ANNUAL REPORT**

Date: March 15, 2019
Time: 1:30 p.m.
Dept.: S35

[Declaration of Bradley J. Herrema and
[Proposed] Order filed concurrently herewith]

TO ALL PARTIES AND THEIR ATTORNEYS OF RECORD:

PLEASE TAKE NOTICE that on March 15, 2019 at 1:30 p.m., or as soon thereafter as
the matter may be heard, in Department S35 of the above entitled Court located at 247 West
Third Street, San Bernardino, California 92415, Chino Basin Watermaster ("Watermaster"), will
and hereby does move the Court to receive and file the Chino Basin Watermaster Fiscal Year
2017-18 41st Annual Report ("Report"). (Declaration of Bradley J. Herrema ("Herrema Decl.") at
¶ 3, Ex. A.)

**DECLARATION OF BRADLEY J.
HERREMA IN SUPPORT OF
WATERMASTER'S MOTION FOR
COURT TO RECEIVE AND FILE
WATERMASTER'S 41ST ANNUAL
REPORT**

Date: March 15, 2019
Time: 1:30 p.m.
Dept.: S35

[Notice of Motion and Motion for Court to
Receive and File Watermaster's 41st Annual
Report and [Proposed] Order filed concurrently
herewith]

22
23
24 I, Bradley J. Herrema, declare as follows:

25 1. I am an attorney duly admitted to practice before all of the courts of this State, and
26 am a shareholder in the law firm of Brownstein Hyatt Farber Schreck, LLP, counsel of record for
27 Chino Basin Watermaster ("Watermaster"). I have personal knowledge of the facts stated in this
28 declaration, except where stated on information and belief, and, if called as a witness, I could and

1 would competently testify to them under oath. I make this declaration in support of the above-
2 referenced request.

3 2. As legal counsel for Watermaster, I am familiar with Watermaster's practices and
4 procedures, as well as actions taken by the Pool Committees, Advisory Committee, and Board.

5 3. On January 24, 2019, the Watermaster Board approved, by unanimous vote, the
6 Chino Basin Watermaster Fiscal Year 2017-18 41st Annual Report ("Report") and directed its
7 filing with this Court. During their January 2019 regular meetings, the Report was presented to
8 the Pool Committees and Advisory Committee for their review. Attached hereto as **Exhibit A** is a
9 true and correct copy of the Report.

10 4. I am not aware of any opposition to the Court receiving and filing the Report.

11 I declare under penalty of perjury under the laws of the State of California that the
12 foregoing is true and correct.

13 Dated this 31st day of January, 2019, at Los Angeles, California.

FISCAL YEAR 2017-18

41ST ANNUAL REPORT

PARTNERSHIPS AND SOLUTIONS FOR A SUSTAINABLE FUTURE

ADAPTING TO EVER-CHANGING WATER CONDITIONS TO MAINTAIN SUPPLY AND QUALITY IN THE BASIN

1970s

Conflicts over water threaten supply reliability, water quality, and the regional economy.

1973

A pump tax is enacted to raise money for studies that aid in implementing recharge programs in the Basin.

1978

Chino Basin is adjudicated and Watermaster is created. Planning and funding are initiated to manage the Basin.

1999

Optimum Basin Management Program provides a detailed blueprint to ensure a reliable water supply and to protect and enhance water quality.

2000 & 2007

Peace (I) and Peace II Agreements make effective collaboration possible, resulting in hundreds of millions of dollars in cost savings and other benefits.

2004

Regional Water Quality Control Board (RWQCB) adopts unique Maximum Benefit Salinity Management Program, enabling implementation of a massive recycled water reuse, stormwater, and supplemental water recharge program, and expansion of groundwater desalting to achieve hydraulic control.

2008-2010

The Recharge Master Plan Update is developed as a critical step to ensure long-term water quality and supply.

2011

Safe Yield Reset process is initiated.

2013

Completed the 2013 Amendment to the 2010 Recharge Master Plan Update, which is the foundation to cost-effectively recharge storm-, imported, and recycled water with the goal of improving water quality, and ensuring water supply reliability into the future.

2016

Pumping by Chino Basin Desalters in the Chino Creek Well Field reaches the rate required to achieve hydraulic control, protecting the water quality of the Santa Ana River by intercepting and removing contaminants, and enabling recycled water recharge in the Chino Basin.

2017-2018

Chino Desalter Authority (CDA) completes two new desalter wells and begins work to site a third, in order to maintain capacity and hydraulic control as groundwater production changes over time.

January 2018 marks the 40th anniversary of the Chino Basin Judgment.

TECHNICAL EXCELLENCE, STAKEHOLDER ENGAGEMENT, AND COLLABORATION

A Message from Chino Basin Watermaster

Carrying Out Our Core Mission. In order to meet our mission, Watermaster annually fulfills a large number of ongoing requirements necessary to enforce the Judgment and implement the Optimum Basin Management Program, consisting of nine key elements, including: comprehensive monitoring and recharge programs, storage and recovery programs, regional supplemental and impaired groundwater supply programs, and others.

Major Projects to Advance Basin Management. This year, Watermaster advanced numerous critical projects to refine and improve Basin management:

- Storage framework investigation.
- 2018 Recharge Master Plan Update (RMPU).
- Increased this year's "put" limit for Dry Year Yield (DYY) program with Metropolitan Water District of Southern California (MWD).
- Engagement with State agencies and other adjudicated basins to better fulfill Chino Basin obligations under SGMA.
- New procedure to account for evaporation losses for recharged supplemental water.
- Continued engagement in the Santa Ana Watershed Project Authority (SAWPA), the SAWPA Basin Monitoring Program Task Force, and Santa Ana River Habitat Conservation Plan (HCP) development.
- Master agreement with Inland Empire Utilities Agency (IEUA) to accommodate future joint project efforts.

Our Commitment to Quality Science, Engineering, and Legal Analysis on Behalf of All Basin Stakeholders. There are dozens of parties to the Judgment, with a wide range of interests: cities, corporations, agricultural organizations, private and public water suppliers, the County, and others. Managing the Basin to the benefit of all requires a commitment to detailed scientific, engineering, and legal analysis followed by open and extensive communication and engagement processes so all parties can understand the issues, provide input, and participate actively.

As we enter the fortieth year of the Judgment, we look forward to continuing to improve upon our understanding and management of the Basin and our ability to work effectively with the many parties to the Judgment, regulators, and other partners around the State.

Peter Kavounas, PE
General Manager, Chino Basin Watermaster

PARTNERS IN BASIN MANAGEMENT

OPTIMIZING STORAGE TO ENSURE LONG-TERM SUSTAINABILITY

CONFRONTING CURRENT LIMITS ON USE OF GROUNDWATER STORAGE SPACE

Long-Term Groundwater Storage Management Continues to Be an Important Focus for Watermaster. As of June 2018, total water in Basin storage accounts had reached almost 500,000 acre-feet—the maximum quantity that had been evaluated for environmental impacts under the Peace II Agreement. The parties’ plan to use additional storage in the future prompted an analysis of Basin storage use for long-term management planning.

Conditional Increase in Safe Storage Capacity to 600,000 Acre-Feet. As an interim response to reaching storage limits, Watermaster and the IEUA conducted the necessary analysis to temporarily increase the Safe Storage Capacity from 500,000 acre-feet to 600,000 acre-feet from July 1, 2017, through June 30, 2021.

NEW STORAGE MANAGEMENT FRAMEWORK REQUIRED

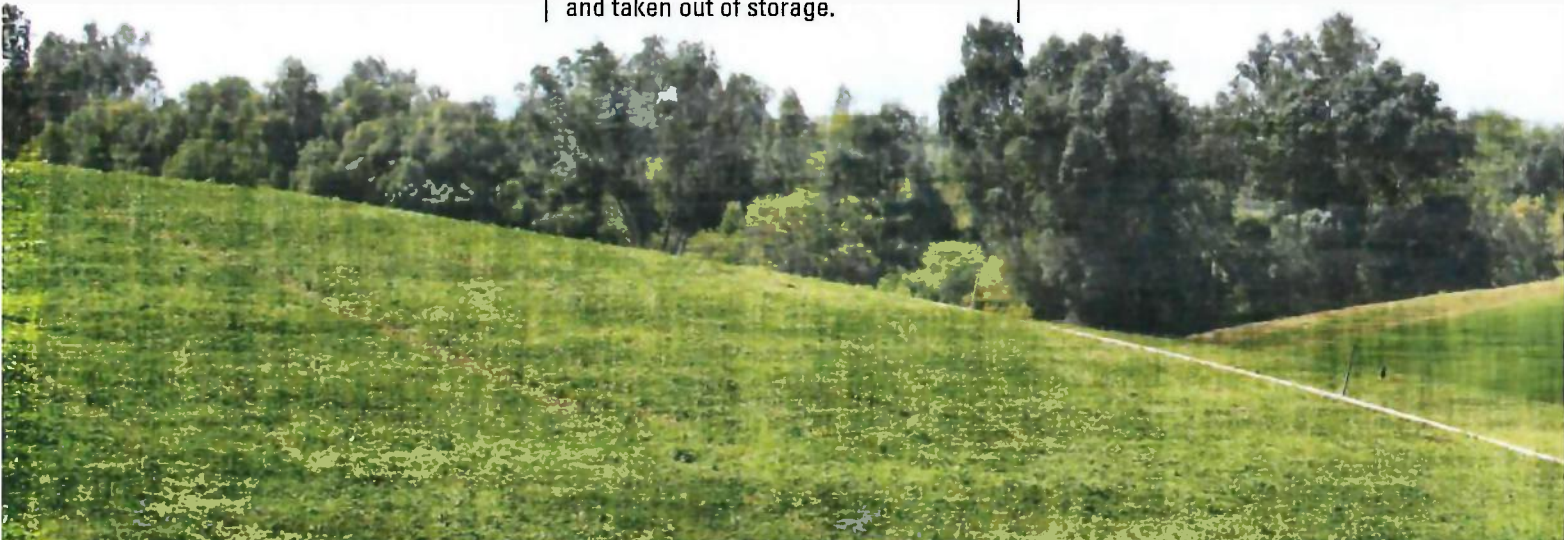

Based on projections of groundwater pumping, the parties have identified the need for additional storage to accommodate future management activities—up to 700,000 acre-feet under current projections. An analysis is required in order to determine the impact of this additional storage and to ensure that no material physical injury (MPI) will result from extraction.

Groundwater Storage Management Program Update Requires Development of a “Storage Framework.” The update of the existing Groundwater Storage Management Program requires development of a technically defined storage framework to support it. This framework will provide some certainty around how the Basin will respond to various storage proposals, including the magnitude of water in storage, and where and how water is best put into and taken out of storage.

GOAL OF THE NEW STORAGE FRAMEWORK INVESTIGATION

The goal of the storage framework investigation is to describe how the Basin will respond to the use of storage space and whether there will be any resulting MPI, and to provide conceptual descriptions of various approaches to mitigating any MPI. This is done by describing how the Basin responds to varying amounts of pumping, recharge, and storage, and defining how to determine and measure the occurrence of MPI in each case.

WATERMASTER IS UNDERTAKING THE STORAGE FRAMEWORK INVESTIGATION IN ORDER TO DEVELOP A LONG-TERM GROUNDWATER STORAGE PLAN, AND ENSURE MANAGED STORAGE DOES NOT CAUSE MPI, SUCH AS INCREASED LAND SUBSIDENCE, OR THREATEN PUMPING SUSTAINABILITY.

The Chino Basin has urbanized rapidly in recent decades, but there remain a large number of agricultural water users.

PROGRESS ON STORAGE FRAMEWORK

Last year, Watermaster staff began the storage framework investigation to assess how the groundwater Basin would respond to the planned use of Managed Storage by updating its modeling and planning projections, and subsequently assessing the potential for MPI caused by the parties' use of Managed Storage.

EXTENSIVE ENGAGEMENT WITH PARTIES ON STORAGE FRAMEWORK

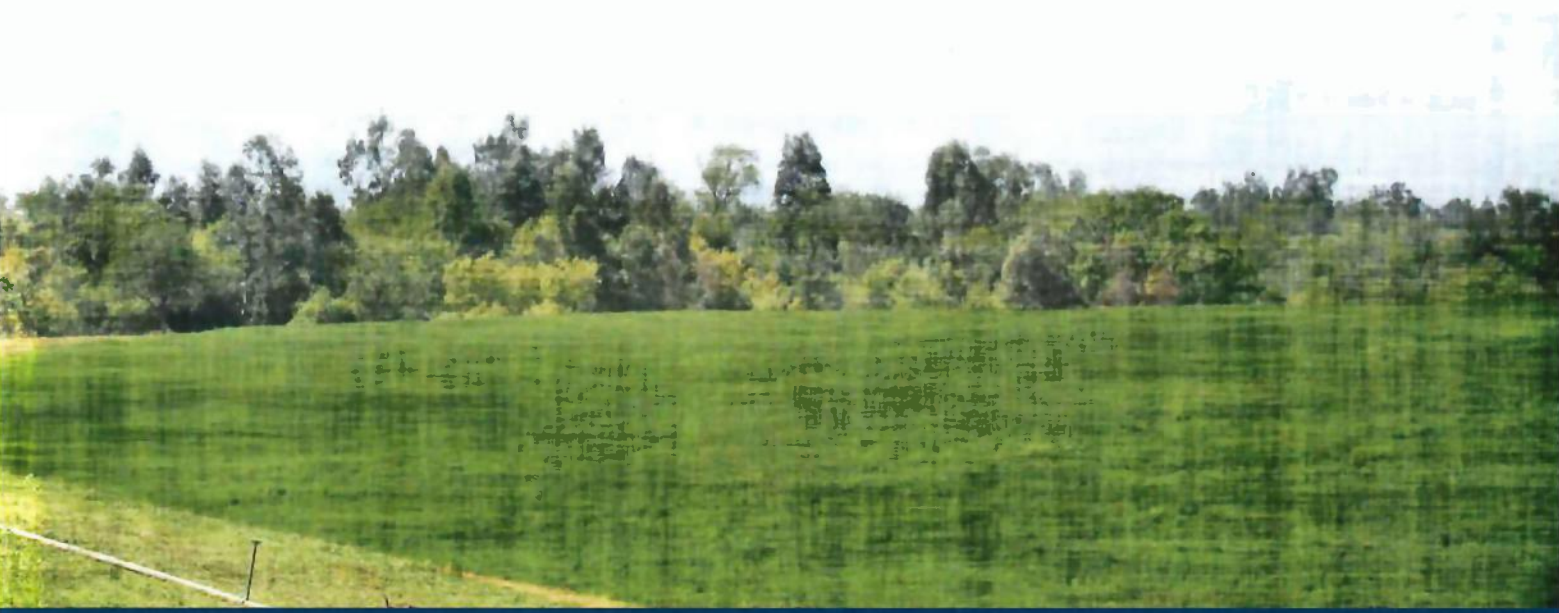

This year, Watermaster held five storage workshops with Watermaster parties. One topic was the Basin's response to a range of operational bands or varying volumes of water. As of this Annual Report, the investigation continues.

RESULTS OF THE STORAGE FRAMEWORK INVESTIGATION TO DATE

- **Baseline Groundwater Storage Space Use of Up to 700,000 Acre-Feet.** Based on the parties' pumping projections, Watermaster estimated that the amount of storage space needed is about 700,000 acre-feet. This amount includes carry over, excess carry over, and supplemental water.
- **No MPI at 700,000 Acre-Feet of Storage Use.** Watermaster evaluated the Basin's response to the likely storage use of 700,000 acre-feet and determined that there would be no MPI.
- **No MPI but High Capital Costs at Up to 1 Million Acre-Feet of Storage Use.** At the May 2018 workshop, Watermaster presented the results from the evaluation of the use of 800,000 to 1 million acre-feet. It showed that no MPI would occur, but that utilizing this much storage would require substantial capital investment to store and remove the water. In addition, there would be no impact on hydraulic control. With the parties' input, it was decided that 800,000 to 1 million acre-feet of water is the maximum amount that would be studied.

SCHEDULE TO COMPLETE THE STORAGE FRAMEWORK

The final report is expected to be completed by fall 2018.

SAFE STORAGE WAS ESTIMATED IN THE DEVELOPMENT OF THE OPTIMUM BASIN MANAGEMENT PROGRAM (OBMP) TO BE ABOUT 5.8 MILLION ACRE-FEET.

OPTIMIZING STORAGE TO ENSURE LONG-TERM SUSTAINABILITY, CONT.

OTHER STORAGE PROJECTS AND ACTIVITIES

Continuation of DYY Storage Program. Due to the prior winter's wet conditions, MWD was able to deliver its maximum annual limit of 25,000 acre-feet within five months. Rather than stopping recharge to the Basin, the parties elected to increase the delivery limit to 50,000 acre-feet per year for this fiscal year, without increasing the overall maximum of 100,000 acre-feet of total storage. Ultimately, MWD recharged 35,069 acre-feet of water during the 2017–2018 fiscal year, which included 517 acre-feet recharged via direct injection for the first time. The total amount stored in the DYY account is just over 41,000 acre-feet as of the end of the fiscal year.

Preparation of an Application for Storage Agreements. In order to help the parties stay in compliance with the Judgment, Watermaster prepared an application for storage agreements for all parties in the Overlying (Non-Agricultural) Pool and the Appropriative Pool with increases in storage accounts. Watermaster investigates all requests for storage agreements to ensure that the water stored and recovered does not cause MPI to a party or the Basin.

Facilitation of Transfers Among Parties. Each year, the parties actively transfer unproduced Safe Yield rights and water in storage accounts among themselves. Similar to storage agreements, Watermaster reviews these transfers to ensure that they do not result in MPI.

Construction underway at San Sevaine Basin.

STUDIES SHOW PEACE II IMPLEMENTATION HAS NOT IMPACTED PRADO BASIN HABITAT

HABITAT SUSTAINABILITY PROGRAM GOAL

In accordance with the monitoring and mitigation requirement of the Peace II Supplemental Environmental Impact Report (SEIR), Watermaster, along with the IEUA and the Orange County Water District (OCWD), continued to implement the Prado Basin Habitat Sustainability Program (PBHSP).

The purpose of the PBHSP is to ensure that implementation of the Peace II plan does not cause the riparian habitat to incur unforeseen significant adverse effects from the Peace II implementation.

EXTENSIVE PRADO BASIN HABITAT STUDIES AND MONITORING THIS YEAR

Report Finds No Trend in Long-Term Degradation. The second Annual Report of the Prado Basin Habitat Sustainability Committee (PBHSC) found no indication of a long-term trend in degradation of the extent or quality of riparian habitat along Chino Creek, Mill Creek, or the Santa Ana River that is linked with the implementation of the Peace II Agreement.

