**CALL TO ORDER**

Vice-Chair Pierson chaired and called the Watermaster Board meeting to order at 11:00 a.m.

**FLAG SALUTE**

(00:00:38) Vice-Chair Pierson led the Board in the flag salute.

**ROLL CALL**

(00:01:12) Ms. Nelson conducted the roll call and announced that a quorum was present.

**PUBLIC COMMENTS**

**This is an opportunity for members of the public to address the Board on any short non-agenda items that are within the subject matter jurisdiction of the Chino Basin Watermaster. No discussion or action can be taken on matters not listed on the agenda, per the Brown Act. Each member of the public who wishes to comment shall be allotted three minutes, and no more than three individuals shall address the same subject.**

None

**AGENDA – ADDITIONS/REORDER**

None

**SAFETY MINUTE**

(00:02:41) Mr. Corbin informed the Board that Watermaster staff completed their first earthquake safety training, focused on personal safety and identifying appropriate cover areas at their respective locations and emphasized the importance of having these plans in place to keep safe during an earthquake.

## **I. CONSENT CALENDAR**

**All matters listed under the Consent Calendar are considered to be routine and non-controversial and will be acted upon by one motion in the form listed below. There will be no separate discussion on these items prior to voting unless any members, staff, or the public requests specific items be discussed and/or removed from the Consent Calendar for separate action.**

### **A. MINUTES**

Approve as presented:

1. Minutes of the Watermaster Board Meeting held March 26, 2026

### **B. FINANCIAL REPORTS**

February and March financials are being deferred to the May 2026 meetings.

(00:04:12)

*Motion by Mr. Bob Kuhn, seconded by Mr. Bill Velto, there being no dissent, the item passed unanimously by voice vote among those present.*

***Moved to approve the Consent Calendar as presented.***

## **II. BUSINESS ITEMS**

### **A. REVIEW AND DISCUSSION OF WATERMASTER RULES AND REGULATIONS – SECTION 2.10**

Discussion only.

(00:04:34) Mr. Corbin gave a report. A discussion ensued. The Board directed staff to assist with a kick-off of the Ad Hoc Committee to review specific issues and questions and report back within 90 days.

### **B. AWARD OF THREE-YEAR CONTRACT FOR FINANCIAL AUDIT SERVICES**

Approve the audit engagement letter with Rogers, Anderson, Malody & Scott, LLP (RAMS), as presented, and authorize the General Manager to execute the contract on behalf of Watermaster.

(00:22:54) Mr. Corbin gave a report.

(00:26:00)

*Motion by Mr. Mike Gardner, seconded by Mr. Bill Velto, there being no dissent, the item passed unanimously by voice vote among those present.*

***Moved to approve Business Item II.B. as presented.***

## **III. REPORTS/UPDATES**

### **A. WATERMASTER LEGAL COUNSEL**

1. March 27, 2026 Court Hearing (Watermaster Motion for Court to Receive and File 48th Annual Report)

## STAFF REPORT

DATE: May 2026  
TO: Watermaster Committees & Board  
SUBJECT: Monthly Financial Reports (For the Reporting Periods Ended February 28, 2026 and March 31, 2026) (Consent Calendar Item I.B.)

Issue: Record of Monthly Financial Reports for the reporting periods ended February 28, 2026 and March 31, 2026 [Normal Course of Business]

Recommendation: Receive and file Monthly Financial Reports for the reporting period ended February 28, 2026 and March 31, 2026 as presented.

Financial Impact: Unless otherwise noted, all expenditures were included in the Fiscal Year 2025/26 budget as approved by the Advisory Committee and adopted by the Watermaster Board in May 2025, and subsequently amended in July 2025, and in January 2026.

---

### ACTIONS:

**Appropriative Pool – May 14, 2026 [Final]:** Received and filed.  
**Non-Agricultural Pool – May 14, 2026 [Final]:** Received and filed without approval.  
**Agricultural Pool – May 14, 2026 [Final]:** Received and filed.  
**Advisory Committee – May 21, 2026 [Final]:** Received and filed.  
**Watermaster Board – May 28, 2026 [Recommended]:** Receive and file.

## **BACKGROUND**

A monthly financial reporting packet is provided to keep all members apprised of Watermaster revenues, expenditures, and other financial activities. Monthly reports include the following:

1. Cash Disbursements – Summarized report of all payments made during the reporting month.
2. Credit Card Expense Detail – Detail report of all credit card activity during the reporting month.
3. Combining Schedule of Revenues, Expenses & Changes in Net Assets – Detail report of all revenue and expense activity for the fiscal year to date (YTD), summarized by pool category.
4. Treasurer’s Report – Summary of Watermaster investment holdings and anticipated earnings as of month end.
5. Budget to Actual Report – Detail report of actual revenue and expense activity, shown for reporting month and YTD, comparatively to the amended budget and carryover budget.
6. Monthly Variance Report & Supplemental Schedules – Supporting schedule providing explanation for major budget variances, additional tables detailing pool fund balances, salaries expense, legal expense, engineering expense, and carryover budget.

## **DISCUSSION**

Detailed explanations of major variances and other additional information can be found on the “Monthly Variance Report & Supplemental Schedules.”

Watermaster staff is available to provide additional explanations or respond to any questions on these reports during the monthly meetings as requested.

## **ATTACHMENTS**

1. Monthly Financial Reports (Period Ended February 28, 2026)
2. Monthly Financial Reports (Period Ended March 31, 2026)

## Monthly Variance Report & Supplemental Schedules

### For the period July 1, 2025 to February 28, 2026

#### (Unaudited)

## Budget to Actual

The Budget to Actual report summarizes the operating and non-operating revenues and expenses of Chino Basin Watermaster for the fiscal year-to-date (YTD). Columns are included for current monthly and YTD activity shown comparatively to the FY 26 amended budget and FY 25 carryover budget. The final two columns indicate the amount over or under budget, and the YTD percentage of total budget used. As of February 28<sup>th</sup>, the target budget percentage is generally 67%.

## Revenues

**Lines 1-5 Administration Revenue** – Includes local agency subsidies and administrative assessment for the Appropriative, Agricultural and Non-Agricultural Pools.

- Line 2 Local Agency Subsidies includes the annual Dry Year Yield (DYY) administrative fee received. This account is at 100% of budget due to the timing of payment.

**Lines 6-12 Other Revenue** – Includes Pool replenishment assessments, interest income, miscellaneous income, and carryover budget from prior years.

## Expenses

**Lines 13-34 Judgment Administration Expense** – Includes Watermaster general administrative expenses, contract services, insurance, office and other administrative expenses. Below is a summary of notable account variances at month end:

- Line 16 Office Building Expense includes office lease, telephone, utilities, repair and maintenance, and building interior renovation costs. The account is at 70% of budget due to the timing of the office lease payment.
- Line 21 Watermaster Legal Services includes outside legal counsel expenses. The account is over budget due to increased administration matters and court coordination not originally anticipated in the budget.
- Line 22 Insurance includes general liability insurance, directors' and officers' liability, umbrella coverage, environmental pollution liability and other various insurance policies. The account is over budget due to an unanticipated increase in the cost of Municipalities Umbrella coverage, as well as the implementation of a Cyber insurance policy that was not included in the original budget.
- Line 23 Dues and Subscriptions include annual dues for ACWA, CA Groundwater Coalition, SHRM, and other miscellaneous subscriptions. The account is at 94% of budget due to the timing of subscription renewals.

**Lines 35-47 Optimum Basin Management Plan (OBMP) Expense** – Includes legal, engineering, groundwater level monitoring, allocated administrative expenses, and other expenses.

**Lines 48-51 Other Expense** – Includes groundwater replenishment, settlement expenses, and various refunds as appropriate.

## Monthly Variance Report & Supplemental Schedules

### For the period July 1, 2025 to February 28, 2026

(Unaudited)

## Pool Services Fund Accounting

Each Pool has a fund account created to pay their own legal service invoices. The legal services invoices are funded and paid using the fund accounts (8467 for the Overlying Agricultural Pool (OAP), 8567 for the Overlying Non-Agricultural Pool (ONAP), and 8367 for the Appropriate Pool (AP)). Along with the legal services fund account for the OAP (8467), the OAP also has two other fund accounts for Ag Pool Meeting Attendance expenses (8470), and Special Projects expenses (8471). The ONAP also has a meeting compensation fund account (8511). Additionally, the OAP has a reserve fund that is held by Watermaster and spent at the direction of the OAP. The AP also has account 8368 relating to the Thomas Harder & Company contract. These fund accounts are replenished at the direction of each Pool, and the legal service invoices are approved by the Pool leadership and when paid by Watermaster, are deducted from the existing fund account balances. If the fund account for any pool reaches zero, no further payments can be paid from the fund, and a replenishment action must be initiated by the Pool.

The following tables detail the fund balance accounts as of February 28, 2026 (continued next page):

## Monthly Variance Report & Supplemental Schedules

### For the period July 1, 2025 to March 31, 2026

#### (Unaudited)

## Budget to Actual

The Budget to Actual report summarizes the operating and non-operating revenues and expenses of Chino Basin Watermaster for the fiscal year-to-date (YTD). Columns are included for current monthly and YTD activity shown comparatively to the FY 26 amended budget and FY 25 carryover budget. The final two columns indicate the amount over or under budget, and the YTD percentage of total budget used. As of March 31<sup>st</sup>, the target budget percentage is generally 75%.

