its officers, agents, employees, successors, and assigns, has been enjoined and restrained from storing Supplemental Water in Chino Basin for withdrawal, or causing withdrawal of water stored, except pursuant to the terms of a Groundwater Storage Agreement with Watermaster. Any Supplemental Water recharged by any person within Chino Basin, except pursuant to these Rules and Regulations and a Groundwater Storage Agreement, is deemed abandoned and shall not be considered Stored Water. [Judgment ¶ 14]
 - (ii) Application for Storage of Supplemental Water. Watermaster will ensure that any person, including but not limited to the State of California and the Department of Water Resources may make Application to Watermaster to store and Recover water from the Chino Basin as provided herein in a manner that is consistent with the OBMP and the law. Watermaster shall not approve an Application to store and Recover water if it is inconsistent with the terms of the Peace Agreement or will cause any Material Physical Injury to any party to the Judgment or the Basin. Any potential or threatened Material Physical Injury to any party to the Judgment or the Basin caused by the storage and Recovery of water shall be reasonably and fully mitigated as a condition of approval. In the event the Material Physical Injury cannot be mitigated, the request for storage and Recovery must be denied [Peace Agreement § 5 2 (a) (iii)] Applications for the storage of Supplemental Water shall be processed in accordance with the provisions of Article X
 - (iii) Pre-existing Groundwater Storage Agreements In accordance with the Peace Agreement, pre-existing Groundwater Storage Agreements are revived and extended as follows:

- a) Any Local Storage Agreement that would have expired pursuant to its terms on or before July 1, 2000 and which is determined to have water in storage account is revived and extended by these Rules and Regulations until July 1, 2005 subject to the limitations set forth in these Rules and Regulations; and
 - b) In addition, a Producer that has a Local Storage Agreement for Supplemental Water that will expire after July 1, 2000 pursuant to its terms and that has Supplemental Water in a storage account as of its original date of termination, shall be revived and extended by these Rules and Regulations to July 1, 2005. The extension shall only be valid for that quantity of Supplemental Water that is then in the storage account at the end of the term set forth in the Local Storage Agreement.
- (iv) Quantification of Supplemental Water Held in Local Storage on July 1, 2000.
- a) Quantification of Groundwater Held in Local Storage. Upon the request of any Producer, Watermaster shall quantify the amount of Groundwater held in Local Storage by that Producer. Groundwater held in Local Storage by a party to the Judgment, the majority of whose stock is owned by another party to the Judgment, may be treated as the Stored Water of the majority shareholder for purposes of quantification of the amount of such Groundwater as Supplemental Water under this section 8.1(f)(iv) only
 - b) Procedure for Quantification. On or before May 1, 2001, any party may submit a request to Watermaster for the quantification of water held in Local Storage as Supplemental Water. Watermaster shall evaluate pursuant to d) below all written requests filed by any Producer and shall make its determination regarding each request on or before May 31, 2001. Watermaster shall provide a minimum of thirty (30) days advance written notice to all parties of the date to submit requests. Watermaster shall consider all written requests concurrently
 - c) Limitations. Watermaster's quantification of Groundwater in Local Storage pursuant to a Local Storage Agreement as of July 1, 2000 as

Supplemental Water and Supplemental Water held in Local Storage as provided in section 8 1(f)(iii) above shall not be subject to the 50,000 acre-foot limitation on Supplemental Water held in Local Storage set forth in the Peace Agreement, section 5.2(b)(iv)(1) and these Rules and Regulations. However, all other Supplemental Water held in a Local Storage Account not quantified as such by Watermaster by May 31, 2001 shall be conclusively presumed to be Basin Water which shall also be subject to a Local Storage Agreement. While a party that obtains a quantification of Supplemental Water pursuant to this section is exempt from the 50,000 acre-foot limitation on the cumulative quantity of Supplemental Water that may be held in Local Storage, the exemption is limited. First, a party that obtains a Watermaster determination that quantifies some quantity of Groundwater as Supplemental Water pursuant to this Section shall not be entitled to replace the Supplemental Water Produced from Local Storage with new Supplemental Water without regard to the 50,000 acre-foot limitation on Local Storage of Supplemental Water. This means that the 50,000 acre-foot limitation applies to all Supplemental Water that is physically Recharged and stored in the Basin under a Local Storage Agreement after July 1, 2000. A Producer shall not have the right to replace the Groundwater quantified as Supplemental Water under this Section with other Supplemental Water following its initial Transfer or Recapture from Local Storage. Second, the recovery of the Supplemental Water stored under this provision by any Producer shall not cause Material Physical Injury to any party to the Judgment or the Basin.

d) Calculation For users of Supplemental Water, the quantity of Supplemental Water held by a Producer in Local Storage as of July 1, 2000 is deemed to be the lesser of:

- 1) the quantity of water held by the Producer in Local Storage ; or
- 2) the quantity of Supplemental Water used by the Producer prior to July 1, 2000

(g) Rules and Procedures in General

(i) Any person desiring to store Supplemental Water in the Basin shall make appropriate Application therefor with the Watermaster pursuant to the provisions of this Article and Article X. Supplemental Water stored or Recharged in the Basin, except pursuant to a Groundwater Storage Agreement with Watermaster, shall be deemed abandoned and not classified as Stored Water [Judgment ¶ 14.]

