A Budget vs. Actual Report for the period July 1, 2022 through September 30, 2022 is provided to keep all members apprised of the total revenues and expenses for the current fiscal year. The expense section is categorized into four distinct sections. Those sections are: Judgment Administration and Administrative Expenses; Optimum Basin Management Program Expenses; Program Element 1-9 Expenses; and Other Income/Expenses. DISCUSSION

CURRENT MONTH – SEPTEMBER 2022

Year-To-Date (YTD) for the three months ending September 30, 2022, all but three categories were at or below the projected budget.

The categories over budget were: (1) the Administration Salary/Benefits expenses (6010s) were over budget by \$140,036 or 81.8% as a result of increased staff time and activities in the administrative functions. Please note that the overage is only in the administrative section, not with the entire consolidated staffing budget. (2) The Watermaster Legal Services (6070s) were over budget by \$48,489 or 41.6% as a result of increased activities in the areas of Court Coordination, Personnel Matters, unbudgeted expenses for the Ely 3 Basin Investigation, and miscellaneous legal expenses during the past three months. Please note that the overage is only in the administrative section, not the entire consolidated BHFS budget. (3) Groundwater Level Monitoring expenses (7104s) were over budget by \$36,606 or 48.9% as a result of increased Watermaster field staff time for monitoring and production data collection efforts. Please note that the overage is only in the Groundwater Level Monitoring section, not with the entire consolidated staffing budget.

There are no Budget Transfers or Budget Amendments being proposed for FY 2022/23 as of September 30, 2022.

Overall, the Watermaster (YTD) Actual Expenses were \$2,081,659 or 46.1% below the (YTD) Budgeted Expenses of \$4,519,931.

PREVIOUSLY REPORTED ACTIONS (Descending Order)

July 2022:

During the month of July 2022, the "Carry Over" funding was calculated. The Total "Carry Over" funding amount of \$1,541,640.96 has been posted to the general ledger accounts. The total amount of \$1,596,853.31 consisted of \$478,326.10 from Engineering Services, \$458,709.78 from Capital Improvement Projects, \$373,394.56 from OBMP Activities, \$145,428.66 from Pool Funding Accounts, and \$85,781.86 from Administration Services. More detailed information is provided regarding this issue under the "Carry Over" Funding section.

The "Amended" Budget for FY 2022/23 is \$11,073,616.96 which includes \$1,541,640.96 for the prior years "Carry Over" funding.

SALARIES EXPENSE

CURRENT MONTH – SEPTEMBER 2022

As of September 30, 2022, the total (YTD) Watermaster salary expenses were \$293 or 0.0% below the (YTD) budgeted amount of \$640,641. The overall staffing budget was developed with a staffing level of eleven Full-Time Equivalents (FTEs), and staffing is currently at eleven Full-Time Equivalents (FTEs).

Watermaster utilizes an in-house database time and attendance system to track and record staff's actual hours worked and records those hours to a specific project or activity. This time and attendance database of captured staff hours and activities is the basis for the bi-weekly payrolls which are processed using an external payroll processing service (ADP). During the FY 2022/23 budget development, Watermaster staff modified the internal timekeeping database system to better track the actual activities performed by the staff. Watermaster reduced the number of cost accounting activities from 160+ labor codes down to 53 labor codes. Watermaster staff can now record time to the following six activity categories: (1) Judgment Administration activities; (2) General Administrative activities; (3) Paid Leaves of vacation, sick or holiday; (4) Pools, Advisory or Board Meeting attendance; (5) OBMP activities; and (6) Program Elements 1 through 9 activities.

When the FY 2022/23 budget was developed, basic assumptions were used in allocating how staff's time would be spent and on which of the projects or activities. The staffing dollars were then allocated into those specific areas and budgeted on a 1/12 monthly budget. When actual staffing activities vary from the budgeted assumptions, a positive or negative variance can be created.

Currently the following actual allocations are tracking above the projected allocations due to Watermaster staff spending more time in these activities as follows: Judgment Administration-Document Review-WM Staff expenses (account 5901.1) above budget by \$44,420 or 164.1%; Judgment Administration-Water Accounting/Database-WM Staff expenses (account 5981) above budget by \$9,846 or 156.5%; WM Staff Salaries-Overtime expenses (account 6011.1) above budget by \$1,145 or 38.2%; 457(f) NQDC Plan expenses (account 6011.4) above budget by \$2,114 or 21.5%; Administrative-Accounting-WM Staff expenses (account 6011.10) above budget by \$20,136 or 41.8%; Administrative-Building Admin-WM Staff expenses (account 6011.15) above budget by \$2,018 or 33.1%; Administrative-Document Review-WM Staff expenses (account 6011.25) above budget by \$17,227 or 317.1%; Administrative-General-WM Staff expenses (account 6011.50) above budget by \$114,891 or 556.6%; Administrative-IT-WM Staff expenses (account 6011.70) above budget by \$17,568 or 319.5%; Administrative-Meetings-WM Staff expenses (account 6011.80) above budget by \$3,757 or 27.5%; Administrative-Training(Giving/Receiving) expenses (account 6011.95) above budget by \$1,101 or 19.6%; OBMP-General-WM Staff expenses above budget by \$5,209 or 30.5%; PE1-Monitoring Program-WM Staff expenses (account 7104.1) above budget by \$38,196 or 806.3%; and PE2-Comprehensive Recharge-WM Staff expenses (account 7201) above budget by \$13,484 or 203.6%.

Watermaster does not plan to present any Budget Transfers or Budget Amendments as of September 30, 2022.

Please be advised that the "\$ Over Budget" and the "% of Budget" columns are a comparison of the (YTD) Actual to the (YTD) Budget, not the 12-month Annual Budget. PREVIOUSLY REPORTED ACTIONS (Descending Order)

August 2022:

The first quarter (ECAC) report is scheduled for issuance and distribution in early May 2022 for the period July 1, 2022 through March 31, 2022.

Watermaster does not plan to present any Budget Transfers or Budget Amendments at this time.

July 2022:

The explanations regarding the Carry-Over amount of \$478,328.10 from FY 2021/22 to the FY 2022/23 budget is provided as follows:

