15 CHINO BASIN MUNICIPAL WATER  
16 DISTRICT,

17 Plaintiff,

18 v.

19 CITY OF CHINO, et al.,

20 Defendants.

Case No. RCVRS 51010

ASSIGNED FOR ALL PURPOSES TO  
HONORABLE GILBERT G. OCHOA

**REQUEST FOR JUDICIAL NOTICE IN  
SUPPORT OF CITY OF ONTARIO'S  
COMBINED REPLY TO  
OPPOSITIONS TO MOTION  
CHALLENGING WATERMASTER'S  
NOVEMBER 17, 2022  
ACTIONS/DECISION TO APPROVE  
THE FY 2022/2023 ASSESSMENT  
PACKAGE**

Hearing:

Date: April 5, 2023

Time: 9:00 a.m.

Dept: S24

Judge: Gilbert Ochoa

1 **REQUEST FOR JUDICIAL NOTICE**

2 Pursuant to California Evidence Code sections 452 and 453, City of Ontario (“Ontario”)  
3 respectfully submits this Request for Judicial Notice in Support of its Combined Reply to  
4 Oppositions to Motion Challenging Watermaster’s November 17, 2022 Actions/Decision to  
5 Approve the Fiscal Year 2022/2023 Assessment Package, filed concurrently herewith.

6 This Court may take judicial notice of the pleadings, court minutes, and court transcripts,  
7 as they are records of the Court. (Evid. Code, § 452(d) [allowing courts to judicially notice  
8 “[r]ecords of any court of this state”]; *see also In re Clark*, 5 Cal. 4th 750, 798 fn. 35 (1993) [taking  
9 judicial notice of court’s own records]; *see also Shine v. Williams-Sonoma, Inc.*, 23 Cal. App. 5th  
10 1070, 1076-77 (2018) [the trial court properly exercising discretion to take judicial notice of prior  
11 case’s pleading, settlement agreement, and stipulated judgment of dismissal for purposes of  
12 collateral estoppel].)

13 Further, Evidence Code section 452 allows a court to take judicial notice of certain matters  
14 of law and fact, including the official acts of a public agencies and the state. (Evid. Code, § 452(c)  
15 *Estate of Will*, 170 Cal. App. 4th 902, 908 (2009); *Rodas v. Spiegel*, 87 Cal. App. 4th 513, 518  
16 (2001) [noting that “official act” includes records, reports, and orders of governmental agencies].)  
17 Evidence Code section 452(h) allows a court to take judicial notice of facts and propositions that  
18 are not reasonably subject to dispute and are capable of immediate determination by resort to  
19 sources of reasonably indisputable accuracy.

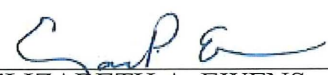

20 Evidence Code section 453 requires a court to take judicial notice of any matter specified  
21 in Evidence Code section 452 if a party requests it, and if it gives the adverse party sufficient notice  
22 of the request and furnishes the court with sufficient information to enable it to take judicial notice  
23 of the matter. Accordingly, Ontario respectfully requests that this Court take judicial notice of the  
24 documents listed below, pursuant to Evidence Code section 452(h) as follows:

25 1. Attached as Exhibit 58 is a true and correct copy of the ORDERS for Watermaster’s  
26 Motion Regarding 2015 Safe Yield Reset Agreement, Amendment of Restated Judgement,  
27 Paragraph 6, dated April 28, 2017.

ORDERS for Watermaster's Motion  
Regarding 2015 Safe Yield Reset  
Agreement, Amendment of Restated  
Judgement, Paragraph 6  
Date: April 28, 2017  
Time: 1:30 PM  
Department: S35

Watermaster's Motion Regarding 2015 Safe Yield Reset Agreement,  
Amendment of Restated Judgment, Paragraph 6, joined by The Chino Basin  
Overlying (Agricultural) Pool Committee and The Inland Empire Utilities Agency  
("IEUA") and opposed by Jurupa Community Services District ("JCSD") and the  
City of Chino ("Chino") is granted in part and denied in part for the reasons set forth  
herein. The court grants the motion with respect to amending the restated judgment  
to reset the Safe Yield of the basin to 135,000 AFY.

However, the court denies all other parts of SYRA including the motions to  
amend the schedule for access to Re-Operation Water and. The court denies the  
motion to institute Safe Storage Management Measures. The court makes additional  
orders regarding priorities and with respect to access for Re-Operation Desalter

1 water as set forth herein.

2       Additionally, the court orders that the Safe Yield reset to 135,000 AFY is an  
3 event that requires a “recalculation” with the definition of Judgment, Exhibit “H”  
4 ¶10.

## 6 **REQUEST FOR JUDICIAL NOTICE**

7       The court grants requests for judicial notice of JCSD as follows:

- 8 1. Restated Judgment (“Judgment”) in case number RCV 51010.
- 9 2. Implementation Plan Optimum Basin Management Program for the Chino Basin  
10 (“OBMP Implementation Plan”).
- 11 3. Chino Basin Watermaster Rules and Regulations (“Rules and Regulations”).
- 12 4. 2015 Safe Yield Reset Agreement (“SYRA”).
- 13 5. Order Concerning Motion for Approval of Peace II Documents (“2007 Order”)  
14 in case number RCV 51010.
- 15 6. 2000 Peace Agreement Chino Basin (“Peace I Agreement” or “Peace I”).
- 16 7. Watermaster Compliance with Condition Subsequent Number Eight: Proposed  
17 Order Submitted Concurrently.
- 18 8. Peace II Agreement: party support for Watermaster’s OBMP Implementation  
19 Plan, Settlement and Release of Claims Regarding Future Desalters (“Peace II  
20 Agreement” or “Peace II”).

## 22 **JOINDERS AND FILINGS**

23 A. Watermaster's motion regarding 2015 Safe Yield Reset Agreement,  
24 amendment of restated Judgment, Paragraph 6.

- 25 1. City of Chino’s objections to declaration of Kavounas submitted with  
26 Watermaster’s Motion regarding 2015 Safe Yield Reset Agreement, Amendment of  
27 Restated Judgment, Paragraph 6  
28 Rulings in separate document.

1           2.     City of Chino's objections to declaration of Wildermuth submitted with  
2 Watermaster's Motion regarding 2015 Safe Yield Reset Agreement, Amendment of  
3 Restated Judgment, Paragraph 6

4           Rulings in separate document.

5 B.     The following parties joined in Watermaster's motion:

- 6           1.     Overlying (Agricultural) Pool  
7           2.     Inland Empire Utilities Agency

8 C.     Oppositions to Watermaster's motion

- 9           1.     City of Chino with supporting documents  
10          a)     Declaration of Robert Shibatani, physical hydrologist  
11          b)     Declaration of David Crosley, civil engineer, water and environmental  
12                 manager for City of Chino  
13          2.     Jurupa Community Services District (JCSD) with supporting documents  
14          a)     Request for judicial notice identified above  
15          b)     Declaration of Todd Corbin, general manager of JCSD  
16          c)     Declaration of Robert Donlan, attorney

17 D.     Watermaster's reply to oppositions to motion regarding 2015 Safe Yield Reset  
18 Agreement, amendment of Restate Judgement, Paragraph 6

- 19          1.     Supplemental declaration of Kavounas  
20          a)     City of Chino's objections Kavounas supplemental declaration in  
21                 support of Watermaster's reply the Chino opposition  
22          b)     Watermaster's Response to City of Chino's objections to supplemental  
23                 declaration of Peter Kavounas in support of Watermaster's reply to  
24                 Chino's Opposition to Motion regarding 2015 Safe Yield Reset  
25                 Agreement, Amendment of Restated Judgment, Paragraph 6

26          I) Motion to strike denied. The court finds that the declaration did not  
27                 raise new issues.

28          II) All objections overruled.

- 1           2.     Supplemental declaration of Wildermuth
- 2           a)     City of Chino's objections to Wildermuth supplemental declaration in
- 3                 support of Watermaster's reply to Chino opposition.
- 4           b)     Watermaster's Response to City of Chino's objections to supplemental
- 5                 declaration of Mark Wildermuth in support of Watermaster's reply to
- 6                 Chino's Opposition to Motion regarding 2015 Safe Yield Reset
- 7                 Agreement, Amendment of Restated Judgment, Paragraph 6.
- 8                 I)     Motion to strike denied. The court finds that the declaration did not
- 9                     raise new issues.
- 10                II)  All objections overruled.
- 11           3.     Declaration of Danielle Maurizio, assistant general manager of Chino
- 12 Basin
- 13           a)     City of Chino's objections to supplemental declaration of Danielle D.
- 14                 Maurizio in support of Watermaster's reply to chino opposition
- 15           b)     Watermaster's Response to City of Chino's objections to supplemental
- 16                 declaration of Danielle E. Maurizio in support of Watermaster's reply to
- 17                 Chino's Opposition to Motion regarding 2015 Safe Yield Reset
- 18                 Agreement, Amendment of Restated Judgment, Paragraph 6
- 19                 I)     Motion to strike denied. The court finds that the declaration did not
- 20                     raise new issues.
- 21                 II)  All objections overruled.
- 22           4.     Joinders in Watermaster's reply to oppositions
- 23           a)     Overlying (Agricultural) Pool
- 24           b)     City of Pomona and (in one pleading document)
- 25                 I)     City of Upland
- 26                 II)  Monte Vista Water District
- 27                 III)  Cucamonga Valley Water District
- 28                 IV)  Fontana Union Water Company

1 E. In an order Dated March 22, 2016, the court served the parties with questions  
2 and a request for further briefing in response to the questions. The responses were  
3 as follows:

- 4 1. Jurupa Community Services District response to Judge Reichert's  
5 request for clarification filed April 1, 2016.
- 6 2. City of Chino's responses to Judge Reichert's questions, filed April 1,  
7 2016.
- 8 3. Watermaster's response to order for additional briefing filed April 1,  
9 2016.
  - 10 a) Chino's reply to Watermaster's response to order for additional briefing,  
11 filed April 11, 2016.
  - 12 b) Jurupa Community Services District's additional response to Judge  
13 Reichert's request for clarification, filed April 11, 2016
- 14 4. Watermaster's further response to order for additional briefing, filed  
15 April 11, 2016

16 F. At the hearing on February 22, 2017, the court ordered that the parties may  
17 file questions regarding the court's tentative draft order, and the court set a briefing  
18 schedule. In response, the court received the following:

- 19 1. Filed March 10, 2017-Chino Basin Watermaster response to February  
20 22, 2017 order
- 21 2. Filed March 10, 2017-City of Chino's response to issue in section II of  
22 Judge Reichert's revised proposed order re SYRA
- 23 3. Filed March 10, 2017-Responding AP members (Monte Vista Water  
24 District, Cucamonga Valley Water District, City of Pomona, and City of Upland)  
25 filed March 10, 2017
- 26 4. Filed March 24, 2017-Chino Basin Watermaster further response to  
27 February 22, 2017 order
- 28 5. Filed March 24, 2017-City of Chino's response to court authorized

1 further briefing re revised tentative order re Watermaster's motion re 2015 Safe Yield  
2 reset Agreement

3 6. Filed March 24, 2017-City of Chino's response to Chino Basin  
4 Watermaster's response to February 22, 2017 order

5 7. Filed March 24, 2017-City of Ontario's response regarding issue for  
6 further briefing

7 8. Filed March 24, 2017-Jurupa Community Services District opposition  
8 to Monte Vista Water District's response to court's February 22, 2017 order re SYRA  
9 and response to questions [joins in the opposition filed by the City of Ontario]

10 9. Filed March 24, 2017-Responding AP members response to both  
11 Watermaster and City of Chino's further briefing re revised tentative order re  
12 Watermaster's motion re 2015 Safe Yield Reset Agreement

13 10. Filed April 4, 2017-errata to City of Chino's response to Chino Basin  
14 Watermaster's response to February 22, 2017 order

15 11. Filed April 7, 2017-Chino Basin Watermaster further response to  
16 February 22, 2017 order

17 12. Filed April 7, 2017-City of Chino's reply to responses of Watermaster,  
18 4AP Members, Ontario and Jurupa

19 13. Filed April 7, 2017-Jurupa Community Services District's limited reply  
20 to City of Chino's response to Chino Basin Watermaster's response to February 22,  
21 2017 order, dated March 24, 2017

22 14. Filed April 7, 2017-Responding AP Members reply to opposition briefs  
23 re revised tentative order re Watermaster's motion re 2015 Safe Yield Reset  
24 Agreement

25 15. Filed April 27, 2017, request by Chino basin desalter authority member  
26 agencies regarding desalter pumping

27

28

1 **SEPTEMBER 23, 2016, HEARING AND ADDITIONAL BRIEFING**

2 After extensive briefing and consideration, on September 23, 2016, the court  
3 held a hearing on the 2015 SYRA and related motions. Before the hearing, the court  
4 had issued a lengthy (over 60 pages) proposed order. At the hearing on September  
5 23, there was extensive oral argument, and the court concluded that some aspects of  
6 the court's proposed order were confusing or erroneous. Therefore, the ordered that  
7 there be even further briefing, and the court ordered additional briefing through  
8 questions by the parties about the proposed order. In its order entitled "Revised  
9 Proposed Order Re SYRA in Response to Questions: Issues for Further Briefing,"  
10 and the current order, the court addressed the parties' questions.

11  
12

13 **I. INTRODUCTION, DEFINITIONS, BACKGROUND**

14 A. The 1978 judgment in *Chino Basin Municipal Water District v. City of Chino* (San  
15 Bernardino Superior Court Case No. 51010) set the Safe Yield of the Chino Basin at  
16 140,000 acre-feet per year (AFY), but reserved continuing jurisdiction to the court to  
17 amend the Judgment, inter alia, to redetermine the Safe Yield after the first 10 years  
18 of operation of the Physical Solution established under the Judgment. The Physical  
19 Solution identified three groups of parties (Pools) with water interests in the Chino  
20 Basin, and set forth their allocations as follows:

| Pool                                 | Allocation   | Acre-feet Yearly Allocation |
|--------------------------------------|--|-----------------------------|
| Overlying<br>(Agricultural)<br>Pool* | 414,000 acre-feet in any five<br>(5) consecutive years [note:<br>414,000 ÷ 5 = 82,800 per<br>year] | 82,800                      |
| Overlying<br>(Non-agricultural)      | 7,366 acre-feet  | 7,366                       |

27  
28

|   |               |                         |         |
|---|---------------|-------------------------|---------|
| 1 | Pool**        |                         |         |
| 2 | Appropriative | 49,834 acre-feet        | 49,834  |
| 3 | Pool***       |                         |         |
| 4 |               | Yearly total allocation | 140,000 |

5 \*The members of this pool included dairy farms.

6 \*\*The members of this pool include businesses which use water in their production  
7 processes.

8 \*\*\*The members of this pool include cities and water companies. They  
9 “appropriate” the water by pumping and selling it.