## Revenues

**Lines 1-5 Administration Revenue** – Includes local agency subsidies and administrative assessment for the Appropriative, Agricultural and Non-Agricultural Pools.

- Line 2 Local Agency Subsidies includes the annual Dry Year Yield (DYY) administrative fee received. This account is at 100% of budget due to the timing of payment.

**Lines 6-12 Other Revenue** – Includes Pool replenishment assessments, interest income, miscellaneous income, and carryover budget from prior years.

## Expenses

**Lines 13-34 Judgment Administration Expense** – Includes Watermaster general administrative expenses, contract services, insurance, office and other administrative expenses. Below is a summary of notable account variances at month end:

- Line 16 Office Building Expense includes office lease, telephone, utilities, repair and maintenance, and building interior renovation costs. The account is at 78% of budget due to the timing of the office lease payment.
- Line 21 Watermaster Legal Services includes outside legal counsel expenses. The account is over budget due to increased administration matters and court coordination not originally anticipated in the budget.
- Line 22 Insurance includes general liability insurance, directors' and officers' liability, umbrella coverage, environmental pollution liability and other various insurance policies. The account is over budget due to an unanticipated increase in the cost of Municipalities Umbrella coverage, as well as the implementation of a Cyber insurance policy that was not included in the original budget.
- Line 23 Dues and Subscriptions include annual dues for ACWA, CA Groundwater Coalition, SHRM, and other miscellaneous subscriptions. The account is at 95% of budget due to the timing of subscription renewals.

**Lines 35-47 Optimum Basin Management Plan (OBMP) Expense** – Includes legal, engineering, groundwater level monitoring, allocated administrative expenses, and other expenses.

**Lines 48-51 Other Expense** – Includes groundwater replenishment, settlement expenses, and various refunds as appropriate.

#### (Unaudited)

## Pool Services Fund Accounting

Each Pool has a fund account created to pay their own legal service invoices. The legal services invoices are funded and paid using the fund accounts (8467 for the Overlying Agricultural Pool (OAP), 8567 for the Overlying Non-Agricultural Pool (ONAP), and 8367 for the Appropriate Pool (AP)). Along with the legal services fund account for the OAP (8467), the OAP also has two other fund accounts for Ag Pool Meeting Attendance expenses (8470), and Special Projects expenses (8471). The ONAP also has a meeting compensation fund account (8511). Additionally, the OAP has a reserve fund that is held by Watermaster and spent at the direction of the OAP. The AP also has account 8368 relating to the Thomas Harder & Company contract. These fund accounts are replenished at the direction of each Pool, and the legal service invoices are approved by the Pool leadership and when paid by Watermaster, are deducted from the existing fund account balances. If the fund account for any pool reaches zero, no further payments can be paid from the fund, and a replenishment action must be initiated by the Pool.

The following tables detail the fund balance accounts as of March 31, 2026 (continued next page):

<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: left; border-bottom: 1px solid black;"><b>Fund Balance For Non-Agricultural Pool</b></th> </tr> <tr> <th colspan="2" style="text-align: left; border-bottom: 1px solid black;"><b>Account 8567 - Legal Services</b></th> </tr> </thead> <tbody> <tr> <td>Beginning Balance July 1, 2025:</td> <td style="text-align: right;">\$ 77,376.71</td> </tr> <tr> <td>Additions:</td> <td></td> </tr> <tr> <td style="padding-left: 20px;">Interest Earnings</td> <td style="text-align: right;">2,178.61</td> </tr> <tr> <td style="padding-left: 20px;">Payments received on ONAP Assessment invoices issued 11/25/25</td> <td style="text-align: right; border-bottom: 1px solid black;">24,490.40</td> </tr> <tr> <td>Subtotal Additions:</td> <td style="text-align: right; border-bottom: 1px solid black;">26,669.01</td> </tr> <tr> <td>Reductions:</td> <td></td> </tr> <tr> <td style="padding-left: 20px;">Invoices paid July 2025 - March 2026</td> <td style="text-align: right; border-bottom: 1px solid black;">(935.00)</td> </tr> <tr> <td>Subtotal Reductions:</td> <td style="text-align: right; border-bottom: 1px solid black;">(935.00)</td> </tr> <tr> <td><b>Available Fund Balance as of March 31, 2026</b></td> <td style="text-align: right; border-bottom: 3px double black;"><b>\$ 103,110.72</b></td> </tr> </tbody> </table>	<b>Fund Balance For Non-Agricultural Pool</b>		<b>Account 8567 - Legal Services</b>		Beginning Balance July 1, 2025:	\$ 77,376.71	Additions:		Interest Earnings	2,178.61	Payments received on ONAP Assessment invoices issued 11/25/25	24,490.40	Subtotal Additions:	26,669.01	Reductions:		Invoices paid July 2025 - March 2026	(935.00)	Subtotal Reductions:	(935.00)	<b>Available Fund Balance as of March 31, 2026</b>	<b>\$ 103,110.72</b>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: left; border-bottom: 1px solid black;"><b>Fund Balance For Appropriate Pool</b></th> </tr> <tr> <th colspan="2" style="text-align: left; border-bottom: 1px solid black;"><b>Account 8367 - Legal Services</b></th> </tr> </thead> <tbody> <tr> <td>Beginning Balance July 1, 2025:</td> <td style="text-align: right;">\$ 224,225.46</td> </tr> <tr> <td>Additions:</td> <td></td> </tr> <tr> <td style="padding-left: 20px;">Interest Earnings</td> <td style="text-align: right;">12,082.72</td> </tr> <tr> <td style="padding-left: 20px;">Payments received on AP Assessment invoices issued 11/17/22</td> <td style="text-align: right;">81,892.83</td> </tr> <tr> <td style="padding-left: 20px;">Payments received on appellant share of Post-TOA legal fees</td> <td style="text-align: right; border-bottom: 1px solid black;">112,640.87</td> </tr> <tr> <td>Subtotal Additions:</td> <td style="text-align: right; border-bottom: 1px solid black;">206,616.42</td> </tr> <tr> <td>Reductions:</td> <td></td> </tr> <tr> <td style="padding-left: 20px;">Invoices paid July 2025 - March 2026</td> <td style="text-align: right;">(22,673.00)</td> </tr> <tr> <td style="padding-left: 20px;">Budget Transfer</td> <td style="text-align: right; border-bottom: 1px solid black;">(25,000.00) *</td> </tr> <tr> <td>Subtotal Reductions:</td> <td style="text-align: right; border-bottom: 1px solid black;">(47,673.00)</td> </tr> <tr> <td><b>Available Fund Balance as of March 31, 2026</b></td> <td style="text-align: right; border-bottom: 3px double black;"><b>\$ 383,168.88</b></td> </tr> </tbody> </table> <p style="font-size: small; margin-top: 5px;">*Transfer of funds issued to OAP meeting stipends per AP Chair direction.</p>	<b>Fund Balance For Appropriate Pool</b>		<b>Account 8367 - Legal Services</b>		Beginning Balance July 1, 2025:	\$ 224,225.46	Additions:		Interest Earnings	12,082.72	Payments received on AP Assessment invoices issued 11/17/22	81,892.83	Payments received on appellant share of Post-TOA legal fees	112,640.87	Subtotal Additions:	206,616.42	Reductions:		Invoices paid July 2025 - March 2026	(22,673.00)	Budget Transfer	(25,000.00) *	Subtotal Reductions:	(47,673.00)	<b>Available Fund Balance as of March 31, 2026</b>	<b>\$ 383,168.88</b>

### For the period July 1, 2025 to March 31, 2026

(Unaudited)

### Pool Services Fund Accounting – Cont.

**Fund Balance for Agricultural Pool**  
**Account 8467 - Legal Services (Held by AP)**

Beginning Balance July 1, 2025:	\$ 225,597.51
Reductions:	
Invoices paid July 2025 - March 2026	(160,712.50)
Subtotal Reductions:	(160,712.50)
<b>Available Fund Balance as of March 31, 2026</b>	<b>\$ 64,885.01</b>

**Agricultural Pool Reserve Funds**  
**As shown on the Combining Schedules**

Beginning Balance July 1, 2025:	\$ 881,534.98
Additions:	
YTD Interest earned on Ag Pool Funds FY 26	36,791.72
Transfer of Funds from AP to Special Fund for Legal Service Invoices	160,712.50
Total Additions:	197,504.22
Reductions:	
Legal service invoices paid July 2025 - March 2026	(160,712.50)
Subtotal Reductions:	(160,712.50)
<b>Agricultural Pool Reserve Funds Balance as of March 31, 2026:</b>	<b>\$ 918,326.70</b>

**Fund Balance For Agricultural Pool**  
**Account 8470 - Meeting Compensation (Held by AP)**

Beginning Balance July 1, 2025:	\$ 18,069.65
Additions:	
Budget Transfer	25,000.00 *
Subtotal Additions:	25,000.00
Reductions:	
Compensation paid July 2025 - March 2026	(32,125.00)
Subtotal Reductions:	(32,125.00)
<b>Available Fund Balance as of March 31, 2026</b>	<b>\$ 10,944.65</b>

\*Transfer of funds issued from AP legal services per AP Chair direction.

**Fund Balance For Agricultural Pool**  
**Account 8471 - Special Projects (Held by AP)**

Beginning Balance July 1, 2025:	\$ 12,189.00
Reductions:	
Invoices paid July 2025 - March 2026	-
Subtotal Reductions:	-
<b>Available Fund Balance as of March 31, 2026</b>	<b>\$ 12,189.00</b>

### “Carry Over” Funding:

The “Carry Over” funding was calculated at the start of FY 26. The Total “Carry Over” funding amount of \$553,870 has been posted to the general ledger accounts. The total amount consisted of \$508,838 from Engineering Services, \$34,994 from OBMP Activities, and \$10,038 from Administration Services. More detailed information is provided on the table below.