- <u>IEUA Integrated Model Meetings and Technical Review 50% IEUA Cost Share (Account 6906.15):</u> <u>\$51,548 (Watermaster's portion is \$25,774)</u> The requested carryover is necessary because this effort was planned for completion in FY 2021/22 but is now scheduled to be completed in FY 2022/23.
- <u>Groundwater Quality Monitoring Program (Account 7505 formerly account 7103.5): \$1,694</u> The carryover is necessary for the laboratory cost for the HCMP GW and SW monitoring program. The work was completed in FY 2021/22, but the invoice has not yet been received from the laboratory.
- Groundwater Level Monitoring Program (Account 7104.9): \$1,085 The requested carryover is necessary for the purchase of replacement transducer for the MZ1 transducer monitoring program. The work was completed in FY 2021/22, but the invoice has not yet been received from the subcontractor.
- 4. <u>Ground Level Capital Equipment (Account 7408 formerly account 7107.8): \$5,000</u> The requested carryover is necessary for the of purchase of a replacement door at the Ayala Park Extensometer facility and for materials and equipment for the Pomona Extensometer Facility. These orders were made in FY 2021/22 but the invoices have not yet been received.
- 5. Prado Basin Habitat Monitoring, Data Analysis and Reporting 50% IEUA Cost Share (Account 7302 formerly account 7108.31) \$42,000 (Watermaster's portion is \$21,000) The requested carryover is necessary to implement a recommendation in Prado Basin Habitat Sustainability Committee Annual Report for Water Year 2021 (approved in June 2021) to update the digital elevation model for the Prado Basin. This data will improve the estimates of current depth- to-groundwater in the study area, and in critical areas where there are observed declines in groundwater levels that could potentially threaten the quality of the riparian habitat.
- Agriculture Production and Estimation (Account 5925 formerly account 7110.3): \$22,325
 The requested carryover is necessary to complete the Agriculture Production and Estimation work that
 was planned for completion in FY 2021/22 but is now scheduled to be completed in FY 2022/23.
- PE2: Engineering Services for Other Recharge Improvement Projects (Account 7202.2): \$95,256
 The requested carryover is necessary to finalize this work in FY 2022/23. The work includes conducting
 a life-cycle analysis at the San Sevaine 1 and Etiwanda Debris conservation berms and preparing a
 technical memorandum describing the analysis and conclusions. The scope and schedule for this work
 was refined with input from IEUA and Watermaster Staff in FY 2020/21. The work is to be completed in
 FY 2022/23.
- 8. <u>SB88 Specification to Ensure Compliance with Regulations (Account 7206.1) \$108,024 (GRCC's portion is \$54,012 and IEUA's portion is \$54,012)</u>

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

The requested carryover is necessary to provide as-needed support to IEUA and Watermaster in implementing the recommendations described in the technical memorandum evaluating the existing methodology to estimate stormwater diversions in the Chino Basin.

9. <u>2023 RMPU Recharge Master Plan Scoping (Account 7210): \$34,668.</u> The requested Carry-Over is necessary to complete the scope, budget and report outline the 2023 RMPU.

10. Management Zone Strategies - Data Analyses and Reports (Account 7402): \$26,758

The requested carryover is necessary because the GLMC annual report is prepared over two fiscal years and is completed in November. Not as much progress was made in FY 2021/22 as was anticipated. The unspent budget in FY 2021/22 is needed to complete the annual report.

11. Management Zone Strategies - Northwest MZ-1 (Account 7402.10): \$64,515

The requested carryover is necessary because this is a multi-year project to develop a subsidence management plan for the Northwest MZ-1, and not all tasks planned/budgeted in FY 2021/22 were completed and must be completed in FY 2022/23. This included the request by the GLCM to perform a sensitivity study on the 1D compaction models and the use of the 1D compaction models to evaluate the effectiveness of potential subsidence management strategies. Carryover needed to complete the GLMC annual report. Tim Moore was on vacation and so we didn't make as much progress on this task as was anticipated in 2021/22.

- <u>Updated Plan Mitigation Temp Loss of Hydraulic Control of Basin 50% IEUA Cost Share (Account 7508): \$20,000 (Watermaster's portion is \$10,000)</u> The requested carryover is necessary to complete regulatory compliance support or add additional model simulations that may potentially be requested by the Regional Board based on its review of the submitted Plan.
- 13. <u>IEUA Update Recycled Water Permit Salinity (Account 7510): \$81,214 (Watermaster's portion is</u> <u>\$73,019)</u>

The requested carryover is necessary to complete the technical and regulatory compliance support work to update the Chino Basin Maximum Benefit Salt and Nutrient Management Plan. This multiyear project began FY 2017/18 and will continue through FY 2022/23.

14. <u>PE 8/9: Support Implementation of the 2020 Storage Management Plan (Account 7610): \$43,220</u> This budget is for as-requested technical support to Watermaster staff, updating the information required for a complete Storage and Recovery Program application, updating the Storage and Recovery Program application forms, and updating the process to evaluate an application. No implementation activities occurred in FY 2021/22. The entire budget is requested to be carried over to FY 2022/23.

PRADO BASIN HABITAT SUSTAINABILITY PROGRAM

Ongoing Costs

Program costs that are ongoing (Ongoing Costs) will be cost-shared between Watermaster and IEUA, split on a 50/50 basis, subject to the following limitation: in each fiscal year, neither Watermaster nor IEUA shall be obligated to reimburse the other for Ongoing Costs that exceed the amount that the reimbursing party has budgeted for Ongoing Costs in that fiscal year, except as agreed upon by both parties in writing or as amended during the fiscal year. The first year expenses (FY 2016/17) to be cost shared were approximately \$300,000, with projected future years (FY 2017/18 and forward) estimated at approximately \$150,000. For the purposes of the agreement, Ongoing Costs are defined as the costs associated with the following Program activities:

1. A Riparian Habitat Monitoring Program, including, but not limited to, the following sub-tasks:

- a. Design and implement a site-specific vegetation monitoring program with the United States Bureau of Reclamation (USBR) and Orange County Water District, pursuant to which USBR will perform site-specific vegetation surveys.
- b. Manage and perform custom flight to collect a high resolution air photo of the Prado Basin Region.
- c. Collect, check, and upload historical air photos and vegetation survey data in the Prado Basin region.
- d. Collect, check, and upload historical Landsat data in the Prado Basin region.
- 2. A Climate Monitoring Program, including, but not limited to, the following sub-task:
 - a. Collect, check, and upload climatic data on an annual basis
- 3. Preparation of the AMP Annual Report (Annual Report), including, but not limited to, the following subtasks:
 - a. Water level monitoring, vegetation survey, photo monitoring, landsat data, climate data and analysis of the components.
 - b. Analyze data and prepare an administrative draft of the Annual Report for Watermaster/IEUA.
 - c. Incorporate the Watermaster and IEUA comments and prepare a draft Annual Report for review by the PBHSC.
 - d. Meet with PBHSC to review draft Annual Report.
 - e. Incorporate PBHSC comments and finalize the Annual Report.
- 4. Annual license fees for monitoring wells.
- 5. Project management and administration activities associated with the Program undertaken by a Party's consultant, including, but not limited to, the following sub-tasks:
 - a. Ad-Hoc Meetings
 - b. Preparation of scope and budget for the Program
 - c. Project administration and financial reporting
- 6. Other costs required to fulfill the requirements of Peace II Subsequent EIR mitigation measure 4.4-3. Watermaster shall be responsible for the costs associated with the Groundwater Level Monitoring Program, Groundwater Quality Monitoring Program, and Surface Water Monitoring Program.

Watermaster and IEUA shall each have responsibility for its own administrative costs, excluding the tasks and expenses included under Set-Up Costs and Ongoing Costs. Watermaster and IEUA will meet to review the cost-sharing structure under this agreement and negotiate necessary adjustments in good faith on at least an annual basis.

The Peace II SEIR does not explicitly state a duration for the monitoring and mitigation program. It is logical to assume that the program will last until the drawdown impacts, if any, on the riparian habitat from Peace II activities are fully manifested and not predicated to worsen, and that mitigation measures, if any are required, are fully implemented. This is not a perpetual agreement. Upon termination of the monitoring and any necessary mitigation obligations, the parties may elect to terminate the cost share agreement.