10 Over the course of the Court-Approved Management Agreements (set forth in  
11 the next section), the court allowed up to 600,000 AF of water to be  
12 produced/pumped out of the Chino Basin without any replenishment obligation.  
13 “While the parties are not limited in the quantities of water they may produce, the  
14 Judgment requires that beyond the permitted Controlled Overdraft comprising an  
15 initial 200,000 AF and an additional 400,000 AF of Re-operation water (Restated  
16 Judgment, Exhibit “T”, ¶¶ 2.(b), 3.(a)), there must be a bucket for bucket  
17 replenishment [and associated cost to the producer/pumper] to offset production in  
18 excess of the Basin’s Safe Yield. (Restated Judgment, ¶¶ 13, 42).” (Watermaster’s  
19 Response to Questions for Clarification in Final Orders for Watermaster’s Motion  
20 Regarding 2015 Safe Yield Reset Agreement, Amendment of Restated Judgment,  
21 Paragraph 6, page 2, line 23 to page 3, line 4, filed October 28, 2016.)

22 The court notes that this total “controlled overdraft” i.e., pumping without  
23 replenishment cost, (aka “Re-Operation Water”) of 600,000 AF has just about been  
24 exhausted.

25 This motion is the first time the court has redetermined the Safe Yield since  
26 the Judgment was entered in 1978.

27  
28 B. Since the entry of the judgment, the court has previously approved agreements to

1 implement the Physical Solution (“Court Approved Management Agreements” aka  
2 “CAMA”). There is no dispute that the court has the authority and duty to  
3 independently review the evidence de novo and determine whether proposals by  
4 Watermaster or any party comply with the Judgment and the Court Approved  
5 Management Agreements. (Restated Judgment ¶31(d).) The Court Approved  
6 Management Agreements are:

7 1. The Chino Basin Peace Agreement (Peace I Agreement), dated June 29,  
8 2000, as subsequently amended in September 2004 and December 2007.

9 a. In 2000 the parties executed Peace Agreement Chino Basin (Peace I  
10 Agreement) and agreed to Watermaster’s adoption of the Optimum  
11 Basin Management Plan (OBMP) Implementation Plan. At about the  
12 same time, the court ordered Watermaster to proceed in a manner  
13 consistent with Peace I and the OBMP, including Program Element 8  
14 (Develop and Implement Groundwater Storage Management Program)  
15 and Program Element 9 (Develop and Implement Storage and  
16 Recovery Programs). The implementation plan acknowledged the need  
17 to obtain better production data through the metering of non-exempt  
18 production within the Basin. Program Elements 8 and 9 provided for  
19 Watermaster to redetermine and reset the Basin’s Safe Yield in the year  
20 2010/11. The basis of the redetermination and reset would be  
21 production data derived from the collection of additional data regarding  
22 the parties’ production (i.e., parties who pumped water out of the Basin)  
23 within the basin during the 10-year period 2000/01 through 2009/10.  
24 The study for redetermination and reset was not completed until 2015,  
25 and the motion regarding determination and reset was not filed until  
26 October 2015.

27 b. The Peace I Agreement introduced the installation of Desalters in the  
28 southwest portion of the Basin. The Desalters pump ground water

1 from the aquifer and supply that water to water companies and other  
2 users. By pumping water out of the aquifer, the Desalters also lowered  
3 the ground water table to help obtain Hydrologic Control, i.e.,  
4 preventing Chino Basin ground water from reaching the Santa Ana  
5 River south of the Basin. The Santa Ana River is a major source of  
6 water for Orange County, and water impurities and contaminants, some  
7 of which came from the Chino Basin dairy farms (“salts”) were in the  
8 groundwater flowing from the Basin into the Santa Ana River. The  
9 Desalter capacity has now expanded to 40 MGD (40 million gallons per  
10 day) as provided in the OBMP Implementation Plan to protect against a  
11 decline in Safe Yield and for water quality benefits, but the court  
12 reserved the question of how “Future Desalter” capacity would be  
13 addressed. The Chino Basin Desalter Authority (CDA), which includes  
14 the City of Chino, participated in the construction of the Desalters  
15 which represented a substantial engineering and financial undertaking.  
16 These Desalters were completed and fully operational in 2006.

17 2. The Peace II Measures (court approved on December 21, 2007).

- 18 a. In 2007, the parties entered into the Peace II Agreement. The objective  
19 was to increase the Desalter capacity to 40 MGD to achieve the OBMP  
20 Implementation Plan objectives. In order to do this, the parties  
21 designed and financed an additional 10 million gallons per day (~~MGD~~)  
22 of expanded Desalter capacity. The expansion of the Desalters to the  
23 full plant capacity will be completed in 2017. With the completion of  
24 this construction, Hydraulic Control will be achieved. Hydraulic  
25 Control now means only a de minimus amount of groundwater will  
26 flow from the Chino Basin south into the Santa Ana River. In fact, the  
27 Desalters now have lowered the water table in the south end of the  
28 Basin so that ground water is now flowing from the Santa Ana River

1 north into the Chino Basin. ~~This is called Re-Operation water.~~

2 3. The Optimum Basin Management Plan (OBMP) Implementation Plan  
3 dated June 29, 2000, was supplemented in December 2007.

4 4. The Recharge Master Plan, dated 1998, was updated in 2010 and  
5 amended in 2013.

6 5. The Watermaster Rules and Regulations dated June 2000, as amended.

7 6. The October 8, 2010 Order Approving Watermaster's Compliance with  
8 Condition Subsequent Number Eight and Approving Procedures to be used to  
9 Allocate Surplus Agricultural Pool Water in the Event of a Decline in Safe Yield.

10 7. Watermaster Resolution 2010-04 ("Resolution of the Chino Basin  
11 Watermaster regarding Implementation of the Peace II Agreement and the Phase III  
12 Desalter Expansion in Accordance with the December 21, 2007 Order of the San  
13 Bernardino Superior Court").

14

15 C. Additional background for motion

16 1. At the September 24, 2015 Watermaster Board Meeting, the board  
17 adopted Resolution 2015-06: Resolution of the Chino Basin Watermaster regarding  
18 the 2015 Safe Yield Reset Agreement (SYRA).

19 2. Through a Facilitation and Non-Disclosure Agreement (FANDA),  
20 Watermaster attempted to obtain agreement as to all issues regarding Safe Yield  
21 redetermination and reset allocation. Those issues included not only a reset of the  
22 Safe Yield from 140,000 acre-feet per year to 135,000 acre-feet per year, but also  
23 Watermaster's accounting for reallocations related to Court Approved Management  
24 Agreements, and a method of allocations for water storage called the Safe Storage  
25 Management Agreements.

26 a) The FANDA process took place starting in November 2014, and  
27 through at least 30 meetings, by May 27, 2015, all but one of the then-  
28 active parties to the FANDA reached a non-binding agreement among

27  
28

their negotiating representatives on certain key principles (apparently also called the “term sheet”) embodied in the Safe Yield Summary of Non-Binding Key Principles Derived from the Facilitated Process.

- b) The parties continued to negotiate, with a goal of reducing the Key Principles into a binding instrument for execution by September 1, 2015. That agreement is identified as the 2015 Safe Yield Reset Agreement (SYRA). The Appropriative Pool, the Overlying (Agricultural) Pool, and the Three Valleys Municipal Water District approved the 22-page agreement, as did many other parties. The City of Chino refused to sign the agreement.
- c) On September 24, 2015, the board at its regular meeting adopted resolution 2015-06, and previously – on September 17, 2015 – the advisory committee approved resolution 2015-06: “Resolution of Chino Basin Watermaster regarding 2015 Safe Yield Reset Agreement (SYRA).”
- d) Watermaster’s instant motion asks the court to address the issues covered in the SYRA as follows:
  - I) The reset of the Basin Safe Yield from 140,000 acre-fee per year (AFY) to 135,000 AFY pursuant to the Restated Judgment, the OBMP Implementation Plan, and Watermaster’s Rules and Regulations;
  - II) The manner in which Watermaster should account for various components of the recharge to the Basin implementing the Court-Approved Management Agreements; and
  - III) Establishment of Safe Storage Management Measures (SSMM) intended to ensure that withdrawals of groundwater from authorized storage accounts within the Basin are safe, sustainable, and will not cause Material Physical Injury or undesirable results.

1 D. SUMMARY RULNGS:

2 In its motion, Watermaster requests an order acknowledging the 2015 Safe  
3 Yield Reset Agreement and ordering Watermaster to proceed in accordance with its  
4 terms with respect to amending the restated judgment to reset the Safe Yield of the  
5 Basin from 135,000 AFY to 135,000 AFY and amending the schedule for access to  
6 Re-Operation water. For the reasons set forth herein, the court grants the motion  
7 with respect to amending the restated judgment to reset the Safe Yield of the basin to  
8 135,000 AFY. However, the court denies the rest of the motions including the motions  
9 to amend the schedule for access to Re-operation water and the motion to institute  
10 Safe Storage Management Measures. The court makes additional orders with respect  
11 to Desalter water as set forth herein.

12  
13 **II. Severability of SYRA**

14 Watermaster has questioned whether the court can sever SYRA and enforce  
15 certain sections and not others. For the following reasons, except for the Safe Yield  
16 reset itself, the court has concluded that it cannot enforce some of sections and not  
17 others:

18 A. Watermaster itself has argued that SYRA is an integrated document which  
19 cannot be divided.

20 1. Watermaster's "Response to Questions for Clarification, etc." filed  
21 October 28, 2016, states: "the SYRA is the product of the Facilitation and Non-  
22 Disclosure Agreement (FANDA) process, during which the parties to that agreement  
23 comprehensively settled and compromised their disagreements, so as to enable  
24 Watermaster to implement the CAMA's through and following the reset of Safe  
25 Yield."

26 a) The court does not find a basis for this characterization. *Most* of the  
27 parties settled and compromised their disagreements, but not all,  
28 notably the city of Chino and Jurupa Community Services District.

1           2.     Watermaster further argues that approving “some, but not all, of  
2 SYRA’s provisions can materially advantage one party over another, in that the full  
3 benefit of the parties intended settlement and compromise is not achieved, as one or  
4 more parties may be denied the consideration for which it bargained.”

5           a)     For the reasons set forth below, the court refuses to adopt SYRA in  
6 whole. Following Watermaster’s own all-or-nothing argument, the  
7 court must conclude that not only is there no legal basis to enforce part  
8 of SYRA, but also that it is fundamentally unfair to the parties to  
9 enforce portions of SYRA for which the parties did not bargain.

10          3.     However, the court concludes there is a qualitative difference between  
11 the safe yield reset and the balance of SYRA.

12          a)     The request to reduce the Safe Yield to 135,000 AFY is a legal  
13 determination for the court.

14          b)     The request to reduce Safe Yield is based on the Reset Technical  
15 Memorandum report and model. That memorandum has nothing to do  
16 with interactions, bargaining, or allocations among the parties.

17               I) There ample technical and scientific support for the reset in the  
18 Technical Memorandum and the 2013 Chino Basin Groundwater  
19 Model Update and Recalculation of Safe Yield Pursant to the Peace  
20 Agreement prepared by Wildermuth Environmental, Inc. dated  
21 October 2015.

22          c)     The request to reduce Safe Yield is in response to the court order itself  
23 to evaluate the yield every 10 years

24               I) Although the study should have been done in 2010, at least it was  
25 completed in 2015.

26               II) None of the other aspects of SYRA were pursuant to a court order.

27               III) The safe yield reset is a legal determination for the court. There  
28 is no “bargained-for exchange” for the court to consider.

1 d) Therefore for these reasons and those set forth in section III below ~~III~~  
2 the court adopts the following provisions of Article 4-SAFE YIELD  
3 RESET TO 135,000 AFY of the SYRA AND ORDERS AS  
4 FOLLOWS:

5 4.1 Safe Yield Reset. Consistent with the prior orders of the Court pursuant to its  
6 continuing jurisdiction, effective July 1, 2010 and continuing until June 30, 2020, the  
7 Safe Yield for the Basin is reset at 135,000 AFY. For all purposes arising under the  
8 Judgment, the Peace Agreements and the OBMP Implementation Plan, the Safe  
9 Yield shall be 135,000 AFY, without exception, unless and until Safe Yield is reset in  
10 accordance with the procedures set forth in this order, and determined by the Court  
11 pursuant to its retained continuing jurisdiction.

12  
13 4.2 Scheduled Reset. Watermaster will initiate a process to evaluate and reset the  
14 Safe Yield by July 1, 2020 as further provided in this order. Subject to the provisions  
15 of Paragraph 4.3 below, the Safe Yield, as it is reset effective July 1, 2020 will  
16 continue until June 30, 2030. Watermaster will initiate the reset process no later than  
17 January 1, 2019, in order to ensure that the Safe Yield, as reset, may be approved by  
18 the court no later than June 30, 2020. Consistent with the provisions of the OBMP  
19 Implementation Plan, thereafter Watermaster will conduct a Safe Yield evaluation  
20 and reset process no less frequently than every ten years. This Paragraph is deemed  
21 to satisfy Watermaster's obligation, under Paragraph 3.(b) of Exhibit "I" to the  
22 Restated Judgment, to provide notice of a potential change in Operating Safe Yield.

23  
24 4.3 Interim Correction. In addition to the scheduled reset set forth in Paragraph  
25 4.2 above, the Safe Yield may be reset in the event that, with the recommendation  
26 and advice of the Pools and Advisory Committee and in the exercise of prudent  
27 management discretion described in Paragraph 4.5(c), below, Watermaster  
28 recommends to the court that the Safe Yield must be changed by an amount greater

1 (more or less) than 2.5% of the then-effective Safe Yield.

2  
3 4.4 Safe Yield Reset Methodology. The Safe Yield has been reset effective July 1,  
4 2010 and shall be subsequently evaluated pursuant to the methodology set forth in  
5 the Reset Technical Memorandum. The reset will rely upon long-term hydrology and  
6 will include data from 1921 to the date of the reset evaluation. The long-term  
7 hydrology will be continuously expanded to account for new data from each year,  
8 through July 2030, as it becomes available. This methodology will thereby account  
9 for short-term climatic variations, wet and dry. Based on the best information  
10 practicably available to Watermaster, the Reset Technical Memorandum sets forth a  
11 prudent and reasonable professional methodology to evaluate the then prevailing  
12 Safe Yield in a manner consistent with the Judgment, the Peace Agreements, and the  
13 OBMP Implementation Plan. In furtherance of the goal of maximizing the  
14 beneficial use of the waters of the Chino Basin, Watermaster, with the  
15 recommendation and advice of the Pools and Advisory Committee, may supplement  
16 the Reset Technical Memorandum's methodology to incorporate future advances in  
17 best management practices and hydrologic science as they evolve over the term of  
18 this order.

19  
20 4.5 Annual Data Collection and Evaluation. In support of its obligations to  
21 undertake the reset in accordance with the Reset Technical Memorandum and this  
22 order, Watermaster shall annually undertake the following actions:

23 (a) Ensure that, unless a Party to the Judgment is excluded from reporting,  
24 all production by all Parties to the Judgment is metered, reported, and reflected in  
25 Watermaster's approved Assessment Packages;

26 (b) Collect data concerning cultural conditions annually with cultural  
27 conditions including, but not limited to, land use, water use practices, production,  
28 and facilities for the production, generation, storage, recharge, treatment, or

1 transmission of water;

2 (c) Evaluate the potential need for prudent management discretion to avoid  
3 or mitigate undesirable results including, but not limited to, subsidence, water quality  
4 degradation, and unreasonable pump lifts. Where the evaluation of available data  
5 suggests that there has been or will be a material change from existing and projected  
6 conditions or threatened undesirable results, then a more significant evaluation,  
7 including modeling, as described in the Reset Technical Memorandum, will be  
8 undertaken; and,

9 (d) As part of its regular budgeting process, develop a budget for the  
10 annual data collection, data evaluation, and any scheduled modeling efforts, including  
11 the methodology for the allocation of expenses among the Parties to the Judgment.  
12 Such budget development shall be consistent with section 5.4(a) of the Peace  
13 Agreement.