(ii) Guidelines and Criteria. Any person, whether a party to the Judgment or not, may make reasonable beneficial use of the available groundwater storage capacity of Chino Basin for storage of Water pursuant to written agreement with the Watermaster as provided herein. [Judgment ¶ 12.]

(iii) In the allocation of storage capacity, the needs and requirements of lands overlying Chino Basin and the owners of rights in the Safe Yield or Operating Safe Yield of the Basins shall have priority and preference over storage for export [Judgment ¶ 12.]

(iv) It is an objective in management of the Basin's waters that no Producer shall be deprived of access to the Basin's waters by reason of unreasonable pumping patterns, nor by regional or localized Recharge of Replenishment Water, insofar as such result may be practically avoided [Judgment Exhibit "I" ¶ 1(a).]

(v) Maintenance and improvement of water quality shall be given prime consideration [Judgment Exhibit "I" ¶ 1(b).]

(vi) Financial feasibility, economic impact and the cost and optimum utilization of the Basin's resources and the physical facilities of the parties to the Judgment shall be considered equal in importance to water quantity and quality parameters [Judgment Exhibit "I" ¶ 1(c).]

(h) Contents of Groundwater Storage Agreements. Each Groundwater Storage Agreement shall include but not be limited to the following components [Judgment Exhibit "I" ¶ 3]:

(i) The quantities and the term of the storage right, which shall specifically exclude credit for any return flows;

- (ii) A statement of the priorities of the storage right as against overlying, Safe Yield uses, and other storage rights;
 - (iii) The delivery rates, together with schedules and procedures for spreading, injection or in-lieu deliveries of Supplemental Water for direct use;
 - (iv) The calculation of storage water losses and annual accounting for water in storage; and
 - (v) The establishment and administration of withdrawal schedules, locations and methods
- (i) Accounting. Watermaster shall calculate additions, extractions and losses of all Stored Water in Chino Basin, and any losses of water supplies or Safe Yield of Chino Basin resulting from such Stored Water, and keep and maintain for public record, an annual accounting thereof. [Judgment ¶ 29]
 - (j) No Material Physical Injury. Watermaster will ensure that any party to the Judgment may Recapture water in a manner consistent with the Peace Agreement, the OBMP, the Judgment and these Rules and Regulations. Watermaster shall not approve a Recapture plan if it is inconsistent with the terms of Peace Agreement or will cause Material Physical Injury to any party to the Judgment or the Basin. Any potential or threatened Material Physical Injury to any party to the Judgment or the Basin caused by the Recapture of water by any person shall be fully and reasonably mitigated as a condition of approval. In the event the Material Physical Injury cannot be fully and reasonably mitigated, the request for Recapture must be denied.

8.2 Local Storage: Special Considerations. Under a Local Storage Agreement with Watermaster, every party to the Judgment shall be permitted to store its Excess Carry-Over Water and Supplemental Water in the Chino Basin according to the following provisions:

- (a) Until July 1, 2005, Watermaster shall ensure that: (a) the quantity of water actually held in local storage under a Local Storage Agreement with Watermaster is confirmed and protected and (b) each party to the Judgment shall have the right to store its Excess Carry-Over Water. Thereafter, a party to the Judgment may continue to Produce the actual quantity of Excess Carry-Over Water and Supplemental Water held in its storage account,

subject only to the loss provisions set forth herein. All Producers with a Local Storage Agreement for either Excess Carry-Over Water or Supplemental water shall be deemed to have received an extension of the applicable term in each of their respective Local Storage Agreements as provided in section 8.1(f)(iii)(a-b) above. However, such extensions shall be subject to the limitations set forth herein; e.g. the requirement that Local Storage does not cause Material Physical Injury, and the 50,000 acre-foot limitation on the cumulative total of Supplemental Water that may be placed in Local Storage after July 1, 2000. However, a Producer that obtains a determination regarding a request for classification of some quantity of Groundwater as Supplemental Water pursuant to section 8.1 above, shall also be deemed to have received an extension of their Local Storage Agreement until July 1, 2005, but only for that Supplemental Water actually stored in the Basin as of July 1, 2000. A Producer shall not have the right to replace the Groundwater classified as Supplemental Water pursuant to section 8.1 with other Supplemental Water following its initial Production from Local Storage without regard to the 50,000 acre-foot limitation.

- (b) Until July 1, 2005 or for such additional period as Watermaster, in its discretion, may establish, any party to the Judgment may make Application to Watermaster for a Local Storage Agreement pursuant to the provisions of this Article and Article X, whereby it may store Supplemental Water in the Chino Basin [Peace Agreement § 5.2(b)(ii)]
- (c) In accordance with Article X, Watermaster shall provide written notice to all interested parties of the proposed Local Storage Agreement prior to approving the agreement.
- (d) Watermaster shall approve the storage of Supplemental Water under a Local Storage Agreement so long as: (1) the total quantity of Supplemental Water authorized to be held in Local Storage under all then-existing Local Storage Agreements, other than amounts classified as Supplemental Water under the procedure set forth in section 8.1 above, for all parties to the Judgment does not exceed the cumulative total of 50,000 acre-feet; (2) the party to the Judgment making the request provides their own Recharge facilities for the purpose of placing the Supplemental Water into Local Storage; (3) the agreement will not result in any Material Physical Injury to any party to the Judgment or the Basin. Watermaster may approve a proposed agreement with conditions that mitigate any threatened or potential Material Physical Injury [Peace Agreement § 5.2(b)(iv)]