July 2022:

Per section VI.D.3 of the Groundwater Storage Program Funding Agreement No. 49960 in the Chino Basin with The Metropolitan Water District of Southern California, the FY 2022/23 annual administrative fee invoice was issued on July 1, 2022 in the amount of \$181,865.78 under invoice number 2022-07-CUP. Payment in the amount of \$181,865.78 was received and deposited on August 2, 2022.

POOL LEGAL SERVICES FUND ACCOUNTING

Each Pool has a Fund Account created to pay their own legal service invoices. The legal services invoices are funded and paid using the Fund accounts (8467 for the OAP, 8567 for the ONAP, and 8367 for the AP). These Fund Accounts are replenished at the direction of each Pool, and the legal service invoices are approved by the Pool leadership and when paid by Watermaster, are deducted from the existing Fund Account balances. If the Fund Account for any Pool reaches zero, no further payments can be paid from the Fund and a replenishment action must be initiated by the Pool. Along with the legal services Fund account for the OAP (8467), the OAP also has two other Fund accounts for Ag Pool Meeting Attendance expenses (8470), and Special Projects expenses (8471).

The Agricultural Pool instructed Watermaster to issue invoices to the Appropriative Pool in the amount of \$250,000 for the approved FY 2022/23 Agricultural Pool Legal Services budget. The payment terms to be set at 30 days. These invoices were issued on September 9, 2022 under the category of Agricultural Pool Admin & Legal Services (4114). According to the payment terms of 30 days, payments are due on or before October 9, 2022.

BACKGROUND

During the period of 2008-2010, Watermaster, in collaboration with the Inland Empire Utilities Agency (IEUA) and Chino Basin Water Conservation District (CBWCD), completed the 2010 Recharge Master Plan Update (RMPU). The RMPU was submitted to the Court in June 2010, and the Court subsequently approved the 2010 RMPU in October 2010. Watermaster has completed the amendment of the 2010 RMPU, pursuant to the Court's order, which the Board adopted in September 2013. The IEUA and Watermaster completed the most recent version of the RMPU in 2018 and will complete the next update before the end of 2023.

Pursuant to Section 8.3 of the Peace II Agreement, Watermaster is obligated to make an annual finding that it is in substantial compliance with the 2018 Recharge Master Plan. This requirement exists to ameliorate any long-term risk attributable to reliance upon un-replenished groundwater production by the Desalters and is a condition on the annual availability of any portion of the 400,000 acre-feet set aside as controlled overdraft (Re-Operation). Recently, pursuant to Section 6.2(b) of the Peace Agreement, as the amendment is shown in the March 15, 2019 Court Order, the Desalter Replenishment Obligation is now being replenished by the Appropriative Pool through wet or stored water. West Yost (WY) has prepared the attached opinion regarding the adequacy of replenishment capacity, which includes the information that Watermaster needs to make this finding for Fiscal Year 2022-2023.

DISCUSSION

The analysis performed by WY finds that current projections indicate that Watermaster has sufficient recharge capacity to meet the future replenishment obligations based on the knowledge of the basin's conditions in FY 2022-23 and future water management projections provided by the Watermaster Stakeholders. Current analysis indicates that even if Re-Operation were terminated at any time through 2030, Watermaster would be able to immediately increase its replenishment activity and replenish any overproduction in the Basin as required by the Judgment.

Project No.: 941-80-21-45 SENT VIA: EMAIL

Mr. Peter Kavounas General Manager Chino Basin Watermaster 9641 San Bernardino Road Rancho Cucamonga, CA 91730

SUBJECT: Annual Finding of Substantial Compliance with the Recharge Master Plan -Fiscal Year 2022-23

Mr. Kavounas:

At your direction and pursuant to the Peace II Agreement, West Yost has prepared this opinion regarding the adequacy of replenishment capacity in the Chino Basin to support an annual finding of substantial compliance with the Chino Basin Watermaster (Watermaster) Recharge Master Plan (RMP).

In part, Section 7.3 of the Peace II Agreement reads:

Re-Operation and Watermaster's apportionment of controlled overdraft will not be suspended in the event that Hydraulic Control is achieved in any year before the full 400,000 acre-feet has been produced so long as: [...] Watermaster is in substantial compliance with a Court approved Recharge Master Plan as set forth in Paragraph 8.1 below.

Review of Section 8.1 of the Peace II Agreement indicates that this compliance relates to the implementation of plans to ensure that Watermaster has enough supplemental water recharge capacity to meet its replenishment obligation after re-operation water is completely exhausted. Section 8.3 of the Peace II Agreement states:

To ameliorate any long-term risks attributable to reliance upon un-replenished groundwater production by the Desalters, the annual availability of any portion of the 400,000 acre-feet set aside as controlled overdraft as a component of the Physical Solution, is expressly subject to Watermaster making an annual finding about whether it is in substantial compliance with the revised Watermaster Recharge Master Plan pursuant to Paragraphs 7.3 and 8.1 above.

Pursuant to the Peace II Agreement, following the completion of the 2010 Recharge Master Plan Update (RMPU), Watermaster is obligated to make an annual finding that there is enough supplemental water recharge capacity to meet projected replenishment obligations.

This letter report includes the information required by Watermaster to determine if there is enough supplemental water recharge capacity to meet its projected replenishment obligations.

METHODOLOGY

The methodology used to determine if sufficient supplemental wet-water recharge capacity is available to meet projected replenishment obligations is to compare projected replenishment obligations to available supplemental wet-water recharge capacity over the period 2021 through 2050. Supplemental wet-water recharge capacity includes the capacity of spreading basins available for supplemental water recharge and the capacity to inject supplemental water at aquifer storage and recovery (ASR) wells. Figure 1 shows the locations of spreading basins and ASR wells in the Chino Basin. The supplemental water recharge capacity in the Chino Basin is listed in Table 1 by the type of recharge facility.^{1,2}

| Table 1. Supplemental wet-water recharge capacity in the Chino Basin | | | | |
|--|---|--|--|--|
| Recharge Facility | Recharge Capacity acre-feet per year (afy) | | | |
| Spreading basins ³ | 56,600 | | | |
| ASR wells | 5,480 61,480 | | | |
| Total | | | | |

The most recent projections of replenishment obligations were developed in 2022 as part of the 2021 Data Collection and Evaluation effort for the period of 2022 through 2050. These replenishment obligation projections are based on the Watermaster Parties' (Parties) best estimates of how future water supplies will be used to meet their water demands.

The most recent estimates of supplemental water recharge capacity were developed in 2018 as part of the 2018 RMPU. These estimates will be reviewed and updated as needed in the 2023 RMPU. As of this writing, the supplemental water recharge capacity in the Chino Basin is assumed to be constant through 2050.

This analysis also considers the potential for certain conditions to impact Watermaster's ability to meet its replenishment obligations, including:

- Reduced availability of imported water
- Suspension of Basin Reoperation
- Contractual requirements of the Dry-Year Yield Program

Chino Basin Watermaster Annual Finding of Substantial Compliance with the Recharge Master Plan Page 85

RESULTS

Table 2 shows the supplemental wet-water recharge capacity [Column (*b*)] and the projected annual replenishment obligation from 2022 to 2050 [Column (*c*)].⁴ Comparing Columns (*b*) and (*c*) in Table 2 indicates there is sufficient supplemental wet-water recharge capacity (61,480 afy) to meet the projected wet-water replenishment obligations (up to 2,800 afy).