Other Factors Have Had Documented Adverse Impacts on the Riparian Habitat. These include wildfire and pests—particularly the Polyphagous Shot-Hole Borer beetle, which has been identified as a threat to cause adverse impacts to trees in the Prado Basin.

Groundwater Levels Underlying the Riparian Habitat in Prado Basin Have Generally Remained Stable Since 1961. Groundwater levels have been unaffected by the implementation of both Peace agreements, the first of which went into effect in 2000.

MONITORING ACTIVITIES IN THE PRADO BASIN THIS YEAR

The full range of monitoring continued, generating data on groundwater quality and groundwater level, surface water quality and daily discharge, climate, and riparian habitat.

Conducting field monitoring in the Prado Basin.

PROGRESS ON IMPLEMENTING THE CURRENT MASTER PLAN AND PREPARING THE UPCOMI

This year, Watermaster and the IEUA continued to implement projects from the 2013 Amendment to the 2010 RMPU and began development of the 2018 RMPU.

THE RMPU IS THE FOUNDATION OF THE RECHARGE PROGRAM

The RMPU is the foundation of Watermaster's comprehensive program to cost-effectively recharge stormwater, urban runoff, imported water, and recycled water. The goals of the RMPU include improving water quality, mitigating historical subsidence, ensuring water supply reliability into the future, and recharging areas within the Basin where groundwater levels decline to a level where there is threat of MPI to any party to the Judgment.

INVESTMENT IN 2013 RMPU PROJECTS IS COST-EFFECTIVE

The total cost of the five selected projects is expected to be about \$30 million, with a unit cost for the new stormwater recharge of about \$400 per acre-foot. This is roughly half the cost to purchase untreated State Water Project water from MWD, which in 2018 is about \$760 per acre-foot (including readiness-to-serve charges).

THE 2013 RMPU LED TO THE APPROVAL OF NUMEROUS PROJECTS EXPECTED TO INCREASE STORMWATER AND RECYCLED WATER RECHARGE CAPACITY BY UP TO 11,900 ACRE-FEET PER YEAR.

THIS FISCAL YEAR, WATERMASTER AND THE IEUA RECHARGED A RECORD 53,963 ACRE-FEET OF WATER

4,494 acre-feet of
STORMWATER

13,212 acre-feet of
RECYCLED WATER

36,257 acre-feet of
IMPORTED WATER

Heavy equipment at work on San Sevaine Basin.

RECHARGE NG PLAN

PROGRESS ON IMPLEMENTING THE 2013 RMPU AND PREPARING THE 2018 RMPU

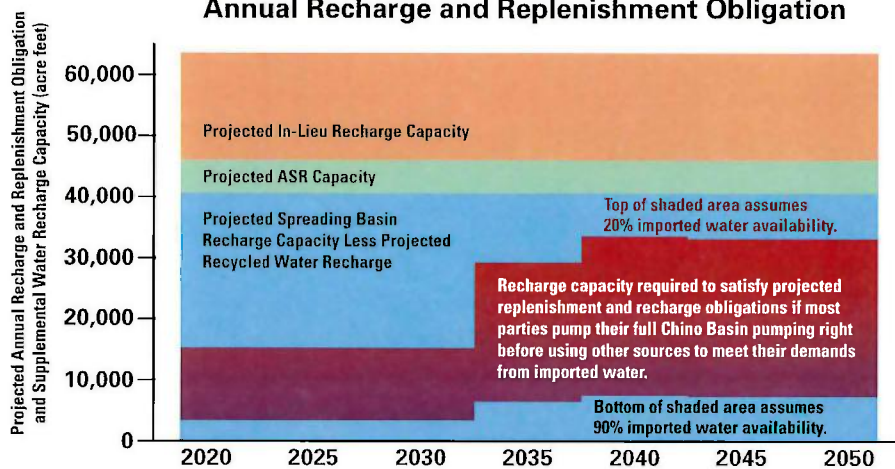

The Recharge Investigations and Project Committee met monthly this year, and Watermaster and the IEUA made progress on implementing the 2013 RMPU projects.

- Design Phase Underway on Four Recharge Projects.** As of June 2018, four of the 2013 RMPU Projects reached the final design phase (completed the 50% design plans and specifications): 23a Project (Wineville, Jurupa, and RP3 Basins), Montclair Basins, Lower Day Basin, and Victoria Basin.
- Construction of the San Sevaine Basin Improvements Began.** Work started in September 2017 and is expected to finish in 2019. Key construction activities so far include installation of the piping connecting Basins 1, 2, and 3 to the recycled water line and San Sevaine 5, and installation of a monitoring well. San Sevaine Basin improvements received two grants totaling \$1.125 million: \$750,000 from the Department of Water Resources, and \$375,000 from the US Bureau of Reclamation. The remaining capital cost is covered by State financing, including a loan from the Clean Water State Revolving Fund, and a \$2.5 million forgiveness grant.
- 2018 RMPU Update.** Watermaster is required to update the Recharge Master Plan no less frequently than every five years, and a new update began this year. Watermaster began developing the 2018 RMPU through a stakeholder process with monthly Steering Committee meetings beginning in February 2018. At these meetings, the important assumptions and interim work products of the RMPU were presented and they remain available on Watermaster’s website. This fiscal year, staff refined the budget and schedule to complete and file the 2018 RMPU with the Court as required by October 2018.

Trenching for pipelines to connect recharge basins.

Supplemental Recharge Capacity Exceeds the Annual Recharge and Replenishment Obligation

Recharge Capacity (the blue, green, and orange bars) comfortably exceeds the amount needed to satisfy projected replenishment and recharge obligation (the area between the purple and red shaded area). The additional capacity is designed to accept large amounts of water during infrequent wet periods to make up for decreased recharge in dry years.

ACHIEVING MAXIMUM BENEFITS FROM THE B WATER SUPPLY DEPENDS ON MONITORING P

Watermaster's wide-ranging water management programs depend on an extensive monitoring program. Data from the monitoring programs are used to help design water quality, supply, and management programs; manage ground levels; and test the outcomes of these programs.

PRESERVATION OF MONITORING WELLS IS INCREASINGLY IMPORTANT

Over time, large agricultural areas within the Basin are converting to new housing and businesses. As a result, many wells that were a part of the Basin's monitoring network are no longer available. Watermaster has become more active in working with the cities and developers to preserve and prevent the destruction of monitoring wells.

35 LOCATIONS FOR SURFACE WATER MONITORING.

Surface water is monitored as it is delivered to recharge basins. Monitoring at in-stream sites also helps to characterize interactions with groundwater along the Santa Ana River.

1,300 WELLS FOR GROUNDWATER LEVEL MONITORING.

About 1,300 wells are monitored to track groundwater levels across the Chino Basin.

190 SITES FOR GROUND-LEVEL MONITORING.

The data are used to assess the effectiveness of management programs and to prevent future subsidence and fissuring.

519 WELLS FOR GROUNDWATER PRODUCTION MONITORING.

Nearly all active groundwater production wells are metered to measure groundwater production.

1,400 WELLS FOR GROUNDWATER QUALITY MONITORING.

Watermaster measures water quality at private and monitoring wells, and collects water quality data from well owners performing their own sampling.

251 SAMPLES FOR GROUNDWATER RECHARGE

MONITORING. Watermaster measures and records recharge volumes, collects stormwater quality samples, and samples downgradient of the basins from sampling wells.

90 YEARS OF PRADO BASIN HABITAT SUSTAINABILITY

MONITORING DATA. This two-year-old monitoring program uses both new and historical data—including aerial photos dating back to the 1930s. See page 5 for more information.

BASIN PROGRAMS

Recycled water pipes and valves being installed to deliver recharge water to San Sevaine Basin.

TESTING MORE EFFICIENT WATER-LEVEL MONITORING EQUIPMENT FOR WELLS

This year, Watermaster initiated a changeover of equipment in wells with transducers. The new equipment has proven to be more reliable in dynamic conditions. Less troubleshooting in the field will increase the efficiency, productivity, and accuracy of Watermaster’s data gathering.

MAXIMUM BENEFIT SALINITY MANAGEMENT PROGRAM DEPENDS ON MONITORING

The Maximum Benefit Salinity Management Program is a regulatory program designed by Watermaster and approved by the Regional Board. Its implementation has enabled development of a large program for recycled water reuse, stormwater recharge, and supplemental water recharge, as well as expansion of groundwater desalting to achieve hydraulic control. These actions provide hundreds of millions of dollars in benefits, including: protection of water quality of the Santa Ana River, improved water quality, and improved local supply reliability. In 2017–2018, the Chino Basin Maximum Benefit Annual Report was prepared and submitted to the Regional Board to show that Watermaster’s Optimum Basin Management Program continues to provide maximum benefit to the people of the State.

PETITIONED REGIONAL BOARD TO MODIFY COMPLIANCE METRIC TO ACCOUNT FOR DROUGHT CONDITIONS

Watermaster and the IEUA petitioned the Regional Board to consider modifying the total dissolved solids (TDS) compliance metric for recycled water to a longer-term averaging period so that short-term permit violations do not occur during drought conditions when the TDS concentration of imported water supplies increases. The Regional Board agreed that an evaluation of the compliance metric is warranted and directed Watermaster and the IEUA to develop a technical scope of work to support the adoption of a longer-term averaging period.

Watermaster and the IEUA began implementing the scope of work in September 2017. The technical work is scheduled to be completed in April 2019 and a new compliance metric approved by December 2019.

PROGRESS ON CONSTRUCTION OF THREE FINAL WELLS REQUIRED TO MEET MAXIMUM BENEFIT REQUIREMENTS

Two of the three CDA desalter wells needed to ensure adequate capacity to meet the requirements of the Maximum Benefit Program and for remediation of the South Archibald Plume are expected to be complete during July 2018 and start production soon after. The overall project is anticipated to be operational by early 2020.

ALTHOUGH FULL HYDRAULIC CONTROL HAS BEEN ACHIEVED, AGRICULTURAL GROUNDWATER PRODUCTION IN THE SOUTHERN PART OF THE BASIN IS EXPECTED TO CONTINUE TO DECLINE, NECESSITATING FUTURE EXPANSION OF THE DESALTERS TO SUSTAIN HYDRAULIC CONTROL.

WIDE-RANGING PROGRAMS TO ENSURE SUST

INCORPORATING SUSTAINABLE GROUNDWATER MANAGEMENT ACT (SGMA) REQUIREMENTS

As an adjudicated basin, Chino Basin is specifically exempted from most of the requirements of the State's SGMA. Nonetheless, Watermaster strives for its OBMP to emulate the SGMA requirements and is building them into its plan for sustainable management of the Basin.

Working Closely with State Regulators on SGMA. Watermaster provided the Department of Water Resources with its mandated SGMA report in April 2018. Additionally, Watermaster has been an active participant in the development of the State's regulations and best management practices as they relate to SGMA, participating in public meetings and providing comments.

Watermaster Continues to Collaborate on SGMA Groundwater Management of Fringe Areas.

- Through close collaboration with partner agencies, all fringe areas within the Basin now have Groundwater Sustainability Agencies.
- CBWM is also working with other adjudicated groundwater basins to develop an approach to simplify compliance regarding fringe areas.
- As part of Watermaster's collaboration with other adjudicated basins to search for an efficient and simplified solution for fringe area compliance, CBWM joined the California Groundwater Coalition (CGC). Membership in the CGC will allow Watermaster to access a broader set of resources and tools to continue the dialogue and propose new solutions.

New Basin Reprioritization Under SGMA.

In May 2018, the Department of Water Resources issued a new draft Basin Reprioritization. This new guideline labeled the Chino Basin (both the adjudicated and un-adjudicated areas) as a very low priority. If ratified, this reprioritization will exempt the fringe areas of the Chino Basin from the requirement to develop Groundwater Sustainability Plans by 2022.

Standing (from l to r): Peter Kavounas (General Manager); Mark Wildermuth (Engineering Consultant); Directors Robert Bowcock, Paul Hofer, Eunice Ulloa, Don Galleano, Steve Elie, Gino Filippi; and Scott Slater (General Counsel). Seated (from l to r): Directors Jeff Pierson (Vice-Chair) Bob DiPrimio (Chair), and Bob Kuhn (Secretary/Treasurer).

AINABLE GROUNDWATER MANAGEMENT

WATERMASTER IMPROVES WATER ACCOUNTING BY APPLYING EVAPORATIVE LOSSES TO ALL SUPPLEMENTAL WATER

Following a technical study and collaborative process with the parties, CBWM adopted an amendment to the Rules and Regulations to account for evaporative losses to all supplemental water delivered to recharge basins, which went into effect on October 1, 2017. The loss rates are 1.5% during the rainy season (November through March) and 4.2% during the dry season (April through October). There are no evaporative losses for aquifer storage and recovery wells, which inject directly into the aquifer and are never exposed to the sun.

Going forward, evaporative losses will be re-evaluated periodically as more data becomes available. This refinement in the way Watermaster accounts for the recharge increases accuracy and accounting not only for the Watermaster parties but for outside parties as well.

STUDY OF SYSTEM LOSSES ADDS ANOTHER FACTOR IN UNDERSTANDING OF THE BASIN

At the request of a party to the Judgment, Watermaster initiated a study to measure the impact of system losses—lost water due to leaks within a city’s water infrastructure system. The goal is to estimate how much of that lost water percolates back into the Basin. The work is underway as of the end of the fiscal year.

FACILITATING RESOLUTION OF “EXHIBIT G” PRICING CHALLENGES

The “Exhibit G” water sale did not occur, as the two Pools, Appropriative and Non-Agricultural, did not approve a mutually acceptable price. Watermaster is facilitating possible future “Exhibit G” water sales by working with both Pools to find a solution.

WORKING TO RESOLVE LEGAL CHALLENGES TO SAFE YIELD RESET

On April 28, 2017, the Court issued a final Order resetting the Safe Yield to 135,000 acre-feet per year. The Court’s Order has been appealed by three parties to the Judgment and the three appellants are working toward a resolution of their issues with the three parties that responded to the appeal. Watermaster continues to support the six parties to the appeal as they work toward a resolution to the appeal.

MEMBERSHIP IN THE CALIFORNIA GROUNDWATER COALITION WILL ALLOW WATERMASTER TO ACCESS A BROADER SET OF RESOURCES AND TOOLS TO CONTINUE THE DIALOGUE AND PROPOSE NEW SOLUTIONS THAT WILL ULTIMATELY BENEFIT GROUNDWATER MANAGEMENT IN THE CHINO BASIN AND OTHER PARTS OF THE STATE.

ADVANCEMENTS IN MONITORING ARE ADDRESSING SUBSIDENCE AND FISSURING

Watermaster continues to implement its Subsidence Management Plan (SMP) to minimize or eliminate land subsidence caused by use of the groundwater basin.

The SMP includes a monitoring and reporting program called the Ground-Level Monitoring Program (GLMP). Recent findings of the GLMP are that very little permanent subsidence is occurring in the southern portion of MZ-1, where high rates of land subsidence and ground fissuring occurred in the 1990s. This lack of subsidence indicates the effectiveness of the SMP in this area. However, subsidence in the northwestern portion of MZ-1 has been occurring at gradual and persistent rates for decades, and is now a primary focus of the GLMP.

GROUND-LEVEL MONITORING AND MANAGEMENT HIGHLIGHTS

PROGRAM-WIDE

- Finalized the 2016 Annual Report of the Ground-Level Monitoring Committee, which analyzes and interprets data from the monitoring program and recommends future monitoring and testing.
- Conducted extensive technical monitoring and management activities in the MZ-1 Managed Area.

NORTHWEST MZ-1 AREA

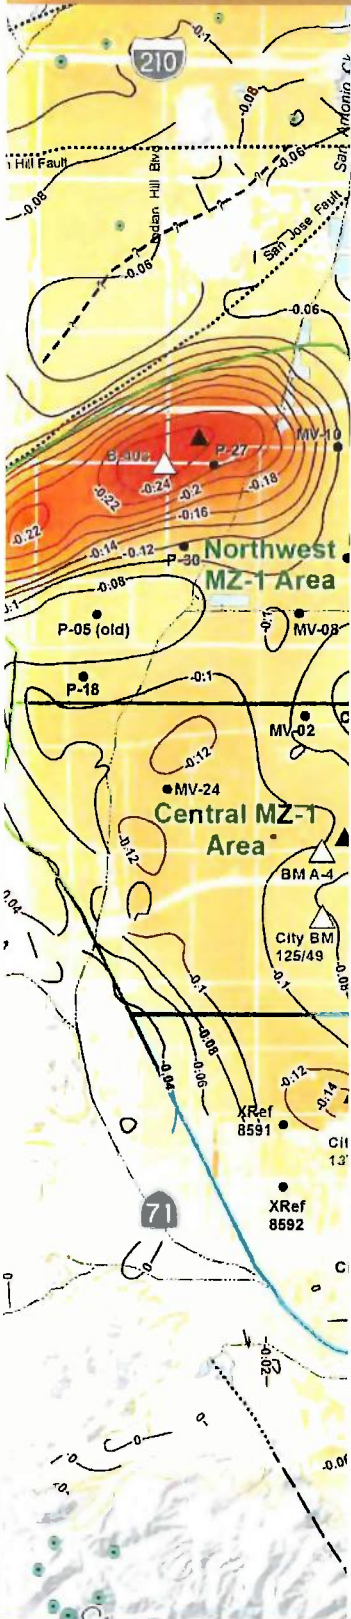

- Developed the initial hydrogeologic conceptual model and the monitoring and testing program for the Northwest MZ-1 Area report, which was finalized in December 2017.
- Completed California Environmental Quality Act (CEQA) analysis toward installing a vertical extensometer in the Northwest MZ-1 Area.
- Started collaboration with the City of Pomona and Monte Vista Water District to enhance groundwater level monitoring in the Northwest MZ-1 Area in order to study ground-level dynamics in the area.
- Conducted proof of concept studies to analyze the use of ultrasound technology to monitor water levels. Although this technology proved ineffective, the study is part of an ongoing effort to identify ways to monitor more efficiently and effectively.
- Conducted modeling of subsidence in Northwest MZ-1 Area to explore the future occurrence of subsidence and to identify potential subsidence mitigation strategies.

RECHARGE EXCEEDS REQUIREMENTS

The total amount of supplemental water recharged in MZ-1 since the Peace II Agreement through June 30, 2018, was approximately 88,711 acre-feet, which is more than the 71,500 acre-feet required by that date (annual minimum requirement of 6,500 acre-feet per year).

ADDITIONAL EXTENSOMETER PLANNED

The Ground-Level Monitoring Committee has recommended installation of a vertical extensometer in the Northwest MZ-1 Area. The extensometer is expected to be completed by early 2019.