- (e) There shall be a rebuttable presumption that the Local Storage Agreement for Supplemental Water does not result in Material Physical Injury to a party to the Judgment or the Basin [Peace Agreement § 5 2(b)(v)]
- (f) In the event more than one party to the Judgment submits a request for an agreement to store Supplemental Water pursuant to a Local Storage Agreement, Watermaster shall give priority to the first party to file a bona fide written request which shall include the name of the party to the Judgment, the source, quantity and quality of the Supplemental Water, an identification of the party to the Judgment's access to or ownership of the Recharge facilities, the duration of the Local Storage and any other information Watermaster shall reasonably request. Watermaster shall not grant any person the right to store more than the then-existing amount of available Local Storage. The amount of Local Storage available for the storage of Supplemental Water shall be determined by subtracting the previously approved and allocated quantity of storage capacity for Supplemental Water from the cumulative maximum of 50,000 acre-feet [Peace Agreement § 5 2(b)(vii) .] This means Watermaster shall not approve requests for the storage of Supplemental Water in excess of the cumulative total of 50,000 acre-feet limitation. Priorities among the parties to the Judgment shall be on the basis that the completed Applications filed first in time under the provisions of Article X shall have a priority in right up to the amount of the quantity approved by Watermaster.
- (g) Any Producer that does not have a Local Storage Agreement extended by the terms of section 8.1 above, may file an Application with Watermaster for a Local Storage Agreement to place Excess Carry-Over Water in a Local Storage account. The Excess Carry-Over Water may be held in Local Storage without regard to the 50,000 acre-feet cumulative limitation on Supplemental Water until July 1, 2005. Thereafter, or at such later date that Watermaster may, in its discretion, establish, Producers shall obtain a Local Storage Agreement with Watermaster to store Excess Carry-Over Water in a Local Storage Account.
- (h) After July 1, 2005, Watermaster shall have discretion to place reasonable limits on the further accrual of Excess Carry-Over Water and Supplemental Water in Local Storage. However, Watermaster shall not limit the accrual of Excess Carry-Over Water for Fontana Union Mutual Water Company and Cucamonga County Water District when accruing Excess Carry-Over Water in Local Storage pursuant to the *Settlement Agreement Among Fontana Union Water Company, Kaiser Steel Resources Inc , San Gabriel Valley*

Water Company and Cucamonga County Water Districts dated February 7, 1992, to a quantity less than 25,000 acre-feet for the term of the Peace Agreement [Peace Agreement § 5 2(b)(x).]

- (i) Watermaster shall evaluate the need for limits on water held in Local Storage to determine whether the accrual of additional Local Storage by the parties to the Judgment should be conditioned, curtailed or prohibited if it is necessary to provide priority for the use of storage capacity for those Storage and Recovery Programs that provide broad mutual benefits to the parties to the Judgment as provided in this paragraph and section 5 2(c) of the Peace Agreement [Peace Agreement § 5 2(b)(xi).]
- (j) Watermaster shall set the annual rate of loss from Local Storage for parties to the Judgment at zero until October 1, 2005. Thereafter the rate of loss from Local Storage for parties to the Judgment will be 2% until recalculated based upon the best available scientific information. Watermaster may, at its sole discretion, set the rate of loss from storage for parties who are not parties to the Judgment. Losses shall be deducted annually from the storage accounts [Peace Agreement § 5 2(b)(xii).]
- (k) Watermaster shall allow water held in storage to be Transferred pursuant to the provisions of section 5 3 of the Peace Agreement as provided in Article X. Storage capacity is not Transferable. [Peace Agreement § 5 2(b)(xiii).]
- (l) Monetary payment shall not be accepted as a form of mitigation for Material Physical Injury where the injury is not confined to a specific party or parties. Where the Material Physical Injury is confined to a specific party or parties, monetary payment may be accepted as a form of mitigation, if acceptable to the affected party or parties.
- (m) Applicants for Local Storage of Supplemental Water agreements shall submit such Application prior to initiation of the placement of the Supplemental Water into storage except as provided in sections 8.1 and 8.2 above.
- (n) Any Supplemental Water stored or recharged in the Basin, except pursuant to a Local Storage Agreement for Supplemental Water with Watermaster, shall be deemed abandoned and not classified as Stored Water [Judgment ¶ 14].

8.3 Groundwater Storage and Recovery Program: Special Considerations. The parties, through Watermaster, may initiate a regional Storage and Recovery (sometimes called “conjunctive use”)

Program, for the mutual benefit of the Appropriators and the Non-Agricultural Pool in the Chino Basin according to the following provisions:

- (a) Watermaster will ensure that no person shall store water in, and recover water from the Basin, other than pursuant to a Local Storage Agreement, without a Storage and Recovery agreement with Watermaster [Peace Agreement § 5.2(c)(i)];
- (b) A proposed Applicant for a Storage and Recovery Program must submit the information set forth in Article X to Watermaster prior to Watermaster's consideration of an Application for a Storage and Recovery agreement;
- (c) As a precondition of any project, program or contract regarding the use of Basin storage capacity pursuant to a Storage and Recovery Program, Watermaster shall first request proposals from qualified persons [Peace Agreement § 5.2(c)(iii)];
- (d) Watermaster shall be guided by the following criteria in evaluating any request to store and recover water from the Basin by a party to the Judgment or any person under a Storage and Recovery Program
 - (i) The initial target for the cumulative quantity of water held in storage is 500,000 acre-feet in addition to the existing storage accounts. The 500,000 acre-foot target may be comprised of any combination of participants and is in excess of up to an additional 50,000 acre-feet of Supplemental Water and Excess Carry-Over Rights that may be stored under Local Storage Agreements
 - (ii) Watermaster shall prioritize its efforts to regulate and condition the storage and recovery of water developed in a Storage and Recovery Program for the mutual benefit of the parties to the Judgment and give first priority to Storage and Recovery Programs that provide broad mutual benefits [Peace Agreement § 5.2(c)(iv)];
- (e) The members of the Appropriative Pool and the Non-Agricultural Pool shall be exclusively entitled to the compensation paid for a Storage and Recovery Program irrespective of whether it be in the form of money, revenues, credits, proceeds, programs, facilities, or other contributions (collectively "compensation") with the benefits of such compensation to

be spread as broadly as possible as directed by the Non-Agricultural and the Appropriative Pools [Peace Agreement § 5.2(c)(v)];

- (f) The compensation received from the use of available storage capacity under a Storage and Recovery Program, may be used to offset the Watermaster's cost of operation, to reduce any assessments on the parties to the Judgment within the Appropriative and Non-Agricultural Pools, and to defray the costs of capital projects as may be requested by the members of the Non-Agricultural Pools and the Appropriative Pool [Peace Agreement § 5.2(c)(vi)];
- (g) Any potential or threatened Material Physical Injury to any party to the Judgment or the Basin caused by storage and recovery of water, whether Local Storage and recovery or pursuant to a Storage and Recovery Program, shall be reasonably and fully mitigated as a condition of approval [Peace Agreement §§ 5.2(a)(iii) and 5.2(c)(viii) (labeled "(xiii)"];
- (h) Watermaster reserves discretion to negotiate appropriate terms and conditions or to deny any request to enter into a Storage and Recovery Program Agreement. With respect to persons who are not parties to the Judgment, Watermaster reserves complete discretion to ensure that maximum compensation, as defined in section (e) above, is received. Watermaster shall base any decision to approve or disapprove any proposed Storage and Recovery Program Agreement upon the record as provided in Article X. However, it may not approve a proposed Storage and Recovery Program Agreement unless it has first imposed conditions to reasonably and fully mitigate any threatened or potential Material Physical Injury [Peace Agreement § 5.2(c)(ix)];
- (i) Any party to the Judgment may seek review of the Watermaster's decision regarding a Storage and Recovery Program Agreement as provided in Article X;
- (j) Nothing herein shall be construed as prohibiting the export of Supplemental Water stored under a Storage and Recovery Program and pursuant to a Storage and Recovery Agreement; and
- (k) The Parties shall indemnify and defend the State of California and the members of the Agricultural Pool against any lawsuit or administrative proceedings, without limitation, arising from Watermaster's adoption, approval, management, or implementation of a Storage and Recovery Program

8 4 Recapture

- (a) All Recapture of water held in a storage account under a Groundwater Storage Agreement shall be subject to the requirement that the Recovery of the water not result in Material Physical Injury to a party to the Judgment or the Basin
- (b) Recapture of water held in a Local Storage Account that pre-exists the adoption of these Rules and Regulations and that was extended by Watermaster in accordance with Article V of the Peace Agreement and these Rules and Regulations until July 1, 2005, shall be in accordance with the provisions of the plan for Recapture previously approved by Watermaster. Any amendments to an approved Recapture plan shall require additional Watermaster's approval under the provisions of Article X
- (c) A person with an approved plan for Recapture shall have the right to process amendments to the previously approved plan in accordance with the provisions of Article X

**ARTICLE IX
TRANSFERS**

- 9 0 Scope. Any Transfer shall be made only in accordance with the Judgment, the Peace Agreement section 5 3, the OBMP and this Article IX
- 9 1 In General Watermaster will ensure that any party to the Judgment may Transfer water in a manner that is consistent with the Judgment, the Peace Agreement, the OBMP and the law Watermaster shall approve a Transfer if it is consistent with the terms of the Peace Agreement, and will not cause any Material Physical Injury to any party to the Judgment or the Basin. Any potential or threatened Material Physical Injury to any party to the Judgment or the Basin caused by the Transfer of water shall be fully and reasonably mitigated as a condition of approval. In the event the Material Physical Injury cannot be fully and reasonably mitigated, the request for Transfer must be denied. Upon receipt of written request by Watermaster, a party to the Judgment shall exercise Best Efforts to provide Watermaster with a preliminary projection of any anticipated Transfer of Production within the Year.
- 9 2 Application to Transfer. A party to the Judgment may make Application to Watermaster to Transfer water as provided in the Judgment under the procedures set forth in Article X

