

OPTIMUM BASIN MANAGEMENT PROGRAM PEIR

The Optimum Basin Management Program (“OBMP”) is the management plan for the Chino Basin order by the 1978 adjudication Judgment. The OBMP Phase I Report is described above. The OBMP is a comprehensive management plan that serves as the overall blueprint for Basin management decisions by Watermaster. Prior to implementation of the OBMP, extensive review under the California Environmental Quality Act (“CEQA”) was conducted. This review is documented in the OBMP Programmatic Environmental Impact Report (“PEIR”). The OBMP PEIR was certified by the Inland Empire Utilities Agency without objection.