ADDITIONAL FOCUS ON TRACKING ALL CONTAMINATION PLUMES

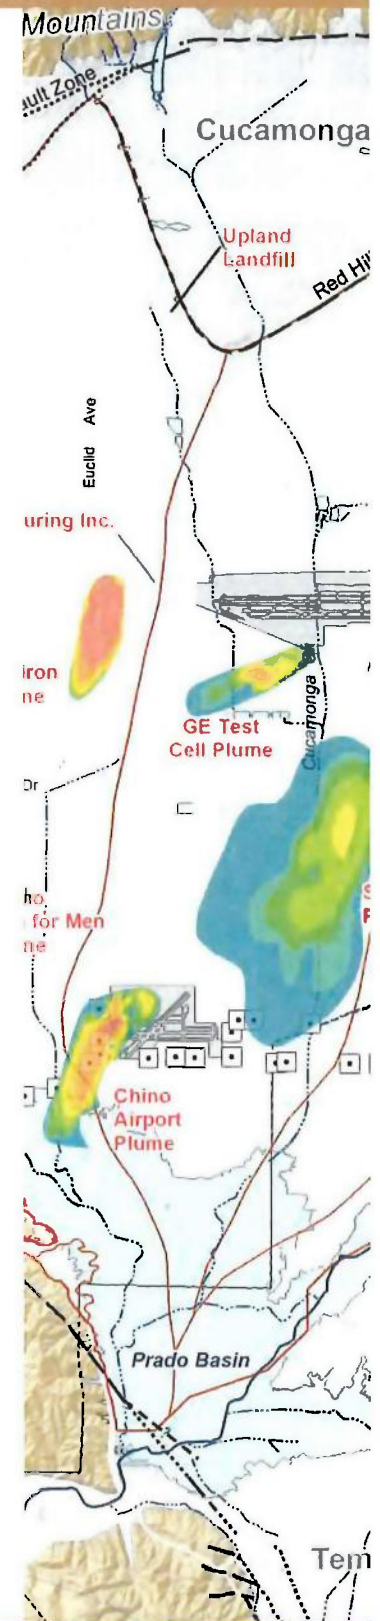

The goal of Watermaster's effort to track the monitoring and remediation of point-source contamination plumes in the Basin is to determine their current and potential future impact on groundwater quality, the parties' municipal water supply wells, and groundwater management activities, such as how groundwater recharge and pumping could impact the movement of plumes.

Recent Focus on Chino Airport and South Archibald Plumes. In the last several years, Watermaster's focus was primarily on tracking the activities of the Chino Airport and South Archibald plumes, both of which impact the operation of the Chino Basin Desalters. Watermaster has also provided input and support to move the remediation efforts forward for these two plumes, and provides detailed updates on the status of remediation activities to the Board twice each year.

Focus on Tracking Monitoring Activities and Status of Remediation. This year, Watermaster re-engaged its efforts to track the current monitoring activities and the status of remediation for the other major point-source contamination plumes across the Basin, including General Electric Test Cell plume, General Electric Flatiron plume, Former Kaiser Steel Mill plume, Milliken Sanitary Landfill plume, and the Stringfellow plumes. For each plume, Watermaster prepared detailed status reports that describe the contaminants of concern, the extent of the contamination, the history of regulatory oversight, and the ongoing monitoring and remediation activities. Going forward, Watermaster will update these status reports annually.

One of the major contaminant plumes is near the Chino Airport.

WATERMASTER GOVERNANCE AND MEMBERSHIP – CALENDAR YEAR 2018

Watermaster Board

Agricultural Pool Representatives

REPRESENTATIVE	MEMBER ENTITY
Jeff Pierson , Vice-Chair	Crops
Alternate: Robert Feenstra	Dairy
Paul Hofer	Crops
Alternate: Ron Pietersma	Dairy

Non-Agricultural Pool Representatives

REPRESENTATIVE	MEMBER ENTITY
Bob Bowcock	CalMat Co.
Alternate: Brian Geye	California Speedway Corporation

Appropriative Pool Representatives

REPRESENTATIVE	MEMBER ENTITY
Eunice Ulloa	City of Chino
Alternate: Tom Haughey	
Robert DiPrimio , Chair	Fontana Water Company
Alternate: Josh Swift	

Municipal Water District Representatives

REPRESENTATIVE	MEMBER ENTITY
Steve Elie	Inland Empire Utilities Agency
Alternate: Kati Parker	
Bob Kuhn , Secretary/Treasurer	
Alternate: David De Jesus	Three Valleys Municipal Water District
Don Galleano	Western Municipal Water District
Alternate: Robert Stockton	

Minor Representative

REPRESENTATIVE	MEMBER ENTITY
Gino L. Filippi	City of Upland
Alternate: Manny Martinez	Monte Vista Water District

Staff

Peter Kavounas , PE	General Manager
Joseph Joswiak , MBA	Chief Financial Officer
Anna Nelson , CAP-OM-TA	Executive Svcs. Director/Board Clerk
Edgar Tellez Foster , PhD	Sr. Environmental Engineer
Frank Yoo	Water Resources Senior Associate
Justin Nakano , MPA	Water Resources Senior Associate
Janine Wilson , CAP-OM	Senior Accountant
Camille Gregory	Administrative Assistant
David Huynh (Oct - Dec)	Field Operations Specialist
Alonso Jurado (Oct - Dec)	Field Operations Specialist
Rick Zapien (Jan - Jul)	Sr. Field Operations Specialist

Advisory Committee

Agricultural Pool Representatives

REPRESENTATIVE	MEMBER ENTITY
Ron LaBrucherie, Jr.	Crops
Jeff Pierson , Chair	Crops
Nathan deBoom	Dairy
Geoffrey Vanden Heuvel	Dairy
Robert Feenstra	Dairy
John Huitsing	Dairy
Alternates to any Ag Pool Seat: Henry DeHaan , Ron Pietersma	
Bob Page	County of San Bernardino
Carol Boyd	State of California-CIM
Lawrence Dimock	State of California-CIM
Pete Hall	State of California-CIM

Non-Agricultural Pool Representatives

REPRESENTATIVE	MEMBER ENTITY
Brian Geye , 2nd Vice-Chair	California Speedway Corporation
Alternate: Bob Bowcock	CalMat Co.
Ramsey Haddad	California Steel Industries, Inc.
Alternate: Kathleen Brundage	
Tom O'Neill	City of Ontario (Non-Ag)
Alternate: Michael Sigsbee	

Appropriative Pool Representatives

REPRESENTATIVE	MEMBER ENTITY
Dave Crosley	City of Chino
Alternates: Jose Alire , Amanda Coker , Landon Kern , Jesus Plasencia	
Ron Craig	City of Chino Hills
Alternate: Nadeem Majaj	
Marty Zvirbulis	Cucamonga Valley Water District
Alternates: John Bosler , Eduardo Espinoza	
Eric Tarango	Fontana Union Water Company
Alternates: Josh Swift , Seth Zielke	
Cris Fealy	Fontana Water Company
Alternate: Seth Zielke	
Todd Corbin , Vice-Chair	Jurupa Community Services District
Alternate: Steven Popelar	
Van Jew	Monte Vista Irrigation Company ^a
Alternate: Mark Kinsey	
Van Jew	Monte Vista Water District
Alternate: Mark Kinsey	
Scott Burton	City of Ontario
Alternates: Katie Gienger , Courtney Jones (Aug - Dec)	
Darron Poulsen	City of Pomona
Alternate: Raul Garibay	
Teri Layton	San Antonio Water Company ^a
Alternates: Tommy Hudspeth (Jan - Sep), Brian Lee (Oct - Dec)	
Rosemary Hoerning	City of Upland
Alternate: Bill Manis (Jan - Sep), Jeannette Vagnozzi (Oct - Dec)	

WATERMASTER INCLUDES REPRESENTATION OF ALL KEY STAKEHOLDER GROUPS

To draw together in a single organization all the diverse interests in the Basin, a governing structure was formed that represents all stakeholder groups, including a Board, Advisory Committee, and three Producer Pool Committees: Agricultural, Non-Agricultural, and Appropriative.

Agricultural Pool Committee

<i>REPRESENTATIVE</i>	<i>MEMBER ENTITY</i>
Ron LaBrucherie, Jr.	Crops
Jeff Pierson, Vice-Chair	Crops
Nathan deBoom	Dairy
Robert Feenstra, Chair	Dairy
John Huitsing	Dairy
Henry DeHaan	Dairy
Ron Pietersma	Dairy
Geoffrey Vanden Heuvel	Dairy
Bob Page	County of San Bernardino
Alternate: Andrew Silva	
Carol Boyd	State of California-CIM
Pete Hall	State of California-CIM
Lawrence Dimock	State of California-CIM
Alternates to any State of California Seat:	
Diana Frederick	
Julie Cavender	
Marilyn Levin	
Noah Golden-Krasner	

Non-Agricultural Pool Committee

<i>REPRESENTATIVE</i>	<i>MEMBER ENTITY</i>
Richard Zuniga (Jan - Oct)	Ameron International Corporation
David Penrice	Aqua Capital Management, LP
—	CCG Ontario, LLC
Brian Geye, Chair	California Speedway Corporation
Alternate: Ray Wilkings	
Ramsey Haddad	California Steel Industries, Inc.
Alternate: Kathleen Brundage	
Bob Bowcock, Vice-Chair	CalMat Co.

**COURT HEARINGS AND ORDERS
FISCAL YEAR 2017-18**

During the fiscal year 2017-18, several hearings were held relating to administration of the Judgment and implementation of the Optimum Basin Management Program (OBMP). Hearings and orders were as follows:

Hearing Date	Primary Subject Matter
January 12, 2018	• Order re Request for Court to Amend the Annual Reporting Schedule for the Ground-Level Monitoring Committee
January 12, 2018	• Hearing re Request for Court to Amend the Annual Reporting Schedule for the Ground-Level Monitoring Committee
December 15, 2017	• Order re Watermaster's Request for the Court to: (1) Approve the Interventions of CalMat Co. and NCL Co., LLC into the Appropriate Pool; and, (2) Receive and File the 39 th Annual Report, the 2016 Annual Report of the Ground-Level Monitoring Committee, and the Semi-Annual OBMP Status Reports
December 15, 2017	• Hearing re Watermaster's Request for the Court to: (1) Approve the Interventions of CalMat Co. and NCL Co., LLC into the Appropriate Pool; and, (2) Receive and File the 39 th Annual Report, the 2016 Annual Report of the Ground-Level Monitoring Committee, and the Semi-Annual OBMP Status Reports

**RESOLUTIONS
FISCAL YEAR 2017-18**

Resolution	Adopted	Summary of Resolution
2018-03	June 28, 2018	<p><i>Adoption of the VantageCare Retirement Health Savings (RHS) Program</i></p> <ul style="list-style-type: none"> • The Employer hereby adopts the ICMA Retirement Corporation's VantageCare Retirement Health Savings Program ("Program") through the Employer's integral part trust ("Trust") and the Employer's welfare benefits plan ("Plan"); and • The assets of the Plan shall be held in trust, with the following position within the Employer, Chief Financial Officer of the Watermaster (the "CFO"), serving as trustee for the exclusive benefit of Plan participants and their survivors, and the assets of the Plan shall not be diverted to any other purpose prior to the satisfaction of all liabilities of the Plan. The Employer has executed the Declaration of Trust of the Chino Basin Watermaster Integral Part Trust in the form of the sample trust made available by the ICMA Retirement Corporation; and • The CFO of the Watermaster shall be the coordinator and contact for the Program and shall receive necessary reports, notices, etc.; and • The CFO of the Watermaster, on behalf of the Watermaster, may delegate any administrative duties relating to the Retirement Health Savings Program to appropriate employees and others; and shall execute all necessary agreements and other documents and take all actions incidental to the administration of the Retirement Health Savings Program.
2018-02	January 25, 2018	<p><i>Authorizing Investment of Monies in the Local Agency Investment Fund</i></p> <ul style="list-style-type: none"> • Authorize the deposit and withdrawal of Chino Basin Watermaster monies in the Local Agency Investment Fund in the State Treasury in accordance with the provisions of Section 16429.1 of the Government code for the purpose of investment as stated therein, and verification by the State Treasurer's Office of all banking information provided in that record; and • The following Chino Basin Watermaster officers and designated employees or their successors in office/position shall be authorized to order the deposit or withdrawal of monies in the Local Agency Investment Fund: Board Chair, Board Vice-Chair, Board Secretary/Treasurer, General Manager/Secretary, Assistant General Manager, and Chief Financial Officer.
2018-01	January 25, 2018	<p><i>Establishing a Watermaster Investment Policy</i></p> <ul style="list-style-type: none"> • The authority to invest and reinvest funds of Watermaster is hereby delegated to the Watermaster General Manager (and his/her designees) subject to the provisions of said Investment Policy and the ongoing review and control of Watermaster and the Watermaster Advisory Committee; and • This resolution shall take effect from and after its date of adoption and Resolution 2017-01 is rescinded in its entirety.
2017-07	November 16, 2017	<p><i>Levying Administrative, Replenishment, and Special Project Assessments for Fiscal Year 2017-2018</i></p> <ul style="list-style-type: none"> • The Chino Basin Watermaster levies the respective assessments for each pool effective November 16, 2017 as shown on Exhibit "A" attached hereto; and • That pursuant to the Judgment, each party has thirty (30) days from the date of invoice to remit the amount of payment for assessments due. After that date, interest will accrue on that portion which was due as provided for in Section 55 (c) of the Restated Judgment.

¹ Source: Watermaster Annual Reports and Assessment Packages.

² Fiscal year 83-84 was the first-year that reallocation occurred under the Judgment.

³ During fiscal year 87-88 the Appropriators agree to pay Ag Pool assessments and the reallocation procedure changed by agreement. Effective FY 88-89, the Ag Pool's unused water rights from the prior year are made available for reallocation to the Appropriative Pool in the following year (i.e. 82,800 AF less the total assessable production).

⁴ During fiscal year 99-00 the Peace Agreement is signed. The Appropriators agree to pay the Ag Pool assessments for the life of the Peace Agreement and the reallocation procedure is changed by agreement. The Ag Pool's unused water rights (i.e. 82,800 AF less the total assessable production) are made available for reallocation to the Appropriative Pool in the current year.

⁵ n/a indicates the information is not applicable for the given year.

⁶ When land is converted from agricultural to urban uses, water rights are permanently transferred to the appropriative pool. This column represents the sum of the cumulative transfers that have resulted from land use changes over time. For example, in 85-86 land use conversions resulted in 218 acre-feet of conversions. Thus the total claims for 85-86 were 811: the sum of the conversions from prior years plus the new conversions for 85-86 (811 = 593 + 218).

⁷ After a duplication of conversion areas was identified, Jurupa's Pre-Peace Agreement acres were adjusted to 337.6 acres and the Post-Peace Agreement acres were adjusted to 846.4 acres.

⁸ During fiscal year 99-00 the Peace Agreement is signed and establishes that each year 32,800 acre-feet of Ag Pool rights will be pre-emptively transferred to the Appropriative Pool and the transfer will be distributed proportional to each member's share of the Operating Safe Yield.

⁹ If the total claims to underproduced Ag Pool Safe Yield (C + D) are greater than the water rights available for reallocation (B) then the reallocation is limited to the amount of rights available. The reduction is distributed among the Parties in proportion to their share of the Operating Safe Yield.

¹⁰ For production years 83-84 through 87-88, the allocation was computed in a different manner and so the generalized formula does not apply for these years.

* Total Production adjusted from prior annual reports to include previously omitted production from wells that have become non-active over time.

¹ Includes 3,945 AF of mined water pumped by Edison as agent for IEUA.

² Does not include 7,674.3 AF exchanged with MWDSC.

³ Does not include 6,423.6 AF exchanged with MWDSC.

⁴ Does not include 16,377.1 AF exchanged with MWDSC.

⁵ Does not include 14,929.1 AF exchanged with MWDSC.

⁶ Does not include 12,202.4 AF exchanged with MWDSC.

⁷ Does not include 13,657.3 AF exchanged with MWDSC.

⁸ Does not include 20,194.7 AF exchanged with MWDSC.

⁹ Does not include 4,221.9 AF exchanged with MWDSC.

¹⁰ Does not include 6,167.2 AF exchanged with MWDSC.

¹¹ Does not include 4,275.4 AF exchanged with MWDSC.

¹² Does not include 216.5 AF exchanged with MWDSC.

¹³ Represents total physical production by Pools, not assessed production.

¹⁴ Production by the Chino Basin Desalters is not considered assessable production. Desalter replenishment obligation accounting is shown in the Assessment Package.

¹⁵ Production by DTSC is accounted separately, by agreement, such that the production is not assessed by Watermaster.

¹⁶ Total reflects physical production by pumpers and does not account for any adjustments that are made in the Assessment Packages.

¹⁷ Total Agricultural Pool production revised due to incorrect multiplier used on an Irrigation well meter.

¹ The values reported herein represent the total supplemental water supply used by each Party within its entire service area. Some Parties have service area boundaries which extend outside the adjudicated Chino Basin boundary.

² Recycled water is supplied by IEUA unless stated otherwise.

³ Other groundwater is produced from Cucamonga Basin. Surface water diversions are from Lloyd Michaels, Royer-Nesbit, and Arthur H. Bridge WTPs, and Deer Canyon.

⁴ Other groundwater is produced from Colton/Rialto, Lytle, and "unnamed" Basins. Surface water diversions are from Lytle Creek.

⁵ Other groundwater is produced from Six Basins.

⁶ Other groundwater is produced from Riverside Basin and Temescal.

⁷ Treated water is delivered by West Valley Water District (WVWD), and represents a blend of multiple water sources available to WVWD. MMWC purchased 183 acre-feet of water from WVWD, but that amount is shown as part of WVWD's supply within this table.

⁸ Other groundwater is produced from Arlington and Temescal Basins and a portion of the hydrologic Chino Basin that is outside the adjudicated boundary.

⁹ Imported groundwater is produced from Six Basins and Spadra Basin. Surface water diversions are from San Antonio Creek. Recycled water is served from the Pomona Water Reclamation Plant.

¹⁰ Other groundwater is produced from Six Basins and Cucamonga Basin. Surface water diversions are from San Antonio Creek. Supplemental Supplies shown herein do not include sales to the City of Upland - these supplies are shown as part of Upland's supply within this table.

¹¹ Other groundwater is produced from the portion of the hydrologic Chino Basin that is outside the adjudicated boundary.

¹² Recycled water includes water treated by CIM and reused on location for irrigation purposes, and IEUA recycled water reused by Cal Poly Pomona for farming on CIM property.

¹³ Other groundwater is produced from Six Basins and Cucamonga Basin. Supplemental Supplies shown herein do not include sales to Golden State Water Company (GSWC) - these supplies are shown as part of GSWC's supply within this table.