#### Carry Over Budget Detail FY 2025/26

## STAFF REPORT

DATE: May 28, 2026  
TO: Board Members  
SUBJECT: Watermaster Fiscal Year 2026/27 Budget (Business Item II.A.)

Issue: To consider the adoption of the Fiscal Year 2026/27 Budget.

Recommendation: Adopt the Watermaster Fiscal Year 2026/27 Budget as presented.

Financial Impact: The Fiscal Year 2026/27 Proposed Budget is \$13,371,561 (excluding any Carryover Funds).

---

### ACTIONS:

**Appropriative Pool – May 14, 2026 [Final]:** Unanimously recommended Advisory Committee approval.

**Non-Agricultural Pool – May 14, 2026 [Final]:** Unanimously recommended Advisory Committee approval subject to changes which Pool representative deems appropriate.

**Agricultural Pool – May 14, 2026 [Final]:** Unanimously recommended Advisory Committee approval.

**Advisory Committee – May 21, 2026 [Final]:** Unanimously approved.

**Watermaster Board – May 28, 2026 [Recommended]:** Adopt budget as presented.

## **BACKGROUND**

To prepare a budget of anticipated expenses each year, Watermaster conducts meetings with internal staff and consultants to discuss upcoming projects and anticipated work. As the budget is developed, the related budgeted expenses are continually refined based on feedback from the stakeholders. The following budget-related meetings were held during the past few months:

- Watermaster staff met with the West Yost staff on February 25, 2026 for an Engineering Services budget overview to discuss the ongoing engineering-related activities required by the Judgment, the Peace Agreements, Court orders, the Basin Plan, as well as other upcoming engineering activities.
- During the period of February through April 2026, Watermaster staff held numerous additional meetings and discussions with staff from West Yost to discuss questions and feedback regarding the Engineering Services budget and expected engineering activities for fiscal year (FY) 2026/27.
- Watermaster staff received and discussed the Legal Services budget and expected legal activities for FY 2026/27 with staff from Brownstein Hyatt Farber Schreck during the period of February through March 2026.
- In March 2026, the Treasurer of Inland Empire Utilities Agency, Mr. Alex Lopez, provided Watermaster's share of the Debt Service figures to be included in the budget for FY 2026/27 as well as the projected Pay-Go amounts for Project 23a.
- The Groundwater Recharge Coordinating Committee has met on a quarterly basis to review the anticipated costs of operations and maintenance activities and develop the scope of activities for the upcoming FY 2025/26 budget as recommended by IEUA. The last meeting was held on February 24, 2026.
- The Ground-Level Monitoring Committee met on March 5, 2026 to review and recommend a scope and budget for the Ground-Level Monitoring Program for FY 2026/27. The Technical Memorandum regarding the proposed recommendation for the scope and budget for the Ground-Level Monitoring Committee for FY 2026/27 was issued on February 19, 2026 and finalized on May 1, 2026.
- The Prado Basin Habitat Sustainability Committee met on March 19, 2026 to review and recommend a scope and budget for the Prado Basin Habitat Sustainability Program for FY 2026/27. The Technical Memorandum regarding the proposed recommendation for the scope and budget for the Prado Basin Habitat Sustainability Program for FY 2026/27 was issued on March 11, 2026.
- The Recharge Investigations and Projects Committee meets quarterly, and the most recent meeting was held on April 16, 2026. The purpose of these meetings is to review ongoing capital projects and future years' capital expense projections, and State Revolving Fund (SRF) loan and other financing activities.

Based on the above-mentioned activities of the various committees, along with other input from staff and consultants, Watermaster developed the Proposed FY 2026/27 Budget version dated May 14, 2026 in the amount of \$13,371,561. Attachment 1 provides the Proposed FY 2026/27 Budget Detail.

## **DISCUSSION**

On Thursday, March 19, 2026, Watermaster presented the Proposed FY 2026/27 Budget of \$13,659,201 to the Advisory Committee in accordance with Section 30 (Annual Administrative Budget) of the Restated Judgment. The presentation provided the budget drivers, how the budget is developed, various budget comparison tables, the estimated assessment calculation, and future actions required. Representatives from West Yost and Brownstein Hyatt Farber Schreck presented their respective proposed budgets and provided information on new efforts, changes in budgets, and/or projects that are being removed for FY 2026/27.

Attendees at the meeting were requested to submit their budget-related questions using the FY 2026/27 Budget Questions portal located on the home page of Watermaster's website. As of this writing, there have been no questions posted on the portal.

Budget Workshop #1 was held on Tuesday, April 14, 2026 and representatives from West Yost, Brownstein Hyatt Farber Schreck, and IEUA were available during the meeting to answer questions related to their specific areas of focus as contained within the proposed budget. The workshop focused on covering the changes that occurred since the time of release, which were all captured on the Comparative Analysis supplemental schedule, as well as providing a detailed view on the multi-year Recharge Improvement projects budget. An opportunity was provided at the end of the workshop for attendees to ask any questions. Parties were instructed on how to navigate to the Watermaster website portal to submit their questions, and the workshop was concluded with future required actions and next steps.

Budget Workshop #2 was held on Tuesday, April 28, 2026 and similar to the first workshop, the team was present to answer any questions related to their specific areas of focus within the proposed budget. The workshop focused on reviewing the changes that occurred since the first workshop using the supplemental comparative schedule and analyzing the calculation for projected assessments should DYY production be excluded from the total assessable production. There were no new topics raised for discussion, and the meeting was concluded with future required actions and next steps.

Since the budget release on March 19, 2026, the following changes have occurred:

- The year-to-date actuals were updated from February to March 2026.
- Production numbers were projected based on actuals throughout Q3 and based on the feedback received by producers.
- Legal Miscellaneous services budget (account 6078) was reduced by \$36,900 due to a clerical error and San Sevaine Litigation services (account 6907.51) was removed from the budget since that litigation is winding down, resulting in a total legal services budget decrease of \$239,400.
- The engineering budget to Support Implementation of Safe Yield Court Order budget (account 7614) was reduced by \$11,406.
- Capital project budget for Groundwater Recharge OIT and PLC Upgrades increased by \$121,666 to properly account for Watermaster's share of costs.
- Capital project budget for Groundwater Recharge Condition Assessments decreased by \$25,000 to properly account for Watermaster's share of costs.
- Capital project budget for College Heights Basin Well Sensor Installation decreased by \$75,000 to properly account for Watermaster's share of costs.
- Capital project budget for Groundwater/Recycled Water Valve Actuator Replacement decreased by \$37,500 to properly account for Watermaster's share of costs.
- Capital project budget for Groundwater Recharge SCADA Infrastructure Replacement decreased by \$23,500 to properly account for Watermaster's share of costs.
- Watermaster increased the budget for annual report services (account 6061.3) by \$2,500.

The comparative schedule of changes since the budget release is provided in Attachment 2. The budget total at the budget release was \$13,659,201 and the total amount at the time of this report is \$13,371,561, which has not changed since Workshop #1, and represents a total decrease of \$287,640.

The expense sections below highlight the Proposed Fiscal Year 2026/27 budget.

	<b>FY 2025/26 Amended Budget</b>	<b>FY 2026/27 Proposed Budget</b>	<b>Budget Variance (\$)</b>	<b>Budget Variance (%)</b>
<b>Expenses</b>				
Watermaster Expenses & Salaries	\$ 3,871,216	\$ 4,118,746	\$ 247,530	6%
Engineering Services	2,659,500	3,272,047	612,548	23%
Legal Services	1,350,949	1,241,865	(109,084)	(8)%
Debt Service	687,653	1,528,007	840,354	122%
Recharge Basin O&M	3,448,412	3,210,895	(237,517)	(7)%
<b>Total Expenses</b>	<b>\$ 12,017,729</b>	<b>\$ 13,371,561</b>	<b>\$ 1,353,832</b>	<b>11%</b>

**WATERMASTER EXPENSES AND SALARIES - #1**

The first section of the Proposed FY 2026/27 budget relates to Watermaster Expenses, Labor, and Burden. The proposed Watermaster expenses for FY 2026/27 are \$1,012,048 or 5% above the previous year's Approved Budget of \$966,789. Labor and Burden for FY 2026/27 are \$3,106,698 which is \$202,271 or 7% above the previous year's Approved Budget of \$2,904,427. The Full Time Equivalent (FTE) number of Watermaster employees for the Proposed FY 2025/26 Budget is currently at 12 FTE though not all budgeted positions are presently filled.

	<b>FY 2025/26 Amended Budget</b>	<b>FY 2026/27 Proposed Budget</b>	<b>Budget Variance (\$)</b>	<b>Budget Variance (%)</b>
<b>Watermaster Expenses</b>				
Total Expenses	\$ 966,789	\$ 1,012,048	\$ 45,259	5%
Total Payroll and Payroll Burden	2,904,427	3,106,698	202,271	7%
<b>Total Watermaster Expenses</b>	<b>\$ 3,871,216</b>	<b>\$ 4,118,746</b>	<b>\$ 247,530</b>	<b>6%</b>

All proposed adjustments to the Labor and Burden expense category are routine and follow past Watermaster practices and policy. Watermaster is using the approved Salary Schedule from FY 2025/26 and budgeting a 3.4 % Cost of Living adjustment effective July 1, 2026 using January CPI as published by the Bureau of Labor Statistics for the San Bernardino/Riverside areas. There are no new employee benefits being proposed that create additional costs for Watermaster. The draft FY 2026/27 Proposed Pay Schedule is shown in Attachment 3.