14

15 4.6 Modeling. Watermaster shall cause the Basin Model to be updated and a  
16 model evaluation of Safe Yield, in a manner consistent with the Reset Technical  
17 Memorandum, to be initiated no later than January 1, 2024, in order to ensure that  
18 the same may be completed by June 30, 2025.

19

20 4.7 Peer Review. The Pools shall be provided with reasonable opportunity, no  
21 less frequently than annually, for peer review of the collection of data and the  
22 application of the data collected in regard to the activities described in Paragraphs  
23 4.4, 4.5, and 4.6 above.

24

25 4.8 No Retroactive Accounting. Notwithstanding that the initial Safe Yield reset,  
26 described in Paragraph 4.1 above, shall be effective as of July 1, 2010, Watermaster  
27 will not, in any manner, including through the approval of its Assessment Packages,  
28 seek to change prior accounting of the prior allocation of Safe Yield and Operating

1 Safe Yield among the Parties to the Judgment for production years prior to July 1,  
2 2014.

3  
4  
5 **III. THE COURT FURTHER ORDERS AS FOLLOWS:**

6 A. The court amends the restated judgment ¶6 and sets the safe yield to 135,000  
7 AFY for the following reasons:

8 1. The court accepts the findings and conclusions of Wildermuth for the  
9 following reasons. Those conclusions are set forth in the reset Technical  
10 Memorandum.

- 11 a) Wildermuth has been the authoritative resource for the parties and the  
12 court during the pendency of the case for the last 15 years.
- 13 b) Wildermuth has performed a detailed analysis with substantiated facts  
14 and findings in the reset technical memorandum, the supplemental  
15 declaration of Mark Wildermuth in support of Watermaster's reply to  
16 oppositions to the motion regarding 2015 Safe Yield Reset Agreement,  
17 and the memo to restated judgment, paragraph 6 aka Wildermuth  
18 supplemental declaration.
- 19 c) The court accepts the net recharge approach and calculations set forth  
20 in the Wildermuth report.
- 21 d) The Wildermuth report gives the most comprehensive analysis and  
22 credible evaluation of the historic condition of the Basin.
- 23 e) The court does not accept the conclusions of Robert Shibatani for the  
24 following reasons:
- 25 I) Shibatani recognizes that the net recharge calculation is a legitimate  
26 approach to a determination of Safe Yield.
- 27 II) The Shibatani approach is unnecessarily quantitative. The Wildermuth  
28 analysis allows for the definitions required for the analysis of the Chino

1 Basin, including cultural conditions and undesirable results.

2 III) Wildermuth has considered the effects of climate change of  
3 Basin precipitation. The court accepts Wildermuth's conclusion that  
4 there are not any better predictive modeling scenarios generally available  
5 at this time accurately calibrated to the historical rainfall and are  
6 therefore not reliable as a predictive tool.

7 2. The Restated Judgment's definition of Safe Yield includes the  
8 consideration of the evolutionary land-use conditions the need to protect the Basin  
9 against undesirable results.

10 3. No party has objected to the reduction in Safe Yield, except the city of  
11 Chino. Chino's objections were discussed and rejected/overruled for the reasons set  
12 forth in Joinders and Filings, Section A.2 above.

13 4. The reduction safe yield is consistent with the Court-Approved  
14 Management Agreements.

15 5. The court finds that the provisions of SYRA set for in Section II above  
16 set forth an approach to a determination of future Safe Yield determinations in a  
17 manner consistent with the Court Approved Management Agreements.

18 a) The declaration of Peter Wildermuth and the supporting  
19 documentation, analysis supports the court's conclusion.

20 b) Wildermuth declaration, paragraph 14, states his opinion that the Basin  
21 protection measures to which the parties have agreed and the 2015 Safe  
22 Yield Reset Agreement will ensure that the Basin is not harmed by  
23 extraction of 135,000 AFY through fiscal 2020. However, again the  
24 court emphasizes that its ruling is not based on the agreement of the  
25 parties. The court's ruling is based upon the Restated Judgment, the  
26 Court Approved Management Agreements, and its legal conclusions  
27 supported by the technical analyses identified in the court's order.

28 I) Although the court concludes the Safe Storage Management Measures

1 are useful and advisable, the court concludes there is no specific factual  
2 basis requiring the Safe Yield reset to include Safe Storage Management  
3 Measures. Therefore the court concludes that even without the Safe  
4 Storage Management Measures, reduction of Safe Yield to 135,000 AFY  
5 will not harm the Basin.

6 II) The 2013 Chino Basin Groundwater Model Update and Recalculation  
7 of Safe Yield Pursuant to the Peace Agreement is sufficiently  
8 documented and the court finds the data reliable.

9 c) Wildermuth declaration, paragraph 15, states that the Basin protection  
10 measures to which the parties have agreed and the 2015 Safe Yield  
11 Reset Agreement, including the Safe Storage Management Measures,  
12 will ensure that the Basin is not harmed by extractions of the 20,000 AF  
13 that was allocated in the past 4 years and would have been allocated if  
14 the Safe Yield have been reset to 135,000 AFY in 2011.

15 I) However, again Wildermuth does not specifically address the necessity  
16 of the Safe Storage Measures with respect to complying with the Court  
17 Approved Management Agreements. Therefore, the court again  
18 concludes that even without the Safe Storage Management Measures,  
19 reduction of Safe Yield to 135,000 AFY will not harm the Basin.

20 II) Again, the 2013 Chino Basin Groundwater Model Update and  
21 Recalculation of Safe Yield Pursuant to the Peace Agreement is  
22 sufficiently documented and the court finds the data reliable.

23 d) Therefore, the court concludes that the extraction of 135,000 AFY is  
24 consistent with the Court Approved Management Agreements and does  
25 not create any undesirable result or Material Physical Injury to the Basin.  
26

27 B. The measures set forth in Article 4 are consistent with the Physical Solution  
28 under the judgment and Article X, section 2 of the California Constitution.

C. Paragraph 6 of the Restated Judgment is hereby amended to read as follows:  
“Safe Yield. The Safe Yield of the Basin is 135,000 acre feet per year.”

1. The effective date of this amendment of Paragraph 6 of the Restated Judgment is July 1, 2010.

**IV. SAFE YIELD RESET AGREEMENT (SYRA): WATERMASTER ALLOCATION HISTORY, EARLY TRANSFERS, AND THE DESALTERS**

A. The 1978 Judgment as amended

1. The 1978 Judgment ¶44 made the following allocation of rights to Safe Yield in the Chino Basin (“the physical solution”):

| Pool                              | Allocation   |
|-----------------------------------|--|
| Overlying (Agricultural) Pool     | 414,000 acre-feet in any 5 consecutive years (82,800 acre-feet per year)* ** |
| Overlying (Non-agricultural) Pool | 7366 acre-feet per year**  |
| Appropriative Pool                | 49,834 acre-feet per year  |
| Total                             | 140,000 acre-feet per year   |

\*Note:  $414,000 \div 5 = 82,800$ . 82,800 acre-feet per year has been the basis of calculations for the Appropriative Pool going forward from the judgment.

\*\*Note: the rights of the members of the Overlying (Agricultural) Pool and the Overlying (Non-Agricultural) Pool are fixed (Restated Judgment ¶8, ¶44, see also Exhibits “C” and “D” to the Restated Judgment). **Therefore the effect of a decline of the safe yield is borne entirely by the members of the Appropriative Pool (Restated Judgment ¶9).**

2. The Judgment ¶1(x) defines Safe Yield as “the long-term average annual

1 quantity of groundwater (excluding replenishment or stored water but including  
2 return flow to the basin from use of replenishment or stored water) which can be  
3 produced [*i.e.*, pumped] from the basin under cultural conditions of the particular  
4 year without causing an undesirable result.”

5 3. The judgment fixed the amount of water production (pumping) that  
6 could be allocated to the Overlying (Agricultural) Pool and the Overlying (Non-  
7 agricultural) Pool. However, the Appropriative Pool allocation could be changed.

8 a) The court concludes that the disputes in the oppositions concern  
9 relationship between unproduced (*i.e.*, unpumped) Overlying  
10 Agricultural Pool water (aka Ag Pool water) and the water available to  
11 the Appropriative Pool.

12 4. Exhibit “T” to the judgment is the Engineering Appendix. It discusses  
13 Hydraulic Control and Re-Operation, which are described in more detail below.  
14 Section 3 defines Operating Safe Yield as consisting in any “year of the  
15 Appropriative Pool’s share of Safe Yield of the Basin, plus any controlled overdraft  
16 of the Basin which Watermaster may authorize.”

17 a) Section 3(b) states that “in no event shall Operating Safe Yield in any  
18 year be less than the Appropriative Pool’s share of Safe Yield, nor shall  
19 it exceed such share of Safe Yield by more than 10,000 acre feet. The  
20 initial Operating Safe Yield is hereby set at 54,834 acre feet per year.”

21 I) The figure of 54,834 acre feet per year is the initial 1978 Judgment  
22 allocation of 49,834 acre-feet per year plus 5,000 acre feet per year. The  
23 additional 5,000 AFY comes from 200,000 acre-feet of overdraft (water  
24 pumped without a replenishment obligation) allocated by the Judgment  
25 to the Appropriative Pool. This overdraft total was later increased by  
26 400,000 AF to a total of 600,000 AF. The overdraft will be exhausted  
27 in 2016/2017. (Watermaster Motion Regarding 2015 Safe Yield Reset  
28 Agreement, Amendment of Restated Judgement, Paragraph 6, page 3,

1 line 27.)

2 b) Operating Safe Yield has also come to mean water that the  
3 Appropriative Pool could produce/pump without having to purchase  
4 replenishment water. (Exhibit "H" ¶5.)

5 5. Exhibit "H" to the judgment described the Appropriative Pool Pooling  
6 Plan, paragraph 10 described "Unallocated Safe Yield Water" as follows: "to the  
7 extent that, in any 5 years, any portion of the share of Safe Yield allocated to the  
8 Overlying (Agricultural) Pool is not produced, such water shall be available for  
9 reallocation to members of the Appropriative Pool as follows:

- 10 (a) Priorities. Such allocation shall be made in the following sequence:  
11 (1) to supplement, in the particular year, water available from Operating Safe  
12 Yield to compensate for any reduction in the Safe Yield by reason of  
13 recalculation thereof after the tenth year of operation hereunder. [This  
14 Exhibit H ¶10(a)(1) priority is sometimes called 'unproduced Agricultural Pool  
15 water' or 'unproduced Ag Pool water.' The current credited production  
16 (pumping) for agricultural groundwater is about 33,600 AFY, but that includes  
17 agricultural land irrigated with reclaimed water. The actual groundwater  
18 production for agricultural purposes is about 22,000 AFY. (Jurupa Services  
19 District's response to Judge Reichert's Request for Clarification, March 22,  
20 2016, page 2, lines 8-10.)]  
21 (2) pursuant to conversion claims as defined in Subparagraph (b) hereof.  
22 (3) as a supplement to Operating Safe Yield, without regard to reductions in  
23 Safe Yield."

24 6. In an order dated November 17, 1995, Conversion Claims were defined  
25 in Exhibit "H" ¶10(b) [this is the Subparagraph (b) to which the preceding  
26 paragraph--page 23, line 21--refers]. Peace I modified this definition in Exhibit "H"  
27 ¶10(b) to state as follows:

28 (b) Conversion Claims. The following procedures may be utilized by any

1 appropriator:

2 1) Record of Unconverted Agricultural Acreage. Watermaster shall maintain  
3 on an ongoing basis a record with appropriate related maps of all agricultural  
4 acreage within the Chino Basin subject to being converted to appropriate  
5 water use pursuant to the provisions of this paragraph. An initial  
6 identification of such acreage as of June 30, 1995 is attached hereto as  
7 Appendix 1.

8 (2) Record of Water Service Conversion. Any appropriator who undertakes  
9 to permanently provide water service to lands subject to conversion may  
10 report such intent to change water service to Watermaster. Watermaster  
11 should thereupon verify such change in water service and shall maintain a  
12 record and account for each appropriator of the total acreage involved.  
13 Should, at any time, converted acreage return to water service from the  
14 Overlying (Agricultural) Pool, Watermaster shall return such acreage to  
15 unconverted status and correspondingly reduce or eliminate any allocation  
16 accorded to the appropriator involved.

17 (3) Allocation of Safe Yield Rights

18 (i) For the term of the Peace Agreement in any year in which sufficient  
19 unallocated Safe Yield from the Overlying (Agricultural) Pool is available for  
20 such conversion claims, Watermaster shall allocate to each appropriator with  
21 the conversion claim 2.0 acre-feet of unallocated Safe Yield water for each  
22 converted acre for which conversion has been approved and recorded by  
23 Watermaster.

24 (ii) In any year in which the unallocated Safe Yield water from the Overlying  
25 (Agricultural) Pool is not sufficient to satisfy all outstanding conversion claims  
26 pursuant to subparagraph (i) herein above, Watermaster shall establish  
27 allocation percentages for each appropriator with conversion claims. The  
28 percentages shall be based upon the ratio of the total of such converted

1 acreage approved and recorded for each appropriators's [sic] account in  
2 comparison to the total of converted acreage approved and recorded for all  
3 appropriators. Watermaster shall apply such allocation percentage for each  
4 appropriator to the total unallocated Safe Yield water available for conversion  
5 claims to derive the amount allocable to each appropriator.

6 7. CONCLUSION: With the 1995 amendments, the Judgment set a  
7 prioritized list of claims upon unproduced Ag Pool water.

8 Ag Pool water--1995 Judgment amendment

9 82,800 AFY of the Ag Pool's water available to the Appropriative Pool with  
10 Appropriative Pool claims prioritized as follows:

11 (1) to supplement, in the particular year, water available from Operating Safe  
12 Yield to compensate for any reduction in the Safe Yield by reason of recalculation  
13 thereof after the tenth year of operation as required by the Judgment;

14 (2) pursuant to conversion claims as defined in Subparagraph (b of Exhibit "H"  
15 ¶10(b);

16 (3) as a supplement to Operating Safe Yield, without regard to reductions in Safe  
17 Yield.

18 The court notes that there is currently more than 49,000 AFY of unproduced  
19 Agricultural Pool water available. (Jurupa Services District's response to Judge  
20 Reichert's Request for Clarification, March 22, 2016, page 2, lines 10-14.)

21  
22 B. The 2000 Peace Agreement aka Peace I

23 1. With the agreements made in Peace I, the elements of Desalters and of  
24 water transfers entered the water allocations to the parties.