¹⁴ Other groundwater is produced from Six Basins and Cucamonga Basin.

¹⁵ Other groundwater is produced from Rialto and North Riverside basins. Surface water diversions are from Lytle Creek.

¹The values reported herein are intended to represent the supplemental water supply used by each Party within its entire service area. Some Parties have service area boundaries which extend outside the adjudicated Chino Basin boundary. During the preparation of the FY14/15 Annual Report, it was determined that the collection and reporting of supplemental water supplies has been inconsistent over time, such that some parties reported estimates of water used within the boundary of Chino Basin and others provided the entire service area use, and some agencies varied their reporting methods over time. In many years, the reported data also excluded some Watermaster Parties. And, in some cases, the supplemental supplies included recharge water volumes. The values reported for the noted years are representative of total water consumption by the Chino Basin parties and are not directly comparable to values reported for prior years. Watermaster staff will be working with the Parties to update the historical information for consistency in future annual reports.

² Represents the total groundwater extraction values reported in Appendix H-1.

³ Total does not include cyclic deliveries, water delivered by exchange, or water from direct spreading that was used for replenishment.

**SUMMARY OF STORMWATER, IMPORTED WATER,
AND RECYCLED WATER RECHARGE

p9:

Evaporative Losses will be applied to recharged water from Pump-to-Waste activities beginning in October 2017.
(Evaporative Loss Rates: 1.5% Nov - Mar; 4.2% Apr - Oct)

Other Adj:

- 1) CDA provided 35,464 AF to JCSD for irrigation at Orchard Park.
- 2) Cucamonga Valley Water District received credit of 9,120 AF due to Pump-to-Waste activities. No evaporative losses were applied because recharge occurred before October 2017.
- 3) Santa Ana River Water Company had an over-allotment of 52,585 AF with Jurupa Community Services District.
- 4) Monte Vista Water District received credit of 10,819 AF minus evaporative losses due to Pump-to-Waste activities.
- 5) City of Upland received credit of 245,516 AF minus evaporative losses due to Pump-to-Waste activities.

p10:

- 1) The Restated Judgment allowed an accumulated overdraft of 200,000 AF over 40 years. The total Operating Safe Yield is now 49,834 AF, allocated by percent.
- 2) Due to the ongoing Safe Yield Recalculation process and related questions as to the proper method for allocating Stormwater New Yield, 0 AF will be allocated necessary.
- 3) An adjustment of (573.345) was applied to this year's Golden State Water Company's production right due to two years of under-reporting of production.

p11:

1) In May 2018, the following Appropriators transferred water out of their Excess Carry Over Storage Account to be used toward their future Desalter replenishment obligation: City of Ontario (6,000 AF), City of Pomona (6,000 AF), Jurupa Community Services District (5,000 AF), Cucamonga Valley Water District (5,000 AF), Fontana Union Water Company via CVWD (2,000 AF), City of Chino Hills (2,567 AF), City of Upland (2,500 AF), San Antonio Water Company (1,370 AF), and West End Consolidated Water Company (700 AF).

2) In September 2018, Arrowhead Mtn Spring Water Co transferred 307.930 AF from their Excess Carry Over Storage Account to offset their Production Year 2017/2018 overproduction obligations.

p18:

- 1) Table and content of the original Desalter Replenishment Accounting: WEI, Response to Condition Subsequent Number 7, November 2008.
- 2) Peace II Desalter Expansion expected to increase total desalter production in October 2015.
- 3) 3,956.877 acre-feet + 316.177 acre-feet added as Non-Ag dedicated stored water per Paragraph 31 Settlement Agreements. Per Agreements, the water is deemed to
- 4) The projection of the Desalter Induced Recharge (DIR), previously referred to as the Santa Ana River Underflow New Yield (SARUNY), in the table is shown as zero fr schedule.
- 5) Six years of Desalter tracking (Production Year 2000-2001 through Production Year 2005/2006) may have incorrectly assumed that a significant portion of Desalter pr Production Year 2008/2009.
- 6) The Peace I Agreement terminates in 2030. Per this schedule, the Peace II Desalter expansion would not fully utilize its available 175,000 acre-feet.
- 7) For the first 10 years following the Peace II Agreement (2006/2007 through 2015/2016), the Non-Ag "10% Haircut" water is apportioned among the specific seven mer replenishment. However, to the extent there is no remaining desalter replenishment obligation in any year after applying the offsets set forth in 6.2(a), it will be distributec
- 8) Per the Peace II Agreement, Section 6.2(b)(ii), the residual replenishment assessment is against the Appropriative Pool, pro-rata based on each Producer's combined
- 9) Through production year 2017/2018, the desalter replenishment obligation could be as high as 138,335 AF. Due to the ongoing Safe Yield Recalculation process and desalter replenishment obligation will be recalculated and assessed, if necessary.

P20:

* Fontana Water Company had two Water Transactions on 2/20/2018. Because each of the transaction had a different cost per AF, a blended rate was used for both transactions (see below for blended rate calculation):

From	AF	\$/AF	Total \$
Cucamonga Valley Water District	10,000	\$500.40	\$5,004,000
City of Pomona	2,500	\$550.00	\$1,375,000
	<u>12,500</u>		<u>\$6,379,000</u>

2/20/18 Blended Rate: \$510.32 (\$6,379,000 / 12,500 AF)

1) The Water Transaction between Fontana Water Company and the City of Pomona submitted on 2/20/2018 for the amount of 2,500 AF had been split because the amount purchased exceeds what is required to satisfy overproduction; the 85/15 Rule only applies to the portion that satisfies overproduction per the direction of the Appropriate Pool on November 2, 2011.

Assessment Year 2018-2019 (Production Year 2017-2018)
Assessment Package Notes

Page	Note
pg01	"Agricultural Total Pool Production" includes Voluntary Agreements between Appropriators and Agricultural Pool Parties.
pg04 (a)	Transfers in Column [4E] include the annual transfer of 10% of the Non-Ag Safe Yield to be utilized to offset the overall Desalter Replenishment Obligation in accordance with the Peace II Agreement Section 6.2, and also the Exhibit "G" physical solution
pg04 (b)	Column [4H], "Actual Fiscal Year Production," includes physical production and Assignments between Appropriators and Non-Ag Pool Parties.
pg04 (c)	"Net Over Production" does not include evaporative loss. Additional water will be purchased in order to adequately cover evaporative losses. The rates are 1.5% from November through March, 4.2% from April through October.
pg05 (a)	Hydraulic Control was achieved on February 1, 2016. Pursuant to Paragraph 7.4(b) of the Peace II Agreement, Storage Loss is now calculated at 0.07%.
pg05 (b)	When applicable, column [5C] includes the Exhibit "G" physical solution transfers to the Appropriative Pool.
pg07 (a)	The financial Outstanding Obligations are reconciled on pages 7.1 and 17.1.
pg07 (b)	Fund Balance is maintained on a spreadsheet by Watermaster.
pg07 (c)	Outstanding Obligation is calculated by multiplying Outstanding Obligation (AF) by the current rate, reduced by the Fund Balance.
pg07 (d)	Fund Balance is the money collected by Watermaster, Outstanding Obligation is the money owed by the Parties or credited to the Parties.
pg08	Recharge Debt Project expenses [8O] and Recharge Improvement Project expenses [8P] are each allocated on % OSY, based on the approved budget.
pg09	Other Adjustments include water provided to another Appropriator, pump-to-waste that has been captured in a recharge basin (as verified by IEUA), and other miscellaneous recharge / injection of native water.
pg10 (a)	Stormwater New Yield is allocated to the Appropriators based on their % OSY. Watermaster has completed the process for correction of prior over-allocation that was documented through Condition Subsequent 7.
pg10 (b)	Column [10J], "Actual Fiscal Year Production," includes physical production, Voluntary Agreements, Assignments, and, if applicable, other adjustments. A detailed breakdown can be found on Page 9.1.
pg10 (c)	"Net Over Production" does not include evaporative loss. Additional water will be purchased in order to adequately cover evaporative losses. The rates are 1.5% from November through March, 4.2% from April through October.
pg11 pg12	The Assessment Package database is set up so that all water must go through the Party Annual Accounts on the way to or from ECO Storage Accounts, and through the ECO Storage Accounts on the way to or from Supplemental Storage Accounts.
pg13 (a)	"Re-Operation Offset: Pre-Peace II Desalters" had a starting balance of 225,000.000 AF. The account will need adjustment following the current modeling and Safe Yield Redetermination work (i.e. DIR) and will be adjusted in future Assessment Package.
pg13 (b)	The 29,070 AF correction required by Condition Subsequent 7 has been included in the "Re-Operation Offset: Pre-Peace II Desalters". (See Page 18.1)
pg13 (c)	"Re-Operation Offset: Peace II Expansion" had an original beginning balance of 175,000.000 AF. The "Transfer From" amount includes Expansion production for this year. The table shows information under existing rules.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package Notes

Page	Note
pg13 (d)	There is no loss assessed on the native Basin water allocated to offset Desalter production as a result of Basin Reoperation as approved in the Peace II Agreement.
pg13 (e)	Chino, Ontario, and JCSD Preemptive Replenishment Agreement water is shown. Per the Agreements, no losses are deducted against these accounts.
pg13 (f)	"Non-Ag Dedication" was used in a prior Assessment Package to indicate Non-Ag Pool desalter dedication.
pg14	Transfers in Column [14A] include annual water transfers/leases between Appropriators and/or from Appropriators to Watermaster for replenishment purposes. Also included are the Exhibit "G" physical solution transfers from the Non-Ag Pool when applicable.
pg17 (a)	The financial Outstanding Obligations are reconciled on pages 7.1 and 17.1.
pg17 (b)	Fund Balance is maintained on a spreadsheet by Watermaster.
pg17 (c)	Outstanding Obligation is calculated by multiplying Outstanding Obligation (AF) by the current rate, reduced by the Fund Balance.
pg17 (d)	Fund Balance is the money collected by Watermaster, Outstanding Obligation is the money owed by the Parties or credited to the Parties.
pg21	The column titled "(Over)/Under Production Excluding Water Transfer(s)" excludes Exhibit "G" water sales and water transfers between Appropriators and to Watermaster (if any). ([10B] + [10C] + [10D] + [10E] + [14B] - [10J])
pg22 (a)	The "15% Water Transaction Debits" total is the "Total 15% Credits from all Transaction" from Page 20.1.
pg22 (b)	"Replenishment Obligation" does not include evaporative loss. Additional water will be purchased in order to adequately cover evaporative losses. The rates are 1.5% from November through March, 4.2% from April through October.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 2A AF Production**
Actual fiscal year production by each Party. Copied from [4H].
- 2B Non-Agricultural Pool - AF/Admin**
Production [2A] \times per acre-foot Admin fee.
- 2C Non-Agricultural Pool - AF/OBMP**
Production [2A] \times per acre-foot OBMP fee.
- 2D Replenishment Assessments - AF Exceeding Annual Right**
Over-production for each Party beyond their annual production right. Copied from [4I].
- 2E Replenishment Assessments - Per AF**
Amount overproduced [2D] \times the current replenishment rate.
- 2F CURO Adjustment**
Monetary amount needed (or to be credited) for each Party's Cumulative Unmet Replenishment Obligation (CURO). Calculated on Page 7.1.
- 2G RTS Charges**
Annual Readiness to Serve charges for water purchased in prior years.
- 2H Other Adjustments**
Used as necessary for any other monetary adjustments needed to the Assessment Package.
- 2I Total Assessments Due**
Total fees assessed based on Party production. [2B] + [2C] + [2E] + [2F] + [2G] + [2H].
-
- 3A Physical Production**
Fiscal year physical production by each Party.
- 3B Assignments**
Total of water received from an Appropriator by each Party.
- 3C Other Adjustments**
Any other adjustments that result in off-set of the fiscal year's production.
- 3D Actual FY Production (Assmnt Pkg Column 4H)**
Total adjusted production for the fiscal year. Also known as Assessable Production. [3A] + [3B] + [3C].
-
- 4A Percent of Safe Yield**
The Party's yearly percentage of Safe Yield.
- 4B Carryover Beginning Balance**
The beginning balance in each Annual Account. This number carries forward from the ending balance in the previous period Assessment Package.
- 4C Prior Year Adjustments**
This number reflects the adjusted production rights from a previous Assessment Package, in the event that corrections are needed.
- 4D Assigned Share of Safe Yield (AF)**
The Party's yearly volume of Safe Yield.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 4E Water Transaction Activity**
Total of one-time water transfers between Parties for this period, including the annual transfer of 10 percent of the Non-Ag Safe Yield to be utilized to offset the overall Desalter Replenishment Obligation, as stated in the Peace II Agreement, and Exhibit G.
- 4F Other Adjustments**
This number reflects adjusted production rights, in the event that corrections are needed.
- 4G Annual Production Right**
Current Year Production Right. $[4B] + [4C] + [4D] + [4E] + [4F]$.
- 4H Actual Fiscal Year Production**
Fiscal year production, including Assignments, from CBWM's production system (as verified by each Party on their Water Activity Report). Also known as Assessable Production.
- 4I Net Over Production**
Over-production, if any, for each Party beyond their annual production right. $[4H] - [4G]$, equaling more than zero.
- 4J Under Production Balances - Total Under-Produced**
Production rights $[4G]$ <minus> production $[4H]$, equaling more than zero.
- 4K Under Production Balances - Carryover: Next Year Begin Bal**
Either total under-produced $[4J]$ or share of Safe Yield $[4D]$, whichever is less.
- 4L Under Production Balances - To Excess Carryover Account**
Total under-produced $[4J]$ <minus> Carryover to next year $[4K]$, equaling more than zero.
-
- 5A Local Excess Carry Over Storage Account (ECO) - Beginning Balance**
The beginning balance in each ECO account. This number will carry forward from the ending balance in the previous period Assessment Package.
- 5B Local Excess Carry Over Storage Account (ECO) - 0.07% Storage Loss**
Beginning balance $[5A]$ <times> -0.0007 .
- 5C Local Excess Carry Over Storage Account (ECO) - Transfers To / (From)**
Total of water transferred to and from the Annual Account.
- 5D Local Excess Carry Over Storage Account (ECO) - From Under-Production**
Total of water transferred from the Annual Account due to under production. Copied from $[4L]$.
- 5E Local Excess Carry Over Storage Account (ECO) - Ending Balance**
The current balance in each ECO account. $[5A] + [5B] + [5C] + [5D]$.
- 5F Local Supplemental Storage Account - Beginning Balance**
The beginning balance in each Supplemental Account. This number will carry forward from the ending balance in the previous period Assessment Package.
- 5G Local Supplemental Storage Account - 0.07% Storage Loss**
Beginning balance $[5F]$ <times> -0.0007 .
- 5H Local Supplemental Storage Account - Transfers To / (From)**
Total of water transferred to and from the Annual Account.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 5I Local Supplemental Storage Account - Transfers (To) / From ECO Account**
Total of water transferred to the ECO Account.
- 5J Local Supplemental Storage Account - Ending Balance**
The current balance in each Supplemental Account. [5F] + [5G] + [5H] + [5I].
- 5K Combined - Ending Balance**
The combined amount in all local storage accounts. [5E] + [5J].
-
- 6A Percent of Safe Yield**
The Party's yearly percentage of Operating Safe Yield.
- 6B Assigned Share of Safe Yield (AF)**
The Party's yearly volume of Operating Safe Yield.
- 6C Water Transactions - 10% of Operating Safe Yield ("Haircut")**
Operating Safe Yield [6B] \times -0.1
- 6D Water Transactions - Transfers (To) / From ECO Account**
Total of water transferred between the Annual Account and ECO Account.
- 6E Water Transactions - General Transfers and Exhibit G Water Sales**
Total of water transfers between Parties for this period including Exhibit G Water Sales.
- 6F Water Transactions - Total Water Transactions**
Total water transactions. [6C] + [6D] + [6E]. This column is used to populate [4E].
-
- 8A AF Production and Exchanges**
Total production and exchanges. Copied from [10L].
- 8B Appropriative Pool - AF/Admin**
Production and Exchanges [8A] \times per acre-foot Admin fee.
- 8C Appropriative Pool - AF/OBMP**
Production and Exchanges [8A] \times per acre-foot OBMP fee.
- 8D Ag Pool SY Reallocation - AF Total Reallocation**
Reallocation of Ag Pool Safe Yield. Copied from [10E] and [16G].
- 8E Ag Pool SY Reallocation - AF/Admin**
Party Ag Pool reallocation [8D] \div Total Ag Pool Reallocation [8D Total] \times total dollar amount needed for Ag Pool Administration.
- 8F Ag Pool SY Reallocation - AF/OBMP**
Party Ag Pool reallocation [8D] \div Total Ag Pool Reallocation [8D Total] \times total dollar amount needed for Ag Pool OBMP.
- 8G Replenishment Assessments - AF/15%**
For Parties participating in the 85/15 Rule: Percentage of total 85/15 participant production \times required credit amount. Copied from Page 22.1.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 8H Replenishment Assessments - AF/85%**
For parties participating in the 85/15 Rule: Total volume overproduced [10M] <times> 85% of the replenishment rate.
- 8I Replenishment Assessments - AF/100%**
For parties not participating in the 85/15 Rule: Total volume overproduced [10N] <times> 100% of the replenishment rate.
- 8J 85/15 Water Transaction Activity - 15% Producer Credits**
For parties participating in the 85/15 Rule: Credit amount equals 15% of the cost of the water purchased. Total copied from Page 20.1.
- 8K 85/15 Water Transaction Activity - 15% Pro-rated Debits**
For parties participating in the 85/15 Rule: Percentage of total 85/15 participant production <times> required credit amount. Copied from Page 22.1.
- 8L CURO Adjustment**
Monetary amount needed (or to be credited) for each Party's Cumulative Unmet Replenishment Obligation (CURO). Calculated on Page 17.1.
- 8M ASSESSMENTS DUE - Total Production Based**
Total fees assessed based on Party production. [8B] + [8C] + [8E] + [8F] + [8G] + [8H] + [8I] + [8J] + [8K] + [8L].
- 8N ASSESSMENTS DUE - Pomona Credit**
Debit amount to Pomona <times> -1 <times> percent share of Operating Safe Yield [10A].
- 8O ASSESSMENTS DUE - Recharge Debt Payment**
Total recharge debt payment <times> percent share of Operating Safe Yield [10A].
- 8P ASSESSMENTS DUE - Recharge Improvement Project**
Total Recharge Improvement Project <times> Percent Share of Operating Safe Yield [10A].
- 8Q ASSESSMENTS DUE - RTS Charges**
Annual Readiness to Serve charges for water purchased in prior years.
- 8R ASSESSMENTS DUE - Other Adjustments**
Used as necessary for any other monetary adjustments needed to the Assessment Package.
- 8S ASSESSMENTS DUE - Total Due**
Total assessments. [8M] + [8N] + [8O] + [8P] + [8Q] + [8R].
-
- 9A Physical Production**
Fiscal year physical production by each Party.
- 9B Voluntary Agreements (w/ Ag)**
Total of water provided to Agricultural Pool Parties.
- 9C Assignments (w / Non-Ag)**
Total of water provided to Non-Agricultural Pool Parties.
- 9D Other Adjustments**
Total of water received from, or provided to, another Appropriator. Also includes production off-sets.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 9E Actual FY Production (Assmnt Pkg Column 10J)**
Total adjusted production for the fiscal year. $[9A] + [9B] + [9C] + [9D]$.
-
- 10A Percent of Operating Safe Yield**
The Party's yearly percentage of Operating Safe Yield.
- 10B Carryover Beginning Balance**
The beginning balance in each Annual Account. This number carries forward from the ending balance in the previous period Assessment Package.
- 10C Prior Year Adjustments**
This number reflects the adjusted production rights from a previous Assessment Package, in the event that corrections are needed.
- 10D Assigned Share of Operating Safe Yield**
The Party's yearly volume of Operating Safe Yield.
- 10E Net Ag Pool Reallocation**
Reallocation of Ag Pool Safe Yield. Copied from [16G]. The calculations that lead to this are made on Page 16.1.
- 10F Water Transaction Activity**
Water transactions. Copied from [14E]. The calculations that lead to this are made on Page 14.1.
- 10G Stormwater New Yield**
Stormwater New Yield \times percent share of Operating Safe Yield [10A].
- 10H Other Adjustments**
This number reflects adjusted production rights, in the event that corrections are needed.
- 10I Annual Production Right**
Current Year Production Right. $[10B] + [10C] + [10D] + [10E] + [10F] + [10G] + [10H]$.
- 10J Actual Fiscal Year Production**
Fiscal year production, including Assignments and Voluntary Agreements, from CBWM's production system (as verified by each Party on their Water Activity Report). Includes a sub note subtracting Desalter production. See Page 9.1.
- 10K Storage and Recover Program(s)**
Total exchanges for the period (July 1 - June 30) including MZ1 forbearance and DYY deliveries (as reported to CBWM by IEUA and TVMWD and as verified by each Party on their Water Activity Report). A DYY in-lieu "put" is shown as a positive number and a DYY "take" is shown as a negative number.
- 10L Total Production and Exchanges**
Actual production [10J] $+$ Storage and Recovery exchanges [10K]. Includes a sub note subtracting Desalter production. Also known as Assessable Production.
- 10M Net Over-Production - 85/15%**
For 85/15 Rule participants: Production rights [10I] $-$ total production and exchanges [10L], equaling less than zero.
- 10N Net Over-Production - 100%**
For non-85/15 Rule participants: Production rights [10I] $-$ total production and exchanges [10L], equaling less than zero. Includes a sub note subtracting Desalter production.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 10O Under Production Balances - Total Under-Produced**
Production rights [10I] <minus> total production and exchanges [10L], equaling more than zero.
- 10P Under Production Balances - Carryover: Next Year Begin Bal**
Either total under-produced [10O] or share of Operating Safe Yield [10D], whichever is less.
- 10Q Under Production Balances - To Excess Carryover Account**
Total under produced [10O] <minus> Carryover to next year [10P], equaling more than zero.
-
- 11A Excess Carry Over Account (ECO) - Beginning Balance**
The beginning balance in each ECO account. This carries forward from the ending balance in the previous period Assessment Package.
- 11B Excess Carry Over Account (ECO) - 0.07% Storage Loss**
Beginning balance [11A] <times> -0.0007.
- 11C Excess Carry Over Account (ECO) - Transfers To / (From)**
Total of water transferred to and from ECO and the Annual Account.
- 11D Excess Carry Over Account (ECO) - From Supplemental Storage**
Total of water transferred to and from Local Supplemental Storage accounts, as shown on Page 12.1.
- 11E Excess Carry Over Account (ECO) - From Under-Production**
Total of water transferred from the Annual Account due to under production. Copied from [10Q].
- 11F Excess Carry Over Account (ECO) - Ending Balance**
The current balance in each ECO account. [11A] + [11B] + [11C] + [11D] + [11E].
-
- 12A Recharged Recycled Account - Beginning Balance**
The beginning balance in each Recharged Recycled Account. This number carries forward from the ending balance in the previous period Assessment Package.
- 12B Recharged Recycled Account - 0.07% Storage Loss**
Beginning balance [12A] <times> -0.0007.
- 12C Recharged Recycled Account - Current Recharged Recycled**
Total recharged recycled water credited to each Party for the year, as provided by IEUA.
- 12D Recharged Recycled Account - Transfer to ECO Account**
Total of water transferred to the ECO Account, as shown on Page 11.1.
- 12E Recharged Recycled Account - Ending Balance**
The current balance in each Recharged Recycled account. [12A] + [12B] + [12C] + [12D].
- 12F Quantified (Pre 7/1/2000) Account - Beginning Balance**
The beginning balance in each Quantified Supplemental Account. This number carries forward from the ending balance in the previous period Assessment Package.
- 12G Quantified (Pre 7/1/2000) Account - 0.07% Storage Loss**
Beginning balance [12F] <times> -0.0007.
- 12H Quantified (Pre 7/1/2000) Account - Transfers To / (From)**
Total of water transferred to and from the Annual Account.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 12I Quantified (Pre 7/1/2000) Account - Transfer to ECO Account**
Total of water transferred to the ECO Account, as shown on Page 11.1.
- 12J Quantified (Pre 7/1/2000) Account - Ending Balance**
The current balance in each Quantified Supplemental account. [12F] + [12G] + [12H] + [12I].
- 12K New (Post 7/1/2000) Account - Beginning Balance**
The beginning balance in each New Supplemental Account. This number carries forward from the ending balance in the previous period Assessment Package.
- 12L New (Post 7/1/2000) Account - 0.07% Storage Loss**
Beginning balance [12K] \times -0.0007.
- 12M New (Post 7/1/2000) Account - Transfers To / (From)**
Total of water transferred to and from the Annual Account.
- 12N New (Post 7/1/2000) Account - Transfer to ECO Account**
Total of water transferred to the ECO Account, as shown on Page 11.1.
- 12O New (Post 7/1/2000) Account - Ending Balance**
The current balance in each New Supplemental Account. [12K] + [12L] + [12M] + [12N].
- 12P Combined - Ending Balance**
The combined amount in all supplemental storage accounts [12E] + [12J] + [12O].
-
- 13A Desalter Replenishment Account - Preemptive Replenishment (2011) - Beginning Balance**
The beginning balances in each Desalter Preemptive Replenishment account. These numbers carry forward from the ending balances in the previous period Assessment Package.
- 13B Desalter Replenishment Account - Preemptive Replenishment (2011) - Transfers From**
Total of water transferred from each 2011 Desalter Replenishment account.
- 13C Desalter Replenishment Account - Preemptive Replenishment (2011) - Ending Balance**
The current balance in each 2011 Desalter Preemptive Replenishment account. [13A] + [13B].
- 13D Desalter Replenishment Account - Replenishment Purchases and Transfers - Beginning Balance**
The beginning balances in each Desalter Replenishment account post 2011. These numbers carry forward from the ending balances in the previous period Assessment Package.
- 13E Desalter Replenishment Account - Replenishment Purchases and Transfers - Water Purchases**
Total of water purchased by each Desalter Replenishment account.
- 13F Desalter Replenishment Account - Replenishment Purchases and Transfers - Transfers To**
Total of water transferred to each Desalter Replenishment account.
- 13G Desalter Replenishment Account - Replenishment Purchases and Transfers - Transfers From**
Total of water transferred from each Desalter Replenishment account.
- 13H Desalter Replenishment Account - Replenishment Purchases and Transfers - Ending Balance**
The current balances in each Desalter Replenishment account. [13D] + [13E] + [13F] + [13G].
- 13I Desalter Replenishment Account - Overall - Combined Balance**
The combined amount in all Desalter Replenishment accounts. [13C] + [13H].