Analysis Under a Worst-Case Scenario

The worst-case scenario analysis considers the potential for certain conditions that may impact Watermaster's ability to meet its replenishment obligations, including:

- Reduced availability of imported water
- Suspension of Basin Reoperation
- Contractual requirements of the Dry-Year Yield Program

Reduced Availability of Imported Water

The Metropolitan Water District of Southern California (Metropolitan) provides imported water to the Chino Basin area through the Inland Empire Utilities Agency (IEUA). The imported water supplies are not guaranteed to Watermaster because during periods of shortages (when Metropolitan's demands exceed available supplies) Metropolitan may not deliver imported water to the Chino Basin for replenishment. In January 2016, Metropolitan completed its 2015 Integrated Resources Plan (IRP) Update.⁵ Metropolitan reported that if its IRP is fully implemented, shortages in Metropolitan supplies will occur approximately 9 percent of the time under 2020 conditions, 4 percent of the time under 2025 conditions, and 0 percent under 2030 conditions. However, as Metropolitan implements the 2015 IRP, modifications to the proposed projects in the IRP may cause additional shortages than previously projected. For instance, in 2019, one of the main projects recommended in the 2015 IRP – the California WaterFix tunnel project (now called the Delta Conveyance Project) – was downsized. As of this writing, construction of this project is not certain. If Metropolitan does not fully implement its 2015 IRP, shortages in Metropolitan supplies are projected to occur about 12 percent of the time under 2020 conditions and up to 80 percent under 2040 conditions.⁶

To be conservative, uncertainty in imported water availability as analyzed by Metropolitan was accounted for in this analysis by assuming that under the 2015 IRP projections, Watermaster will only be able to purchase water imported water for replenishment purposes in one out of every five years (*i.e.,* shortages will occur 80 percent of the time).

⁴ The 2020 SYR assumes 80 percent of a replenishment obligation is satisfied from storage and 20 percent is satisfied by wet-water recharge via spreading and injection (see Table 7-3 of the 2020 SYR).

⁵ Metropolitan Water District of Southern California (2016). Integrated Water Resources Plan: 2015 Update. Report No. 1518. <u>http://www.mwdh2o.com/</u>

⁶ These projections were updated as part of the 2020 IRP Update to evaluate four scenarios. Under the worst-case scenario, water shortages are expected to occur7 percent of the time in 2025 and 29 percent of the time in 2045. For more detail, see: Metropolitan Water District of Southern California (2021). Refined Water Supply and Demand Gap Analysis. <u>https://www.mwdh2o.com/media/21085/06222021-irp-6a-presentation.pdf</u> However, the 2015 estimates were used as a worst-case scenario.

Suspension of Basin Reoperation

The annual maximum amount of Basin Reoperation water used to meet the replenishment obligation of the Desalters is 12,500 afy through 2030. If Basin Reoperation was discontinued at any time through 2030, the annual maximum replenishment obligation could increase. Table 2 [Column *(e)*] shows the projected recharge capacity required to meet replenishment obligations if Basin Reoperation were discontinued at any point before 2030.

Contractual Requirements of the Dry-Year Yield Program

The IEUA and Watermaster have a contractual requirement with Metropolitan to recharge up to 25,000 afy under the Dry-Year Yield Program (DYYP). The DYYP contract terminates in 2028. Table 2 [Column (*f*)] shows the projected recharge capacity required to meet replenishment obligations and to recharge 25,000 afy for DYYP, assuming DYYP continues after 2028.

Worst-Case Scenario Results

Comparing Columns (*b*) and (*f*) in Table 2 indicates there is sufficient supplemental wet-water recharge capacity (61,480 afy) to meet the maximum projected wet-water replenishment obligation and recharge up to 25,000 afy under the worst-case scenario (up to 50,922 afy).

Other Recharge and Excess Capacity

Some Parties want to utilize wet-water recharge capacity to store supplemental water in the Chino Basin. Table 2 [Column (g)] shows the excess supplemental wet-water recharge capacity under the worst-case scenario (*i.e.*, reduced imported water availability, suspension of Basin Reoperation, and DYYP recharge). The minimum excess supplemental wet-water recharge capacity under the worst-case scenario from 2022 to 2050 is projected to be about 10,600 afy. Therefore, this analysis indicates that at least 10,600 afy of wet-water recharge capacity will be available for the Parties to recharge and store supplemental water in the Chino Basin through 2050.

CONCLUSIONS

Watermaster's ability to recharge the Chino Basin with supplemental water is sufficient to meet its projected replenishment obligations, even under conditions of reduced availability of imported water, increased replenishment obligations (*i.e.*, suspension of Basin Reoperation), and/or decreased recharge capacity (*i.e.*, the need to recharge for the DYYP). Additionally, Watermaster can purchase imported surface water when it is available for use in-lieu of groundwater (in-lieu recharge). There is about 17,700 afy of in-lieu recharge capacity available that can be used to meet future replenishment obligations.

Please contact Carolina Sanchez if you have any questions or concerns regarding this opinion.

Sincerely, WEST YOST

BACKGROUND

In 1999, the OBMP Phase I Report identified pumping-induced drawdown and resultant aquifer-system compaction as the most likely cause of land subsidence and ground fissuring that had been observed in Management Zone 1 (MZ-1). Program Element 4 of the OBMP, "Develop and Implement a Comprehensive Groundwater Management Plan for Management Zone 1," called for the development and implementation of a long-term Subsidence Management Plan to minimize or abate the occurrence of subsidence and ground fissuring.

From 2001 to 2005, Watermaster developed, coordinated, and conducted a comprehensive investigation under the guidance of the MZ-1 Technical Committee (now called the Ground-Level Monitoring Committee or GLMC) to understand the causes of the subsidence and fissuring in the southwestern portion of MZ-1. The investigation provided enough information for Watermaster to develop Guidance Criteria for the producers in the investigation area that, if followed, would minimize the potential for subsidence and fissuring during the completion of the Subsidence Management Plan. The Guidance Criteria formed the basis for the Subsidence Management Plan, which was developed by the GLMC and approved by Watermaster in October 2007. The Court Order on November 15, 2007 approved the Subsidence Management Plan and ordered its implementation. The Subsidence Management Plan was updated in 2015 to include a recommendation to develop a Subsidence Management Plan specific to the northwestern portion of the Chino Basin where gradual and persistent subsidence is an ongoing concern.

The Subsidence Management Plan states that Watermaster will produce an annual report, which includes the results of ongoing monitoring efforts, interpretations of the data, recommendations for future monitoring efforts, and recommendations for adjustments to the Subsidence Management Plan, if any. The Court's 2007 Order directed Watermaster to file the annual reports with the Court.

DISCUSSION

The final 2021/22 Annual Report of the GLMC (Attachment 1) includes results and interpretations for data that were collected during FY 2021/22 and includes recommendations for Watermaster's Ground-Level Monitoring Program for FY 2022/23.