**ENGINEERING SERVICES - #2**

The second section of the Proposed FY 2026/27 budget relates to Watermaster Engineering Services. The Engineering Services budget is proposed at \$3,272,047 which is \$612,548 or 23% above the Approved FY 2025/26 Budget of \$2,659,500 (which excludes Carry-Over funding for ongoing projects).

The Engineering Services documents are provided below in Attachment 4, a 49-page detailed narrative including Rationale, Scope of Work, Deliverables for each budget category, and 6 pages of supplemental information in Tables 1 through 4.

Incorporated within the Engineering Services budget of \$3,272,047 are the Ground-Level Monitoring Committee (GLMC) recommendations for FY 2026/27. The GLMC recommended a proposed budget of \$462,032 less anticipated "Carry-Over" funding of \$0 for a budget amount of \$462,032 for FY 2026/27.

Based on the discussions at meetings held by the GLMC, the recommendations and associated budget are shown below in Attachment 5.

The following chart details the proposed Engineering Services budget for FY 2026/27 categorized by Watermaster account number. The comparison is between the FY 2026/27 Proposed Budget of \$3,272,047 and the FY 2025/26 Adopted Budget of \$2,659,500 plus Carry-Over funding of \$588,838 for ongoing projects.

LEGAL SERVICES - #3

The third section of the Proposed FY 2026/27 budget relates to Watermaster Legal Services. The Proposed FY 2026/27 Brownstein Hyatt Farber Schreck budget is \$1,241,865 which is \$109,084 or 8% below the FY 2025/26 Approved Budget of \$1,350,949.

The following chart details the proposed Legal Services budget for FY 2026/27 categorized by Watermaster's account numbers. The comparison is between the FY 2026/27 Proposed Budget of \$1,241,865 and the FY 2025/26 Approved Budget of \$1,350,949.

As with past practices over the last ten plus years, the Brownstein Hyatt Farber Schreck Legal Services budget has been developed using a formula of assumed hours to complete a specific task multiplied by the hourly rate. Brownstein Hyatt Farber Schreck hourly rates for some staff reflect an increase for FY 2026/27.

Brownstein has provided a detailed memorandum and worksheet which is provided below in Attachment 6 dated April 14, 2026.

**DEBT SERVICE AND RECHARGE BASIN O&M COSTS - #4**

The fourth section of the Proposed FY 2026/27 budget relates to Recharge Basin O&M, Debt Service, Pay-Go funding for Project 23a, and Capital Projects.

	<b>FY 2025/26 Amended Budget</b>	<b>FY 2026/27 Proposed Budget</b>	<b>Budget Variance (\$)</b>	<b>Budget Variance (%)</b>
<b>Recharge Water Program - Funding from CBWM</b>				
Recharge Operations and Maintenance	\$ 1,697,272	\$ 1,528,250	\$ (169,022)	(10)%
Debt Service	687,653	1,528,007	840,354	122%
Project 23A Funding (pay-go)	1,317,040	924,979	(392,061)	(30)%
Capital Projects	434,100	757,666	323,566	75%
<b>Total Funding from CBWM to be Assessed</b>	<b>\$ 4,136,065</b>	<b>\$ 4,738,902</b>	<b>\$ 602,837</b>	<b>15%</b>

The Recharge Basin O&M expenses are shared costs between IEUA and Watermaster and are based upon the Agreement for Operations and Maintenance of Facilities to Implement the Chino Basin Recharge Master Plan. The pro-rata cost-sharing methodology is based on the relative proportion of recycled water to the total water recharged in the basins.

The total FY 2026/27 budget for the Watermaster’s portion of the shared costs for Recharge Basin O&M expenses is \$1,528,250. The 2025/26 budget for this category was \$1,697,272. The detailed worksheets provided by IEUA for the FY 2026/27 budget are shown in Attachment 7.

The Debt Service is based upon principal and interest on the (1) 2020A Refunding (2008B Variable Revenue Rate Bonds) totaling \$5.7M for 11 years @ 0.849% and matures in 2032; (2) San Sevaine Improvement (SRF Loan) totaling \$1.5M for 30 years @1.8% and matures in December 2049; (3) Lower Day Improvement (SRF Loan) totaling \$2.8M for 20 years @ .55% and matures in January 2042; and (4) Wineville/Jurupa/RP-3 Basin Recharge Improvements (SRF Loan) totaling \$15.4M for 20 years @ .55% and matures in March 2046; and (5) Interfund Loan Interest. This section also includes the pay-go portion of the remaining amount for Project 23a (a Recharge Investigations and Projects Committee project) in the amount of \$924,979.

The Proposed FY 2026/27 Debt Service budget is \$1,528,007. The FY 2025/26 budget for this category was \$687,653.

The current budget details regarding the Debt Service provided by IEUA are shown in Attachment 8.

At the Pool Committee meetings held on May 14, 2026, the Appropriative and Overlying (Agricultural) Pool unanimously recommended Advisory Committee to approve the Watermaster Fiscal Year 2026/27 Proposed Budget as presented; the Overlying (Non-Agricultural) Pool unanimously recommended its representatives to support at Advisory Committee and Watermaster Board subject to changes they deem appropriate.

The Fiscal Year 2026/27 Budget was presented to the Advisory Committee on May 21, 2026, where it was unanimously approved.

<sup>1</sup> Due to the timing of when the Budget and the Assessment Package are prepared, actual production numbers on this page may differ from the Budget depending on any last minute corrections during the Assessment Package

<sup>2</sup> Total costs are allocated to Pools by actual production percentages. Does not include Recharge Debt Payment, Recharge Improvement Projects, Replenishment Water purchases, or RTS charges.

<sup>3</sup> Judgment Administration excludes OAP, AP, and ONAP specific legal services, meeting compensation, or Special Funds. These items invoiced separately on the Assessment invoices.

<sup>4</sup> June 30th fund balance (estimated) less any funds required for Operating Reserves, OAP, AP, or ONAP Reserves, and Carryover replenishment obligations.

<sup>5</sup> The previous fiscal year's budget numbers are from the previously approved Assessment Package and does not reflect numbers from any amended budget that may have followed.

# Chino Basin Watermaster Engineering Services

## *Fiscal Year 2026/27*

### EXECUTIVE SUMMARY

This document summarizes a proposed scope-of-work and cost estimate for Watermaster Engineering Services in fiscal year (FY) 2026/27. For each engineering task in this summary, the following information is provided:

- **Cost Estimate.** This is the estimated cost to complete the task in FY 2026/27, which includes all costs for Watermaster Engineer labor, equipment rentals, laboratory analyses, travel, other subcontractors, etc. Subcontractor costs are passed through with no additional “markup.” The cost estimates include costs that will be covered by cost sharing partners (e.g., IEUA) and/or carryover budget from the prior FY. Hence, the cost to the Watermaster Parties in 2026/27 will be less than the costs stated herein for those tasks with cost share and/or carryover funding.
- **Rationale.** This is a description of why the task is being proposed for FY 2026/27, including references to associated regulatory requirements, Court Orders, CEQA requirements, or agreements.
- **Scope.** This is a summary description of the scope of work required to complete the task.
- **Deliverables.** This is a summary of the task deliverables.

This summary is accompanied by four tables that describe the cost estimates in more detail and compare the cost estimates to the prior year Watermaster budget:

- **Table 1.** This is a detailed line-item cost estimate for each proposed task. It includes totals for the following:
  - **Total Engineering Cost Estimate.** The total cost to complete the task in 2026/27, including Watermaster Engineer labor, equipment rentals, laboratory analyses, travel, other subcontractors, etc.
  - **IEUA Cost Share.** The amount of Total Engineering Cost Estimate covered by IEUA under cost sharing agreements.
  - **Watermaster Engineering Cost Estimate.** The Total Engineering Cost Estimate minus the IEUA Cost Share.
  - **Expected Watermaster Carryover.** The estimated amount of unspent approved budget for work planned for FY 2025/26 that is now expected to be performed in FY 2026/27.<sup>1</sup>
  - **Proposed Watermaster Budget for Engineering Services 2026/27.** The Watermaster Engineering Cost Estimate minus Expected Carryover. This is the estimated costs that would be assessed to the Watermaster parties for 2026/27.
- **Table 2.** This table compares the Watermaster Engineering Cost Estimates for FY 2026/27 versus 2025/26.
- **Table 3.** This table explains the variances between the Watermaster Engineering Cost Estimates for FY 2026/27 versus 2025/26 for the tasks with variances greater than \$15,000.

---

<sup>1</sup> The expected Watermaster carryover does not include the portion of carryover that IEUA would be responsible for in a cost-share; for cost-share projects that assume carryover, IEUA’s portion of carryover is included in the “IEUA Cost Share” column.

- **Table 4.** This table breaks down the Total Engineering Cost Estimate into the various expense categories of labor and other direct costs.

The total proposed cost estimate for engineering services in FY 2026/27 is \$3,513,272. Cost sharing contributions by IEUA (~\$201,975) reduces the estimated costs for Watermaster engineering services to \$3,272,047, which is about \$171,357 less than the Watermaster engineering costs for FY 2025/26. Currently, it is estimated that about \$39,250 of the Watermaster engineering costs will be funded via carryover funds from the FY 2025/26 budget.