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 13J Storage and Recovery Account - Beginning Balance**
The beginning balance in the Storage and Recovery (DYY) account. This number carries forward from the ending balance in the previous period Assessment Package.
- 13K Storage and Recovery Account - Storage Loss**
Beginning balance [13J] \times -0.0007
- 13L Storage and Recovery Account - Transfers To**
Total of water transferred to the Storage and Recovery Account ("puts"), and/or to each Storage and Recovery accounts.
- 13M Storage and Recovery Account - Transfers From**
Total of water transferred from the Storage and Recovery Account ("takes").
- 13N Storage and Recovery Account - Ending Balance**
The current balances in each Storage and Recovery accounts. [13J] + [13K] + [13L] + [13M].
-
- 14A Water Transactions - Assigned Rights**
Total of assigned transactions for this period, including annual water transfers/leases between Appropriators and/or from Appropriators to Watermaster for replenishment purposes, and also the Exhibit "G" physical solution transfers from the Non-Ag Pool. Detailed in Pages 20.1 - 20.2.
- 14B Water Transactions - General Transfer**
Total of water transfers between Parties for this period.
- 14C Water Transactions - Transfers (To) / From ECO Account**
Total of water transferred between the Annual Account and ECO Account.
- 14D Water Transactions - Transfers (To) Desalter Replenishment**
Total of water transferred from the ECO Account to the Desalter Replenishment Obligation.
- 14E Water Transactions - Total Water Transactions**
Total water transactions. [14A] + [14B] + [14C] + [14D]. This column is used to populate [10F].
-
- 15A Prior Conversion**
Prior Land Use Conversion in acre-feet.
- 15B Conversion @ 1.3 af/ac - Acres**
Converted parcels in acres at 1.3 acre-feet per acre.
- 15C Conversion @ 1.3 af/ac - Acre-Feet**
Converted parcels in acre-feet at 1.3 acre-feet per acre. [15B] \times 1.3.
- 15D Total Prior to Peace Agrmt**
Total Land Use Conversion in acre-feet prior to the Peace Agreement. [15A] + [15C].
- 15E Conversion @ 2.0 af/ac - Acres**
Converted parcels in acres at 2.0 acre-feet per acre.
- 15F Conversion @ 2.0 af/ac - Acre-Feet**
Converted parcels in acre-feet at 2.0 acre-feet per acre. [15E] \times 2.0.

Assessment Year 2018-2019 (Production Year 2017-2018)

Assessment Package References and Definitions

-
- 15G** **Total Land Use Conversion Acre-Feet**
Total Land Use Conversion in acre-feet for each Party. [15D] + [15F].
-
- 16A** **% Share of Operating Safe Yield**
The Party's yearly percentage of Operating Safe Yield. Copied from [10A].
- 16B** **Reallocation of Agricultural Pool Safe Yield - 32,800 AF Early Transfer**
The Party's percent share of Operating Safe Yield [16A] multiplied by 32,800.
- 16C** **Reallocation of Agricultural Pool Safe Yield - Land Use Conversions**
Total land use conversions claimed on Page 15.1 (as verified by each Party on their Water Activity Report). Copied from [15G].
- 16D** **Reallocation of Agricultural Pool Safe Yield - Potential for Reallocation (AF)**
The Agricultural Pool Reallocation amount potentially available to each Appropriator. [16B] + [16C].
- 16E** **Reallocation of Agricultural Pool Safe Yield - Percent of Ag Pool Reallocation**
Each Party's pro rata share of the potential for reallocation [16D] from the total of [16D].
- 16F** **Reallocation of Agricultural Pool Safe Yield - Difference: Potential vs. Net**
The total over or under Agricultural Pool Reallocation (from Page 1.1) <times> each Party's percent of Ag Pool reallocation [16E].
- 16G** **Reallocation of Agricultural Pool Safe Yield - Net Ag Pool Reallocation**
Net Agricultural Pool Reallocation to each Party. [16D] + [16F]. This column is used to populate [10E].

Board of Directors
Chino Basin Watermaster

Introduction

It is our pleasure to submit the Annual Financial Report for the Chino Basin Watermaster (Watermaster) for the fiscal year ended June 30, 2018, following guidelines set forth by the Governmental Accounting Standards Board. The Watermaster is ultimately responsible for both the accuracy of the data and the completeness and the fairness of presentation, including all disclosures in this financial report. We believe that the data presented is accurate in all material respects. This report is designed in a manner that we believe necessary to enhance your understanding of the Watermaster's financial position and activities.

This report is organized into three sections: (1) Introductory, (2) Financial, and (3) Supplemental. The Introductory section offers general information about the Watermaster's organization and current Watermaster activities and reports on a summary of significant financial results. The Financial section includes the Independent Auditor's Report, Management's Discussion and Analysis of the Watermaster's basic financial statements, and the Watermaster's audited basic financial statements with accompanying Notes. The Supplemental section includes combining revenue and expense schedules.

Generally Accepted Accounting Principles (GAAP) requires that management provide a narrative introduction, overview and analysis to accompany the financial statements in the form of the Management's Discussion and Analysis (MD&A) section. This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The Watermaster's MD&A can be found immediately after the Independent Auditor's Report.

Watermaster Structure and Leadership

The Chino Basin Watermaster ("Watermaster") was established under a judgment entered in Superior Court of the State of California for the County of San Bernardino as a result of Case No. RCVRS 51010 (formerly Case No. SCV 164327) entitled "Chino Basin Municipal Water District v. City of Chino, et al.", signed by the Honorable Judge Howard B. Weiner on January 27, 1978. The effective date of this Judgment for accounting and operations was July 1, 1977. Under the Judgment, three Pool committees were formed: (1) Overlying (Agricultural) Pool which includes the State of California and all producers of water for overlying uses other than industrial or commercial purposes; (2) Overlying (Non-Agricultural) Pool which represents producers of water for overlying industrial or commercial purposes; and (3) Appropriative Pool which represents cities, special districts, other public or private entities and utilities. The three Pools act together to form the "Advisory Committee". Pursuant to the Judgment, the Chino Basin Municipal Water District (CBMWD) five member Board of Directors was initially appointed as "Watermaster". Pursuant to a recommendation of the Advisory Committee, the Honorable J. Michael Gunn appointed a nine-member board as Watermaster on February 19, 1998.

The General Manager administers the day-to-day operations of the Watermaster in accordance with policies and procedures established by the Board of Directors. The Watermaster staff includes nine regular, full-time employees. The Watermaster's three Pools, the Advisory Committee, and the Board of Directors meet each month.

Watermaster Mission and Services

Chino Basin Watermaster's mission is "To manage the Chino Groundwater Basin in the most beneficial manner and to equitably administer and enforce the provisions of the Chino Basin Watermaster Judgment", Case No. RCVRS 51010 (formerly Case No. SCV 164327). The Watermaster provides the Chino Groundwater Basin service area with services which primarily include: accounting for water appropriations and components of acre footage of stored water by agency, purchase of replenishment water, groundwater monitoring and implementation of special projects. The Watermaster is progressively and actively implementing the Basin's Optimum Basin Management Program which includes extensive monitoring, further developing recharge capabilities, storage and recovery projects, managing salt loads, developing new yield such as reclaimed and storm water recharge and continuing to work with other agencies and entities to enhance this significant natural resource.

Watermaster expenditures are allocated to the pools based on the prior year's production volume (or the same percentage used to set the annual assessments).

Economic Condition and Outlook

The Watermaster's office is located in the City of Rancho Cucamonga in San Bernardino County which has experienced tempered economic growth within the region. The economic outlook for the Southern California region is one of cautious growth as the region recovers from a prolonged financial down turn.

Internal Control Structure

Watermaster management is responsible for the establishment and maintenance of the internal control structure that ensures the assets of the Watermaster are protected from loss, theft or misuse. The internal control structure also ensures adequate accounting data that is compiled to allow for the preparation of financial statements in conformity with generally accepted accounting principles. The Watermaster's internal control structure is designed to provide reasonable assurance that these objectives are met. The concept of reasonable assurance recognizes that (1) the cost of a control should not exceed the benefits likely to be derived, and (2) the valuation of costs and benefits requires estimates and judgments by management.

Budgetary Control

The Advisory Committee annually approves, and the Board of Directors annually adopts an operating budget prior to the new fiscal year. The budget authorizes and provides the basis for reporting and control of financial operations and accountability for the Watermaster's enterprise operations. The budget and reporting treatment applied to the Watermaster is consistent with the accrual basis of accounting and the financial statement basis.

Investment Policy

The Board of Directors has adopted an investment policy that conforms to state law, Watermaster's ordinance and resolutions, prudent money management, and the "prudent person" standards. The objectives of the Investment Policy are safety, liquidity and yield. Watermaster funds are invested in the State Treasurer's Local Agency Investment Fund and an institutional checking account.

Water Rates and Watermaster Revenues

The Judgment prescribes Watermaster’s authority and specifies classes of water production assessments to be used to fund certain activities. Those assessment categories are: Administration, Optimum Basin Management Program, Special Projects and Replenishment. Each class of assessment has a prescribed purpose and water production base. Assessment revenue is Watermaster’s principal source of income.

Audit and Financial Reporting

State Law requires the Watermaster to obtain an annual audit of its financial statements by an independent certified public accountant. The accounting firm of Fedak & Brown LLP has conducted the audit of the Watermaster’s financial statements. Their unmodified Independent Auditor’s Report appears in the Financial Section.

Other References

More information is contained in the Management’s Discussion and Analysis and the Notes to the Basic Financial Statements found in the Financial Section of the report.

Acknowledgements

Preparation of this report was accomplished by the combined efforts of Watermaster staff. We appreciate the dedicated efforts and professionalism that these staff members contribute to the Watermaster. We would also like to thank the members of the Board of Directors for their continued support in planning and implementation of the Chino Basin Watermaster’s fiscal policies.

Respectfully submitted,

Report on the Financial Statements

We have audited the accompanying financial statements of Chino Basin Watermaster (Watermaster) as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the Watermaster's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Watermaster, as of June 30, 2018, and the respective changes in financial position, and, where applicable, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Independent Auditor's Report, continued

Emphasis of a Matter

As discussed in note 1 to the financial statements, the Watermaster adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 75 – Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions for the year ended June 30, 2018. Our opinion is not modified with respect to these matters.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 7 through 10, the required supplementary information on pages 37 through 40 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Watermaster's basic financial statements. The introductory section on pages 1 through 3 and combining schedule of revenue, expenses and changes in net position on page 41, is presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining schedule of revenue, expenses and changes in net position are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining schedules of revenue, expenses and changes in net position are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory section has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Independent Auditor's Report, continued

Other Reporting Required by *Government Auditing Standards*

In accordance with Government Auditing Standards, we have also issued our report dated October 25, 2018, on our consideration of the Watermaster's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Watermaster's internal control over financial reporting and compliance. This report can be found on pages 42 and 43.