The GLMC met on March 3, 2022 to review and discuss the recent monitoring results and to develop a scope of work and budget for FY 2022/23. Subsequently, an overview of the monitoring results and the proposed scope of work and budget for FY 2022/23 were presented to the Pool Committees in April 2022 and at Watermaster's budget workshops.

The GLMC was provided with the draft annual report on September 23, 2022 for review and comment. The GLMC met on September 29, 2022 to review and discuss the draft annual report with Watermaster Staff and Engineer. The GLMC submitted comments during the comment window which were addressed in the final report attached.

BACKGROUND

Following the approval of the Assessment Package each year, Volume Vote calculations for the new calendar year are performed and Parties are allocated a voting percentage. The 2022/2023 Assessment Package is scheduled for Watermaster Board approval on November 17, 2022, and thus the Appropriative Pool Calendar Year 2023 Volume Vote is predicated on that approval.

Pursuant to the Appropriative Pool Pooling Plan, the total voting power on the Pool Committee is 1,000 votes. Of these, 500 votes are allocated based on each Party's percentage of Operating Safe Yield. The remaining 500 votes are allocated proportionally based on production during the preceding year.

DISCUSSION

Most Water Activity Reports have now been received, and the Volume Vote has been calculated. Once the Assessment Package is approved by the Board, the Volume Vote is then officialized for use during the coming calendar year.

The 2023 Appropriative Pool Volume Vote allocation has been completed and is provided for review and use (Attachment 1). The current year (2022) Volume Vote is also attached for reference (Attachment 2).

SUBJECT: Calendar Year 2023 Overlying (Non-Agricultural) Pool Committee Volume Vote (Routine Business Item I.E.)

SUMMARY:

<u>Issue</u>: Following the approval of the Assessment Package each year, Volume Vote calculations for the new Calendar Year are performed and Parties are allocated a voting percentage.

<u>Recommendation:</u> Receive and file the Calendar Year 2023 Overlying (Non-Agricultural) Pool Volume Vote as presented, subject to Watermaster Board approval of the 2022/23 Assessment Package at the November 17, 2022 meeting.

Financial Impact: None.

Future Consideration Non-Agricultural Pool – November 10, 2022: Receive and file

<u>ACTIONS:</u> Non-Agricultural Pool – November 10, 2022:

> Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

BACKGROUND

The Overlying (Non-Agricultural) Pool Volume Vote is updated, and Parties are allocated a voting percentage following the approval of the Assessment Package each year. The 2022/2023 Assessment Package is scheduled for Watermaster Board approval on November 17, 2022, and thus the Calendar Year 2023 Overlying (Non-Agricultural) Pool Volume Vote is predicated on that approval.

The total voting power on the Pool Committee is 1,484 votes. Of these, 742 votes are to be allocated based on one vote for every ten acre-feet or fraction thereof of Safe Yield. The remaining 742 votes are allocated proportionally based on production during the preceding year.

DISCUSSION

Occasionally due to water transfers, if each Party is given one vote for every ten acre-feet or fraction thereof of Safe Yield, the total for that portion of the Volume Vote is 743 rather than 742. The logical solution to address this is to reduce the 743 votes down to 742 votes on a pro-rata basis; this is the same methodology that has been used in recent years. Please note that this approach has a very minor effect on each Party's vote.

The 2023 Overlying (Non-Agricultural) Pool Volume Vote allocation has been completed and is provided for review and use (Attachment 1). The current year (2022) Volume Vote is also attached for reference (Attachment 2).

> Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

BACKGROUND

At the October 27, 2022 Board meeting, the Watermaster Board provided direction to staff to explore the idea of reevaluating Recharge Projects that had been deferred in the past to see if the cost and benefits would be feasible given the current grant funding availability.

Watermaster has requested from West Yost a cost estimate for a high-level scoping effort that will include meetings to gather stakeholder feedback and a report with recommendations for projects.

DISCUSSION

The proposed budget for the scope of work to evaluate Recharge Projects is \$60,000. This amount includes a review of proposed Recharge Projects, work necessary to define information and documentation necessary for applying for grant funds, and three workshops for discussions with the Parties.

The funding will cover work done by West Yost from November 2022 to July 2023 and result in the creation of a Work Plan based on feedback received through the process. This cost was not initially included in the Fiscal Year 2022/23 Budget.

SENT VIA: EMAIL

Mr. Peter Kavounas General Manager Chino Basin Watermaster 9641 San Bernardino Road Rancho Cucamonga, CA 91730

SUBJECT: Proposal for Engineering Services for Chino Basin Watermaster to Develop a Plan for Recharge Projects

Dear Mr. Kavounas:

The 2018 Recharge Master Plan Update (2018 RMPU) included a list of projects that were considered but not recommended for implementation by the Chino Basin Parties (Recharge Projects). The Recharge Projects included: projects that were considered in the 2013 RMPU and determined to be technically and institutionally feasible but with unit costs for stormwater recharge that exceeded the economic feasibility threshold established in the 2013 RMPU of \$612 per acre-foot; and, other projects that the Parties brought to the 2018 RMPU Steering Committee for consideration but have not yet been implemented.

The 2023 RMPU process is currently ongoing, and based on input from the Parties, will not include consideration of new capital projects, and thus, will not include technical analysis to evaluate the Recharge Projects.

At its October 27, 2022 meeting, the Watermaster Board discussed recent grant opportunities that are available to plan for and construct recharge and storage projects in the Chino Basin. The Watermaster Board emphasized the importance of having readily available information and documentation that could be used to support grant applications, since grant funding can change the economic feasibility of constructing the Recharge Projects. Based on the Board discussion, Watermaster staff requested that West Yost prepare a proposal to prepare a "Work Plan" to: (i) describe the Recharge Projects; (ii) describe the next planning and/or construction tasks to implement Recharge Projects; and, (iii) describe cost estimates to perform the next planning and/or construction tasks. The Work Plan could then be used to apply for grant funding to offset the implementation costs, and thereby change the economic feasibility to implement the Recharge Projects.

This letter is a proposal for West Yost to prepare the Work Plan.

SCOPE OF SERVICES

The following is a list of the tasks necessary to perform the proposed scope of services:

1. Define the information and documentation necessary to apply for grant funding opportunities

Mr. Kavounas November 2, 2022 Page 2

- 2. Review the descriptions of the Recharge Projects in the 2018 RMPU recharge project and describe the level of analysis that has currently been completed for each Recharge Project
- 3. Refine the list of Recharge Projects by removing projects that the Parties are not interested in pursuing and adding new projects identified by the Parties
- 4. Prepare the Work Plan
- 5. Conduct up to three workshops with the Parties to discuss:
 - a. The projects that were considered but not recommended on the 2018 RMPU
 - b. The level of analysis that has been performed for these projects
 - c. Other projects that should be considered if grant funding is available
 - d. The additional analyses that need to be conducted for each project to be considered "grant ready"
 - e. The costs to perform the additional analyses
 - f. Based on the cost, whether the Recharge Projects should be analyzed further
 - g. Review draft versions of the Work Plan

Deliverables

- Meeting materials, including agendas and presentations
- Draft and Final versions of the Work Plan

PROJECT BUDGET AND SCHEDULE

The proposed budget for the scope of services described herein is \$60,000. We will invoice for services performed on a time-and-expenses basis.