DRAFT

**8306, 8506, 8406, 6206, 6306 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**  
**Pool, Advisory, Watermaster Meetings**

	Cost Estimate
Consultant Labor	\$114,448
Other Direct Costs	\$2,387
<b>Total</b>	<b>\$116,835</b>

**Rationale**

The Watermaster General Manager and/or the Watermaster Board may direct West Yost to prepare for and attend the following meetings:

- Watermaster Pool meetings (Appropriative, Agricultural, and Overlying Non-Agricultural)
- Watermaster Advisory Committee meetings
- Watermaster Board meetings

Watermaster meetings are assumed to occur in all months except August and December.

**Scope of Work**

For each meeting, West Yost will prepare engineering updates with supporting maps, charts, tables, handouts, and PowerPoint presentations, as appropriate. West Yost shall also participate in conference calls with Watermaster’s General Manager and staff to prepare for the meetings and may be asked by Watermaster staff to help prepare staff reports for business items.

**Deliverables**

West Yost will deliver the following to Watermaster:

- Maps, charts, tables, handouts, and PowerPoint presentations prepared by West Yost for the meetings.
- Other as-requested deliverables.

**6901.8, 5901.8 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**Other General Meetings as Requested**

	Cost Estimate
Consultant Labor	\$78,416
Other Direct Costs	\$1,909
<b>Total</b>	<b>\$80,325</b>

**Rationale**

The Watermaster General Manager and/or the Watermaster Board may direct West Yost to prepare for and attend the following meetings:

- Other general meetings as requested by Watermaster’s General Manager or Board.
- Coordination conference calls with Watermaster’s General Manager and staff.

Work on this task will be performed only upon request by Watermaster’s General Manager or the Board.

**Scope of Work**

For each meeting, West Yost will prepare supporting maps, charts, tables, handouts, and PowerPoint presentations, as appropriate, and may participate in conference calls to coordinate with Watermaster staff prior to or following the meetings.

**Deliverables**

West Yost will deliver the following to Watermaster:

- Maps, charts, tables, handouts, and PowerPoint presentations prepared by West Yost for the meetings.
- Other as-requested deliverables.

**5935 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**Material Physical Injury Requests, Others**

	Cost Estimate
Consultant Labor	\$36,096
Other Direct Costs	\$0
<b>Total</b>	<b>\$36,096</b>

**Rationale**

At the direction of the Watermaster General Manager, West Yost will conduct a material physical injury analysis for each transfer application, storage application, and recharge application, or as otherwise directed by Watermaster and pursuant to the Peace Agreement and the Rules and Regulations. Specifically, Article 10 of the Watermaster Rules and Regulations (paragraph 10.10) requires that:

*“[...] Watermaster prepare a written summary and analysis (which will include an analysis of the potential for material physical injury) of the Application and provide the Parties with a copy of the written summary and advanced notice of the date of Watermaster’s scheduled consideration and possible action on any pending Applications.”*

Per the Peace Agreement (page 8), material physical injury is defined as:

*“[...] material injury that is attributable to Recharge, Transfer, storage and recovery, management, movement or Production of water or implementation of the OBMP, including, but not limited to, degradation of water quality, liquefaction, land subsidence, increases in pump lift and adverse impacts associated with rising groundwater.”*

**Scope of Work**

This task provides engineering services to assist Watermaster staff in the evaluation of transfer, storage, and recharge applications. Occasionally, Watermaster staff requires engineering services in the evaluation of such transfers. Material physical injury analyses anticipated the fiscal year will cover water transfers among the parties, recharge applications, and storage application, as directed by Watermaster.

**Deliverables**

The deliverables for this work will be defined by specific Watermaster direction for projects requiring MPI analyses.

**5906.71 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**Miscellaneous General Manager and Data Requests – from Watermaster Staff**

	Cost Estimate
Consultant Labor	\$112,352
Other Direct Costs	\$300
<b>Total</b>	<b>\$112,652</b>

**Rationale**

The Watermaster General Manager and/or Watermaster staff may direct West Yost to perform specific technical analyses and/or respond to miscellaneous data requests related to Chino Basin optimum management. The recommended budget estimate is based on prior years' experience.

**Scope of Work**

West Yost shall perform the following tasks:

- Perform ad hoc analyses and review of documents requested by the Watermaster General Manager and/or Watermaster staff.
- Fulfill requests from the Watermaster General Manager and/or Watermaster staff, including the preparation of PowerPoint presentations, maps, charts, and technical reports.
- Fulfill requests for hydrologic data, model files, model analyses, PowerPoint presentations, maps, charts, technical reports, etc., as requested by Watermaster staff.

**Deliverables**

West Yost shall deliver to Watermaster data-request deliverables as well as PowerPoint presentations, maps, charts, and technical reports, as requested.

**5906.72 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**Miscellaneous Data Requests – from Non-Watermaster Staff, Watermaster Parties, and Non-Watermaster Entities**

	Cost Estimate
Consultant Labor	\$58,316
Other Direct Costs	<u>\$0</u>
<b>Total</b>	<b>\$58,316</b>

**Rationale**

The Watermaster General Manager and/or Watermaster staff may direct West Yost to perform specific technical analyses and/or respond to miscellaneous data requests from Watermaster parties, non-Watermaster staff, and non-Watermaster entities. The recommended budget estimate is based on prior years’ experience.

**Scope of Work**

West Yost shall perform the following tasks:

- Perform ad hoc analyses requested by Watermaster parties, non-Watermaster staff, and non-Watermaster entities, as directed by the Watermaster General Manager and/or Watermaster staff.
- Fulfill requests for hydrologic data, model files, model analyses, PowerPoint presentations, maps, charts, technical reports, etc. requested by Watermaster parties, non-Watermaster staff, or non-Watermaster entities, as directed by Watermaster staff.

**Deliverables**

West Yost shall deliver to Watermaster the data-request deliverables as well as PowerPoint presentations, maps, charts, and technical reports, as requested by the Watermaster General Manager and/or Watermaster staff.

## 6901.95 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

### SGMA Reporting Requirement for April 1, 2027 WC Section 10720.8 (f).

	Cost Estimate
Consultant Labor	\$24,858
Other Direct Costs	\$0
<b>Total</b>	<b>\$24,858</b>

### Rationale

The Sustainable Groundwater Management Act (SGMA) has a requirement that the Watermaster or a local agency of an adjudicated basin identified in WC Section 10720.8(a) submit specific data, information, and reports for the previous water year annually to the California Department of Water Resources (DWR) by April 1 of each year. Pursuant to SGMA WC Section 10720.8(f), Watermaster is required to submit:

- (A) Groundwater elevation data unless otherwise submitted pursuant to WC Section 10932
- (B) Annual aggregated data identifying groundwater extraction
- (C) Surface water supply used for or available for use for groundwater recharge or in-lieu use
- (D) Total water use
- (E) Change in groundwater storage
- (F) The annual report submitted to the court

### Scope of Work

The reporting period is water year 2025/26. Item (A) has already been submitted for the California Statewide Groundwater Elevation Monitoring (CASGEM) Program, so no further data will be reported pursuant to the SGMA. Items (B) through (D) and (F) will be compiled from the appropriators, the IEUA, and Watermaster. Item (E) is a result from the Chino Basin groundwater model that will be updated with data through September 30, 2026. The change in storage will be estimated from the resulting water budget table for water year 2025/26.

The DWR has implemented an Adjudicated Basin Annual Reporting System, which is an on-line submission system that consists of specialized reporting templates for entering all the required information and provides the capability to upload supporting documents and reports. A Technical Memorandum will be prepared for Watermaster, explicitly documenting the information for Items (A) through (F) that will be populated into the reporting templates for the April 1 submittal.

### Deliverables

West Yost shall deliver the following to Watermaster:

- A draft memorandum that documents the information submitted to the DWR Adjudicated Basin Annual Reporting System.
- The draft Memorandum will be submitted to Watermaster in February 2027 for Watermaster review and comment.
- The final Memorandum will be submitted to Watermaster by March 4, 2027 for review and approval by the Watermaster Pools, Advisory Committee, and Board.
- The required information and documents will be submitted to the DWR using the Adjudicated Basin Annual Reporting System by April 1, 2027.

**6906 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**Project Management**

	Cost Estimate
Consultant Labor	\$67,966
Other Direct Costs	<u>\$0</u>
<b>Total</b>	<b>\$67,966</b>

**Rationale**

This task is for routine project management and the preparation of quarterly estimated-cost-at-completion reports.

**Scope of Work**

West Yost shall perform routine project management services, including:

- Set up and update the Integrated Schedule Budget Management (ISBM) system.
- Prepare, execute, and set up accounting for supplemental notice to proceeds and budget authorizations
- Analyze staffing requirements and make assignments for various tasks.
- Review the schedules of deliverables.
- Prepare monthly budget summary tables.
- Prepare the Estimated Cost at Completion (ECAC) and Earned Value (EV) estimates.
- Prepare quarterly progress reports on progress, schedule, and ECAC for Watermaster staff
- Attend joint Watermaster/West Yost senior staff meetings.
- Attend Watermaster budget workshops.

**Deliverables**

West Yost shall deliver the following to Watermaster:

- Quarterly summary of costs to date, ECACs, and estimates of progress on a task-by-task basis.
- Monthly budget summary tables.