Chino Basin Watermaster
Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2018 and 2017

The following Management's Discussion and Analysis (MD&A) of activities and financial performance of the Chino Basin Watermaster (Watermaster) provides an introduction to the financial statements of the Watermaster for the fiscal years ended June 30, 2018 (with comparative information for fiscal year ended June 30, 2017). We encourage readers to consider the information presented here with additional information that we have furnished in conjunction with the transmittal letter in the Introductory Section and with the accompanying basic financial statements and related notes, which follow this section.

Financial Highlights

- The Watermaster's net position increased by 12.06% or \$1,051,508, which is comprised of an increase from operations of \$754,759 and a decrease from prior period adjustment in the amount of \$296,749. Please see Note 10 to the basic financial statements for further discussion. In fiscal year 2017, the Watermaster's net position decreased by 10.92% or \$1,068,722 as a result of ongoing operations.
- The Watermaster's total revenues decreased by \$16.67% or \$1,996,332. In fiscal year 2017, the Watermaster's total revenues decreased by \$7.79% or \$1,011,194.
- The Watermaster's total expenses decreased by 29.29% or \$3,819,813. In fiscal year 2017, the Watermaster's total expenses increased by 19.58% or \$2,135,072.

Required Financial Statements

This annual report consists of a series of financial statements. The Statements of Net Position, Statements of Revenues, Expenses, and Changes in Net Position and Statements of Cash Flows provide information about the activities and performance of the Watermaster using accounting methods similar to those used by private sector companies.

The Statements of Net Position includes all of the Watermaster's investments in resources (assets), deferred outflows of resources, obligations to creditors (liabilities), and deferred inflows of resources. It also provides the basis for computing a rate of return, evaluating the capital structure of the Watermaster and assessing the liquidity and financial flexibility of the Watermaster. All of the current year's revenue and expenses are accounted for in the Statements of Revenues, Expenses, and Changes in Net Position. This statement measures the success of the Watermaster's operations over the past year and can be used to determine if the Watermaster has successfully recovered all of its costs through its rates and other charges. This statement can also be used to evaluate profitability and credit worthiness. The final required financial statement is the Statement of Cash Flows, which provides information about the Watermaster's cash receipts and cash payments during the reporting period. The Statement of Cash Flows reports cash receipts, cash payments and net changes in cash resulting from operations, investing, non-capital financing, and capital and related financing activities and provides answers to such questions as where did cash come from, what was cash used for, and what was the change in cash balance during the reporting period.

Financial Analysis of the Watermaster

One of the most important questions asked about the Watermaster's finances is, "Is the Watermaster better off or worse off as a result of this year's activities?" The Statements of Net Position and the Statements of Revenues, Expenses and Changes in Net Position report information about the Watermaster in a way that helps answer this question.

These statements include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the *accrual basis of accounting*, which is similar to the accounting method used by most private sector companies. All of the current year's revenues and expenses are taken into account regardless of when the cash is received or paid.

Chino Basin Watermaster
Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2018 and 2017

Financial Analysis of the Watermaster, continued

These two statements report the Watermaster's *net position* and changes in them. You can think of the Watermaster's net position – the difference between assets, deferred outflow of resources, and liabilities and deferred inflows of resources – as one way to measure the Watermaster's financial health, or *financial position*. Over time, *increases or decreases* in an organization's net position is one indicator of whether its *financial health* is improving or deteriorating. However, one will need to consider other non-financial factors such as changes in economic conditions, population growth, zoning, and new or changed government legislation, such as changes in federal and state water quality standards. Watermaster is funded on a year-by-year basis through a Court-mandated process.

Notes to the Basic Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the basic financial statements. The notes to the basic financial statements can be found on pages 15 through 36.

Statements of Net Position

Condensed Statements of Net Position

	<u>2018</u>	<u>2017</u>	<u>Change</u>
Assets:			
Current assets	\$ 11,736,601	11,758,298	(21,697)
Capital assets, net	43,558	13,997	29,561
Total assets	<u>11,780,159</u>	<u>11,772,295</u>	<u>7,864</u>
Deferred outflows of resources	<u>478,980</u>	<u>451,446</u>	<u>27,534</u>
Liabilities:			
Current liabilities	755,892	1,716,958	(961,065)
Non-current liabilities	1,693,678	1,731,968	(38,291)
Total liabilities	<u>2,449,570</u>	<u>3,448,926</u>	<u>(999,356)</u>
Deferred inflows of resources	<u>42,132</u>	<u>58,886</u>	<u>(16,754)</u>
Net position:			
Net investment in capital assets	43,558	13,997	29,561
Restricted	845	15,000	(14,155)
Unrestricted	<u>9,723,034</u>	<u>8,686,932</u>	<u>1,036,102</u>
Total net position	<u>\$ 9,767,437</u>	<u>8,715,929</u>	<u>1,051,508</u>

As noted earlier, net position may serve over time as a useful indicator of an organization's financial position. In the case of the Watermaster, assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$9,767,437 and \$8,715,929 as of June 30, 2018 and 2017, respectively.

The Watermaster's investment in capital assets is comprised of capital assets (net of accumulated depreciation) less any related debt (where applicable) used to acquire those assets that are still outstanding. The Watermaster uses these capital assets to provide services to customers within the Watermaster's service area; consequently, these assets are not available for future spending.

Chino Basin Watermaster
Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2018 and 2017

Statements of Net Position, continued

At the end of fiscal years 2018 and 2017, the Watermaster reflected a positive balance in its unrestricted net position of \$9,723,034 and \$8,686,932, respectively that may be utilized in future years. (See Note 10)

Statements of Revenues, Expenses and Changes in Net Position

Total expenses	<u>9,221,652</u>	<u>13,041,465</u>	<u>(3,819,813)</u>
Change in net position	<u>754,759</u>	<u>(1,068,722)</u>	<u>1,823,481</u>
Net position, beginning of period, as previously stated	8,715,929	9,784,651	(1,068,722)
Prior period adjustment (note 10)	<u>296,749</u>	<u>-</u>	<u>296,749</u>
Net position, beginning of period, as restated	<u>9,012,678</u>	<u>9,784,651</u>	<u>(771,973)</u>
Net position, end of period	<u>\$ 9,767,437</u>	<u>8,715,929</u>	<u>1,051,508</u>

The statements of revenues, expenses and changes of net position show how the Watermaster's net position changed during the fiscal years.

In fiscal year 2018, Watermaster's net position increased by 12.06% or \$1,051,508, which is comprise of an increase from normal operations of \$754,759 and a decrease from prior period adjustment in the amount of \$296,749. Please see Note 10 to the basic financial statements for further discussion. In fiscal year 2017, the Watermaster's net position decreased by 10.92% or \$1,068,722 as a result of ongoing operations.

A closer examination of the sources of changes in net position reveals that:

In fiscal year 2018, Watermaster's total revenues decreased by 16.67% or \$1,996,332 due primarily to decreases in administrative assessments of \$1,429,767 and replenishment water revenue of \$686,344, which was offset by an increase in investment earnings and other revenues of \$119,779. In fiscal year 2017, Watermaster's total revenues decreased by 7.79% or \$1,011,194 due primarily to a decrease in replenishment water revenue of \$2,065,830, which was offset by an increase in administrative assessments of \$1,013,480.

Chino Basin Watermaster
Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2018 and 2017

Statements of Revenues, Expenses and Changes in Net Position, continued

In fiscal year 2018, Watermaster's total expenses decreased by 29.29% or \$3,819,813, primarily due to a \$3,357,804 decrease in groundwater replenishment costs and other water purchases, and a \$476,700 decrease in optimum basin management plan expenditures. In fiscal year 2017, Watermaster's total expenses increased by 19.58% or \$2,135,072, primarily due to a \$1,580,973 increase in groundwater replenishment costs and other water purchases, and a \$466,810 increase in optimum basin management plan expenditures.

Capital Asset Administration

At the end of fiscal year 2018 and 2017, the Watermaster's investment in capital assets amounted to \$43,558 and \$13,997 (net of accumulated depreciation), respectively. This investment in capital assets includes leasehold improvements, office equipment, and vehicles. The capital assets of the Watermaster are more fully analyzed in Note 3 to the basic financial statements.

Changes in capital assets in 2018 were as follows:

	<u>Balance 2017</u>	<u>Additions</u>	<u>Disposals/ Transfers</u>	<u>Balance 2018</u>
Capital assets:				
Depreciable assets	\$ 270,604	39,618	(35,522)	274,700
Accumulated depreciation	(256,607)	(10,057)	35,522	(231,142)
Total capital assets	<u>\$ 13,997</u>	<u>29,561</u>	<u>-</u>	<u>43,558</u>

Changes in capital assets in 2017 were as follows:

	<u>Balance 2016</u>	<u>Additions</u>	<u>Disposals/ Transfers</u>	<u>Balance 2017</u>
Capital assets:				
Depreciable assets	\$ 265,144	5,460	-	270,604
Accumulated depreciation	(250,766)	(5,841)	-	(256,607)
Total capital assets	<u>\$ 14,378</u>	<u>(381)</u>	<u>-</u>	<u>13,997</u>

Conditions Affecting Current Financial Position

Management is unaware of any conditions which could have a significant impact on the Watermaster's current financial position, net assets or operating results based on past, present and future events.

Requests for Information

This financial report is designed to provide the Watermaster's present users, including funding sources, customers, stakeholders and other interested parties with a general overview of the Watermaster's finances and to demonstrate Watermaster's accountability with an overview of Watermaster's financial operations and financial condition. Should the reader have questions regarding the information included in this report or wish to request additional financial information, please contact the Watermaster's Chief Financial Officer, Joseph S. Joswiak, at Chino Basin Watermaster, 9641 San Bernardino Road, Rancho Cucamonga, CA 91730 or (909) 484-3888.

**Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Year Ended June 30, 2018**

(1) Reporting Entity and Summary of Significant Accounting Policies

A. Organization and Operations of the Reporting Entity

The Chino Basin Watermaster (“Watermaster”) was established under a judgment entered in Superior Court of the State of California for the County of San Bernardino as a result of Case No. RCV 51010 (formerly Case No. SCV 164327) entitled “Chino Basin Municipal Water District v. City of Chino, et al.”, signed by the Honorable Judge Howard B. Weiner on January 27, 1978. The effective date of this Judgment for accounting and operations was July 1, 1977.

Pursuant to the Judgment, the Chino Basin Municipal Water District (CBMWD) five member Board of Directors was initially appointed as “Watermaster”. Their term of appointment as Watermaster was for five years, and the Court, by subsequent orders, provided for successive terms, or for a successor Watermaster. Pursuant to a recommendation of the Advisory Committee, the Honorable J. Michael Gunn appointed a nine-member board as Watermaster on September 28, 2000.

Under the Judgment, three Pool committees were formed: (1) Overlying (Agricultural) Pool which includes the State of California and all producers of water for overlying uses other than industrial or commercial purposes; (2) Overlying (Non-Agricultural) Pool which represents producers of water for overlying industrial or commercial purposes; and (3) Appropriative Pool which represents cities, districts, other public or private entities and utilities. The three Pool committees act together to form the “Advisory Committee.”

The Watermaster provides the Chino Groundwater Basin service area with services which primarily include: accounting for water appropriations and components of acre-footage of stored water by agency, purchase of replenishment water, groundwater monitoring and implementation of special projects.

Watermaster expenditures are allocated to the pools based on the prior year’s production volume (or the same percentage used to set the annual assessments). Allocations for fiscal year 2017-2018 expenses are based on the 2016-2017 production volume.

	Fiscal Year 2018	
Production volume	Acre Feet	Percentage
Appropriative Pool	82,269	72.597%
Agricultural Pool	26,862	23.704%
Non-agricultural Pool	4,192	3.699%
Total production volume	113,323	100.000%

The Agricultural Pool members ratified an agreement with the Appropriative Pool at their meeting of June 16, 1988, wherein the Appropriative Pool assumes Agricultural Pool administrative expenses and special project cost allocations in exchange for an accelerated transfer of unpumped agricultural water to the Appropriative Pool. In addition the Agricultural Pool transferred all pool administrative reserves at June 30, 1988, to the Appropriative Pool effective July 1, 1988.

In July of 2000, the principal parties in the Basin signed an agreement, known as the Peace Agreement, which among other things formalized the commitment of the Basin parties to implement an Optimum Basin Management Program. The Peace Agreement was signed by all of the parties, and the Court has approved the agreement and ordered the Watermaster to proceed in accordance with the terms of the agreement. The Court has approved revisions to the Chino Basin Watermaster Rules and Regulations.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

B. Basis of Accounting and Measurement Focus

The Watermaster reports its activities as an enterprise fund, which is used to account for operations that are financed and operated in a manner similar to a private business enterprise, where the intent of the Watermaster is that the costs of providing water to its service area on a continuing basis be financed or recovered primarily through user charges (water sales), capital grants and similar funding. Revenues and expenses are recognized on the full accrual basis of accounting. Revenues are recognized in the accounting period in which they are earned and expenses are recognized in the period incurred, regardless of when the related cash flows take place.

Operating revenues and expenses, such as replenishment water revenues and groundwater replenishment, result from exchange transactions associated with the principal activity of the Watermaster. Exchange transactions are those in which each party receives and gives up essentially equal values. Management, administration, and depreciation expenses are also considered operating expenses. Other revenues and expenses not included in the above categories are reported as non-operating revenues and expenses.

C. Financial Reporting

The Watermaster's basic financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), as applied to enterprise funds. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. Watermaster solely operates as a special-purpose government which means it is only engaged in business-type activities; accordingly, activities are reported in the Watermaster's proprietary fund.

The Watermaster has adopted the following GASB pronouncements in the current year:

Government Accounting Standards Board Statement No. 75

In June 2015, the GASB issued Statement No. 75 – *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. The objective of this Statement is to improve accounting and financial reporting by state and local governments for postemployment benefits other than pensions (OPEB). It also improves information provided by state and local governmental employers about financial support for OPEB that is provided by other entities.

This Statement replaces the requirements of Statement No. 45 – *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, as amended, and No. 57 – *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*, for OPEB.

Government Accounting Standards Board Statement No. 81

In March 2016, the GASB issued Statement No. 81 – *Irrevocable Split-Interest Agreements*. The objective of this Statement is to improve accounting and financial reporting for irrevocable split-interest agreements by providing recognition and measurement guidance for situations in which a government is a beneficiary of the agreement.

This Statement requires that a government that receives resources pursuant to an irrevocable split-interest agreement recognize assets, liabilities, and deferred inflows of resources at the inception of the agreement. Furthermore, this Statement requires that a government recognize assets representing its beneficial interests in irrevocable split-interest agreements that are administered by a third party, if the government controls the present service capacity of the beneficial interests. This Statement requires that a government recognize revenue when the resources become applicable to the reporting period.

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

C. Financial Reporting

Government Accounting Standards Board Statement No. 85

In March 2017, the GASB issued Statement No. 85 – *Omnibus 2017*. The objective of this Statement is to address practice issues that have been identified during implementation and application of certain GASB Statements. This Statement addresses a variety of topics including issues related to blending component units, goodwill, fair value measurement and application, and postemployment benefits (pensions and other postemployment benefits [OPEB]).

Government Accounting Standards Board Statement No. 86

In May 2017, the GASB issued Statement No. 86 – *Certain Debt Extinguishment Issues*. The primary objective of this Statement is to improve consistency in accounting and financial reporting for in-substance defeasance of debt by providing guidance for transactions in which cash and other monetary assets acquired with only existing resources—resources other than the proceeds of refunding debt—are placed in an irrevocable trust for the sole purpose of extinguishing debt. This Statement also improves accounting and financial reporting for prepaid insurance on debt that is extinguished and notes to financial statements for debt that is defeased in substance.

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

D. Assets, Deferred Outflows, Liabilities, Deferred Inflows and Net Position

1. Use of Estimates

The preparation of the basic financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported changes in net position during the reporting period. Actual results could differ from those estimates.

2. Cash and Cash Equivalents

Substantially all of the Watermaster’s cash is invested in interest-bearing accounts. The Watermaster considers all highly liquid investments with a maturity of three months or less to be cash equivalents.

3. Investments

The Watermaster has adopted an investment policy directing the General Manager to invest and reinvest funds subject to the provisions of Watermaster’s Investment Policy and the ongoing review and control of Watermaster and the Watermaster Advisory Committee in accordance with California Government Code section 53600.

Changes in fair value that occur during a fiscal year are recognized as investment income reported for that fiscal year. Investment income includes interest earnings, changes in fair value, and any gains or losses realized upon the liquidation or sale of investments.

Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

D. Assets, Deferred Outflows, Liabilities, Deferred Inflows and Net Position, continued

4. Fair Value Measurements

The Watermaster categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles.

The hierarchy is based on valuation inputs used to measure the fair value of the asset, as follows:

- **Level 1** – Valuation is based on quoted prices in active markets for identical assets.
- **Level 2** – Valuation is based on directly observable and indirectly observable inputs. These inputs are derived principally from or corroborated by observable market data through correlation or market-corroborated inputs. The concept of market-corroborated inputs incorporates observable market data such as interest rates and yield curves that are observable at commonly quoted intervals.
- **Level 3** – Valuation is based on unobservable inputs where assumptions are made based on factors such as prepayment rates, probability of defaults, loss severity and other assumptions that are internally generated and cannot be observed in the market.

5. Accounts Receivable and Allowance for Uncollectible Accounts

The Watermaster extends credit to customers in the normal course of operations. Management has determined that all amounts are considered collectable. As a result, the Watermaster has not recorded an allowance for doubtful accounts at June 30, 2018.

6. Prepaid Expenses

Certain payments to vendors reflect costs or deposits applicable to future accounting periods and are recorded as prepaid items in the basic financial statements.

7. Capital Assets

Capital assets acquired and/or constructed are capitalized at historical cost. Donated assets are recorded at estimated fair market value at the date of donation. Upon retirement or other disposition of capital assets, the cost and related accumulated depreciation are removed from the respective balances and any gains or losses are recognized.

Depreciation is recorded on a straight-line basis over the estimated useful lives of the assets as follows:

Computer equipment and software	5 years
Office furniture and fixtures	7 years
Leasehold improvements	10 years
Automotive equipment	7 years

8. Deferred Outflows of Resources

Deferred outflows of resources represent the consumption of resources that is applicable to future periods.