25 2. Peace I Section V-Watermaster Performance defined how Watermaster  
26 was to perform regarding procedures for Recharge and Replenishment. In paragraph  
27 ¶5.3(g), Watermaster was ordered to approve an "Early Transfer" from the  
28 Agricultural Pool to the Appropriative Pool of not less than 32,800 acre-feet per year

1 which was the expected approximate quantity of water not produced by the  
2 Agricultural Pool. ¶5.3(g)(i) further stated that “the quantity of water subject to Early  
3 Transfer under this paragraph shall be the greater of (i) 32,800 acre-feet or (ii) 32,800  
4 acre-feet plus the actual quantity of water not produced by the Agricultural Pool for  
5 that Fiscal Year that is remaining after all the land use conversions are satisfied  
6 pursuant to” the following provision: “the Early Transfer water shall be annually  
7 allocated among members of the Appropriative Pool in accordance with their pro-  
8 rata share of the initial Safe Yield.” The court notes that after this deduction, the  
9 Safe Yield water available to the Agricultural Pool became 50,000 acre-feet per year.

10 3. Peace I also introduced the construction and operation of Desalters in  
11 Section VII. ¶7.5 described replenishment for the Desalters provided from the  
12 following sources in the following order:

13 a) Watermaster Desalter replenishment account composed of 25,000 acre-feet  
14 of water abandoned by Kaiser and other water previously dedicated by the  
15 Appropriative Pool;

16 (b) New Yield of the Basin, unless the water Produced and treated by the  
17 Desalters is dedicated by purchaser of the Desalter water to offset the price of  
18 Desalter water to the extent of the dedication;

19 (c) Safe Yield of the Basin, unless the water Produced and treated by the  
20 Desalters is dedicated by a purchaser of the desalted water to offset the price of  
21 Desalter water to the extent of the dedication; [and then]

22 d) Additional Replenishment Water purchased by Watermaster, the cost of  
23 which shall be levied as an Assessment by Watermaster.

24 4. The court also concludes that the conversion claims have priority over  
25 the Early Transfers because the conversion claims pre-existed the Early Transfer  
26 allocations. The conversion claims came into existence with the 1995 Judgment  
27 amendment. The Early Transfers came into existence with Peace I in 2000. The  
28 Early Transfers must be interpreted in the context of the pre-existing 1995 Judgment

1 amendment.

2 5. CONCLUSION: With Peace I, there were major changes regarding the  
3 allocation of water among the parties as set forth in the following table.

| 4 Ag Pool water                                  | 5 Status and/or change<br>6 result   | 7 Comments                                  |

Under Peace</p> <p>I therefore Desalters do</p> <p>not affect Safe Yield or</p> <p>Operating Safe Yield.</p> <p>Water</p> <p>produced/pumped by</p> <p>the Desalters is not</p> <p>added to or subtracted</p> <p>from Safe Yield of the</p> <p>Basin.</p> |
|--|---|--|

13 The court concludes that Peace I interrelated Early Transfers and conversion  
 14 claims in the following way. The Appropriative Pool received unproduced Ag Pool  
 15 water in at least the amount of 32,800 AFY, but the Appropriative Pool could receive  
 16 more unproduced Ag Pool water if 1) the Ag Pool did not produce/pump its leftover  
 17 50,000 AFY and 2) also after subtracting from the 50,000 AFY the Appropriative  
 18 Pool's conversion claims at the rate of 2 acre-feet per year per converted acre.

19 However, the court also concludes that Peace I did not rearrange the priority  
 20 of allocation claims on unproduced/unpumped water. The priorities of the  
 21 judgment remain. Specifically, the priority set forth in Judgment, Exhibit "H,"  
 22 Paragraph 10.

23 EXAMPLE 1: So, for example in a particular year,

- 24 1. If one Appropriative Pool producer/pumper (*e.g.*, municipality, such as the City of  
 25 Chino) had 1000 acres of converted land resulting in 2000 acre-feet of conversion  
 26 claims (1000 acres x 2.0 acre feet of water/one acre converted), and assuming those  
 27 were the only conversion claims; and
- 28 2. If the Ag Pool produced/pumped only 33,600 AFY leaving 49,200 AFY available

1 for further allocation (82,800 AFY– 33,600 AFY= 49,200 AFY; the court notes that  
 2 33,600 AFY is the approximate Ag Pool credited production [Jurupa response to  
 3 court’s clarification request, page 2, lines 9-10], but the court is using this figure only  
 4 for illustration); then,

5 3. The Ag Pool water that would be available to the Appropriative Pool would be  
 6 based on the following calculation

| Example 1-A   | Explanation      | Comments  |
|---|------------------|---|
| Initial Ag Pool allocation                            | 82,800 AFY       |   |
| Ag Pool production/pumping                            | - 33,600 AFY     | Assumption  |
| Initial balance after production                      | 49,200 AFY       | (82,800 acre-feet – 33,600 acre-feet = 49,200 acre-feet per year)   |
| Conversion claims                                     | - 2000 acre-feet | 1000 acres x 2.0 acre feet of water/one acre converted = 2000 acre-feet per year.<br><br>The subtraction for satisfying conversion claims comes before any reallocation. The conversion claims are applied first because they are set forth in the 1995 Amendment to the Judgment |
| Ag Pool balance after reduction for conversion claims | 47,200 AFY       | (49,200 acre-feet - 2000 acre-feet = 47,200 acre-feet per year)<br><br>Balance: Ag Pool water available to Appropriative Pool after conversion priority claims pursuant to Judgment Exhibit   |

|    |                        |              |  |
|----|------------------------|--------------|--|
| 1  |                        |              | "H" Paragraph 10.  |
| 2  | Reduction for Early    | - 32,800 AFY | The Early Transfer is now applied because Early Transfers were instituted in Peace I in 2000. The Early Transfer from 82,800 AFY allocation leaving 50,000 AFY for the Ag Pool itself to produce/pump and for additional claims by the Appropriative Pool pursuant to Peace I and Peace II.* |
| 3  | Transfers              |              |  |
| 4  |                        |              |  |
| 5  |                        |              |  |
| 6  |                        |              |  |
| 7  |                        |              |  |
| 8  |                        |              |  |
| 9  |                        |              |  |
| 10 |                        |              |  |
| 11 | Balance: Ag Pool       | 14,400 AFY   |  |
| 12 | water available to the |              | = 14,400 acre-feet per year.)  |
| 13 | Appropriative Pool     |              | This is the total Ag Pool water  |
| 14 | after conversion       |              | available for reallocation to  |
| 15 | priority claims and    |              | Appropriative Pool for   |
| 16 | Early Transfers        |              | production/pumping after   |
| 17 |                        |              | subtraction of conversion priority   |
| 18 |                        |              | claims of 2,000 acre-feet per year   |
| 19 |                        |              | from and the 32,800 Early  |
| 20 |                        |              | Transfer from the allotment of Ag  |
| 21 |                        |              | Pool water.**  |
| 22 |                        |              |  |

23 \*It appears to the court that for convenience, many parties first simply take the  
 24 reduction of the 32,800 acre-feet for Early Transfers and start these calculations with  
 25 50,000 acre-feet of Ag Pool water.

- 26 1. That calculation is simply to start with the 50,000 acre-feet of  
 27 unproduced/unpumped Ag Pool water and then subtract the amount 33,600  
 28 acre-feet that was actually pumped in this example. The result is 16,400 acre-

- 1 feet available for conversion claims.
- 2 2. Then subtract the 2,000 acre-feet for conversion claims to get the 14,400 acre-
- 3 feet of Ag Pool water available for allocation to the Appropriative Pool.
- 4 3. However, this procedure is inconsistent with the judgment and Peace
- 5 Agreements as interpreted by the court for the reasons stated above.

6 \*\*The also court notes that the particular producer who serviced the converted acres

7 would actually be able to pump the additional conversion claim water as an

8 allocation.

9

10 EXAMPLE 2: The following example demonstrates complications arising

11 from a decrease in the amount of Ag Pool water available to the Appropriative Pool.

12 If the Ag Pool produced/pumped more than 48,000 AFY there would be no

13 available water for the Appropriative Pool.

| Example 2                        |                  | Comment  |
|----------------------------------|------------------|--|
| Initial Ag Pool allocation       | 82,800 AFY       |  |
| Ag Pool production/pumping       | 48,000 AFY       | Assumption   |
| Initial balance after production | 34,800 AFY       | 82,800 acre-feet – 48,000 acre-feet = 34,800 acre-feet per year  |
| Conversion claims                | - 2000 acre-feet | The subtraction for satisfying conversion claims before any reallocation. (1000 acres x 2.0 acre feet of water/one acre converted = 2000 acre-feet). |
| Balance:                         | 32,800 AFY       | 34,800 acre-feet – 2,000 acre-feet = 32,800 acre-feet per year. Ag Pool Water Available after conversion   |

|  |              |   |
|--|--------------|---|
|  |              | priority claims pursuant to Judgment Exhibit "H" Paragraph  |
| Reduction for Early Transfers  | - 32,800 AFY | Early Transfer of 32,800 AFY from 82,800 AFY allocation leaving 50,000 AFY for the Ag Pool itself to produce/pump. Any water which the Ag Pool did not produce/pump water up to the 50,000 AFY would be available for allocation to the Appropriative Pool pursuant to Peace I and Peace II.              |
| Balance: Ag Pool water available after conversion priority claims and Early Transfers  | 0 AFY        | 32,800 acre-feet - 32,800 acre-feet = 0 acre-feet per year. There would be no Ag Pool water available for reallocation to Appropriative Pool after subtraction of conversion priority claims of 2,000 acre-feet and the 32,800 Early Transfer of unproduced/unpumped from the allotment of Ag Pool water. |
| <p>Conclusion:</p> <p>Under this scenario, the Appropriative Pool would not get any additional allocation from Ag Pool water</p> |              |   |

6. Regarding replenishment for the Desalters, Peace I ¶7.5 sets forth the hierarchy of sources of replenishment water for the Desalters as follows:

Replenishment Water. Replenishment for the Desalters shall be provided from the following sources in the following order of priority.

(a) Watermaster Desalter Replenishment account composed of 25,000

1 acre-feet of water abandoned by Kaiser pursuant to the "Salt Offset  
2 Agreement" dated October 21, 1993, between Kaiser and the RWQB, and  
3 other water previously dedicated by the Appropriative Pool.

4 (b) New Yield of the Basin, unless the water Produced and treated by  
5 the Desalters is dedicated by a purchaser of the desalters water to offset the  
6 price of the salted water to the extent of the dedication;

7 (c) Safe Yield of the Basin, unless the water Produced and treated by  
8 the Desalters is dedicated by a purchaser of the the salted water to offset the  
9 price of the salted water to the extent of the dedication;

10 (d) Additional Replenishment Water purchased by Watermaster, the  
11 cost of which shall be levied as an Assessment by Watermaster.

12  
13 C. The 2007 Peace II Agreement (Peace II)

14 1. Peace II Agreement Article VI-Groundwater Production by and  
15 Replenishment for Desalters and Article VII-Yield Accounting further defined the  
16 accounting for the Desalters and Desalter Production Offsets.

17 2. Peace II Paragraph 6.2(a)(iii) states as follows in pertinent part:  
18 Peace II Desalter Production Offsets. To facilitate Hydraulic Control through  
19 Basin Re-Operation, [court note: that is, water pumped as part of the 600,000  
20 AF controlled overdraft] in accordance with the 2007 Supplement to the  
21 OBMP Implementation Plan and the amended Exhibits G and I to the  
22 Judgment, additional sources of water will be made available for purposes of  
23 Desalter Production and thereby some or all of a Replenishment obligation.  
24 With these available sources, the Replenishment obligation attributable to  
25 Desalter production in any year will be determined by Watermaster as follows:

26 (a) Watermaster will calculate the total Desalter Production for the  
27 preceding year and then apply a credit against the total quantity from: . . .

28 (iii) New Yield (other than Stormwater (Peace Agreement Section

1 7.5(b)); . . .

2 v) Safe Yield that may be contributed by the parties (Peace  
3 Agreement Section 7.5(c));

4 (vi) any Production of groundwater attributable to the controlled  
5 overdraft authorized pursuant to amended Exhibit I to the Judgment.  
6 [The Judgment allowed for a temporary controlled overdraft, *i.e.*,  
7 initially 200,000 AF and then an additional 400,000 AF total  
8 production/pumping starting in 2007 and ending in 2026 without  
9 replenishment, in order to achieve Hydraulic Control. (Safe Yield Reset  
10 Implementation Desalter Replenishment Accounting Illustration (per  
11 Peace II Agreement, Section 6.2 (PIIA, 6.2) and June 11, 2015 Key  
12 Principles)–Exhibit C to Attachment 1, Watermaster’s Motion regarding  
13 2015 Safe Yield Reset Agreement, Amendment of Restated Judgment,  
14 Paragraph 6.]

15 Paragraph 7.1 provides as follows:

16 New Yield Attributable to the Desalters. Watermaster will make an annual  
17 finding as to the quantity of New Yield that is made available by Basin Re-  
18 Operation including that portion that is specifically attributable to the Existing  
19 and Future Desalters. Any subsequent recalculation of New Yield as Safe  
20 Yield by Watermaster will not change the priority set forth above for  
21 offsetting Desalter production as set forth in Article VII, Section 7.5 of the  
22 Peace Agreement. For the initial term of the Peace Agreement, neither  
23 Watermaster nor the Parties will request that Safe Yield be recalculated in a  
24 manner that incorporates New Yield *attributable to the Desalters* [emphasis in  
25 original] into a determination of Safe Yield so that this source of supply will be  
26 available for Desalter Production rather than for use by individual parties to  
27 the Judgment.

28 2. Additionally, in 2007 Peace II ¶1.1(d) defined Re-Operation as “the

1 controlled overdraft [pumping without replenishment] of the Basin by the managed  
2 withdrawal of groundwater Production for the Desalters and the potential increase in  
3 the cumulative un-replenished Production from 200,000 [acre-feet] authorized by  
4 paragraph 3 Engineering Appendix Exhibit I to the Judgment, to 600,000 acre-feet  
5 for the express purpose of securing and maintaining Hydraulic Control as a  
6 component of the Physical Solution.” The Peace II agreement amended the Restated  
7 Judgment’s Engineering Appendix to specify the additional 400,000 acre-feet that  
8 would be dedicated exclusively to the purpose of Desalter replenishment (Restated  
9 Judgement Exhibit “T” §2(b)[3]).

10 3. Peace II, Paragraph 6.2(a)(iii) gives Watermaster a basis to calculate the  
11 total Desalter production from the preceding year and then apply against that  
12 production/pumping a “credit” (*i.e.*, a reduction) which included a number of  
13 factors, including New Yield referencing Peace I, paragraph 7.5(b). This credit  
14 procedure is an important issue going forward for the administration of water  
15 allocations:

16 a) Peace I, paragraph 1.1(aa) defines New Yield as “proven increases in  
17 yield in quantities greater than historical amounts from sources of  
18 supply including, but not limited to, operation of the Desalters  
19 (including the Chino I Desalter), induced Recharge and other  
20 management activities implemented in operational after June 1, 2000.”

21 I) The court concludes that New Yield in the above paragraph means  
22 water produced/pumped by the Desalters, because that is how yield is  
23 always used, e.g., Safe Yield, Operating Safe Yield, etc., and the source  
24 of supply is the Desalters as identified in the definition.

25 II) So, New Yield includes water produced/pumped by the Desalters.

26 b) Peace I, paragraph 1.1(nn) defines “Recharge and Recharge Water as  
27 “introduction of water to the Basin, directly or indirectly, ... .” Recharge  
28 references the physical act of introducing water to the Basin.”