The duration of the scope of services is anticipated to be from November 2022 to July 2023 but is dependent on the availability and engagement of the Parties.

Thank you for providing West Yost the opportunity to be of continued service to Watermaster. We look forward to working with you on this important project. Please call if you have any questions or require additional information.

Sincerely, WEST YOST

> Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

BACKGROUND

The 2020 OBMP Update is a multi-stakeholder collaborative process to bring the 20-year-old document up to date, acknowledging the new challenges and opportunities that the region faces and providing solutions through collective collaboration in adopting and implementing the updated Program.

The Watermaster stakeholders along with staff and consultants started the process to update the OBMP on January 2019. The collaborative process included a series of Listening Sessions where stakeholders expressed their issues, needs, and wants related to groundwater management for the coming decades, and concluded with the Watermaster Board's approval of the OBMP in 2020.

The management actions identified throughout the process along with reasonably foreseeable potential projects will require environmental review. Tom Dodson & Associates has extensive experience in the Chino Basin, including the preparation of the PEIR for the 2000 OBMP, and the Subsequent EIR for the 2007 CDA expansion, the 2017 Addendum, and the 2021 Local Storage Limitation Solution Addendum. The experience qualifies Tom Dodson & Associates to prepare the environmental review for the 2020 OBMP Plan Update. TDA began the environmental analysis of the 2020 OBMP in 2019 and paused in July 2020 when the IEUA Board of Directors, acting as the lead agency, continued the certification process. After the continuation of the item, and after finalizing the Addendum for the Local Storage Limitation Solution, the remaining funds in the contract were used to restart this process during FY 2022/23.

The ongoing effort in FY 2022/23 is to update the 2020 draft environmental document and present it for certification. As a first step, Chino Basin stakeholders were asked to provide input in the Project Description, and several stakeholders made suggestions.

DISCUSSION

The proposed scope of work is attached to this staff report as Attachment 1. While there were leftover funds from the original 2019 contract, the anticipated revisions to the document require an augmentation of the funds to conclude the work.

The scope of work for the Hydrology/Water Quality technical analyses that are to be performed by West Yost and the legal review to be performed by Brownstein, Hyatt, Farber, and Schreck has been budgeted and is included in Watermaster's Fiscal Year 2022/23 amended budget.

The draft Budget Amendment (A-22-11-02) is provided as Attachment 2.

MEMORANDUM

October 31, 2022

From: Tom Dodson

- To: Mr. Edgar Tellez Foster
- Subj: Budget Amendment for the Optimum Basin Management Program Update 2022 CEQA Compliance Effort

Optimum Basin Management Program Update (OBMPU) Subsequent EIR Recirculation

In 2022, TDA was engaged by Watermaster to assist in both preparing an updated Project Description for the OBMPU and presenting the status of the OBMPU at an OBMPU Environmental Review Workshop to the Parties. TDA was authorized to utilize left over budget from our efforts on the Local Storage Limitation Solution in order to complete the above tasks. As of November 1, 2022, TDA has worked with Watermaster Staff, West Yost, and the remaining members of the Project Team to draft a Project Description that has been distributed to the Parties for comment. Our understanding is that, based on feedback from the Project Team, the best and most appropriate path forward to process the CEQA documentation for the OBMPU Subsequent EIR (SEIR) is to recirculate the 2020 document with revisions based on the updated Project Description.

We at Tom Dodson & Associates (TDA) have been asked to submit this budget amendment to assist the Project Team with California Environmental Quality Act (CEQA) compliance by revising the 2020 OBMPU SEIR to enable recirculation of the SEIR.

We have allocated substantial time to ensure that the proposed revision of the OBMPU SEIR meets the stringent standards required under CEQA, and to ensure that we are able to coordinate closely with the West Yost, Watermaster staff, legal counsel, and Stakeholders. We have also allocated substantial time to Project management, as, in our experience, we may need ample time to attend meetings and manage the Project as we move through the recirculation, public review, and response to comments processes.

Scope of Work

Task 1: Attend Meetings & Project Management

TDA will attend meetings with program team and consultant engineering representatives to ensure that the revisions of each of the SEIR Subchapters conform to the defined Project

Description. Based on our discussions, we believe that has provided much of the data that will support the preparation of the SEIR. However, we anticipate further input from West Yost will be required to inform our environmental analysis. In all cases TDA will be acting as an environmental consultant on behalf of the Watermaster and the Lead Agency, IEUA, to perform the independent review of the project required by CEQA.

Given our recent experience, we believe that collectively, TDA will need about 50 hours (with both Tom and Kaitlyn present) allocated to meetings in order to ensure adequate communication between Watermaster Staff, Legal, IEUA, and West Yost, in addition to TDA as we work together to prepare a comprehensive revised SEIR.

• Attend Meetings/Project Management: **\$20,000**

Task 2: Prepare the Revised Technical Studies to Support Recirculated SEIR

Because we have existing technical studies from the OBMPU, I do not believe that substantial effort need be made to prepare revisions to the existing technical studies. Some technical studies are land-area based, such as Biological Resources Assessments and Cultural Resources Analyses, while others are scope of project/facilities based, such as Air Quality, Greenhouse Gas (GHG), and Energy Analyses. Thus, we believe that the Air Quality, Greenhouse Gas (GHG), and Energy Analyses would need to be revised to reflect the recent modifications made to the OBMPU Project Description. In addition, as data has been published as part of the circulation of the Draft Upper Santa Ana River Habitat Conservation Plan EIR, we believe that the Biological Resources Assessment should be updated to ensure that any new data is analyzed and provided therein.

I believe the technical studies can be initiated once we have indication from Watermaster that the project description is final. Based on the project description that has been compiled as described in the introduction to this budget amendment, the preparation of the technical studies is the first stage of review that must be completed to evaluate the changes in environmental consequences of implementing the various programs and facilities to be installed under the life of the OBMPU as a program. TDA will rely upon the most current environmental data compiled in various published environmental and planning documents and specific technical studies that will address impacts of the required program improvements.

• Revisions to Technical Studies: **\$50,000**

Task 3: Prepare the Notice of Recirculation

TDA will prepare a Notice of Recirculation (NOR) based on the revised Project Description prepared to address the scope and facilities proposed under the OBMPU. The NOR will announce Watermaster and IEUA's intent to recirculate the OBMPU SEIR pursuant to Public Resources Code Section 21092.1 and CEQA Statute 15088.5. The estimated fee for carrying out this task is:

• Notice of Recirculation: **\$5,000**

The end product of this effort will be a final decision on the scope of the Recirculated SEIR and a set of responses from interested parties that will identify the concerns and questions related to the OBMPU Project Description and Recirculated SEIR. TDA will assist Watermaster and IEUA with providing a notice of recirculation to every agency, person, or organization that commented

on the 2020 OBMPU SEIR. A possible broader distribution shall be considered with the Project Team.