9. Deferred Inflows of Resources

Deferred inflows of resources represent the acquisition of resources that is applicable to future periods.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

D. Assets, Deferred Outflows, Liabilities, Deferred Inflows and Net Position, continued

10. Compensated Absences

The Watermaster's policy is to permit eligible employees to accumulate earned vacation up to a total of 320 hours. Employees may receive pay in lieu of using vacation for up to one-half of their annual vacation accrual if: (1) within the prior twelve months, the employee has used vacation in an amount equal to at least half of their annual vacation accrual rate; and (2) the employee has a minimum remaining accrued vacation balance of at least 40 hours. Eligible employees accrue and accumulate sick leave based on Watermaster policy. Twice a year, employees may buy-back accrued sick leave at 50% of their current pay provided that at least 480 hours of accrued sick leave remain after the cash-out. Upon termination of employment, employees are paid all unused vacation, and unused sick time is paid out based on Watermaster policy.

11. Pensions

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Watermaster's California Public Employees' Retirement System (CalPERS) plans (Plans) and addition to/deduction from the Plans' fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

GASB 68 requires that the reported results must pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used:

- Valuation Date: June 30, 2016 and 2015
- Measurement Date: June 30, 2017 and 2016
- Measurement Period: July 1, 2016 to June 30, 2017 and July 1, 2015 to June 30, 2016

12. Postemployment Benefits Other than Pensions (OPEB)

For purposes of measuring the net OPEB Liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Watermaster's Retiree Health Plan and additions to/deductions from the Watermaster's fiduciary net position have been determined on the same basis as they are reported by the Watermaster. For this purpose, the Watermaster recognizes benefit payments when due and payable in accordance with benefit terms. Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

13. Water Production Assessments

Water Production Assessment categories include: Administration, Optimum Basin Management Program, Special Projects, and Water Replenishment. Assessments are billed on a yearly basis.

14. Budgetary Policies

The Watermaster adopts an annual operational budget for planning, control, and evaluation purposes. Budgetary control and evaluation are affected by comparisons of actual revenues and expenses with planned revenues and expenses for the period. Encumbrance accounting is not used to account for commitments related to unperformed contracts for construction and services.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

D. Assets, Deferred Outflows, Liabilities, Deferred Inflows and Net Position, continued

15. Net Position

The financial statements utilize a net position presentation. Net position is categorized as follows:

- Net Investment in Capital Assets Component of Net Position – This component of net position consists of capital assets, net of accumulated depreciation and is reduced by any outstanding debt outstanding against the acquisition, construction or improvement of those assets.
- Restricted Component of Net Position – This component of net position consists of constraints placed on net position use through external constraints imposed by creditors, grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.
- Unrestricted Component of Net Position – This component of net position consists of the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of the net investment in capital assets or restricted component of net position.

(2) Cash and Investments

Cash and investments as of June 30, are classified in the Statement of Net Position as follows:

	2018
Cash and cash equivalents	\$ 11,572,318
Cash and cash equivalents - restricted	845
	\$ 11,573,163

Cash and investments as of June 30, consist of the following:

	2018
Cash on hand	\$ 500
Deposits held in trust with County of San Bernardino	845
Deposits with financial institutions	668,805
Investments	10,903,013
Total cash and investments	\$ 11,573,163

As of June 30, Watermaster's authorized deposits had the following maturities:

	2018
Deposits held with the California Local Agency Investment Fund	193 days

Investments Authorized by the California Government Code and the Watermaster's Investment Policy

The table below identifies the investment types that are authorized by the Watermaster in accordance with the California Government Code (or the Watermaster's investment policy, where more restrictive). The table also identifies certain provisions of the California Government Code (or the Watermaster's investment policy, where more restrictive) that address interest rate risk, credit risk, and concentration of credit risk.

Authorized Investment Type	Maximum Maturity	Maximum Percentage of Portfolio	Maximum Investment in One Issuer
U.S. Treasury Obligations	5 years	None	None
Federal Agency and bank obligations	5 years	None	None
Certificates of Deposits and Time Deposits	5 years	30%	None
Commercial Paper	270 days	10%	10%
Money Market Mutual Funds	90 days	20%	10%
State and Local Bonds, Notes and Warrants	5 years	10%	None
California Local Agency Investment Fund (LAIF)	N/A	None	None
Investment Trust of California (CalTRUST)	N/A	20%	None

Investment in State Investment Pool

The Watermaster is a voluntary participant in the Local Agency Investment Fund (LAIF) that is regulated by the California Government Code under the oversight of the Treasurer of the State of California. The fair value of Watermaster's investment in this pool is reported in the accompanying financial statements at amounts based upon Watermaster's pro-rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis.

Watermaster's deposit and withdrawal restrictions and limitations are as follows:

- Same day transaction processing occurs for orders received before 10:00 a.m.
- Next day transactions processing occurs for orders received after 10:00 a.m.
- Maximum limit of 15 transactions (combination of deposits and withdrawals) per month.
- Minimum transaction amount requirement of \$5,000, in increments of \$1,000 dollars.
- Withdrawals of \$10,000,000 or more require 24 hours advance.
- Prior to funds transfer, an authorized person must call LAIF for verbal authorization.

Custodial Credit Risk

Custodial credit risk for *deposits* is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits, or will not be able to recover collateral securities that are in the possession of an outside party. The California Government Code and the Watermaster's investment policy does not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits, other than the following provision for deposits:

The California Government Code requires that a financial institution secure deposits made by state or local governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law (unless so waived by the governmental unit).

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(2) Cash and Investments, continued

Custodial Credit Risk, continued

The market value of the pledged securities in the collateral pool must equal at least 110% of the total amount deposited by the public agencies. Of the Watermaster's bank balances, up to \$250,000 at June 30, 2018, were federally insured and the remaining balance is collateralized in accordance with the Code; however, the collateralized securities are not held in the Watermaster's name.

The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The Code and the Watermaster's investment policy contain legal and policy requirements that would limit the exposure to custodial credit risk for investments. With respect to investments, custodial credit risk generally applies only to direct investments in marketable securities. Custodial credit risk does not apply to a local government's indirect investment in securities through the use of mutual funds or government investment pools (such as LAIF).

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment the greater the sensitivity of its fair value to changes in market interest rates. One of the ways that the Watermaster manages its exposure to interest rate risk is by purchasing a combination of shorter term and longer term investments and by timing cash flows from maturities so that a portion of the portfolio matures or comes close to maturity evenly over time as necessary to provide for cash flow requirements and liquidity needed for operations.

Credit Risk

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Presented below is the minimum rating required by (where applicable) the California Government Code, the Watermaster's investment policy, or debt agreements, and the actual rating as of year-end for each investment type.

Credit ratings of investments as of June 30, 2018 were as follows:

Investment Type	Total	Minimum Legal Rating	Not Rated
California Local Agency Investment Fund	\$ 10,903,013	N/A	10,903,013

Concentration of Credit Risk

The Watermaster's investment policy contains no limitations on the amounts that can be invested in any one issuer as beyond that stipulated by the California Government Code. There were no investments in any one issuer (other than for U.S. Treasury securities, mutual funds, and external investment pools) that represented 5% or more of total Watermaster's investment at June 30, 2018.

Chino Basin Watermaster
Notes to the Financial Statements, continued

Total capital assets, net	<u>\$ 13,997</u>			<u>43,558</u>

(4) Deferred Outflows of Resources

Changes in deferred outflows of resources for 2018, were as follows:

	<u>Balance 2017</u>	<u>Additions</u>	<u>Amortization</u>	<u>Balance 2018</u>
Deferred outflows of resources				
Deferred pension outflows	\$ 451,446	259,385	(244,070)	466,761
Deferred OPEB outflows	-	14,256	(2,037)	12,219
Total deferred outflows of resources	<u>\$ 451,446</u>	<u>273,641</u>	<u>(246,107)</u>	<u>478,980</u>

(5) Compensated Absences

The changes to compensated absences for 2018 were as follows:

	<u>Balance 2017</u>	<u>Additions</u>	<u>Deletions</u>	<u>Balance 2018</u>	<u>Due Within One Year</u>	<u>Due in more than one year</u>
\$	<u>262,753</u>	<u>151,308</u>	<u>(117,600)</u>	<u>296,461</u>	<u>103,761</u>	<u>192,700</u>

(6) Other Post-Employment Benefits Payable

Plan Description

The Watermaster's defined benefit Other Post-Employment Benefit (OPEB) Plan (Plan) provides OPEB for all permanent and vested full-time employees. The Plan is a single-employer defined benefit OPEB plan administered by the Watermaster. The Watermaster's Board has the authority to establish and amend the benefit terms and financing requirements of the Plan. Watermaster participates in a CalPERS Health Program, a community-rated program for its medical coverage. Watermaster does not have an OPEB trust established and no assets are accumulated in a trust that meets the criteria in paragraph 4 of Statement 75.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(6) Other Post-Employment Benefits Payable, continued

Benefits Provided

The Plan provides a contribution equal to 50% of the retiree only costs for eligible retirees and surviving spouses in receipt of a pension benefit from CalPERS. An employee is eligible for this employer contribution provided they are vested in their CalPERS pension benefit and commence payment of their pension benefit within 120 days of retirement from the Watermaster.

Vesting requires at least 5 years of CalPERS total service. The surviving spouse of an eligible retiree who elected spouse coverage under CalPERS is eligible for the employer contribution upon death of the retiree. Board members during or prior to 1994 are also eligible for a Watermaster contribution at retirement.

Employee Covered by Benefit Terms

At June 30, 2018, the following employees were covered by the benefit terms:

	2018
Active employees	9
Inactive employees or beneficiaries currently receiving benefit payments	5
Total plan membership	14

Total OPEB Liability

The Watermaster's total OPEB liability of \$208,799 was measured as of December 31, 2017, and was determined by an actuarial valuation as of that date.

Actuarial Assumptions and Other Inputs

The total OPEB liability in the June 30, 2018 actuarial valuation, which was measured at December 31, 2017, was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified:

Valuation Date	December 31, 2017
Measurement Date	December 31, 2017
Actuarial cost method	Entry Age Normal cost method in accordance with the requirements of GASB Statement No. 75
Inflation	2.75% per annum
Salary increases	3.0% per annum, in aggregate
Discount rate	3.35%; the discount rate is based on the resulting rate using the average of 3-20 year municipal bond rate indices: S&P Municipal Bond 20 Year High Grade Rate Index, Bond Buyer 20-Bond GO Index, Fidelity GO AA 20 Year Bond Index
Healthcare cost trend rates	6.0% and 6.5% for HMO and PPO, respectively as of June 30, 2018, decreasing 0.5% per year to an ultimate rate of 5.0% for both HMO and PPO as of June 30, 2022 and later years.

Changes in the Net OPEB Liability

Changes in the net OPEB Liability as of June 30, 2018 (measured at December 31, 2017) were as follows:

	Increase (Decrease)		
	Plan		
	Total OPEB Liability (a)	Fiduciary Net Position (b)	Net OPEB Liability/(Asset) (c) = (a) - (b)
Balance at July 1, 2017	\$ 173,730	-	173,730
Changes during the year:			
Service cost	16,048	-	16,048
Interest	7,073	-	7,073
Changes in assumptions	14,256	-	14,256
Contributions - employer	-	2,308	(2,308)
Benefit payments	(2,308)	(2,308)	-
Net changes	35,069	-	35,069
Balance at June 30, 2018	\$ 208,799	-	208,799

Sensitivity of the net OPEB Liability to Changes in the Discount Rate

The following presents the net OPEB liability of the Watermaster, as well as what the Watermaster's net OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower (2.35%) or 1-percentage-point higher (4.35%) than the current discount rate:

	Current		
	Discount Rate - 1%	Discount Rate	Discount Rate + 1%
	2.35%	3.35%	4.35%
Net OPEB Liability	\$ 251,250	208,799	175,561

Sensitivity of the net OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents the net OPEB liability of the Watermaster, as well as what the Watermaster's net OPEB liability would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower or 1-percentage-point higher than the current healthcare cost trend rates:

	1% Decrease	Current	1% Increase
	Healthcare Cost Trend		
	5% HMO/ 5.50% PPO decreasing to 4% HMO/PPO	Rates (6% HMO 6.50% PPO decreasing to 5% HMO/PPO)	7% HMO/ 7.50% PPO decreasing to 6% HMO/PPO)
Net OPEB Liability	\$ 169,024	208,799	261,776

OPEB Expense and Deferred Outflows of Resources Related to OPEB

For the fiscal year ended June 30, 2018, the Watermaster recognized OPEB expense of \$25,158.

At June 30, 2018, the Watermaster reported deferred outflows of resources related to OPEB from the following sources:

Description	Deferred Outflows of Resources
Changes in assumptions	\$ 12,219
Total	\$ <u>12,219</u>

The changes in assumptions are amortized over a seven-year period. Amounts reported as deferred outflows of resources related to OPEB will be recognized in OPEB expense as follows:

Fiscal Year Ending June 30	Deferred Outflows of Resources
2019	2,037
2020	2,037
2021	2,037
2022	2,037
2023	2,037
Thereafter	2,034

Payable to the OPEB Plan

At June 30, 2018, the Watermaster had no outstanding amount of contributions required to the OPEB plan.

(7) Deferred Compensation Savings Plan

For the benefit of its employees, the Watermaster participates in a 457 Deferred Compensation Program (Program). The purpose of this Program is to provide deferred compensation for public employees that elect to participate in the Program. Generally, eligible employees may defer receipt of a portion of their salary until termination, retirement, death or unforeseeable emergency. Until the funds are paid or otherwise made available to the employee, the employee is not obligated to report the deferred salary for income tax purposes.

Federal law requires deferred compensation assets to be held in trust for the exclusive benefit of the participants. Accordingly, the Watermaster is in compliance with this legislation. Therefore, these assets are not the legal property of the Watermaster, and are not subject to claims of the Watermaster's general creditors. Market value of all plan assets held in trust at June 30, 2018 was \$1,242,494.

The Watermaster has implemented GASB Statement No. 32, Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans. Since the Watermaster has little administrative involvement and does not perform the investing function for this plan, the assets and related liabilities are not shown on the statement of net position.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(8) Nonqualified Employee Compensation Plan

Effective June 1, 2015, the Watermaster established a Nonqualified Deferred Compensation Plan (Plan). The purpose of this Plan is to provide deferred compensation for selected public employees to participate in the Plan. The Plan is intended to be an unfunded deferred compensation plan that complies with the requirements of Section 457(f) and 409A of the Internal Revenue Code of 1986. Each Plan Participant shall be entitled to elect to forego all or any portion, as either a dollar amount or a percentage, of the Participant's salary and/or bonus that may become payable by the Employer for a Plan year after all applicable deductions and withholdings. Such election shall be evidenced by a Deferral Agreement.

On June 30, 2018, 2017, 2016 and 2015, Watermaster made an employer contribution of \$32,564, \$25,399, \$18,996 and \$4,750 to the Plan for the benefit of its eligible employee for the 12 consecutive month period from July 1, 2017 to June 30, 2018, July 1, 2016 to June 30, 2017, from July 1, 2015 to June 30, 2016 and from July 1, 2014 to June 30, 2015, respectively.

For each of Watermaster's regular payroll periods beginning on and after July 1, 2015 during the remainder of the Employment Term (from June 30, 2014 up to the expiration date of June 30, 2017), the Watermaster agrees to make an employer contribution to the Plan for the benefit of the eligible employee equal to 8% of the corresponding salary including any incentive compensation paid during that payroll period; provided that the eligible employee is still employed with Watermaster on the payday of that payroll period.

On June 22, 2017, Watermaster agrees to make an employer contribution to the Plan for the benefit of another eligible employee equal to 4% of the corresponding salary for the payroll period effective following July 1, 2017; and shall continue to be provided on each paycheck date thereafter until the Board takes further action.

The balance of Watermaster's Employee Compensation Plan as of June 30, 2018 amounted to \$81,709.

(9) Defined Benefit Pension Plan

Plan Description

All qualified permanent and probationary employees are eligible to participate in the Watermaster's Miscellaneous Employee Pension Plan, cost-sharing multiple employer defined benefit pension plans administered by the California Public Employees' Retirement System (CalPERS). Benefit provisions under the Plan are established by State statute and Watermaster's resolution. CalPERS issues publicly available reports that include a full description of the pension plan regarding benefit provisions, assumptions and membership information that can be found on the CalPERS website.

Benefits provided

CalPERS provides service retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full time employment. Members with five years of total service are eligible to retire at age 50 with statutorily reduced benefits. All members are eligible for non-duty disability benefits after 10 years of service. The death benefit is one of the following: The Basic Death Benefit, the 1957 Survivor Benefit, or the Optional Settlement 2W Death Benefit. The cost of living adjustments for each plan are applied as specified by the Public Employees' Retirement Law.

On September 12, 2012, the California Governor signed the California Public Employees' Pension Reform Act of 2013 (PEPRA) into law. PEPRA took effect January 1, 2013. The new legislation closed the Watermaster's CalPERS 2.5% at 55 Risk Pool Retirement Plan to new employee entrants effective December 31, 2013. All employees hired after January 1, 2013 are eligible for the Watermaster's CalPERS 2.0% at 62 Retirement Plan under PEPRA.

Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(9) Defined Benefit Pension Plan, continued

The provision and benefits for the Plan's miscellaneous pool in effect at June 30, 2017, are summarized as follows:

	<u>Miscellaneous Plan</u>	
	<u>Classic</u>	<u>PEPRA</u>
Hire date	Prior to January 1,	On or after January 1,
Benefit formula	2.5% @ 55	2.0% @ 62
Benefit vesting schedule	5 years of service	
Benefit payments	monthly for life	
Retirement age	50 - 55	52 - 67
Monthly benefits, as a % of eligible compensation	2.0% to 2.5%	1.0% to 2.5%
Required employee contribution rates	8.000%	6.25%
Required employer contribution rates	10.110%	6.533%

Contributions

Section 20814(c) of the California Public Employees' Retirement Law requires that the employer contribution rates, for all public employers, be determined on an annual basis by the actuary and shall be effective on July 1 following notice of the change in rate. Funding contributions for the Plan is determined annually on an actuarial basis as of June 30 by CalPERS. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The Watermaster is required to contribute the difference between the actuarially determined rate and the contribution rate of employees.

For the fiscal year ended June 30, 2018, the contributions recognized as part of pension expense for the Plan was as follows:

	<u>Miscellaneous</u>
Contributions – employer	\$ <u>114,507</u>

Net Pension Liability

As of June 30, 2018, the Watermaster reported net pension liabilities for its proportionate share of the net pension liability of the Plan as follows:

	<u>Miscellaneous</u>
Miscellaneous Plan	\$ <u>1,210,470</u>

The Watermaster's net pension liability for the Plan is measured as the proportionate share of the net pension liability. The net pension liability of the Plan is measured as of June 30, 2017 (the measurement date), and the total pension liability for the Plan used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2016 (the valuation date), rolled forward to June 30, 2017, using standard update procedures.