- 1 c) The conclusion of the court is that after Peace II, the definition New  
2 Yield now includes both Desalter operation, *i.e.*, production/pumping  
3 from the Desalters, and induced Recharge (*i.e.*, groundwater flowing  
4 back into the Basin from the Santa Ana River as the result of Desalter  
5 operation).
- 6 d) Peace II was consistent with Peace I. Peace II provided that the parties  
7 would avoid some or all or a replenishment obligation for Desalter  
8 production by getting credit/reduction against that production from  
9 sources such as New Yield which includes induced Recharge.
- 10 I) Peace I defined New Yield to include "operation of the Desalters" and  
11 "induced Recharge."
- 12 II) The court concludes that the Peace I and Peace II when read together  
13 recognized that some of the water which the Desalters  
14 produced/pumped came from induced recharge form the Santa Ana  
15 River.
- 16 III) Peace II was not explicit it stating that the Desalter production  
17 offset should follow the priorities of Peace I ¶7.5, but the court  
18 concludes that the replenishment water, *i.e.*, Desalter-induced recharge,  
19 must follow the priorities of Peace I.  
20 (a) The agreements must be read together and interpreted together  
21 because they form a context for each other.
- 22 e) In its response to Judge Reichert's questions, Chino argued that SYRA's  
23 failure to give a specific definition to "Desalter-induced recharge" was  
24 purposeful because the failure allowed SYRA to use "Desalter-induced  
25 recharge" synonymously with New Yield. The court does not find  
26 "Desalter-induced recharge" to be synonymous with New Yield. The  
27 court finds that "Desalter-induced recharge" is only synonymous with  
28 "induced Recharge." Therefore Desalter-Inducted Recharge is included

1 in the definition of New Yield, as set forth in Peace I ¶1(aa): “induced  
2 Recharge and other management activities implemented in operational  
3 after June 1, 2000” includes Desalter-induced recharge.

4 I) . The court further finds that “Desalter-induced recharge” and  
5 “induced Recharge” mean water flowing back into the Basin from the  
6 Santa Ana River due to production/pumping by the Desalters lowering  
7 the ground water table in the Basin. Finally, the court notes that New  
8 Yield includes Desalter production and Desalter-induced recharge.

9 (a) This result is exactly what the Desalters were designed to  
10 accomplish. They have achieved Hydraulic Control, meaning they  
11 have lowered the water table at the south end of the Basin, so that  
12 only a de minimus amount of Basin water is flows into the Santa  
13 Ana River.

14 (b) In fact the Desalters have accomplished their design objective so  
15 well that now some water flows from the Santa Ana River into the  
16 Chino Basin. The court finds that his water is New Yield as set  
17 forth above.

18 II) The court further finds that “Desalter-induced recharge” aka “induced  
19 Recharge” is measureable, part of which comes from the Santa Ana  
20 River, and is set forth in Watermaster’s response to the court’s  
21 questions. This water is also known as Santa Ana River Underflow or  
22 SARU.

23 4. Peace II specified Desalter production/pumping replenishment to  
24 include induced Recharge, controlled overdraft, and other sources set forth in Peace  
25 II ¶6.2(a). The Peace I and Peace II agreements did not specify any additional  
26 sources of Desalter replenishment, such as Ag Pool water or Safe Yield.

27 5. CONCLUSION:

28 Now, after Peace II, there were additional sources of water for the Basin, the

1 Desalter operation/Desalter-induced recharge, as well as the historical overdraft, as  
 2 summarized below.

| 3 Ag Pool water  |  | Comments   |

|  |  |   |
|--|--|---|
|  | <p>(leaving 50,000 AFY to Ag Pool). The remaining Ag Pool water is subject to Appropriative Pool's prioritized claims. Peace I §1.1(aa) defines New Yield to include water produced/pumped from the Desalters.</p> | <p>Desalters. Water produced/pumped by the Desalters is New Yield and sourced by induced recharge and overdraft. As New Yield, water pumped by the Desalters is not Safe Yield or Safe Operating Yield. That water is "yield" attributable to specific sources of supply not included in Safe Yield.</p> <p>(Watermaster's Response to Order for Additional Briefing, page 5, line 22-23.)</p> <p>Therefore at the time of Peace I Desalter operations did not affect Safe Yield or Operating Safe Yield. Water produced/pumped by the Desalters was not added to or subtracted from yield of the Basin.</p> <p>Water</p> |
|--|--|---|

|                                   |  |   |
|-----------------------------------|--|---|
|                                   |  | produced/pumped by the Desalters had a separate allocation.   |
| 2007 Peace II-overdraft increased | Additional 400,000 AF above the 200,000 AF provided in the Judgment for a total of 600,000 AF.   | This is a diminishing pumping allocation as the overdraft goes to 0 in 2017. Its purpose was to help establish Hydraulic Control. |
| Peace II Desalters                | Peace II ¶7.1 requires Desalter production (defined as New Yield) excluded from the definition of Safe Yield. However, Peace II Article VI identifies offsets for Desalter production, which includes New Yield the meaning of which includes induced Recharge. (Peace I, ¶1.1(aa).) | Desalter production reaches above 20,000 AFY. Watermaster's Response to Order for Additional Briefing, Exhibit 1.                 |

The court concludes that Peace II did not change any of the priorities for claims on actual water production. Peace II addressed Desalter replenishment and production/pumping but did not affect the priorities for allocations of unproduced Ag Pool water.

1 **V. SYRA ARTICLE 5-STORMWATER RECHARGE PLAN AND**  
2 **WATERMASTER ACCOUNTING ANALYSIS**

3 In the instant motion, Watermaster asks the court to approve 1) a stormwater  
4 recharge plan, and 2) an accounting for allocation transfers as set forth in the Safe  
5 Yield and Reset Agreement (SYRA). The court will address these proposals  
6 separately.

7 A. Stormwater Recharge–SYRA ¶5.1

8 1. Although there have been no objections to this aspect of SYRA, the  
9 court denies its enforcement because the court finds that SYRA’s provisions  
10 regarding anything other than they Safe Yield reset cannot be severed for the reasons  
11 set forth in Section II above.

12  
13 B. Desalter-Induced Recharge Allocations, Early Transfers, Land Use  
14 Conversion–SYRA ¶5.2 and SYRA ¶5.3.

15 1. Because these provisions are major sources of contention among the  
16 parties, the court will set them forth in their entirety.

17 SYRA ¶5.2 sets forth the following provisions regarding Desalter Induced  
18 Recharge, and SYRA ¶5.3 sets forth the following provisions regarding Post 2030  
19 Land Use Conversions and Early Transfers.

20 5.2 Desalter-Induced Recharge. After the Effective Date and until  
21 termination of this Agreement, the parties expressly consent to Watermaster’s  
22 accounting for Basin recharge arising from or attributable the Desalters as  
23 follows:

24 (a) 2001-2014 Desalter-Induced Recharge. Induced recharge that  
25 arises from or is attributable to the Desalters for the period of production  
26 years 2001-2014 shall be accounted for as Safe Yield, in the manner it has been  
27 distributed through approved Watermaster Assessment Packages, shall not be  
28 considered New Yield, and shall not be considered to have been available for

1 production by the Desalters.

2 (b) 2015-2030 Desalter-Induced Recharge. For the production years  
3 of 2015- 2030, Watermaster shall account for induced recharge that arises  
4 from or is attributable to the Desalters as equal to fifty (50) percent of the total  
5 Desalter Production during each applicable production year up to a maximum  
6 of twenty-thousand (20,000) AFY of recharge. Consistent with Paragraph  
7 6.2(a)(iii) of the Peace II Agreement, Watermaster shall deem the induced  
8 recharge as having been produced by the Desalters. During each applicable  
9 production year, Watermaster shall reduce Safe Yield by an amount equal to  
10 fifty (50) percent of the total Desalter Production, up to a maximum of  
11 twenty-thousand (20,000) AFY, and require a corresponding supplementation  
12 by the reallocation of available unproduced Agricultural Pool's share of the  
13 Basin's Safe Yield.

14  
15 Claims for reallocation of the remaining unproduced quantity of the  
16 Agricultural Pool's share of Safe Yield shall be satisfied consistent with section  
17 6.3(c) of Watermaster's Rules and Regulations, as amended as part of the  
18 Peace II Measures, and the October 8, 2010 Order Approving Watermaster's  
19 Compliance with Condition Subsequent Number Eight and Approving  
20 Procedures to be used to Allocated Surplus Agricultural Pool Water in the  
21 Event of a Decline in Safe Yield.

22 (c) 2031-2060 Desalter-Induced Recharge. Should the term of the  
23 Peace Agreement be extended pursuant to Paragraph 8.4 thereof, the  
24 treatment of Desalter-Induced Recharge shall be subject to the negotiation of  
25 a new and separate agreement among the Parties to the Judgment. The  
26 accounting provided for in Section 5.2(b), above, shall be without prejudice to  
27 the negotiation of such a new and separate agreement among the Parties to the  
28 Judgment. Unless otherwise agreed by the Parties or ordered by the court,

1 during the extension term, Watermaster shall not consider such recharge to  
 2 require supplementation by the reallocation of a portion of the unproduced  
 3 Agricultural Pool's share of Safe Yield.

4  
 5 5.3 Post-2030 Priority among Land Use Conversion and Early Transfer  
 6 Claims. At the expiration of the Peace II Agreement, the Peace II provisions  
 7 relating to the distribution of surplus water by the Agricultural Pool requiring  
 8 that claims for the Early Transfer of 32,800 AFY and for Land Use  
 9 Conversion be treated equally are expressly repealed including (i) the  
 10 amendment to Section 6.3(c) of Watermaster's Rules and Regulations,  
 11 pursuant to the Peace II measures, and (ii) Section III.(6) of the October 8,  
 12 2010 Order Approving Watermaster's Compliance with Condition Subsequent  
 13 Number Eight and Approving Procedures to be used to Allocate Surplus  
 14 Agricultural Pool Water in the Event of a Decline in Safe Yield. In any Peace  
 15 Agreement extension term, the previous changes to Restated Judgment,  
 16 Exhibit "H", Paragraph 10(b)(3)(i) effectuated by Paragraph 4.4(c) of the  
 17 Peace Agreement, which, to the extent sufficient unallocated Safe Yield from  
 18 the Agricultural Pool is available for conversion claims, allocate 2.0 acre-feet  
 19 of unallocated Safe Yield water for each converted acre, shall remain in effect.  
 20

21 C. The court summarizes the effect of these SYRA proposals ¶5.2 and ¶5.3 as  
 22 follows:

| Ag Pool water           |  | Comments |
|-------------------------|--|----------|
| 1995 Judgment amendment | 82,800 AFY of the Ag Pool's water available to the Appropriate Pool with Appropriative Pool claims prioritized as follows: |          |

| 16 | 50% of total Desalter  | Desalter production up to           |                         |
| 17 | production up to   | 20,000 AFY is attributed to         |                         |
| 18 | 20,000 AFY to Safe   | “Desalter-induced                   |                         |
| 19 | Yield (to make up for  | recharge.” Desalter-induced         |                         |
| 20 | the subtraction in   | Recharge means water                |                         |
| 21 | <i>Step 3</i> ).*  | flowing back into the Basin         |                         |
| 22 |  | from the Santa Ana River.           |                         |
| 23 |  | <i>Step 3</i> : SYRA then subtracts |                         |
| 24 |  | the other half of Desalter          |                         |
| 25 |  | production up to 20,000             |                         |
| 26 |  | AFY from Safe Yield.                |                         |
| 27 | <b>Additional SYRA Effects: <i>Step 5</i> (see above for <i>Steps 1-4</i>)</b> |                                     |                         |
| 28 | The Ag Pool water allocation is reduced by up to 20,000 AFY for the Desalters. |                                     |                         |

1 SYRA is unclear where the priority lies with respect to priority of allocation as  
 2 required by Judgment Exhibit "H" Paragraph 10. The court orders that those  
 3 priorities must be followed. Because the court has ordered that those priorities be  
 4 followed, court concludes that it cannot order these provisions of SYRA in  
 5 addition to SYRA's not being severable. At best SYRA is ambiguous with respect  
 6 to following the priorities set by the Judgment and the Court Approved  
 7 Management Agreements. At worst, SYRA contradicts them.

8 \*So, the court concludes that previous to SYRA, the Desalter water  
 9 production/pumping could be offset from a prioritized list of sources including New  
 10 Yield (induced recharge). Now under SYRA:

11 1) All of the induced recharge gets allocated to water produced/pumped by  
 12 the Desalters.

13 2) Watermaster reduces Safe Yield by 50% of the Desalter production up to  
 14 20,000 AFY.

15 3) Then, Watermaster adds to Safe Yield 50% of the Desalter production up  
 16 to 20,000 AFY, from water allocated to the Ag Pool, to make up for (aka backfill) the  
 17 reduction in Safe Yield allocated to Desalter production.

18 4) This means that the availability of Ag Pool water goes down and thereby the  
 19 availability of unproduced Ag Pool water for the priorities set forth in the Judgment  
 20 and the Court Approved Management Agreements. The priorities are also set forth in  
 21 Watermaster Rules and Regulations ¶6.3(a).

22 5) Elaborating on Example 1-A from Section IV.B.5 of this order above, the  
 23 court's analysis is as follows

| Example 1-B                | Explanation  | Comment  |
|----------------------------|--------------|--|
| Initial Ag Pool allocation | 82,800 AFY   | Judgment   |
| Ag Pool production/pumping | - 33,600 AFY | Assumption based the current credited production (pumping) |

|                                  |                  |  |
|----------------------------------|------------------|--|
|                                  |                  | for agricultural groundwater is about 33,600 AFY, but that includes agricultural land irrigated with reclaimed water. [The actual groundwater production for agricultural purposes is about 22,000 AFY. Jurupa Services District's response to Judge Reichert's Request for Clarification, March 22, 2016 page 2, lines 8-10.] |
| Initial balance after production | 49,200 AFY       | 82,800 acre-feet – 33,600 acre-feet = 49,200 acre-feet   |
| Conversion claims                | - 2000 acre-feet | Assumption: The subtraction for satisfying conversion claims before any reallocation. (1000 acres x 2.0 acre feet of water/one acre converted = 2000 acre-feet).   |
| Balance:                         | 47,200 AFY       | 49,200 acre-feet - 2000 acre-feet = 47,200 acre-feet. Ag Pool Water available after conversion priority claims pursuant to Judgment Exhibit "H" Paragraph 10   |
| Reduction for Early Transfers    | - 32,800 AFY     | Basic Early Transfer from 82,800 AFY allocation leaving 50,000 AFY for the Ag Pool itself to produce/pump and for  |

|    |         |            |                                  |
|----|---------|------------|----------------------------------|
| 1  |         |            | additional claims by the         |
| 2  |         |            | Appropriative Pool pursuant to   |
| 3  |         |            | Peace I and Peace II.*           |
| 4  | Balance | 14,400 AFY | (47,200 acre-feet -32,800 acre-  |
| 5  |         |            | feet = 14,400 acre-feet. This is |
| 6  |         |            | the Ag Pool water available for  |
| 7  |         |            | reallocation to Appropriative    |
| 8  |         |            | Pool after subtraction of        |
| 9  |         |            | conversion priority claims of    |
| 10 |         |            | 2,000 acre-feet from and the     |
| 11 |         |            | 32,800 Early Transfer of         |
| 12 |         |            | unproduced/unpumped from the     |
| 13 |         |            | allotment of Ag Pool water.      |

14  
15 Now, to examine the effect of SYRA on the Appropriative Pool:

|    |                       |              |                                    |
|----|-----------------------|--------------|------------------------------------|
| 16 | Starting balance      | 14,400 AFY   | Total Ag Pool water available for  |
| 17 | available Ag Pool     |              | production/pumping from the        |
| 18 | water                 |              | example above                      |
| 19 | Desalter reallocation | - 20,000 AFY | SYRA Desalter reallocation:        |
| 20 |                       |              | 20,000 AFY of Desalter             |
| 21 |                       |              | production is allocated from Ag    |
| 22 |                       |              | Pool water to Safe Yield.          |
| 23 | Balance:              | - 5,600 AFY  | A negative amount. This            |
| 24 |                       |              | plausible scenario assumes 2,000   |
| 25 |                       |              | AFY of conversion claims. The      |
| 26 |                       |              | negative balance shows that this   |
| 27 |                       |              | scenario under SYRA would not      |
| 28 |                       |              | leave sufficient Ag Pool water for |

|  |  |  |
|--|--|--|
|  |  | that amount of conversion claims. In order to meet conversion claims and Early Transfer allocations, the Ag Pool would only be able to produce/pump 26,000 AFY, well below their current credited pumping. Calculation follows:<br>82,800/initial allocation<br>- 26,000/pumped = 56,800<br>56,800 - 2,000/conversion claims = 54,800<br>54,800 - 32,800/Early Transfer = 20,000<br>20,000 - 20,000/Desalter reduction from Ag Pool Allocation = 0 |
|--|--|--|

The court concludes that there is no basis in the Judgement or any of the Court Approved Management Agreements for the post SYRA result identified in the plausible scenario above.