Task 4: Revise the Draft SEIR

During the 30-day period that the NOR is out for public review, TDA will finalize a draft Recirculated SEIR. As you may recall, the original SEIR was prepared as a Focused SEIR, providing EIR-level analysis for only those issues that were deemed to result in a potentially significant impact. These topics included: Air Quality, Biological Resources, Cultural Resources, Energy, Greenhouse Gas, Hydrology and Water Quality, Tribal Cultural Resources, and Utilities and Service Systems. All other topics were addressed in a comprehensive Initial Study that was presented as an attachment to the 2020 Notice of Preparation. TDA proposes to revise the Initial Study in addition to each of the Environmental Topics that were the focus of the 2020 OBMPU SEIR.

The SEIR would also revise the Executive Summary and an Introduction. The Executive Summary typically summarizes the impacts of implementing the project, and summarizes mitigation measures that support the environmental impact determination. The Executive Summary also summarizes the alternatives to the proposed project. The Introduction discusses the purpose and use of the SEIR, and also incorporates comments received during the NOR comment period and directs the reader to where their comments are answered in the document and briefly responds to each comment. The SEIR must discuss alternatives and topical issues such as growth inducement. The cost to revise and filly address these issues as part of the OBMPU SEIR is as follows:

• Revise SEIR: **\$50,000**

Task 5: Complete the CEQA Process with the SEIR

The following steps will be implemented to complete the CEQA review process:

- a. Distribute the proposed revised document for public review (45 days)
- b. Respond to comments on the SEIR
- c. Prepare a revised Mitigation Monitoring and Reporting Program
- d. Compile a revised Final SEIR package for the Watermaster and ultimately for the IEUA Board's consideration (CEQA certification)
- e. Prepare and file a Notice of Determination (NOD) with the County and State on behalf of the IEUA and Watermaster.

TDA estimates that the above effort under Task 5 will require up to 250 hours plus the NOD filing fee with San Bernardino County (Note: this fee is based on 2022 Fish & Wildlife filing fee)

• Final PEIR/NOD: **\$25,000**

The end result of the Task 5 work efforts is a completed CEQA process. This document will be prepared at a level of detail consistent with our understanding of the project at hand, as demonstrated in our draft Project Description that the Watermaster Parties are currently reviewing and providing comment on. The Final OBMPU SEIR will cover each element and facility under the umbrella of this program environmental document.

Total Fee

Total fee, including the technical studies, is **<u>\$150,000</u>**. Based on our discussions, this proposal assumes no inordinate delays during review periods and no major issues, not identified above, arising during the review process.

| Task | Fee |
|--|------------------|
| Task 1 – Attend Meetings | \$20,000 |
| Task 2 – Prepare Technical Studies | \$50,000 |
| Task 3 – Prepare Notice of Recirculation | \$5,000 |
| Task 4 – Prepare Draft Recirculated SEIR | \$50,000 |
| Task 5 – Complete the CEQA Process with SEIR Notice of Determination (includes 2022 NOD filing fee) | \$25,000 |
| TOTAL Estimated Fee | <u>\$150,000</u> |

Conclusion

The total fee to be amended is \$150,000.

TDA appreciates the opportunity to submit this proposal to Watermaster. Tom Dodson and Kaitlyn Dodson-Hamilton will oversee preparation and carry out all final editing of the document(s) prepared to support the recirculation effort for the OBMPU SEIR. The scope of work outlined above will lead to a fully substantiated CEQA environmental determination for the proposed Project over a period that is assumed to begin in November 2022, and will conclude by June of 2023 at the latest depending on the CEQA path that is required to address impacts pertaining to the OBMPU.

Should you have any questions regarding the above proposal, please feel free to give me a call.

Sincerely,

Tom Dalson

CHINO BASIN WATERMASTER BUDGET AMENDMENT (A-22-11-02)

To: All Parties

Date:

Fiscal Year 2022/23

From :

November 10, 2022

Describe reason for the budget amendment here: The current "Amended" Budget for FY 2022/23 is \$9,781,976. This "Amended" budget is the May 26, 2022 version adopted by the Board on May 26, 2022 of \$9,490,976 plus the additional amounts of \$250,000 for AP Legal Services and \$41,000 for Non-Agricultural Pool Legal/Administrative Services. The current "Amended" Budget for FY 2022/23 is \$9,781,976 which is the September 8, 2022 version. Budget Amendment (A-22-11-01) is being submitted for \$60,000 in November 2022. If that Budget Amendment is approved, the "Amended" Budget for FY 2022/23 would increase to \$9,841,976. This Budget Amendment is proposed to increase the total Watermaster "Amended" budget from \$9,841,976 (excluding any Carry-Over funding) to \$9,991,976, an increase of \$150,000. The additional funding will come from the FY 2022/23 Assessment invoicing.

BACKGROUND

Watermaster issues an Assessment Package annually based on production during the previous production year (July 1 through June 30). Production information is generally collected quarterly, and other necessary information is collected annually. Assessments create funds that are used during the current fiscal year for budgeted expenses. Assessments are based on the approved budget allocated across the total assessable production in the Basin.

DISCUSSION

The Parties of the Overlying (Non-Agricultural) Pool and the Appropriative Pool were each sent a copy of their Water Activity Report in August 2022 that summarized their water activity for the previous year, including production, Dry Year Yield (DYY), land use conversion, transfers, voluntary agreements, and assignments. Each Party was asked to verify the data gathered and summarized by Watermaster. The Water Activity Reports were received back, and any necessary corrections were made.

Each Appropriative Pool Party's Water Activity Report was accompanied by a "Transfer from Storage to Satisfy Desalter Replenishment Obligation (DRO)" form, and summaries of DRO and Local Storage Accounts' balances. Using the form, the Parties submitted their preference on how they would like their share of DRO to be satisfied with stored water. Those transfers were then executed in September 2022 and the Parties' storage account balances were adjusted accordingly.

Assessments generate funds to cover the current year FY 2022/23 approved amended budget, in addition to reserves according to existing reserve policies. The Assessment Package does not factor in unspent monies as those are returned to Parties as a credit on the assessment invoicing. The FY 2021/22 Reserve excess cash to be refunded is \$0; Recharge Basin O&M excess cash to be refunded is \$0; the Debt Payment excess cash to be refunded is \$177,379.00; and the Recharge Improvement Projects excess cash to be refunded is \$0.

Continuing from the prior year, the total Operating Safe Yield (OSY) of the Appropriative Pool is 40,834 acre-feet, and Land Use Conversion has priority ahead of Early Transfer in calculating the Agricultural Pool Safe Yield Reallocation.

The Assessment Package is based on the FY 2022/23 Approved Budget totaling \$8,433,258, as it was amended on September 8, 2022, and identifies total assessable production for all Pools as 99,715.6 acre-feet, resulting in assessments of \$33.44/acre-foot for Judgment Administration and \$51.14/acre-foot for OBMP & Program Elements 1-9, excluding recharge debt service, recharge improvement project expenses, "Pomona Credit" assessments, and assessments for replenishment and CURO water.

For the production year 2021/22, there is a replenishment obligation of 45.9 acre-feet for overproduction, and 245.9 acre-feet for DRO. The new replenishment rate is \$811 per acre-foot, which is MWD's 2022 Tier 1 Untreated rate at \$799 plus OCWD's \$2 connection fee plus TVMWD's \$10 surcharge.