- (a) Watermaster shall provide reasonable advance written notice to all the Active Parties of a proposed Transfer, prior to approving the Transfer as provided in Article X
- (b) Watermaster shall approve the Transfer of water as provided in the Judgment so long as the individual Transfer does not result in any Material Physical Injury to any party to the Judgment or the Basin. Watermaster may approve a proposed Transfer with conditions that fully and reasonably mitigate any threatened or potential Material Physical Injury
- (c) There shall be a rebuttable presumption that the Transfer and the Production by the transferee does not result in Material Physical Injury to a party to the Judgment or the Basin.
- (d) Watermaster shall base any decision to approve or disapprove any proposed Transfer upon the record after considering potential impacts associated with the individual Transfer alone and without regard to impacts attributable to any other Transfers [Peace Agreement § 5.3(b)(v)] However, nothing herein shall be construed as impairing or restraining Watermaster's duty and discretion with regard to cumulative impacts in the context of section 9.3
- (e) Transfers which occur between the same parties in the same year shall be considered as a single Transfer for the purpose of determining Material Physical Injury

9.3 Integrated Watermaster Review. In reviewing Transfers under these Rules and Regulations, Watermaster shall exercise reasonable discretion. Watermaster shall review each proposed Transfer based upon the record before it and considering the potential impacts of the proposed Transfer alone. However, Watermaster shall also consider the cumulative impacts of Transfers generally when carrying out its responsibilities to implement the OBMP and Recharge and monitoring programs authorized by these Rules and Regulations or the Judgment.

- (a) Watermaster will evaluate the cumulative physical impact of Transfers on the Basin, if any, by July 1, 2003, and a minimum of once every two years thereafter
- (b) Watermaster will take the results of its evaluation into account when carrying out its obligations under section 7.1 of these Rules and Regulations

9 4 Transfer of Non-Agricultural Pool Production Rights Watermaster shall approve the Transfer or lease of the quantified Production rights of Non-Agricultural Producers within the Non-Agricultural Pool subject to the provisions of section 9.2(b) above. The right to Transfer within the pool includes the right to lease water to other members of the Non-Agricultural Pool. In addition, the parties to the Judgment with rights within the Non-Agricultural Pool shall have the additional right to Transfer their rights to Watermaster for the purposes of Replenishment for a Desalter or for a Storage and Recovery Program

9 5 Early Transfer

(a) Pursuant to the Peace Agreement, Watermaster approved an Early Transfer of water to the Appropriative Pool in an amount not less than 32,800 acre-feet per year. The quantity of water subject to Early Transfer under this section shall be the greater of (i) 32,800 acre-feet or (ii) 32,800 acre-feet plus the actual quantity of water not Produced by the Agricultural Pool for that Fiscal Year that is remaining after all the land-use conversions are satisfied pursuant to section 5.3(h) of the Peace Agreement

(i) The Transfer shall not limit the Production right of the Agricultural Pool under the Judgment to Produce up to 82,800 acre-feet of water in any year or 414,000 acre-feet in any five years as provided in the Judgment [Peace Agreement § 5.3(g)(ii).]

(ii) The combined Production of all parties to the Judgment shall not cause a Replenishment assessment on the members of the Agricultural Pool. The Agricultural Pool shall be responsible for any Replenishment obligation created by the Agricultural Pool Producing more than 414,000 acre-feet in any five-year period [Peace Agreement § 5.3(g)(iii)]

(iii) The Appropriative Pool shall procure sufficient quantities of Replenishment Water to satisfy Replenishment Obligations pursuant to § 6.3(c) of these Rules and Regulations

(iv) Nothing herein shall be construed as modifying the procedures or voting rights within or by the members of the Agricultural Pool [Peace Agreement § 5.3(g)(v)]

(b) The amount of water converted from agricultural use to urban use prior to execution of the Peace Agreement was 2.6 acre-feet per acre, with 1.3 acre-feet per acre being allocated collectively to all members of the Appropriative Pool with an assigned share of Operating Safe Yield and 1.3 acre-feet per acre being allocated to that Appropriator providing service for that urban use. The rate of 2.6 acre-feet per acre shall be changed to a total of 2.0 acre-feet per acre, all of which shall be allocated upon the conversion of the land use to that party to the Judgment which is a member of the Appropriative Pool, on the Effective Date of the Peace Agreement, and whose Sphere of Influence or authorized service area contains the land (“purveyor”). Upon such conversion of water use the purveyor will pledge that the amount of water needed for such urban land use, when such urban land use is established, up to 2.0 acre-feet of water per acre of land per year will be made available for service for such converted land by purveyor under its then existing standard laws, regulations, rules and policies, or for service arranged by such purveyor, subject only to prohibition of such service by a federal, state agency or court with jurisdiction to enforce such prohibition. The owner of such converted land shall have the right to enforce such pledge by specific performance or writ of mandate under the terms of the Peace Agreement. No monetary damages shall be awarded.

9.6 Voluntary Agreement The members of the Agricultural Pool, including the State of California, shall have the right to engage in a voluntary agreement with an Appropriator which has a service area contiguous to or inclusive of the agricultural land, to provide water allocated from the Agricultural Pool to the overlying land for agricultural use on behalf of the member of the Agricultural Pool unless otherwise prohibited by general law. The Appropriator providing service shall be entitled to a pumping credit to offset Production pursuant to the Peace Agreement section 5.3(i).