D. Further Analysis and orders:

1. In addition to SYRA's not being severable, the court denies Watermaster's motion with respect to the implementation of ¶5.2 and ¶5.3 of SYRA for the following reason:

- a) The court concludes that SYRA paragraphs 5.2 and 5.3 fundamentally change the allocations of Appropriative Pool and of Ag Pool water. Those fundamental changes are inconsistent with the Judgment and the

1 Court Approved Management Agreements

- 2 b) Peace I and Peace II both define Desalter production as within the  
3 definition of New Yield and therefore outside of the definition of Safe  
4 Yield. Through a several step re-allocation reassignment described  
5 above and summarized in this section of the court's order, SYRA now  
6 moves Desalter production into Safe Yield. The parties have not  
7 demonstrated any legal or practical requirement basis which allows this.  
8 Peace I and Peace II prohibit this.
- 9 c) The court concludes that Peace II Agreement Paragraphs 6.2(a)(iii) and  
10 7.1 provide that through 2030 (the initial term of Peace I Agreement as  
11 set forth in ¶8.2) recharge attributable to the Desalters is allocated for  
12 Desalter Production and not allocated as Safe Yield producible (*i.e.*,  
13 water available to be pumped without a replenishment obligation by  
14 purchase or otherwise).
- 15 I) Peace II ¶7.1 excluded New Yield attributable to the Desalters from  
16 a determination of Safe Yield, at least for the 30 year term of Peace  
17 Agreement.
- 18 II) Peace I ¶1.1(aa) defines New Yield to include induced recharge.  
19 (a) The court finds that induced recharge includes Desalter-  
20 induced recharge.
- 21 III) The court finds that Peace I ¶7.5 defines replenishment water for  
22 the Desalters includes New Yield, but not Safe Yield.
- 23 IV) The court finds that Peace II ¶7.1 states that no party can  
24 incorporate New Yield attributable to the Desalters into Safe Yield.  
25 (a) In contradiction to Peace I and Peace II, SYRA ¶5.2(a)  
26 explicitly defines Desalter-induced recharge as Safe Yield, in  
27 contradiction to Peace I and Peace II.
- 28 V) In contradiction to the Peace I and Peace II, the court finds that

1 SYRA attempts to incorporate New Yield from the Desalters into  
2 Safe Yield through the accounting method of 1) taking Desalter  
3 induced yield water coming from Desalter-induced recharge, then 2)  
4 moving that water into Safe Yield, then 3) backfilling Safe Yield  
5 from unproduced Ag Pool water.

6 (a) This is an unacceptable circumvention of the court's orders  
7 based on Peace I and Peace II.

- 8 d) The analysis above shows that these SYRA provisions are contrary to  
9 the Judgment and the Court Approved Management Agreements,  
10 specifically Peace I and Peace II. These SRYA provisions can prevent  
11 the application of the Judgment provisions regarding conversion claims.  
12 They are invalid.
- 13 e) There is no basis in the Judgment or the Court Approved Management  
14 Agreements for the attribution of water production from Desalters into  
15 the definition of Safe Yield.
- 16 f) There is no basis in the Judgment or any of the Court Approved  
17 Management Agreements for the splitting and reallocation of Desalter  
18 production/pumping to one-half to Desalter-induced recharge and one-  
19 half to Safe Yield.
- 20 g) There is no basis in the Judgment or any of the Court Approved  
21 Management Agreements to reallocate Ag Pool water to Safe Yield to  
22 make up for the Safe Yield reallocated to the Desalters.
- 23 h) Due to the Desalters, there is now recharge coming from the Santa Ana  
24 River back into the Chino Basin. SYRA Paragraph 5.2(b) takes the  
25 Peace I and Peace II agreements one step—wrongfully—farther by  
26 identifying how this recharge quantity will be estimated, *i.e.*, 50% of  
27 Desalter Production, and then further specifies that amount of recharge  
28 will be allocated to Desalter production and not to the parties as part of

1 their allocation of the Safe Yield. There is no legal basis in the  
2 Judgment or the Court Approved Management Agreements for this  
3 redefinition of Safe Yield to include of 50% of Desalter Production up  
4 to 20,000 AFY through a mechanism of passing the amounts through  
5 the Appropriative Pool allocation.

6 i) SYRA attempts now to remove the special exception for New Yield  
7 from Desalter induced recharge and production and incorporate it into  
8 Safe Yield. The mechanism by which SYRA attempts to do this is by 1)  
9 taking half of the Desalter production and sourcing that  
10 production/pumping from Desalter induced recharge from the Santa  
11 Ana River and 2) sourcing the other half from the Appropriative Pool  
12 through unproduced Ag Pool water. The court concludes and finds  
13 that this attempt is not justified because it can interfere with the priority  
14 of claims on unproduced Ag Pool water set forth in the judgment and  
15 the Court-Approved Management Agreements.

16 I) The court notes that Peace II, Article VII-Yield Accounting, ¶7.2(d)  
17 discusses a contingency if Western Municipal Water District  
18 (WMWD) and the Appropriative Pool “do not reach agreement on  
19 apportionment of controlled overdraft of Future Desalters, then no  
20 later than August 31, 2009, the members of the Appropriative Pool  
21 will submit a plan to Watermaster that achieves the identified goals  
22 of increasing the physical capacity of the Desalters and potable water  
23 use of approximately 40,000 acre-feet of groundwater production  
24 from the Desalters from the Basin no later than 2012.”

25 II) The court concludes that the Desalter production of 40,000 acre-feet  
26 has been under discussion since Peace II in 2007.

27 III) However, the court cannot accept the resolution set forth in  
28 SYRA for the reasons stated in this order.

- 1           j)       SYRA ¶5.2 and ¶5.3 contradict and conflict with Peace I and Peace II.
- 2                   I) Peace II ¶7.1 requires neither Watermaster nor the parties to request
- 3                         that safe yield be recalculated in a manner that incorporates New
- 4                         Yield *attributable to the Desalters* into the determination of Safe Yield
- 5                         so that this source of supply will be available for Desalter
- 6                         Production rather than for use by individual parties to the judgment.
- 7                         (Emphasis in original.)
- 8                   II) SYRA now includes New Yield in the determination of Safe Yield in
- 9                         two ways.
- 10                   (a)     First, SYRA takes up to 20,000 AFY away from Safe Yield
- 11                         through Desalter Production.
- 12                   (b)     Second, SYRA adds back up to 20,000 AFY to Safe Yield
- 13                         from unproduced Ag Pool water.
- 14                   (c)     The net change to Safe Yield is 0, but available Ag Pool water
- 15                         for allocation is reduced up to 20,000 AFY. This re-allocation
- 16                         and re-accounting, is not justified or supported in the Peace I,
- 17                         Peace II, Watermaster Rules and Regulations, or the court's
- 18                         orders of implementation, the Judgment, or the CAMAs.
- 19                   (d)     The following chain shows SYRA's violations of the previous
- 20                         orders:
- 21                         (i)     Desalter-induced recharge is New Yield. (Peace
- 22                                 ¶1(aa).)
- 23                         (ii)    Peace II ¶7.1 prevents New Yield from being
- 24                                 incorporated within Safe Yield.
- 25                         (iii)   SYRA moves 20,000 AFY of Desalter-induced
- 26                                 recharge to the Ag Pool.
- 27                         (iv)   Then SYRA moves the 20,000 of Desalter-induced
- 28                                 recharge (now characterized as Ag Pool Water) into

Safe Yield.

- (v) Therefore, SRYA recalculates Safe Yield to incorporate New Yield in violation of Peace II ¶7.1
- (vi) Moving the 20,000 AFY of Desalter-induced Recharge through the portal of the Ag Pool water does not change its definition of New Yield.

- k) The court does not find a legal ~~or factual~~ basis for determining a post-2030 priority among land use conversion and early transfer claims. The priority is set forth in the judgment and as specified in this order
- l) In addition to SYRA's not being severable, the court's 2010 order does not require the implementation of ¶5.2 or ¶5.3.

Section III.(6) of the October 8, 2010 order states:

Watermaster is ordered to utilize the procedures regarding the re-allocation of surplus Agricultural Pool water the event of a decline in Safe Yield as described in the December 2008 staff report and the December 4, 2008 memorandum from legal counsel. Specifically, in the event that Operating Safe Yield is reduced because of a reduction in Safe Yield, Watermaster will follow the hierarchy provided for in the Judgment, exhibit "H," by first applying the unproduced Agricultural Pool water to compensate Appropriative Pool members for the reduction in Safe Yield. (Judgment, Exhibit "H," paragraph 10 (a).) If there is unallocated water left, Watermaster will then follow the remainder of the hierarchy and reallocate unallocated Agricultural Pool water next to conversion claims then to supplement the Operating Safe Yield without regard to reductions in Safe Yield according to the guidance provided by Peace Agreement I & II and Watermaster's rules and regulations as amended. If, after

applying the unallocated Agricultural Pool water to compensate the Appropriate Pool members for the reduction in Safe Yield, the actual combined production from the Safe Yield made available to the Agricultural Pool, which includes overlying Agricultural Pool uses combined with land use conversions and the Early Transfer, exceeds 82,800 in any year, the amount of water available to members of the Appropriate Pool shall be reduced pro rata in proportion to the benefits received according to the procedures outlined in Watermaster Rules and Regulations.

I) In considering the reference to Watermaster Rules and Regulations in the preceding paragraph, if the order is vague, the court now clarifies it. In the instant order, the court has clarified that Watermaster must follow the priorities set forth in the Judgment for allocations of unproduced Ag Pool water.

II) The court has the continuing jurisdiction to interpret and apply its previous orders in light of changing circumstances. In light of the instant motion, the court is doing so.

III) JCSD correctly points out that pursuant to the Judgment ¶15 the court is authorized “to make such further or supplemental orders or directions as may be necessary or appropriate for interpretation, enforcement or tearing out of this judgment . . . .”

IV) Because there has not been a reset in Safe Yield, the court does not find that there has been a detrimental reliance on the court’s October 8, 2010 Order. This would not be the first time that the court’s orders and interpretations thereof have the subject of further litigation.

V) Watermaster’s further response to order for additional briefing,

1 filed April 11, page 3, lines 15-19 states:

2 Both responses provided by the City of Chino and JCSD omit  
3 the key fact: Section 6.3(c) Watermaster Rules and Regulations,  
4 as amended pursuant to Peace II measures provides that water  
5 unused by members of the Agricultural Pool shall be divided  
6 equally between Land Use Conversions and Early Transfers. The  
7 Court's October 8, 2010 Order provides that this shall be done  
8 even if the safe yield declines. For the first time, approximately  
9 five years following this Order, the City and JCSD would set it  
10 aside and thereby unwind accounting, court approvals, and  
11 agreements impliedly if not expressly made in reliance thereon.

12 m) No party has offered any specific detriment that would occur from the  
13 court's instant orders regarding the priorities.

14 n) Watermaster is relying on its own interpretation of its own rules and  
15 regulations which the court does not accept for the reasons set forth  
16 herein. The court has clarified its October 8, 2010 Order.

17 I) Watermaster cannot use its own interpretations of the court's  
18 orders to contradict the court's interpretation. The final decision is the  
19 court's, not Watermaster's.

20 II) If there is any ambiguity that Watermaster finds the current  
21 circumstances for the application of that Order III.(6) the court clarifies  
22 it now. SYRA's reference to that order's provision does not help in its  
23 clarification or application.

24 III) Watermaster argues that "in the event that Operating Safe  
25 Yield is reduced because of a reduction in Safe Yield, Watermaster will  
26 follow the reallocation hierarchy provided for in the Appropriative Pool  
27 Pooling Plan by first applying the unallocated Ag Pool water to  
28 compensate the Appropriate Pool members for the reduction in safe

1 yield. (Restated Judgment, exhibit “H), paragraph 10 (a).) If, thereafter,  
2 there is unallocated water left, Watermaster then followed the  
3 remainder of the hierarchy and reallocate unallocated agricultural Pool  
4 water next to land use conversion claims and Early Transfer, and then  
5 to supplement the Operating Safe Yield without regard reductions in  
6 safe yield.” (Watermaster’s Reply to Oppositions to Motion regarding  
7 2015 Safe Yield Recent Agreement, Amendment Restated Judgment,  
8 Paragraph 6, page 24, lines 7-14.)

9 IV) This argument equates land use conversion claims and  
10 Early transfer claims. This argument is incorrect for the reasons stated  
11 herein. Additionally:

12 (a) The court’s order filed October 8, 2010, paragraph III.(6)  
13 is quoted in full in section “I” above:

14 (b) This paragraph III.(6) provides no basis to equate land use  
15 conversions and Early Transfers. The specific language of the  
16 order requires Watermaster to follow the hierarchy in Judgment,  
17 Exhibit “H” which does not include, or even mention, Early  
18 Transfers. Early transfers were an aspect of Peace I, and the  
19 court has interpreted and ordered the hierarchy to require  
20 conversion claims to have priority over Early Transfer claims.

21 o) Additionally, the court rejects and denies the implementation of SYRA  
22 ¶5.3 specifically because, as with SYRA ¶5.2, this provision has the  
23 same problems of interpretation of the court’s 2010 Order Approving  
24 Watermaster’s Compliance with Condition Subsequent Number Eight  
25 and Approving Procedures to be used to Allocate Surplus Agricultural  
26 Pool Water in the Event of a Decline in Safe Yield.