**6906.1 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**Watermaster Model Update and Required Demonstrations**

	<b>Task 1</b>	<b>Task 2</b>	<b>Total</b>
Consultant Labor	\$78,388	\$10,000	\$88,388
Other Direct Costs	\$0	\$0	\$0
<b>Total</b>	<b>\$78,388</b>	<b>\$10,000</b>	<b>\$88,388</b>

**Rationale**

Watermaster updated its groundwater models in 2007, 2013, 2020, and 2025. Watermaster applies its groundwater model to estimate net recharge and Safe Yield, to assess the state of hydraulic control, to assist with SGMA compliance, to conduct material physical injury assessments, to assist in the development of a storage framework and Storage Management Plan, and to support the development of TDS and nitrate concentration changes in the basin.

Activities historically performed in this task have included: the assessment of the adequacy of supplemental water recharge capacity pursuant to Section 7.3 of the Peace II Agreement; the evaluation of the balance of recharge and discharge; and the evaluation of the cumulative effects of transfers. Each year since 2012, a technical assessment of the adequacy of supplemental water recharge capacity was completed and reported to the Watermaster pursuant to Section 7.3 of the Peace II Agreement.

The evaluation of the balance of recharge and discharge and the cumulative effects of transfers was initiated in FY 2025/26 and will be completed in FY 2026/27 following the completion of the groundwater model update in summer 2026 (the 2025 Safe Yield Reevaluation). This effort will include the evaluation of the adequacy of the 6,500 afy supplemental water recharge requirement pursuant to Section 8.4(e) of the Peace II Agreement.

The work anticipated for this line item in FY 2026/27 includes the evaluation of the balance of recharge and discharge and the cumulative effect of transfers and the preparation of annual finding of compliance with Section 7.3 of the Peace II Agreement.

**Scope of Work**

The consultant shall perform the following tasks:

- **Task 1 – Evaluate the Balance of Recharge and Discharge and the Cumulative Effects of Transfers**
  - Task 1.1—Collect, Compile, and Review Data to Update Historical Hydrology and Prepare Annual Estimate of Balance of Recharge and Discharge. The evaluation of the balance of recharge and discharge is a retrospective analysis of the water budgets in each of the five OBMP management zones (MZs) from the period of July 1, 2020 through June 30, 2026. The consultant will collect and/or compile the necessary data to replace the projection data in the 2025 Chino Valley Model (CVM) for this period, including hydrologic data, pumping data, and recharge data.
  - Task 1.2—Evaluate the Minimum Recharge Quantity in MZ-1. This task will include preparing and running an alternative scenario of the historical model (Task 1.1) to simulate the impact of varying supplemental water recharge in MZ-1. The alternative scenario will be compared to the historical model, and the results will be compared to evaluate whether the minimum recharge quantity in MZ-1 should be greater than 6,500 acre-feet per year. The scope of this task will be precisely defined by the end of FY 2025/26.

- Task 1.3—Compile the Historical Transfers in the Chino Basin and Determine the Annual Avoided Wet-Water Replenishment. The consultant will use the Watermaster Assessment Packages to calculate the avoided wet-water replenishment by Party by year.
- Task 1.4—Evaluate Basin Response to the Water Replenishment That Would Have Occurred in the Absence of Transfers. In this task, the consultant will create a new scenario that will be identical to the calibration run of the 2025 CVM, with imported water recharge increased to the volume that would have occurred in the absence of transfers for the period of July 1, 2000 through June 30, 2026. This scenario will be simulated and compared to the 2025 CVM calibration run (extended through June 30, 2026 in Task 1.1) and to determine the cumulative effect of transfers on the basin.
- Task 1.5—Prepare Report. In this task, the consultant will document the work in Tasks 1.1 through 1.4.
- **Task 2 Prepare Finding of Substantial Compliance.** The work required for this task includes review and update of planning information, testing the adequacy of existing wet-water recharge capacity to meet future wet-water replenishment obligations, and preparation of a technical memorandum to document substantial compliance as required by Section 7.3 of the Peace II Agreement.

## Deliverables

For Task 1, West Yost will prepare a report for Watermaster documenting the evaluation of the balance of recharge and discharge, the minimum recharge quantity in MZ-1, and the cumulative effects of transfers.

For Task 2, West Yost will deliver a technical memorandum to Watermaster documenting the annual finding of substantial compliance.

**5945 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**Assist Watermaster in Preparing the 49th Annual Report**

	Cost Estimate
Consultant Labor	\$18,334
Other Direct Costs	\$0
<b>Total</b>	<b>\$18,334</b>

**Rationale**

This work is required by the Chino Basin Judgment and the Sustainable Groundwater Management Act.

**Scope of Work**

This task includes support services to assist Watermaster staff in the preparation of the Watermaster's 49<sup>th</sup> Annual Report documenting Watermaster's activities and water accounting for FY 2025/26. West Yost will work closely with Watermaster staff and their contractor Martin Rauch to provide as-requested support to collect data and prepare content for the Annual Report.

**Deliverables**

West Yost's deliverables and associated schedule will be defined by Watermaster upon project kick-off in July 2026.

**6906.21 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING**

**2026 State of the Basin Report**

	Cost Estimate
Consultant Labor	\$169,740
Other Direct Costs	<u>\$0</u>
<b>Total</b>	<b><u>\$169,740</u></b>

**Rationale**

Pursuant to the November 15, 2001 Court Order, Watermaster prepares a State of the Basin report every two years. The State of the Basin reports are used to document how the state of the basin has changed since the implementation of the Peace Agreement in September 2000. The scope of the report includes a characterization of the time histories of groundwater levels and quality, storage, production, recharge (replenishment and other recharge), ground level, state of hydraulic control, desalter planning and engineering, and production meter installation.

**Scope of Work**

The consultant shall perform the following tasks:

- Compile and analyze production data for FY 2024/25 and FY 2025/26 and prepare exhibits showing production activities by pool and historical trends in production.
- Compile and analyze recharge and recycled water reuse data for FY 2024/25 and FY 2025/26 and prepare exhibits showing groundwater recharge trends.
- Compile and analyze surface water, climate, and land use data and prepare exhibits that show general hydraulic conditions and storage in the Basin.
- Analyze basin-wide water quality and prepare maps that show five-year maximum concentrations for constituents of concern, and historical trends in TDS and nitrate by management zone.
- Prepare rasters depicting the current extent of the VOC plumes.
- Analyze basin-wide groundwater levels and prepare that show historical trends in groundwater levels by management zone with production and recharge trends.
- Create groundwater elevation contours for spring 2026 for the entire basin and the HCMP area.
- Perform raster calculations and comparisons of groundwater-elevation changes that occurred between spring 2000 and spring 2026.
- Compile and analyze ground-level monitoring data for 2021 through 2026 and prepare exhibits showing trends in vertical ground motion in MZ1 and MZ2, and time histories of groundwater pumping, aquifer recharge, groundwater levels, and ground motion in these areas.
- Prepare text to describe analysis of hydrology, storage, production, recharge, groundwater levels, and groundwater quality
- Update ArcGIS Story Map graphics and text.

## **Deliverables**

The West Yost will deliver an updated web-based online interactive State of the Basin Report in ArcGIS StoryMaps. A draft online version will first go to Watermaster staff for review. A final version will be published on Watermaster’s website. A digital export of the State of the Basin in a pdf format will be prepared for filing for the court.

The ArcGIS Online State of the Basin is a new format developed for the 2024 State of the Basin effort. Preparing the 2026 State of the Basin in this online format will result in cost savings because the foundational structure and workflows have already been established, and the effort is less intensive than producing a traditional report.

DRAFT

## 7502, 7505 – PE1: COMPREHENSIVE MONITORING PROGRAM

### Groundwater and Surface Water Quality Monitoring Program

	Cost Estimate
Consultant Labor	\$222,534
Other Direct Costs	\$51,500
<b>Total</b>	<b>\$274,034</b>

### Rationale

The OBMP, Peace Agreements, and Implementation Plan all call for a key-well monitoring program for groundwater quality as part of Program Element 1.<sup>2</sup> The data generated in Program Element 1 are used for the Biennial State of the Basin Report, the Groundwater Model update and calibration, material physical injury assessments, the evaluation of non-point source groundwater contamination and plumes associated with point-source discharge, Hydraulic Control demonstrations, the Triennial Ambient Water Quality Recomputation<sup>3</sup>, and evaluation of groundwater/surface water interaction near riparian habitat in the Prado Basin. The groundwater-quality and surface water monitoring programs, as currently implemented, meet the minimum requirements for all the above uses.

The Hydraulic Control Monitoring Program (HCMP)<sup>4</sup> and the Prado Basin Habitat Sustainability Program (PBHSP)<sup>5</sup> are regulatory monitoring programs with groundwater and surface water monitoring components. Data collected for the HCMP and PBHSP are also used for all other basin-wide uses.<sup>6</sup>

### Scope of Work

West Yost shall perform the following tasks:

- Assist Watermaster staff in conducting annual sampling at approximately 28 private wells and 11 monitoring wells between July and October 2026. Samples are sent to Clinical Laboratories for analysis. Sub-tasks include:
  - Annual re-evaluation of wells to sample for the key-well monitoring program.