9.7 Assignment of Overlying Rights In addition to the Voluntary Agreement under section 9.6 above, should an Appropriator take an assignment of rights from a Non-Agricultural Pool member, the agreement shall provide that the Appropriator may undertake to provide water service to such overlying land, but only to the extent necessary to provide water service to said overlying lands. Watermaster shall make available to members of the Non-Agricultural Pool and/or Appropriative Pool, a standard form which shall be completed and filed with Watermaster. Any assignment, lease and/or license shall be ineffective unless provided on the standard form approved by Watermaster and filed with Watermaster. - (b) Once a party to the Judgment elects to pursue redress under the provisions of this Article, it shall exhaust this process until conclusion unless there is a sudden, unexpected event or emergency that causes a need for immediate judicial review or in the event that the Watermaster has failed to take action on a longstanding request. Thus, other than in the event of an emergency or where Watermaster has engaged in undue delay, a party to the Judgment may not seek judicial review of a Watermaster action on a pending Application or Complaint until the Watermaster Board has taken final action under the provisions of

this Article. However, the procedures described in this Article X shall not preclude any party from seeking judicial review of any action, decision or rule of Watermaster in accordance with paragraph 31 of the Judgment

 - (c) Any party to the Judgment may file an Answer to the Complaint within 14 (fourteen) days of the date of the notice of Complaint or other time as may be prescribed in the Watermaster notice of the Complaint.
 - (d) Watermaster shall schedule a hearing on the Complaint within 30 (thirty) days of the notice of the Complaint.
 - (e) A party to the Judgment's failure to appear or Contest a hearing on the approval of an Application of any matter before Watermaster shall not be a bar to the party's right to file a Complaint as provided herein. However, a party shall not be permitted to file a Complaint if it knew or should have known of a particular harm that that party would suffer and had a reasonable opportunity to object at the time of the original approval process but did not file such a Contest

- (f) Any party to the Judgment may request an extension of time to file an Answer or to continue the hearing, which may be granted for good cause by Watermaster
 - (g) Any party to a Complaint proceeding that intends to rely upon documentary evidence at the hearing, other than Watermaster documents or files, shall serve copies of the evidence upon Watermaster and the other parties to the proceeding a minimum of seven (7) days in advance of the hearing
 - (h) Watermaster may, in its discretion, cause an investigation of the injury alleged to exist by the pending Complaint. Any party to the proceeding may be requested to confer and cooperate with the Watermaster, its staff or consultants to carry out such investigations
- 10 21 All Complaints Considered by Pool Committees. All Complaints shall be considered by the Pool Committees. Following consideration by the respective Pool Committees, if the Complaint is not dismissed any person(s) directly impacted by the Complaint may file an Answer in accordance with the provisions of section 10 16 and the Complaint shall be set for hearing.
- 10 22 Designation of Hearing Officer for Applications, Contests and Complaints The Watermaster Board shall develop and maintain a panel of five individuals that have technical expertise and some familiarity with the Basin. The hearing officer shall be selected by the mutual agreement of each side. If mutual agreement cannot be reached, each side to any hearing on an Application or Complaint shall rank their preferred hearing officer from one (1) to five (5). The panel member receiving the highest total score shall be selected by the Watermaster Board as the Hearing Officer, unless he or she is unable to serve in which case the panel member receiving the next highest rank shall be selected. Ties shall be broken by vote of the Watermaster Board. Watermaster may add or remove new members to the five member panel from time to time or as circumstances may warrant. There shall be only two sides in any hearing and intervenors shall be assigned to a side
- 10 23 Duty of the Hearing Officer The hearing officer shall conduct the hearings in accordance with the provisions of this Article. It shall be the responsibility of the hearing officer to compile the record, develop proposed findings and recommendations supported by substantial evidence in the record within thirty days of the hearing and transmit the record to the Advisory Committee and thereafter the Watermaster Board for further action. The hearing officer shall have and shall exercise the power to regulate all proceedings in any matter before it, and to take and do all acts and measures necessary or proper for the efficient performance of its duties

- (b) Appearances Persons appearing on their own behalf shall identify themselves at the beginning of the hearing. When a person is represented by an agent or attorney, such agent or attorney shall likewise enter an appearance before the hearing officer and thereafter will be recognized as fully controlling the case on behalf of that party to the proceeding
- (c) Conduct of Hearings Hearings shall be open to the public. The hearing officer has and shall exercise the power to regulate all proceedings in any manner before it, and to do all acts and take all measures necessary or proper for the efficient performance of its duties. The hearing officer may rule on the admissibility of evidence and may exercise such further and incidental authority as necessary for the conduct of the proceedings
- (d) Evidence The hearing need not be conducted according to technical rules of evidence and witnesses. Any relevant, non-repetitive evidence shall be admitted if it is the sort of evidence on which responsible persons are accustomed to rely in the conduct of serious affairs. Hearsay evidence may be used for the purpose of supplementing or explaining any direct evidence but shall not be sufficient by itself to support a finding unless it would be admissible over objection in civil actions
- (e) Rebuttable Presumption A rebuttable presumption under these Rules and Regulations means that the presumption shall be sufficient to approve an Application, unless a party to the Judgment opposing the Application produces substantial evidence to rebut the presumption. Once the party to the Judgment opposing the Application produces substantial evidence in support of their contention that an action may cause Material Physical Injury to a party to the Judgment or the Basin, the presumption shall be deemed rebutted
- (f) Official Notice Before or after submission of a matter for decision, official notice may be taken by the Hearing Officer of such facts as may be judicially noticed by the courts of this State