27 p) Watermaster’s erroneous interpretation of the order of priorities is not a  
28 basis to continue that erroneous interpretation. If Watermaster has to

1 make a reallocation, then it must do so in order to follow the court's  
2 order. A wrong practice can be long-standing, and still be wrong. A  
3 wrong practice cannot be a basis of prejudice.

4 q) The court rejects any argument that this issue is subject to issue  
5 preclusion. The specific issues raised by the oppositions to the motion  
6 have not been specifically addressed by the court. They are not barred  
7 by laches. The issues have been timely raised within the context of the  
8 instant motion, and the court always retains jurisdiction to modify its  
9 orders as those orders are drawn to the attention of the court, and the  
10 court determines they require modification for the reasons set forth in  
11 this order.

12  
13 E. Dispute re priority of claims

14 A dispute has arisen concerning the priority of claims. The dispute concerns  
15 the priority of allocation claims to unproduced/unpumped Ag Pool water. The 1978  
16 Judgment, Exhibit "H," Paragraph 10 was very specific as set forth in section A of  
17 this ruling above. For convenience, it is repeated here.

18 Paragraph 10 described "Unallocated Safe Yield Water" as follows:

19 To the extent that, in any 5 years, any portion of the share of Safe Yield  
20 allocated to the Overlying (Agricultural) Pool is not produced, such  
21 water shall be available for reallocation to members of the

22 Appropriative Pool as follows:

23 (a) Priorities. Such allocation shall be made in the following sequence:

24 (1) to supplement, and the particular year, water available from  
25 Operating Safe Yield to compensate for any reduction in the Safe Yield  
26 by reason of recalculation thereof after the tenth year of operation  
27 hereunder.

28 (2) pursuant to conversion claims as defined in Subparagraph (b)

1 hereof.

2 (3) as a supplement to Operating Safe Yield, without regard to  
3 reductions in Safe Yield.”

4 Confusion has arisen with respect to the relationship between the Judgment,  
5 Exhibit “H,” Paragraph 10 on the one hand, and Watermaster Rules and Regulations  
6 ¶6.3(a) on the other. Watermaster Rules and Regulations ¶6.3(a) states as follows:

7 Accounting of Unallocated Agricultural Portion of Safe Yield. In each  
8 year, the 82,800 acre-feet being that portion of the Safe Yield Made  
9 available to the Agricultural Pool under the Judgment, shall be made  
10 available:

- 11 (i) To the Agricultural Pool to satisfy all demands for overlying  
12 Agricultural Pool lands;
- 13 (ii) To land-use conversions were completed prior to October 1,  
14 2000;
- 15 (iii) To land use conversions that have been completed after October  
16 1, 2000; and
- 17 (iv) To the Early Transfer of 32,800 acre-feet from the Agricultural  
18 Pool to the Appropriative Pool in accordance with their pro-rather  
19 assigned share of Operating State Yield.

20 The confusion arises because Watermaster Rules and Regulation ¶6.3(a) does  
21 not explicitly confirm the priority of allegations set forth in the Judgment and as  
22 ordered by the court.

23 Chino has argued that

24 [T]he members of the Appropriative Pool have received the right to  
25 participate in annual allocations of the Unproduced Agricultural Pool  
26 Water instead of every five years called “Early Transfers” (Paragraph  
27 5.3(f-g), Peace Agreement) and the right to an equal priority of Early  
28 Transfers with Land Use Conversion Claims, which have a higher

1 priority under the Judgment, in order to maximize the amount of their  
2 Early Transfer water to the appropriators do not have Land Use  
3 Conversion Claims. (Paragraph 3.1(a)(i) and Attachment "F", Peace II  
4 Agreement). City of Chino's Opposition Watermaster Motion  
5 regarding 2015 Safe Yield Reset Agreement, Amendment of Restated  
6 Judgment, Paragraph 6, page 13, lines 19-25.

7 Attachment "F" refers to the Watermaster Rules and Regulations 6.3(c). As  
8 stated above, the court finds Watermaster Rules and Regulations 6.3(c) ambiguous.

9 The court finds that the Judgment must govern and take priority and  
10 precedent for the interpretation of any Watermaster rule or regulation, including  
11 Watermaster Rules and Regulations 6.3(c).

12  
13 **At this time, the court additionally orders as follows:**

14 A. The order of priorities set forth in the Judgment, Exhibit "H," Paragraph  
15 10 must be followed; and

16 B. Watermaster Rules and Regulations ¶ 6.3, and particularly ¶¶ 6.3(a) and (c),  
17 are to be interpreted to follow the priorities set forth in Judgment, Exhibit "H,"  
18 Paragraph 10. In particular, the court orders conversion claims are to receive a  
19 higher priority than Early Transfer claims for the following reasons:

20 (1) The conversion claims are set forth in the judgment;

21 (2) Early Transfer claims were a creation of Peace I;

22 (3) Early Transfer claims did not affect the priority of claims set forth in  
23 the judgment;

24 (4) Early Transfer claims were ordered after the judgment and so must  
25 be considered subordinate to the original terms of the judgment.

26 (5) The parties to Peace I made their agreement in the context of the  
27 judgment and therefore used the Judgment priorities as a basis for additional  
28 allocations of Ag Pool water.

**VI. SAFE STORAGE MANAGEMENT MEASURES**

A. Through the facilitation and nondisclosure agreement (FANDA) Watermaster attempted to facilitate an agreement among all parties avoid an accelerated cumulative draw on Excess Carry Over stored water in order to avoid undue risks. SYRA had provisions to establish a mechanism for a safe storage reserve of 130,000 AF of water in the non-Supplemental Water storage accounts of the members of the Appropriative Pool as a reserve sufficient to protect the Basin. However, the concern for basin protection was balanced with temporary needs in the event of an emergency or to support Desalter Replenishment. Up to 100,000 AF could be accessed in the event of an emergency subject to conditions

- a) The plan which Watermaster attempted to facilitate is identified in SYRA as “the safe storage reserve and safe storage management plan” or the safe storage management measures (SSMM).
- b) The City of Chino (Chino) has the largest component of Excess Carry-Over water and was the most significantly affected party.
- c) Chino refused to agree to SSMM.

B. The court rejects the adoption of the Safe Storage Management Measures set forth in the SYRA Article 6. The court is not going to set forth the provisions of SYRA Article 6 because the court is rejects the article as a whole.

C. The court rejects Article 6 of SYRA for the following reasons:

- 1. SYRA is not severable as set forth above.
- 2. Watermaster states that access to safe storage in the short term is extremely remote.
- 3. The volume in stored water accounts of Appropriative Pool members is

1 about 357,000 AF as of June 30, 2014.

2 4. The Judgment Parties presently lack the infrastructure capability (wells  
3 and pipelines) that would produce the quantity of water from storage that would  
4 trigger production from the safe storage reserve that is identified in SYRA.

5 5. Article 6 is essentially a statement of intent without specificity of  
6 implementation. The court refuses to consider or authorize an inchoate plan.

7 a) Although Watermaster argues that the Safe Storage Management  
8 Agreement provisions are still subject to “stakeholder process get to be  
9 initiated” (Watermaster’s Reply to Oppositions to Motion regarding  
10 2015 Safe Yield Reset Agreement, Amendment of Restated Judgment,  
11 Paragraph 6, page 1, line 18), the court does not approve policy  
12 statements and therefore rejects any implementation.

13 6. The Safe Storage Technical Memorandum (Exhibit E to the motion)  
14 does not set forth a factual basis for the court to order the parties to proceed with  
15 the provisions of Article 6. While the memorandum states that the SSMM will not  
16 cause Material Physical Injury or undesirable results, the memorandum does not  
17 include that the SSMM are essential to the OBMP.

18 7. The court notes that from 2000 to 2014, the short-term actual measured  
19 net recharge was less total rights allocated to the judgment Parties by as much as  
20 130,000 AF.

21 a) From this the court concludes that during this period from 2000 to  
22 2014, after offsets for production, there was recharge to the basin in  
23 excess of what water was actually produced by as much as 130,000 AF.

24 b) This recharge was accounted for in the storage of Excess Carry-Over  
25 water.

26 8. The court does not reach the arguments of Chino that the SSMM  
27 constitutes a “taking”.

28 9. The safe storage measures are not required by the physical solution of

1 the Judgment, Peace I, Peace II, the court approved management agreements, the  
2 OBMP, the court orders of implementation, or Article X, section 2 of the California  
3 Constitution.

4  
5  
6 **VII. The Safe Yield Reset and Ag Pool Water: Recalculation**

7 A. The court finds that the Safe Yield reset to 135,000 AFY is a “recalculation”  
8 within the definition of Judgment, Exhibit “H” ¶10.

9 1. SYRA used the term “reset” to describe lowering the Safe Yield to  
10 135,000 AFY.

11 a) Now that the court has rejected all of SYRA except the lowering of Safe  
12 Yield to 135,000 AFY, the court finds that “reset” is a legally unjustified  
13 and legally incorrect term for describing the lowering the Safe Yield to  
14 135,000 AFY. For the reasons stated herein, the court finds that  
15 lowering the Safe Yield to 135,000 is a recalculation within the  
16 definition of Judgment, Exhibit “H” ¶10(a)(1). For the rest of this  
17 order, the court will correctly use the term recalculation for lowering the  
18 Safe Yield from 140,000 AFY to 135,000 AFY.

19 b) Wildermuth himself calls it a recalculation. Exhibit 1 to his declaration  
20 is entitled Declaration of Mark Wildermuth-2013 Chino Basin  
21 Groundwater Model Update and *Recalculation* of Safe Yield Pursuant to  
22 all the Peace Agreements. [Emphasis added.]

23 c) The recalculation to 135,000 is pursuant to the “tenth year” of  
24 operation evaluation required by the Judgment.

25 d) Watermaster and the City of Ontario argue to the contrary, but the  
26 “reset” lowering of Safe Yield fits any ordinary definition of the word  
27 “recalculation.”

28 I) The whole point of the SYRA motion, related motions, and series of

1 hearings has been for the court to determine how to integrate the  
 2 reduction of the Safe Yield from 140,000 AFY to 135,000 AFY.  
 3 The court finds this reduction to be a recalculation of the Safe Yield  
 4 into the current reality of the Chino Basin.

5 (a) In the context of SYRA, the use of the term “reset” might have  
 6 made some legal sense. However, now that the court has  
 7 rejected everything but the reduction, the label “reset” has no  
 8 basis in fact or law.

9 II) The court cannot find any other way to reconcile these provisions and  
 10 their interpretations while keeping the ruling consistent with reality.  
 11 The reduction in Safe Yield is a recalculation, no matter how subtle the  
 12 attorneys’ arguments are.

13 2. Therefore, the court finds and orders that the first 5,000 AFY of any  
 14 unproduced Ag Pool water now has a top priority over any other claims, such as  
 15 conversion claims and early transfers, and that 5,000 AFY of Ag Pool water be  
 16 allocated to Operating Safe Yield pursuant to Judgment Exhibit H ¶10(a).

17 a) This 5,000 AFY has top priority because it is part of the Judgment.

18 b) To further illustrate the court’s orders, based on the tables in sections  
 19 IV.B.5 and V.C.5 above

| Example 1-B                | Explanation  | Comment  |
|----------------------------|--------------|--|
| Initial Ag Pool allocation | 82,800 AFY   | Judgment   |
| Subtract 5,000 AFY         | - 5,000      | Safe Yield recalculation reduction pursuant to Judgment Exhibit H ¶10                      |
| Ag Pool production/pumping | - 33,600 AFY | Assumption based the current credited production (pumping) for agricultural groundwater is |

This is the Ag Pool water available for reallocation to Appropriative Pool after subtraction of the recalculation reallocation, the conversion priority claims of 2,000 acre-feet from and the 32,800 Early Transfer of unproduced/unpumped from the allotment of Ag Pool water. |

**VIII. Safe Yield Reset and Desalter-Induced Recharge**

The court concludes and orders that Desalter-Induced Recharge is only to be applied to offset Desalter production. The court’s analysis involves going back to the basics of the judgment and the Peace Agreements.

**A. The Revised Judgment**

1. The Judgment ¶I.4.(x) defines “Safe Yield” as “the long-term average annual quantity of groundwater . . . which can be produced from the Basin under cultural conditions of a particular year without causing an undesirable result.”

2. The Judgment ¶I.4.(l) defines “Operating Safe Yield” as “the annual amount of water which Watermaster shall determine, pursuant to the criteria specified in Exhibit “T”, can be produced from Chino Basin by the Appropriative Pool parties free of replenishment obligation under the Physical Solution herein.

a) Exhibit “T” is the Engineering Appendix which has come to include the

1 definitions of Hydraulic Control, Re-Operation water, and Desalter  
2 production.

- 3 3. Judgment Exhibit "H" ¶10 Unallocated Safe Yield Water states:  
4 "to the extent that, in any five years, any portion of the share of  
5 Safe Yield allocated to the Overlying (Agricultural) pool is not  
6 produced, such water shall be available for reallocation to members of  
7 the appropriative pool, as follows:

8 (a) Priorities.—Such allocation shall be made in the following sequence:

9 (1) to supplement, in the particular year, water available from  
10 Operating Safe Yield to compensate for any reduction in the Safe Yield  
11 by reason of recalculation thereof after the tenth year of operation  
12 hereunder.

13 (2) pursuant to conversion claims as defined in Subparagraph (b)  
14 hereof.

15 (3) as a supplement to Operating Safe Yield, without regard to  
16 reductions in Safe Yield.

17  
18 B. The 2000 Peace Agreement I

19 1. Peace I Section I(ee) defines "Operating Safe Yield" as the "annual  
20 amount of groundwater which Watermaster shall determine, pursuant to criteria  
21 specified in Exhibit "T" to the judgment, can be produced from Chino Basin by the  
22 Appropriative Pool free of Replenishment obligation under the Physical Solution.  
23 Watermaster shall include any New Yield in determining Operating Safe Yield."

- 24 a) This is a modification of the definition of "Operating Safe Yield" from  
25 the Judgment. In fact, the court notes "IV-Mutual Covenants, ¶ 4.5  
26 Construction of "Operating Yield" Under the Judgment. Exhibit I to  
27 the Judgment shall be construed to authorize Watermaster to include  
28 New Yield as a component of Operating Safe Yield."

C. The 2007 Peace Agreement II

1. Article VII Yield Accounting, ¶7.1 New Yield Attributable to the Desalters states “for the initial term of the Peace Agreement, neither Watermaster nor the Parties will request that Safe Yield be recalculated in a manner that incorporates New Yield *attributable to the Desalters* into the determination of Safe Yield so that this source of supply will be available for Desalter Production rather than for use by individual parties to the Judgment.” (Emphasis in original.)

D. The Safe Yield Recalculation and Desalter-Induced Recharge

1. Watermaster correctly states that that desalter induced recharge can only be used to offset desalter production. From this Watermaster concludes that Safe Yield of 135,000 acre-feet per year must include Desalter-induced recharge.

This conclusion is wrong.