<sup>2</sup> OBMP Program Element 1—*Develop and Implement Comprehensive Monitoring Program.*

<sup>3</sup> The Hydraulic Control demonstrations and the Triennial Ambient Water Quality Recomputation are salt-management requirements of the Basin Plan: [http://www.swrcb.ca.gov/santaana/water\\_issues/programs/basin\\_plan/docs/chapter5.pdf](http://www.swrcb.ca.gov/santaana/water_issues/programs/basin_plan/docs/chapter5.pdf)

<sup>4</sup> The HCMP surface water and groundwater monitoring programs are maximum-benefit requirements are salt-management requirements of the Basin Plan: [http://www.swrcb.ca.gov/santaana/water\\_issues/programs/basin\\_plan/docs/chapter5.pdf](http://www.swrcb.ca.gov/santaana/water_issues/programs/basin_plan/docs/chapter5.pdf) and are more specifically described in 2014 HCMP Work Plan.

<sup>5</sup> Pursuant to Mitigation Measure 4.4-3 in the Peace II CEQA SEIR, the PBHSP adaptive monitoring program includes groundwater and surface water monitoring components to ensure that Peace II Agreement activities to not adversely impact Prado Basin riparian habitat. The PBHSP is an adaptive monitoring program that is implemented under the guidance of the Prado Basin Habitat Sustainability Committee (PBHSC) with an annual process of evaluating results and interpretations of the monitoring data and adjusting the monitoring as needed. In FY 2024/25 the proposed PBHSP groundwater and surface water monitoring includes utilization of 15-minute temperature and specific conductance (EC) data measured in the transducers at the PBHSP monitoring wells, and the collection of field water quality parameters quarterly at four surface water sites along Mill and Chino Creeks. For efficiency, the work to download, process, and upload the 15-minute temperature and EC data at the wells is included with the PBHSP transducers in the Groundwater Level Monitoring Program 7104.3.

<sup>6</sup> Watermaster’s groundwater quality monitoring program includes annual sampling at the 21 HCMP monitoring wells and triennial monitoring at the 17 PBHSP wells as part of the basin-wide monitoring program to be used for Watermaster’s various purposes and characterization of water quality.

- Perform field work to sample a portion of the wells on an as-needed basis.<sup>7</sup>
- Process, perform quality assurance/quality control (QA/QC), review all field and laboratory data, and upload to HydroDaVE.
- Coordinate and perform field oversight for well rehabilitation, well maintenance, and monitoring support on an as-needed basis.
- Obtain groundwater-quality and surface water-quality data routinely for about 1,100 wells and 50 surface water sites and from all appropriators and cooperators in and immediately adjacent to the Chino Basin. This includes collecting data from about 30 open investigation clean-up sites in the Chino Basin with data available on the GeoTracker<sup>8</sup> and EnviroStor<sup>9</sup> websites and checking for any new sites on GeoTracker and EnviroStor with confirmed or potential impacts to groundwater quality. All data collected are checked for reasonableness and compiled into HydroDaVE's centralized database. Subtasks include:
  - Place phone calls, send emails, and attend meetings with the water quality staff of appropriators and other cooperating parties.
  - Collect, process, review, and upload hardcopy, spreadsheet, database, and laboratory electronic data deliverables to HydroDaVE.
- Obtain groundwater and surface water quality data for the HCMP. West Yost shall perform the following tasks:
  - Collect and analyze annual groundwater-quality samples from the 21 HCMP monitoring wells, and quarterly groundwater-quality samples from the two USGS National Water-Quality Assessment Program (NAWQA) and two Santa Ana River Water Company (SARWC) wells. Samples are sent to Clinical Laboratories for analysis. Subtasks include:
    - Schedule field work and coordinate with analytical laboratory.
    - Perform field work. Field work follows the SOPs defined in the 2014 HCMP Work Plan.
    - Process, QA/QC, and upload field and laboratory data to HydroDaVE.
  - Collect and analyze quarterly surface-water quality grab samples at two specified surface-water stations on the Santa Ana River. Samples are sent to Clinical Laboratories for analysis. Subtasks include:
    - Schedule field work and coordinate with analytical laboratory.
    - Perform field work. Field work follows the SOPs defined in the 2014 HCMP Work Plan.
    - Process, QA/QC, and upload field and laboratory data to HydroDaVE.
- Collect, compile, review, and upload the following surface water data to HydroDaVE twice per year:
  - Daily discharge data from POTW discharge locations upstream of Prado Dam.

---

<sup>7</sup> An as-needed field budget is provided in the event that Watermaster staff needs assistance in completing the water quality sampling program during the target monitoring period of July 2026 through October 2026. The field work will be performed on an as-needed basis, as directed by Watermaster staff.

<sup>8</sup> <http://geotracker.waterboards.ca.gov/>

<sup>9</sup> <http://www.envirostor.dtsc.ca.gov/public/>

- Surface water discharge at six USGS gaging stations along the Santa Ana River and tributaries upstream of Prado Dam.
- Collect, review, and upload quarterly surface water quality field parameters for four surface water sites on Chino Creek and Mill Creek for the PBHSP:
  - Perform field work.
  - Process, QA/QC, and upload field data to HydroDaVE.

## **Deliverables**

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

- All groundwater-quality data from the key well sampling program will be uploaded to HydroDaVE by December 31, 2026.
- All available groundwater-quality data collected from Chino Basin appropriators and cooperators for the January 1, 2026 to June 30, 2026 period will be uploaded to HydroDaVE by October 31, 2026.
- All available groundwater-quality data collected from Chino Basin appropriators and cooperators for the July 1, 2026 to December 31, 2026 period will be uploaded to HydroDaVE by April 30, 2027.
- All annual groundwater-quality data collected at the 21 HCMP monitoring wells, during August 2026 will be uploaded to HydroDaVE by September 30, 2026.
- All quarterly groundwater-quality data collected at the two NAWQA and two SARWC wells during July 2026, October 2026, January 2027, and April 2027, will be uploaded to HydroDaVE by August 31, 2026, November 30, 2026, February 28, 2027, and May 31, 2027, respectively.
- All quarterly surface water-quality data collected at the two Santa Ana River sites and surface water quality field parameters collected at four Chino Creek and Mill Creek sites during July 2026, October 2026, January 2027, and April 2027, will be uploaded to HydroDaVE by August 31, 2026, November 30, 2026, February 28, 2027, and May 31, 2027, respectively.
- All POTW surface water quality and discharge data for POTWs, and discharge data for the USGS gaging stations for January 2026 through September 2026 will be uploaded to HydroDaVE by November 30, 2026, and for October 2026 through December 2026 will be uploaded to HydroDaVE by February 28, 2027.

**7104.3, 7104.8, 7104.9 – PE1: COMPREHENSIVE MONITORING PROGRAM**

**Groundwater-Level Monitoring Program**

	Cost Estimate
Consultant Labor	\$299,364
Other Direct Costs	\$60,185
<b>Total</b>	<b>\$359,549</b>

**Rationale**

The OBMP, the Peace Agreements, and the Implementation Plan all call for a key well monitoring program for groundwater levels as part of Program Element 1. The data generated in Program Element 1 are used for the Biennial State of the Basin Report, Hydraulic Control demonstrations, land-subsidence monitoring, Groundwater Model development and recalibration, material physical injury assessments, the periodic assessment of Safe Yield, the estimation of storage change, evaluating the impacts of desalter production on nearby private wells, the California Statewide Groundwater Elevation Monitoring (CASGEM) Program,<sup>10</sup> the Triennial Ambient Water Quality Recomputation, and the monitoring of water levels near riparian habitat in Prado Basin to evaluate potential impacts from Peace II Agreement activities.<sup>11</sup> Hydraulic Control demonstrations and the Triennial Ambient Water Quality Recomputation are required by the Basin Plan.<sup>12</sup> The groundwater-level monitoring program, as currently implemented, meets the minimum requirements for all the above uses.

**Scope of Work**

West Yost shall perform the following tasks:

- Collect and compile groundwater-level measurements from about 1,200 wells. Of the 1,200 wells, about 140 wells are equipped with transducers that measure water levels every 15-minutes that are visited and downloaded quarterly by West Yost and Watermaster field staff. At about 50 wells, groundwater-level measurements are measured by Watermaster staff monthly. At about 1,000 wells in and immediately adjacent to the Chino Basin, groundwater-level measurements are measured by appropriators and cooperators, and the data are collected by West Yost or are provided to West Yost from the Watermaster. All data are checked for reasonableness regarding historical data at the well, converted from depth-to-water to groundwater-level elevation, and compiled into the centralized HydroDaVE database. Sub-tasks include:
  - Schedule field work for West Yost field staff.

<sup>10</sup> The California Department of Water Resources (DWR) developed the CASGEM Program in accordance with California State Senate Bill SB 6, which was passed in November 2009. CASGEM is a comprehensive groundwater-elevation monitoring program that utilizes locally implemented monitoring programs to track seasonal and long-term groundwater elevations in the state’s alluvial groundwater basins and subbasins, as defined in DWR Bulletin 118. Pursuant to California Water Code Section 10927, Watermaster is the monitoring entity for the Chino and Cucamonga Groundwater Subbasins.

<sup>11</sup> Pursuant to Mitigation Measure 4.4-3 in the Peace II CEQA SEIR, monitoring described in the Adaptive Management Plan for the PBHSP is implemented to ensure that Peace II Agreement activities to not adversely impact Prado Basin riparian habitat.