- (g) Evidence by Reference. Public records of Watermaster which are relevant to the subject of the hearing and books, reports or other papers and pleadings which have been prepared by Watermaster and submitted previously to the Court, may in the discretion of the hearing officer, be received into evidence as exhibits without the need of supplying copies to Watermaster or other parties to the proceeding
- (h) Examination of Witnesses Each party to the proceeding shall have the right to call and examine witnesses and introduce exhibits. Watermaster staff and consultants may participate in the hearing as appropriate, using their technical knowledge and experience for the primary purpose of developing a full, fair and accurate record, including the questioning of any witness or the agents for any party to the proceeding
- (i) Order of Procedure. There shall be an opening statement by Watermaster staff, summarizing the subject matter and purpose of the hearing and the procedures to be followed. The designated hearing officer will then ask all persons wishing to participate in the hearing to identify themselves. Staff shall present any written reports, or summary of any findings resulting from an investigation of the Application or the Complaint. The Applicant or the Complainant shall then proceed in the case in chief, followed by the Contestant(s) or the Respondents. The Applicant and the Complainant will then be afforded an opportunity to present any responsive evidence. The hearing officer may allow further response as the interests of justice may require. Questions from the hearing officer or Watermaster staff shall be appropriate at any time.
- (j) Opening Statements and Closing Briefs. Prior to presenting their case, any party to the proceeding may file a written opening statement, or may make an oral opening statement, the length of which may be prescribed by the hearing officer. At the close of the hearing, if the hearing officer deems it advisable, time will be allowed for the filing of written briefs
- (k) Record The record of the hearing shall consist of all documents submitted for consideration as well as all testimony presented. Tape recordings of all testimony shall be made. Any party, at that party's sole expense, may have a court reporter present at the hearing.
- (l) Completion of Record. The Hearing Officer may request assistance from Watermaster staff and general counsel in completing the record, proposed findings and recommendations. The Hearing Officer shall transmit his or her proposed findings to the

Advisory Committee within thirty days of the close of the hearing. The proposed findings of the hearing officer shall be based upon substantial evidence in the record

10 25 Watermaster Determinations

- (a) Watermaster shall consider and may approve, deny, or condition any contested Application. Prior to rendering a determination on a contested Application or a Complaint, both the Advisory Committee or the Board may also each remand the matter for further findings by the hearing officer a maximum of one time each. The hearing officer shall conduct any additional hearings and complete its review and rehearing and transmit its subsequent report to the Advisory Committee within thirty days from the date of notice from Watermaster of the need for additional findings
- (b) A contested Application or a Complaint shall be considered at the first regularly scheduled meeting of the Advisory Committee following the transmittal of the record, proposed findings of fact and recommendations by the hearing officer and no later than 30 days from the date of the hearing. The Advisory Committee shall consider the Application, the staff summary and analysis and staff report, any rebuttable presumption, the Contest, Answer, the record, proposed findings of fact and any recommendations of the hearing officer. The Advisory Committee may amend, modify, accept or reject the report of the hearing officer, or it may direct the hearing officer to conduct a re-hearing to receive additional evidence, direct the filing of additional briefs or request oral argument
 - (i) The findings and decision adopted by the Advisory Committee shall be supported by citations to substantial evidence in the record
 - (ii) If the Advisory Committee fails to base its decision on substantial evidence in the record or fails to consider the proposed findings of fact developed by the Hearing Officer, subject to the right of the Advisory Committee to remand for further findings, any Advisory Committee mandate shall not be binding on the Watermaster Board. This provision shall not be considered in construing the power of the Watermaster Board or the Advisory Committee that may exist under the Judgment
- (c) Following consideration by the Advisory Committee, the matter shall be transmitted to the Board for consideration within the next thirty (30) days. The Board shall also consider the

Application, the staff summary, analysis and staff report, any rebuttable presumption that may be applicable, the Contest, the Answer, the record, the proposed findings of fact and recommendations of the hearing officer, as well as the Advisory Committee action consistent with the Judgment. The Watermaster Board may amend, modify, accept or reject the report of the hearing officer, or it may direct the hearing officer to conduct a re-hearing to receive additional evidence, direct the filing of additional briefs or request oral argument. If the Board directs the hearing officer to conduct a re-hearing, then the proposed findings of fact and any recommendations shall be transmitted to the Advisory Committee for re-consideration prior to transmittal to the Board.

- (d) Watermaster Action. In acting upon a Complaint, or by approving, denying or conditioning in whole or in part any Application under this Article, the determinations made by the Watermaster Advisory Committee and Board shall be based upon substantial evidence in the record developed by the hearing officer and then before the Advisory Committee and Board. In making such determinations, the Advisory Committee and Board shall act in a manner consistent with the Judgment, the Peace Agreement and these Rules and Regulations. Each shall support its determinations by written findings. Each shall consider all relevant evidence presented and give due consideration to the policies and purposes set forth in the Judgment as well as Article X, section 2 of the Peace Agreement and the OBMP Implementation Plan.
- (e) No Restriction on Rights to Judicial Review Following Determination by Watermaster. Nothing herein shall be construed as imposing any limitation on any party's rights to seek judicial review of a Watermaster decision under this Article pursuant to paragraph 3.1 of the Judgment once Watermaster has rendered a decision on the respective Application or, in the case of a Complaint, to seek judicial review of a Watermaster decision where a party to the Judgment has elected to pursue Watermaster review of an action under this Article.
- (f) Emergency Review. In the event of a sudden, unforeseen and unexpected emergency impacting the health, safety and welfare of a party to the Judgment or the Basin, the party to the Judgment may seek immediate judicial review in accordance with the provisions of the Judgment and the Local Rules.
- (g) Undue Delay. Absent a Watermaster determination that extraordinary circumstances exist, Watermaster shall render its final decision on any Application filed under this Article within

180 days from the date the Application is deemed complete by Watermaster Staff. In the event Watermaster fails to offer a satisfactory response to repeated requests by a party to the Judgment to approve, deny or condition an Application or to rule on a Complaint, a party to the Judgment may request judicial review of the matter prior to the final Watermaster action.