- a) Through many avenues, Watermaster has attempted to include Desalter-Induced Recharge (with the new abbreviation of “DIR”) within the definition of Safe Yield.
- b) Watermaster has never explicitly offered an explanation of why Watermaster has attempted so diligently to convince the court to include Desalter-Induced Recharge within the definition of Safe Yield.
- I) The court considers that Watermaster’s explanation might include an argument that if Desalter-Induced Recharge is not included within the definition of Safe Yield, the parties could produce/pump water from Desalters without limit, with the result that water could be drained from the Santa Ana River without limit. That result would be not only detrimental to the hydrology of the entire region, but also legally unjustified.
- c) In its latest argument, Watermaster has offered to “sequester” the

1 portion of Safe Yield attributable to Desalter-Induced Recharge.

2 I) The court does not accept this characterization of Desalter  
3 production/pumping allocation because it is simply a characterization  
4 of an accounting.

5 II) The “sequestration” has no basis in the CAMA’s and adds a new, vague,  
6 undefined term to an already complicated structure of accounting.

7 III) Watermaster argues “that Desalter-Induced Recharge is an inflow  
8 to the Basin and therefore a component of Safe Yield.”

9 (a) The court rejects this argument because it contradicts the  
10 requirement of Peace II that for the initial term of the Peace  
11 Agreement, Safe Yield will not be recalculated to include New Yield  
12 attributable to the Desalters.

13 (b) Desalter-Induced Recharge is the source of (and offset to) New  
14 Yield attributable to the Desalters. That New Yield cannot be  
15 included in Safe Yield. So, so under Peace II, Safe Yield also does  
16 not include Desalter-Induced Recharge. (Peace I ¶ 1.1(aa)-definition  
17 of New Yield; Peace I ¶7.5-Replenishment Water; Peace II ¶6.2-  
18 Peace II Desalter Production Offsets.)

19 IV) The Responding AP Members argue that the court can only be  
20 consistent in its orders if the court resets the Safe Yield to 115,000  
21 AFY. The court also rejects this argument for the following reasons.

22 (a) Using Watermaster's own proposal, the court recognizes that there is  
23 some logic to the position of the Responding AP Members because  
24 1) if the 20,000 AFY is “sequestered” that it is not available for  
25 production/pumping without a replenishment obligation and 2)  
26 then the reality is the safe yield should be 135,000 AFY - 20,000  
27 AFY for a net of 115,000 AFY.

28 (b) However, the court concludes that the structure set up by the

1 Judgment, Peace I, and Peace II require that there be separate  
2 analyses for Safe Yield and New Yield attributable to the Desalters.

3 (i) The analysis for Safe Yield is illustrated in this order Sec. VII.5.a  
4 above.

5 (ii) The analysis for Desalter-Induced Recharge and New Yield  
6 attributable to the Desalters is described in Peace I and Peace II  
7 and the further order as set forth herein.

8 (iii) Watermaster has been accounting for these analyses since 2007,  
9 so it should not be a problem for Watermaster to to continue to  
10 do so.

11 (c) The Responding AP Members also argues that the technical  
12 reports show that the basin can safely only sustain 135,000 AFY.

13 (d) However, in Exhibit 1 to the Declaration of Mark Wildermuth -  
14 2013 Chino Basin Groundwater Model Update and Recalculation of  
15 Safe Yield Pursuant to Peace Agreements, section 1.2.3, "the  
16 updated Watermaster Model was used to estimate Santa Ana River  
17 Underflow New Yield (SARUNY) from the desalters and  
18 reoperation from both the calibration and planning periods.  
19 SARUNY means the same thing as that term *Desalter Induced Recharge*  
20 as used in the 2015 Safe Yield Reset Agreement." This definition is  
21 repeated in section 7.3.7.

22 (e) The Wildermuth declaration filed March 10, 2017, with the Chino  
23 Basin Watermaster Response to February 22, 2017 Order section  
24 7.3.7 which states:

25 (i) "The net Santa Ana River recharge in the fiscal year spending  
26 July 1999 through June 2000 [one year] is the baseline from  
27 which to measure SARUNY, which was estimated to be  
28 -2,153 acre-ft/yr, indicating that the Chino Basin discharged to

1 the Santa Ana River more water than was recharged by the River  
2 into the Basin. . . . Table 7-10 compares Chino Desalter  
3 production and SARUNY over the period of July 2000 through  
4 July 2030. . . . The effect of 's the Chino Desalters and  
5 reoperation becomes clear in 2005 when SARUNY reaches about  
6 50 percent of CDA production. The New Yield results from the  
7 implementation of the Chino Desalters is consistent with the  
8 planning estimates that were assumed during the development of  
9 the Peace Agreements."

- 10 (f) Table 7-10 shows that starting in 2017, the ratio of new yield to  
11 CDA production is about an average of 45 percent, meaning that  
12 New Yield Desalter-Induced Recharge those years is about 45% of  
13 the Desalter production.
- 14 (g) From these facts the court concludes that the Wildermuth Safe Yield  
15 reset/recalculation has taken into account the Desalter-Induced  
16 Recharge and production, so there is no need to reduce the Safe  
17 Yield to 115,000 AFY as argued by the Responding AP Members.
- 18 (h) The Peace Agreement offsets for new yield production attributable  
19 to the Desalters are an accounting requirement process, not a feature  
20 of determination of Safe Yield.
- 21 (i) The court also concludes that the reset/recalculation has included  
22 the contractual features of the Peace Agreements, and one of those  
23 features is that Safe Yield not be recalculated to incorporate New  
24 Yield attributable to the Desalters. Wildermuth has considered this  
25 feature.
- 26 (j) Again, therefore the safe yield of 135,000 AFY does not include  
27 New Yield attributable to the Desalters.

28 2. The court still concludes for the term of Peace I (*i.e.*, until 2030), Safe

1 Yield not be recalculated in a manner that incorporates New Yield attributable to the  
2 Desalters into the determination of Safe Yield.

3 a) The 20,000 AFY of Desalter-Induced Recharge is not included with the  
4 definition of Safe Yield for the term of the Peace Agreements. To rule  
5 otherwise would contradict the Peace Agreements.

6 b) The court analogizes its ruling to the controlled overdraft allowed to  
7 achieve hydraulic control. That aspect of production/pumping was not  
8 allocated to Safe Yield. The court orders that Desalter-Induced  
9 Recharge New Yield remain unallocated to Safe Yield.

10 c) The court does not address the City of Chino's briefing regarding the  
11 Safe Yield Implementation Replenishment Accounting Illustration (Per  
12 Peace II agreement, Section 6.2 (PIIA, 6.2) and June 11, 2015 Key  
13 Principles) Watermaster motion filed October 23, 2015, Exhibit "F"  
14 Attachment 2 for the following reasons:

15 I) Chino asks if the Column G – Desalter-Induced Recharge  
16 replenishment water was coming from Desalter production.

17 II) Footnote 4 for this Column G states that "the desalter-induced  
18 recharge projection in the table is now shown at 50% of the annual total  
19 desalter production for years 2015 through 2030. Desalter -induced  
20 recharge from 2001 to 2014 (187,000 acre-feet) will be deemed Safe  
21 Yield and not available to offset Desalter production."

22 III) As part of its order that SYRA cannot be implemented, the court  
23 rejects the Safe Yield Reset Implementation Desalter Replenishment  
24 Accounting Illustration.

25 IV) The City of Ontario has argued that Desalter Induced Recharge  
26 to offset Desalter production should be "backfilled" from Safe Yield.

27 The court rejects this argument for the following reasons:

28 (a) This is merely a characterization of what SYRA proposed to do, and,

1 for the reasons already stated, the court has rejected SYRA except  
2 for the Safe Yield recalculation.

3 (b) The Judgment, the Peace Agreements, and the CAMA's do not  
4 support this accounting, again for the reasons already stated.

5 (c) Again, for the reasons stated herein, the court rejects that Ontario's  
6 argument that a Safe Yield recalculation to 135,000 AFY is not a  
7 "Safe Yield recalculation." The argument has no merit and is  
8 completely unpersuasive.

9 (d) The court finds that the definitions of Safe Yield and New Yield are  
10 sufficiently set forth in the Judgment, Peace I and Peace II.

11 (i) Watermaster does not point to any specific conflict between the  
12 court's current/instant order and the court's order implementing  
13 Watermaster Resolution 07-05, and the court finds none.

14 (ii) The court reaffirms the definitions of Peace II which have been  
15 in effect for 10 years, and of course the definitions of the  
16 Judgement and Peace I.

17 (iii) The court finds no basis for Watermaster's attempt to define  
18 Desalter-Induced Recharge into directly, indirectly, Safe Yield or  
19 by a "sequester."

20 (iv) In reaffirming the definitions of the Judgment, Peace I, and  
21 Peace II, the court of course also notes the definition of "Safe  
22 Yield" in the Judgment ¶I.1(x) inclusive of "undesirable result,"  
23 and the "Material Physical Injury" of Peace I ¶I.1 (y).

24 V) The court finds and orders that Desalter production is not Safe Yield  
25 and Desalter production is to be offset only as provided in Peace II.  
26  
27

28 **IX. Additional Bases for Rulings**

1 A. The court has refused to implement the sections of SYRA identified above for  
2 the reasons set forth above. In the court's view, those reasons are sufficient under  
3 the law. Therefore, the court has not addressed other objections raised by the  
4 parties, such as those of the City of Chino, that Watermaster has failed to prove a  
5 change in circumstances, that Watermaster has improperly advocated for certain  
6 parties, that the parties are collaterally estopped from re-litigating the parties' rights,  
7 that the parties are equitably estopped from reducing their replenishment obligations,  
8 that SYRA fails to comply with CEQA, that SYRA provisions resulted in an unlawful  
9 taking of Chino's property.

10  
11 B. Although the court understands the necessity of accounting for Desalter  
12 induced recharge from the Santa Ana River, the court does not find a basis in the  
13 law, the Judgment, or the Court Approved Management Agreements for  
14 simultaneously reducing Safe Yield and adding unproduced/unpumped Ag Pool  
15 water to account for Desalter induced recharge.

16 1. Watermaster argues that the court should approve SYRA because it is  
17 only a confirmation of "interpretation of the manner in which Watermaster should  
18 comply with the provisions of the Court Approved Management Agreements.  
19 (Watermaster's Reply to Oppositions to Motion regarding 2015 Safe Yield Reset  
20 Agreement, Amendment of Restated Judgment, Paragraph 6, page 10, line 26.)

21 a) The court does not accept this argument. The court interprets SYRA as  
22 an attempt for a major qualitative revision of the Court Approved  
23 Management Agreements, but the Court Approved Management  
24 Agreements do not support the SYRA revision for the reasons stated  
25 herein.

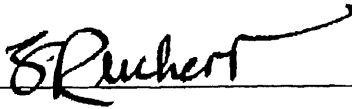

26 2. The court finds that the rulings herein will not cause material physical  
27 injury or an undesirable result.

28 a) Although many parties have approved SYRA, parties' approval or

1

27  
28

disapproval of SYRA is not a legal basis for the court to enforce SYRA.  
The court must look to the previous agreements of the parties, the  
previous court orders, the Court Approved Management Agreements,  
the Judgement, and the California Constitution.

| Defendants  | ) |  |

PLEASE TAKE NOTICE that the additional/final further revised proposed order for the SYRA reset motion in case RCV 51010 is attached. A hearing is set for the additional/further revised proposed order for April 28, 2017, 1:30 PM, Dept. S35

1 of the above-entitled court.

2 NOTES RE FURTHER REVISED PROPOSED ORDER

3 A. Attached are two versions of the additional further revised proposed order.

4 1. One version, for the convenience of the parties, has parts of the order  
5 which the court has added in the following **font**. From the previous proposed order,  
6 filed April 18, 2017, the court has ~~stricken~~ anything that relates to limiting production  
7 /pumping of the Desalters. Court has not made any other substantive changes in the  
8 additional/further revised proposed orders from those orders filed April 18, 2017.

9 a) The court has received and considered the request by Chino Basin Desalter  
10 Authority Member Agencies regarding desalter pumping.

11 b) The court concludes that the court should not have made any orders  
12 whatsoever with respect to limiting production/pumping of the desalters in  
13 its previous orders for the following reasons:

14 I) Such orders were outside of the scope of any briefing regarding SYRA  
15 and the motions, requests, and disputes concerning SYRA.

16 II) Any limitation on Desalter production/pumping would require  
17 additional briefing and unreasonably postpone the resolution of SYRA  
18 motion, requests, and disputes.

19 III) In further review of the court's tentative rulings, the court further  
20 concludes that there were no legal or factual reasons set forth in the  
21 briefing for the court to make such an order.

22 (a) Therefore, from the previous proposed rulings, the parties are not to  
23 derive any conclusions on how the court might rule with respect to a  
24 request to limit Desalter production/pumping. This was only  
25 tentative ruling without sufficient briefing by the parties and  
26 sufficient analysis by the court. In the court's current view, it is  
27 erroneous.

28 (b) Specifically, to help the parties, the court has ordered stricken from

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28

the additional safe yield reset agreement motion and additional further revised proposed rulings and orders, the court has stricken:

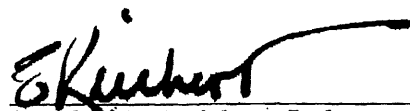

- (i) page 2 of 84: lines 5-6,
- (ii) page 75 of 84: line 7-8, and
- (iii) page 77 of 84: lines 8-10.

(a) The court has also deleted these lines from the additional safe yield reset agreement motion additional final rulings and order

2. The other version of the additional/further revised proposed order has all the changes incorporated into a final, "clean" proposed order as of 4/28/17.

B. Therefore the court's conclusion is the only remaining issue for oral argument is whether the Safe Yield reset to 135,000 AFY is an event that requires a recalculation within the definition of the Judgment, Exhibit "H" ¶10 for the reasons set forth in the additional/further revised proposed order.

Dated: 4-28-17

  
Stanford E. Reichert, Judge

CHINO BASIN WATERMASTER

Case No. RCVRS 51010

Chino Basin Municipal Water District v. City of Chino, et al.

PROOF OF SERVICE

I declare that:

I am employed in the County of San Bernardino, California. I am over the age of 18 years and not a party to the action within. My business address is Chino Basin Watermaster, 9641 San Bernardino Road, Rancho Cucamonga, California 91730; telephone (909) 484-3888.

On March 28, 2023, I served the following:

1. REQUEST FOR JUDICIAL NOTICE IN SUPPORT OF CITY OF ONTARIO'S COMBINED REPLY TO OPPOSITIONS TO MOTION CHALLENGING WATERMASTER'S NOVEMBER 17, 2022 ACTIONS/DECISION TO APPROVE THE FY 2022/2023 ASSESSMENT PACKAGE

BY MAIL: in said cause, by placing a true copy thereof enclosed with postage thereon fully prepaid, for delivery by the United States Postal Service mail at Rancho Cucamonga, California, addresses as follows:

**See attached service list:** Mailing List 1

BY PERSONAL SERVICE: I caused such envelope to be delivered by hand to the addressee.

BY FACSIMILE: I transmitted said document by fax transmission from (909) 484-3890 to the fax number(s) indicated. The transmission was reported as complete on the transmission report, which was properly issued by the transmitting fax machine.

BY ELECTRONIC MAIL: I transmitted notice of availability of electronic documents by electronic transmission to the email address indicated. The transmission was reported as complete on the transmission report, which was properly issued by the transmitting electronic mail device.

**See attached service list:** Master Email Distribution List

I declare under penalty of perjury under the laws of the State of California that the above is true and correct.

Executed on March 28, 2023 in Rancho Cucamonga, California.