The Watermaster's proportion of the net pension liability was based on a projection of the Watermaster's long-term share of contributions to the pension plan relative to the projected contributions of all participating employers, actuarially determined.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(9) Defined Benefit Pension Plan, continued

Net Pension Liability, continued

The Watermaster's proportionate share of the pension liability for the Plan's miscellaneous risk pool as of the measurement date June 30, 2017 was as follows:

	<u>Miscellaneous</u>
Proportion – June 30, 2016	0.01206%
Proportion – June 30, 2017	0.01220%
Increase in proportionate share	0.00014%

Deferred Pension Outflows (Inflows) of Resources

For the fiscal year ended June 30, 2018, the Watermaster recognized pension expense of \$286,056.

As of June 30, 2018, the Watermaster reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

Description	2018	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Pension contributions subsequent to the measurement date	\$ 151,517	-
Differences between actual and expected experience	-	(20,416)
Changes in assumptions	175,581	-
Net differences between projected and actual earnings on plan investments	42,987	-
Differences between actual contribution and proportionate share of contribution	-	(21,716)
Net adjustment due to differences in proportions of net pension liability	96,676	-
Total	\$ 466,761	(42,132)

As of June 30, 2018, employer pension contributions reported as deferred outflows of resources related to contributions subsequent to the measurement date of \$151,517 and will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2019.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(9) Defined Benefit Pension Plan, continued

Deferred Pension Outflows (Inflows) of Resources

At June 30, 2018, other amounts reported as deferred outflows and inflows of resources related to the pensions, which will be recognized as pension expense as follows:

<u>Fiscal Year</u> <u>Ending</u> <u>June 30,</u>	<u>Deferred Net</u> <u>Outflows/(Inflows)</u> <u>of Resources</u>
2019	\$ 120,333
2020	137,280
2021	91,200
2022	(33,569)

Actuarial assumptions

The total pension liabilities were determined by actuarial valuations as of June 30, 2016, which were rolled forward to June 30, 2017, using the following actuarial assumptions:

Valuation Date	June 30, 2016 and 2015
Measurement Date	June 30, 2017 and 2016
Actuarial cost method	Entry Age Normal in accordance with the requirements of GASB Statement No. 68

Actuarial assumptions:

Discount rate	7.15% and 7.65%
Inflation rate	2.75%
Salary increases	Varies by Entry Age and Service
Mortality Rate Table*	Derived using CalPERS' Membership Data for all Funds
Period Upon Which Actuarial Experience Survey Assumptions Were Based	1997-2011
Post Retirement Benefit Increase	Contract COLA up to 2.75% until Purchasing Power Protection Allowance Floor on Purchasing Power applies, 2.75% thereafter

* The mortality table used was developed based on CalPERS' specific data. The table includes 20 years of mortality improvements using Society of Actuaries Scale BB. For more details on this table, please refer to the April 2014 experience study report (based on CalPERS demographic data from 1997 to 2011) available online at <https://www.calpers.ca.gov/docs/forms-publications/calpers-experience-study-2014.pdf>.

Discount Rate

The discount rates used in the actuarial valuations to measure the total pension liability as of June 30, 2017, reflect the long-term expected rates of return. The discount rates used to measure the total pension liability as of June 30, 2017, was 7.15%. These differ from the discount rates used as of June 30, 2016, which was 7.65%, due to a decrease in the long-term expected rate of return. The financial reporting discount rates are not adjusted for administrative expenses and are consistent with the funding discount rates at the end of the three-year funding discount rate phase-in period.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(9) Defined Benefit Pension Plan, continued

Discount Rate

To determine whether the municipal bond rate should be used in the calculation of the discount rate, the amortization and smoothing periods adopted by CalPERS in 2013 were used. The crossover test was performed for a miscellaneous agent plan and a safety agent plan selected as being more at risk of failing the crossover test and resulting in a discount rate that would be different from the long-term expected rate of return on pension investments.

Based on the testing of the plans, the tests revealed the assets would not run out. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability for the PERF C.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, CalPERS took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows. Using historical returns of all of the funds' asset classes, expected compound (geometric) returns were calculated over the short term (first 10 years) and the long term (11+ years) using a building-block approach. Using the expected nominal returns for both short term and long term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the rounded single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equal to the single equivalent rate calculated above and adjusted to account for assumed administrative expenses.

The tables below reflect the long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation.

As of June 30, 2018, the target allocation and the long-term expected real rate of return by asset class were as follows:

<u>Asset Class</u>	<u>New Strategic Allocation</u>	<u>Real Return Years 1-10</u>	<u>Real Return Year 11+</u>
Global Equity	47.0%	4.90%	5.38%
Global Fixed Income	19.0%	0.80%	2.27%
Inflation Sensitive	6.0%	0.60%	1.39%
Private Equity	12.0%	6.60%	6.63%
Real Estate	11.0%	2.80%	5.21%
Infrastructure and Forestland	3.0%	3.90%	5.36%
Liquidity	2.0%	-0.40%	-0.90%
Total	<u>100.0%</u>

(9) Defined Benefit Pension Plan, continued

Sensitivity of the Proportionate Share of Net Pension Liability to Changes in the Discount Rate

The following table presents the Watermaster's proportionate share of the net position liability for the Plan, calculated using the discount rate, as well as what the Watermaster's proportional share of the net pension liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate.

As of June 30, 2018, the Watermaster's net pension liability at the current discount rate, using a discount rate that is one-percentage point lower, and using a discount rate that is one-percentage point higher, are as follows:

	Discount Rate - 1% 6.15%	Current Discount Rate 7.15%	Discount Rate + 1% 8.15%
Watermaster's Net Pension Liability	\$ <u>1,879,064</u>	<u>1,210,470</u>	<u>647,485</u>

Payable to the Pension Plan

At June 30, 2018 and 2017, the Watermaster reported no payables for the outstanding amount of contribution to the pension plan.

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in separately issued CalPERS financial reports. See pages 39 through 40 for the Required Supplementary Schedules.

(10) Prior Period Adjustment

In fiscal year 2018, the Watermaster implemented GASB Statement No. 75, to recognize its net OPEB liability. As a result of the implementation, the Watermaster recognized net OPEB liability and remove the net OPEB obligation associated with GASB 45 as of June 30, 2017 in the amount of \$173,730 and \$468,172, respectively. The Watermaster recorded a prior period adjustment to reclassify prior year's employer OPEB Contribution from expense to deferred outflows of resources of \$2,307 at June 30, 2017.

Previously recorded net position of \$8,715,929 has been restated to \$9,012,678 as of June 30, 2017. In addition, the effect of the implementation of GASB 75 is recorded as an adjustment to the beginning net position at July 1, 2017.

The effect of the above changes is summarized as follows:

Net position at June 30, 2017, as previously stated		\$ <u>8,715,929</u>
Net OPEB Liability - GASB 75 Implementation:		
Effect of adjustment to record net OPEB liability	\$ (173,730)	
Effect of adjustment to remove net OPEB liability associated with GASB 45	468,172	
Effect of adjustment to record deferred OPEB outflows	<u>2,307</u>	
Total adjustment to net position		<u>296,749</u>
Net position – beginning, as restated at July 1, 2017		<u>\$ 9,012,678</u>

Chino Basin Watermaster
Notes to the Financial Statements, continued

(11) Net Position

Calculation of net position as of June 30, were as follows:

	2018
Net investment in capital assets:	
Capital assets, net	\$ <u>43,558</u>
Total net investment in capital assets	<u>43,558</u>
Restricted with other governments:	
Restricted - cash and cash equivalents	<u>845</u>
Total restricted with other governments	<u>845</u>
Unrestricted net position:	
Non-spendable net position:	
Prepaid expenses and deposits	<u>43,722</u>
Total non-spendable net position	<u>43,722</u>
Spendable net position are designated as follows:	
Undesignated net position reserve	<u>9,679,312</u>
Total spendable net position	<u>9,679,312</u>
Total unrestricted net position	<u>9,723,034</u>
Total net position	<u>\$ <u>9,767,437</u></u>

(12) Risk Management

The Watermaster is exposed to various risks of loss related to torts, theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Watermaster is insured for a variety of potential exposures. The following is a summary of the insurance policies carried by the Watermaster as of June 30, 2018:

- Commercial General Liability: \$2,000,000 General Aggregate Limit (Other than Products/Completed Operations); \$2,000,000 Products/Completed Operations Aggregate Limit (Any One Person or Organization); \$1,000,000 Personal and Advertising Injury Limit; \$1,000,000 Each Occurrence Limit; \$300,000 Rented To You Limit; \$15,000 Medical Expenses Limit (Any One Person).
- Commercial Excess Liability: Limits of Liability are \$10,000 Retained Limit, \$4,000,000 Each Occurrence, \$4,000,000 General Aggregate Limit, \$4,000,000 Products/Completed Operations to Aggregate.
- Automobile: \$1,000,000 Combined Bodily Injury and Property Damage Single Limit (Each Accident); \$1,000,000 Uninsured Motorists Single Limit. \$1,000 deductible for Comprehensive and \$1,000 deductible for Collision.
- Property: \$525,000 with liability limits varying by property type with a \$1,000 deductible.
- Crime coverage: \$50,000 per claim with a \$1,000 deductible.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(12) Risk Management, continued

- Director & Officers Liability: \$1,000,000 Liability Coverage; Employment Practices Liability: \$1,000,000 Liability Coverage. Director and Officer/Crisis Management: \$25,000 to \$100,000 with liability limits varying by type of coverage.
- Workers' compensation: Total annual premium is \$6,246.

(13) Governmental Accounting Standards Board Statements Issued, Not Yet Effective

The Governmental Accounting Standards Board (GASB) has issued several pronouncements prior to June 30, 2018, that has effective dates that may impact future financial presentations.

Governmental Accounting Standards Board Statement No. 83

In November 2016, the GASB issued Statement No. 83 – *Certain Asset Retirement Obligations*. This Statement (1) addresses accounting and financial reporting for certain asset retirement obligations (AROs), (2) establishes criteria for determining the timing and pattern of recognition of a liability and a corresponding deferred outflow of resources for AROs, (3) requires that recognition occur when the liability is both incurred and reasonably estimable, (4) requires the measurement of an ARO to be based on the best estimate of the current value of outlays expected to be incurred, (5) requires the current value of a government's AROs to be adjusted for the effects of general inflation or deflation at least annually, and (6) and requires disclosure of information about the nature of a government's AROs, the methods and assumptions used for the estimates of the liabilities, and the estimated remaining useful life of the associated tangible capital assets.

The provisions of this Statement are effective for reporting periods beginning after June 15, 2018. The impact of the implementation of this Statement to the Watermaster's financial statements has not been assessed at this time.

Governmental Accounting Standards Board Statement No. 84

In January 2017, the GASB issued Statement No. 84 – *Fiduciary Activities*. The objective of this Statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported.

This Statement establishes criteria for identifying fiduciary activities of all state and local governments. The focus of the criteria generally is on (1) whether a government is controlling the assets of the fiduciary activity and (2) the beneficiaries with whom a fiduciary relationship exists. Separate criteria are included to identify fiduciary component units and postemployment benefit arrangements that are fiduciary activities.

This Statement describes four fiduciary funds that should be reported, if applicable: (1) pension (and other employee benefit) trust funds, (2) investment trust funds, (3) private-purpose trust funds, and (4) custodial funds. Custodial funds generally should report fiduciary activities that are not held in a trust or equivalent arrangement that meets specific criteria.

The provisions of this Statement are effective for reporting periods beginning after December 15, 2018. The impact of the implementation of this Statement to the Watermaster's financial statements has not been assessed at this time.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(13) Governmental Accounting Standards Board Statements Issued, Not Yet Effective, continued

Governmental Accounting Standards Board Statement No. 87

In June 2017, the GASB issued Statement No. 87 – *Leases*. The objective of this Statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for leases by governments. This Statement increases the usefulness of governments' financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about governments' leasing activities.

The provisions of this Statement are effective for reporting periods beginning after December 15, 2019. Earlier application is encouraged. The impact of the implementation of this Statement to the Watermaster's financial statements has not been assessed at this time.

Governmental Accounting Standards Board Statement No. 88

In April 2018, the GASB issued Statement No. 88 – *Certain Disclosures Related to Debt, Including Direct Borrowings and Direct Placements*. The primary objective of this Statement is to improve the information that is disclosed in notes to government financial statements related to debt, including direct borrowings and direct placements. It also clarifies which liabilities governments should include when disclosing information related to debt.

This Statement defines debt for purposes of disclosure in notes to financial statements as a liability that arises from a contractual obligation to pay cash (or other assets that may be used in lieu of cash) in one or more payments to settle an amount that is fixed at the date the contractual obligation is established.

This Statement requires that additional essential information related to debt be disclosed in notes to financial statements, including unused lines of credit; assets pledged as collateral for the debt; and terms specified in debt agreements related to significant events of default with finance-related consequences, significant termination events with finance-related consequences, and significant subjective acceleration clauses.

For notes to financial statements related to debt, this Statement also requires that existing and additional information be provided for direct borrowings and direct placements of debt separately from other debt.

The requirements of this Statement are effective for reporting periods beginning after June 15, 2018. Earlier application is encouraged.

Governmental Accounting Standards Board Statement No. 89

In June 2018, the GASB issued Statement No. 89 – *Accounting for Interest Cost Incurred Before the End of a Construction Period*. The objectives of this Statement are (1) to enhance the relevance and comparability of information about capital assets and the cost of borrowing for a reporting period and (2) to simplify accounting for interest cost incurred before the end of a construction period.

This Statement establishes accounting requirements for interest cost incurred before the end of a construction period. Such interest cost includes all interest that previously was accounted for in accordance with the requirements of paragraphs 5–22 of Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*, which are superseded by this Statement.

Chino Basin Watermaster
Notes to the Financial Statements, continued
For the Fiscal Year Ended June 30, 2018

(13) Governmental Accounting Standards Board Statements Issued, Not Yet Effective, continued

Governmental Accounting Standards Board Statement No. 89, continued

This Statement requires that interest cost incurred before the end of a construction period be recognized as an expense in the period in which the cost is incurred for financial statements prepared using the economic resources measurement focus. As a result, interest cost incurred before the end of a construction period will not be included in the historical cost of a capital asset reported in a business-type activity or enterprise fund.

This Statement also reiterates that in financial statements prepared using the current financial resources measurement focus, interest cost incurred before the end of a construction period should be recognized as an expenditure on a basis consistent with governmental fund accounting principles.

The requirements of this Statement are effective for reporting periods beginning after December 15, 2019. Earlier application is encouraged. The requirements of this Statement should be applied prospectively.

(14) Commitments and Contingencies

Grant Awards

Grant funds received by the Watermaster are subject to audit by the grantor agencies. Such audit could lead to requests for reimbursements to the grantor agencies for expenditures disallowed under terms of the grant. Management of the Watermaster believes that such disallowances, if any, would not be significant.

Litigation

In the ordinary course of operations, the Watermaster is subject to claims and litigation from outside parties. After consultation with legal counsel, the Watermaster believes the ultimate outcome of such matters, if any, will not materially affect its financial condition.

(15) Subsequent Events

Events occurring after June 30, 2018, have been evaluated for possible adjustment to the financial statements or disclosure as of October 25, 2018 which is the date the financial statements were available to be issued.

Plan's Proportionate Share of Aggregate Employer Contributions	\$ 126,549	\$ 118,862	\$ 99,615	\$ 79,352

Notes to the Schedule of the Watermaster's Proportionate Share of Net Pension Liability:

Changes in Benefit Terms – The Watermaster can make changes to their plan provisions, and such changes occur on an ongoing basis. A summary of the plan provisions that were used for the Watermaster's plan can be found in the plan's annual valuation report.

Changes of Assumptions – In fiscal year 2018, the financial reporting discount rate was lowered from 7.65% to 7.15%. In December 2016, the CalPERS Board approved lowering the funding discount rate used from 7.50% to 7.00%, which is to be phased-in over a three-year period (7.50% to 7.375%, 7.375% to 7.25%, and 7.25% to 7.00%) beginning with the June 30, 2016, valuation reports. The funding discount rate includes a 15 basis-point reduction for administrative expenses, and the remaining decrease is consistent with the change in the financial reporting discount rate.

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

Board of Directors
Chino Basin Watermaster
Rancho Cucamonga, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Chino Basin Watermaster (Watermaster) as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprises the Watermaster's basic financial statements, and have issued our report thereon dated October 25, 2018.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Watermaster's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Watermaster's internal control. Accordingly, we do not express an opinion on the effectiveness of the Watermaster's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Watermaster's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audits, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

**Independent Auditor's Report on Internal Controls Over Financial Reporting
And on Compliance and Other Matters Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards*, (continued)**

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Watermaster's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Watermaster's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

CHINO BASIN WATERMASTER

Case No. RCVRS 51010

Chino Basin Municipal Water District v. City of Chino, et al.

PROOF OF SERVICE

I declare that:

I am employed in the County of San Bernardino, California. I am over the age of 18 years and not a party to the within action. My business address is Chino Basin Watermaster, 9641 San Bernardino Road, Rancho Cucamonga, California 91730; telephone (909) 484-3888.

On January 31, 2019 served the following:

1. NOTICE OF MOTION AND MOTION FOR COURT TO RECEIVE AND FILE WATERMASTER'S 41ST ANNUAL REPORT
2. DECLARATON OF BRADLEY J. HERREMA IN SUPPORT OF WATERMASTER'S MOTION FOR COURT TO RECEIVE AND FILE WATERMASTER'S 41ST ANNUAL REPORT
3. [PROPOSED] ORDER RE WATERMASTER'S MOTION FOR COURT TO RECEIVE AND FILE WATERMASTER'S 41ST ANNUAL REPORT

/ X / BY MAIL: in said cause, by placing a true copy thereof enclosed with postage thereon fully prepaid, for delivery by United States Postal Service mail at Rancho Cucamonga, California, addresses as follows:

See attached service list: Mailing List 1

/ ___ / BY PERSONAL SERVICE: I caused such envelope to be delivered by hand to the addressee.

/ ___ / BY FACSIMILE: I transmitted said document by fax transmission from (909) 484-3890 to the fax number(s) indicated. The transmission was reported as complete on the transmission report, which was properly issued by the transmitting fax machine.

/ X / BY ELECTRONIC MAIL: I transmitted notice of availability of electronic documents by electronic transmission to the email address indicated. The transmission was reported as complete on the transmission report, which was properly issued by the transmitting electronic mail device.

I declare under penalty of perjury under the laws of the State of California that the above is true and correct.

Executed on January 31, 2019 in Rancho Cucamonga, California.