(h) Effective Date of Watermaster Action

- (i) For purposes of judicial review, any action determination or rule of Watermaster shall be the date on which the decision is filed.
- (ii) For the purposes of determining the date on which an approved Application pursuant to Article X shall be considered effective, the approval shall relate back to the date the completed Application is filed.

10.26 Application, Contests, Complaints Fees and Expenses

- (a) Each party to the proceeding shall bear its own costs and expenses associated with the proceeding.
- (b) Watermaster's summary and analysis and participation in any hearing under this Article X shall be considered a general Watermaster administrative expense.
- (c) Upon request by the Agricultural Pool, Non-Agricultural Pool, or Appropriative Pool, the parties shall renegotiate this section 10.26. This renegotiation shall consider, but shall not be limited to, the adoption of a Court-approved resolution to address potential costs, fees and procedures incurred by parties to the Judgment and Watermaster in resolving frivolous and repetitiously unsuccessful similar contests.
- (d) Nothing herein shall be construed as precluding the right or claim by any party to the Judgment to request a reviewing Court under paragraph 3.1 of the Judgment to award litigation fees and costs to the extent such fees and costs may be available under general law.

APPENDIX 2

Chino Basin Watermaster
Agricultural Area Monitoring Program
Notification Procedure for Distribution of Groundwater Quality Data

1. Watermaster shall maintain a database that contains the names and addresses of well owners of record.
2. Every well owner of record shall be sent a copy of the laboratory report for his or her well within 30 days of receipt of laboratory report by Watermaster.
3. Each owner of record shall receive a copy of the laboratory data for his or her well only
4. The laboratory reports shall be for individual wells and shall not have any information about any other well in the sampling program. The analytical laboratory under contract to Watermaster shall provide these laboratory reports to Watermaster in one of two formats:
 - o signed, hard copy; or
 - o electronic format. These electronic reports shall be a facsimile of the hard copy report, *i.e.*, the report shall be formatted in the same style as the hard copy. These electronic data shall be in a format that is not amenable to unauthorized modification (e.g., Acrobat .pdf files). The laboratory reports shall contain an electronic signature of the laboratory's project manager. These files will be e-mailed to Watermaster at the same time as the electronic data deliverable (for upload in the database).
5. If the laboratory reports are delivered electronically, Watermaster staff shall print hard copies.
6. An owner of record may add an additional person of authority to Watermaster's database. Such person of authority will also receive a copy of the laboratory report. Additions to the database shall be made only by written request of the owner of record.
7. If the laboratory report reveals an exceedance of a drinking water standard, then Watermaster shall include with the report a copy of a letter notifying the owner of record and/or person of authority of such exceedance. The letter shall substantially conform to the sample attached to this policy as Exhibit "A."
8. Watermaster shall use a mail merge program to create address labels for mailing laboratory reports. Watermaster shall quality control check the recordation number on the laboratory sheet with the recordation number/owner of record and/or person of authority from the database to ensure that the correct laboratory report is in each envelope.
9. The laboratory report shall be sent via the US Postal Service
10. If a letter is also sent with the laboratory report indicating a drinking water quality standard exceedance, then the report shall be sent via the US Postal Service with a return receipt requested
11. Laboratory reports returned as undeliverable will trigger the following actions by Watermaster staff:
 - o address on letter will be checked against Watermaster database;
 - o the laboratory report will be hand-delivered by Watermaster staff to owners of record and/or person of authority who reside within the Basin;
 - o updated contact information will be requested from the Owner of Record and/or Person of Authority.
12. Copies of the laboratory reports and any USPS return receipts will be kept on file at Watermaster's offices.

[Well Owner or Person of Authority Address]

Dear _____

The Chino Basin Watermaster is a Court appointed entity established to manage the groundwater resources of the Chino Basin. As part of the Optimum Basin Management Program ("OBMP") for the Chino Basin, the Watermaster conducts a monitoring program to gather data regarding groundwater conditions in the Basin.

Water quality data gathered from well [identify well] indicates an exceedance of a drinking water standard for the following contaminants:

[Identify contaminants in chart form, which lists the contaminant, the standard, and the level reported by the laboratory].

Consumption of water that exceeds such standards could be hazardous to a person's health. However, the Watermaster makes no representation as to the legal consequences to you, if any, of such exceedances. Watermaster collects this information as part of a basin-wide water quality management program and not for the purpose of safeguarding the water quality at any particular well site. The results of this monitoring effort are provided solely as a convenience to you. If you have any questions about the water quality from your wells, you should contact the appropriate regulatory entity.

Sincerely,

Chino Basin Watermaster
