Month of Activities to Celebrate the Importance of Water

May is Water Awareness Month

Rancho Cucamonga, CA (April 29, 2009) – On Tuesday, April 28, the Cucamonga Valley Water District (CVWD/District) adopted a proclamation recognizing May as Water Awareness Month at their Board of Directors meeting. Water Awareness Month is a statewide campaign that focuses on educating Californians about the value of water. While communicating the importance of water is a year-long priority for CVWD, Water Awareness Month provides the opportunity for agencies, cities, and counties to work together to promote water awareness to the public.

“Now more than ever it is critical to educate the community on the importance of conserving our precious resource of water,” stated Randall J. Reed, President of the CVWD Board of Directors. “Water Awareness Month is the perfect time to invite our surrounding cities to join us in our efforts to strengthen our conservation message.”

CVWD will celebrate Water Awareness Month with several activities, beginning with its 11th Annual Water Awareness Day on Saturday, May 9 from 11 a.m. to 2 p.m., at the District’s Operations Facility. Attendees will enjoy educational booths on water efficient landscaping, recycled water, District functions, and more. Other highlights include children’s games and a live puppet show. Water Awareness Day will provide fun and education for the entire family.

In addition to Water Awareness Day, CVWD will offer a Landscape Workshop on Saturday, May 30 to educate customers about water efficient landscaping. Along with educating the community about low-water use landscaping, CVWD also offers customers a chance to participate in the 3rd Annual Landscape Recognition. This program, which concludes May 31,

About CVWD

The Cucamonga Valley Water District delivers high quality, reliable drinking water to the City of Rancho Cucamonga, portions of the Upland, Ontario and Fontana, and some unincorporated areas of San Bernardino County. The District also maintains an extensive sewage collection system for residential, commercial and industrial users. The District serves 185,000 customers within a 47 square mile area, which includes 47,000 water connections and 37,000 sewer connections.