In September 2022, Watermaster received an RTS invoice from IEUA in the amount of \$39,879.12. The RTS is being assessed for water purchased during FY 2016/17 and FY 2017/18 through IEUA. A portion of the RTS is the fifth of ten annual installments for the 5,767.037 acre-feet of water purchased during FY 2016/17. The other portion is the fourth of ten annual installments for the 1,145.9 acre-feet of water purchased during FY 2017/18. The 85/15 Rule is applied where applicable for the RTS charges.

The additional assessments approved as part of the budget, allocated amongst the Appropriators based on their percentage of OSY, are the Pomona Credit assessment of \$66,667.00, recharge debt payment assessment of \$482.302.00, and recharge improvement project assessment of \$358,000.00. Other approved assessments will be invoiced based on formulas separate from the Assessment Package.

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

The total DRO for production year 2021/22 is 27,290.4 acre-feet. This includes the 10,000 acre-feet of DRO Contribution and 17,290.4 acre-feet of Remaining DRO. In August and September 2022, the Appropriative Pool Parties were given an opportunity to transfer water to satisfy their share of DRO. The Parties have submitted their requests and the DRO was satisfied with a combination of stored water, annual water rights, and Exhibit "G" Form A transfers. These transfers resulted in 245.9 acre-feet of the residual DRO to be assessed.

The storage loss rate applied to water held in storage accounts continues to be 0.07%. This rate is reflected in the Assessment Package and has been applied to the beginning balances of locally stored water accounts.

In cases where the ending balance of a storage account has increased from the beginning balance on July 1, 2022, a new storage agreement will be required. Parties with increased storage balances as of the approval of the Assessment Package have already submitted storage applications to Watermaster; the application submitted by the Overlying (Non-Agricultural) Pool was approved by the Watermaster Board on June 23, 2022, and the application submitted by the Appropriative Pool will be presented to the Watermaster Board for approval on November 17, 2022. Following the approval of the FY 2022/23 Assessment Package, a new storage agreement will be sent for signature to those Parties with increased balances.

Watermaster held two Assessment Package Workshops: one on October 18, 2022, and the other on November 1, 2022. The purpose of the workshops was to provide the Parties with information pertaining to the Assessment Package and opportunities to raise questions, concerns, and feedback.

The FY 2022/23 Assessment Package is being presented to the Pool Committees for advice and assistance. It will then be presented to the Advisory Committee for advice and assistance, and to the Watermaster Board for approval on November 17, 2022. If approved by the Board, invoices will be emailed to the Parties immediately following the Board's approval.

In addition to the line items detailed within the FY 2022/23 Assessment Package, additional credits and charges will be added to assessment invoices as directed by specific action of the Pool(s), or by action of Watermaster per past practice; these items are not dependent on the Board's approval of the Assessment Package. The following additional items will be added to this year's assessment Invoicing:

1. Refund of the excess FY 2021/22 Debt Service Payments to the Appropriative Pool: \$177,379.00

In addition to the items listed above, charges for Pool Administration/Legal Services will be included on the FY 2022/23 Assessment invoices as approved by each Pool Committee.

The FY 2022/23 Assessment Package as presented does not include the two budget amendments of \$60,000 or \$150,000 that are being presented for consideration under Business Items II.A. and II.B. respectively. If the budget amendment(s) are approved, a revised FY 2022/23 Assessment Package will be presented to the Watermaster Board for approval. The \$60,000 budget amendment will increase the OBMP assessment by \$0.60/AF while the \$150.000 budget amendment will increase the OBMP assessment by \$1.50/AF.

Notes:

1) IEUA is collecting the fifth of ten annual RTS charges for water purchased in FY 2016/17, and fourth of ten annual RTS charges for water purchased in FY 2017/18. 2) "Other Adjustments" (Column [8R]) includes adjustments from replenishment purchase for DRO. If water was not available for purchase in the previous year, this adjustment is based on the previous year's obligation, multipled by the current replenishment rate, minus the fund balance, similar to the CURO.

Notes:

¹ Original table format and content: WEI, Response to Condition Subsequent Number 7, November 2008. Table has since been revised as a result of the March 15, 2019 Court Order.

² Peace II Desalter Expansion was anticipated to have an annual production of approximately 10,000 AF.

³ 3,956.877 acre-feet + 316.177 acre-feet added as Non-Ag dedicated stored water per Paragraph 31 Settlement Agreements. Per Agreements, the water is deemed to have been dedicated as of June 30, 2007.

⁴ Six years of Desalter tracking (Production Year 2000-2001 through Production Year 2005/2006) may have incorrectly assumed that a significant portion of Desalter Induced Recharge. Condition Subsequent 7 included an adjustment of 29,070 AF against Desalter replenishment in Production Year 2008/2009.

⁵ Pursuant to section 7.2(e)(ii) of the Peace II Agreement, the initial schedule for the Peace II Desalter Expansion controlled overdraft of 175,000 acre-feet had been amended to be allocated to Desalter replenishment over a 17-year period, beginning in 2013/14 and ending in 2029/30. ⁶ For the first 10 years following the Peace II Agreement (2006/2007 through 2015/2016), the Non-Ag "10% Haircut" water is apportioned among the specific seven members of the Appropriative Pool, per PIIA 9.2(a). In the eleventh year and in each year thereafter, it is dedicated to Watermaster to further offset desalter replenishment. However, to the extent there is no remaining desalter replenishment obligation in any year after applying the offsets set forth in 6.2(a), it will be distributed pro rata among the members of the Appropriative Pool based upon each Producer's combined total share of OSY and the previous year's actual production.

⁷ Per the Peace II Agreement, Section 6.2(b)(iii) (as amended by the March 15, 2019 Court Order), the Remaining Desalter Replenishment Obligation is to be assessed against the Appropriative Pool, pro-rata based on each Producer's combined total share of OSY and their Adjusted Physical Production. ⁸ Due to the Re-Operation Schedule amendments in 2019, the Pre-Peace II Controlled Overdraft is left with a balance of 1,288.054 AF, which may be utilized at a later date to offset a future Desalter Replenishment Obligation.

BACKGROUND

Watermaster issues an Assessment Package annually based on the previous production year (July 1 through June 30). Production information is generally collected quarterly, and other necessary information is collected annually. The Assessment Package creates funds that are used during the current fiscal year for budgeted expenses. Assessments are based on the approved budget divided by the total assessable production in the Basin.

Watermaster is endowed with powers to levy and collect administrative, special project, and replenishment assessments necessary to maintain water levels and to cover the cost of administering the Chino Basin Restated Judgment. A resolution of the Watermaster Board is needed to levy the assessments and issue invoices to parties. Pursuant to the Restated Judgment, each party has thirty (30) days from the date of invoice to remit the payment for assessments due. After that date, interest will accrue on any portion which was due as provided for in Section 55(c) of the Restated Judgment.

DISCUSSION

The draft Fiscal Year 2022/23 Assessment Package is being considered for approval this month under Business Item II.C. and Resolution 2022-10 has been drafted for the Watermaster Board's consideration.

If Resolution 2022-10 is approved through the Watermaster process in November 2022, the invoices will be emailed in late November and assessments will be due 30 days later.