<sup>12</sup> The Hydraulic Control demonstrations and the Triennial Ambient Water Quality Recomputation are salt-management requirements of the Basin Plan: [http://www.swrcb.ca.gov/santaana/water\\_issues/programs/basin\\_plan/docs/chapter5.pdf](http://www.swrcb.ca.gov/santaana/water_issues/programs/basin_plan/docs/chapter5.pdf)

- Perform field work to download and maintain approximately 100 transducers for various monitoring wells in Watermaster’s monitoring network. (Field work follows the Standard Operating Procedures [SOPs] defined in the 2014 HCMP Work Plan.)
- Purchase and install replacement transducers and direct-read cables as needed for all wells in the transducer monitoring programs.
- Perform field work on an as-needed basis<sup>13</sup> to download transducer data from 30 wells routinely downloaded by Watermaster staff.
- Review and upload manual groundwater-level measurements collected by Watermaster staff monthly to HydroDaVE.
- Process, review, and upload transducer data downloaded quarterly by West Yost staff into HydroDaVE.
- Process, review, and upload cooperator groundwater-level measurements collected by West Yost to HydroDaVE.
- Review and upload transducer data downloaded quarterly by Watermaster staff, and Appropriative pool water-level measurements collected by Watermaster staff to HydroDaVE.
- Annually reevaluate the key well program due to abandoned and destroyed wells.
- Submit groundwater-level data collected at 46 wells to the Chino and Cucamonga CASGEM program<sup>14</sup> on a biennial basis (fall and spring).
- Help coordinate and contract subcontractors for as-needed well maintenance and rehabilitation services for wells in the monitoring network.

## **Deliverables**

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

- All available groundwater-level data collected manually in the field or downloaded from transducers for the period of July 1, 2026 through September 31, 2026 will be uploaded to HydroDaVE by October 15, 2026.
- All available groundwater-level data collected manually in the field or downloaded from transducers for the period of October 1, 2026 through December 31, 2026 will be uploaded to HydroDaVE by January 15, 2027.
- All available groundwater-level data collected manually in the field or downloaded from transducers for the period of January 1, 2027 through March 31, 2027 will be uploaded into HydroDaVE by April 7, 2027.

---

<sup>13</sup> An as-needed budget is provided in the event that Watermaster staff needs assistance in completing the transducer downloads during the target monitoring period for each quarterly download event. The quarterly download of all wells should be completed during the first month at the beginning of each FY quarter—July 2026; October, 2026; January 2027; and April, 2027. Field work will be performed on an as-needed basis, as directed by Watermaster staff.

<sup>14</sup> Watermaster is the designated Monitoring Entity for the Chino and Cucamonga Basins CASGEM program. CASGEM is a mandated statewide monitoring and reporting program for the entire State of California, per the amended California State Water Code SBx7-6 in November 2009.

- All available groundwater-level data collected manually in the field or downloaded from transducers for the period of April 1, 2027 through June 10, 2027 will be uploaded to HydroDaVE by June 30, 2027.
- All available groundwater-level data collected from appropriators in the Chino Basin for the April 1, 2026 through June 30, 2026 period will be uploaded to HydroDaVE by September 15, 2026.
- All available groundwater-level data collected from appropriators in the Chino Basin for the July 1, 2026 through September 30, 2026 period will be uploaded to HydroDaVE by December 15, 2026.
- All available groundwater-level data collected from appropriators in the Chino Basin for the October 1, 2026 through December 31, 2026 period will be uploaded to HydroDaVE by March 15, 2027.
- All available groundwater-level data collected from appropriators in the Chino Basin for the January 1, 2027 through March 31, 2027 period will be uploaded to HydroDaVE by May 31, 2027.
- The fall 2026 CASGEM data submittals will be provided to the DWR by December 31, 2026. The spring 2027 CASGEM data submittals will be provided to the DWR by June 30, 2027.
- Complete coordination and contracting of subcontractors as required to perform as-needed well maintenance and rehabilitation services for wells in the monitoring network.
- Purchase and installation of new replacement transducers and direct-read cables as needed throughout the year for all wells in the transducer monitoring programs.

**7402, 7403, 7406, 7408 – PE1: COMPREHENSIVE MONITORING PROGRAM**  
**MZ-1 Ground-Level Monitoring Program**

	Cost Estimate
Consultant Labor	\$166,718
Other Direct Costs	\$61,396
<b>Total</b>	<b>\$228,114</b>

**Rationale**

Program Element 4 of the OBMP states that land subsidence and ground fissuring in MZ-1 are not acceptable and, to the extent that the cause is pumping in MZ-1, should be managed to tolerable levels. Watermaster conducts a ground-level monitoring program to support Program Element 4 per the requirements of the Peace Agreement, the subsequently developed and Court-approved Chino Basin Subsidence Management Plan, and the monitoring and mitigation requirements of the Peace II California Environmental Quality Act (CEQA) Supplemental Environmental Impact Report (SEIR).

**Scope of Work**

West Yost shall perform the following tasks:

- Maintain and replace (if necessary) the existing monitoring equipment at extensometer and well facilities in the MZ-1 Managed Area and the Areas of Subsidence Concern.
- Download, check, and store monitoring data from extensometers, wells, and recharge activities in the MZ-1 Managed Area and the Areas of Subsidence Concern.
- Conduct GPS surveys at four key control points in the Managed, Northwest, Southeast, and Northeast areas:
  - High-precision GPS acquisition at four control points is recommended over traditional benchmark surveys, as it provides a more cost-effective approach for monitoring vertical ground motion in areas of subsidence concern. This approach also allows for verification of InSAR-derived vertical ground motion estimates, supports calibration of 1D compaction models, and establishes reference elevations for future benchmark surveys.
- Conduct InSAR monitoring of ground motion across western Chino Basin from March 2026 to March 2027 using information collected by the TerraSAR-X satellite.

**Deliverables**

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

- All ground-level monitoring data, available as of May 1, 2027, will be uploaded into Watermaster’s database by June 30, 2027.

**7302, 7306 – PE1: COMPREHENSIVE MONITORING PROGRAM**

**Prado Basin Habitat Monitoring, Data Analysis and Reporting – 50% IEUA Cost Share**

	Cost Estimate <sup>15</sup>
Consultant Labor	\$152,861
Other Direct Costs	<u>\$13,740</u>
<b>Total</b>	<b>\$166,601</b>

**Rationale**

Mitigation Measure 4.4-3 of the Peace II CEQA SEIR (Biological Resources/Land Use & Planning) calls for the IEUA, Watermaster, and the Orange County Water District to form the Prado Basin Habitat Sustainability Committee (PBHSC). The purpose of the PBHSC is to ensure that the Peace II Agreement actions will not significantly or adversely impact the Prado Basin riparian habitat. The responsibilities of the PBHSC are to develop and implement an adaptive monitoring program for the Prado Basin Habitat Sustainability Program (PBHSP) and to prepare annual reports that include recommendations for ongoing monitoring and any adaptive management actions required to mitigate any measured or prospective loss of riparian habitat that is attributable to the Peace II Agreement.

**Scope of Work**

The PBHSP is implemented as described in the Adaptive Management Plan and recommendations in the Annual Reports. The PBHSP includes the implementation of a monitoring program and the preparation of an annual report. The monitoring program includes monitoring of riparian habitat and all factors that can affect the riparian habitat such as changes in groundwater levels, surface water discharge, climate, and other factors.<sup>16</sup> The PBHSP for FY2026/27 is described in the Recommended Scope and Budget Technical Memorandum of the PBHSP for FY 2026/27 developed through the PBHSC. This work includes the following:

- Collect, compile, and review the following riparian habitat data:
  - High-resolution air photo of the Prado Basin region in July 2026.
  - Landsat remote sensing data in the Prado Basin region over the 2026 water year.
- Collect, compile, review, and upload the 2026 climatic data to HydroDaVE.
- Analyze data and prepare a draft and final 2026 Annual Report of the PBHSC.
- Prepare a Recommended Scope and Budget of the PBHSP for FY 2027/28.
- Prepare for and participate in PBHSC meetings.

<sup>15</sup> IEUA will cost share 50 percent of this task.

<sup>16</sup> The groundwater and surface water monitoring components of the PBHSP are included with Tasks 7103.3 and 7104.3 because the data collected are also used for basin-wide monitoring efforts such as for the Biennial State of the Basin report, groundwater modeling, demonstration of Hydraulic Control, and the triennial Ambient Groundwater Quality Recomputation.

## **Deliverables**

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

- All riparian habitat and climatic data through water year 2026 uploaded to HydroDaVE by November 30, 2026.
- High-resolution air photo of the Prado Basin region completed by July 31, 2026.
- A Recommended Scope and Budget memorandum for the PBHSP for FY 2027/28 by March 15, 2027
- Draft Annual Report of the PBHSC by May 10, 2027.
- Final Annual Report of the PBHSC by June 15, 2027.

DRAFT

**7202 – PE1: COMPREHENSIVE MONITORING PROGRAM**

**Recharge and Well Monitoring Program: Review Documents for Chino Basin Recycled Water GW Recharge Program**

	Cost Estimate
Consultant Labor	\$24,090
Other Direct Costs	\$0
<b>Total</b>	<b>\$24,090</b>

**Rationale**

The IEUA and Watermaster are required to submit specific reports as part of the Chino Basin Recycled Water Groundwater Recharge Program (RWGRP). The RWGRP is being implemented by the IEUA and Watermaster as co-permittees. Annual reporting is performed pursuant to the requirements of the following orders:

- California Regional Water Quality Control Board, Santa Ana Region. Order No. R8-2007-0039. Water Recycling Requirements for Inland Empire Utilities Agency and Chino Basin Watermaster. Chino Basin Recycled Water Groundwater Recharge Program: Phase I and Phase II Projects, San Bernardino County, June 29, 2007.
- California Regional Water Quality Control Board, Santa Ana Region. Monitoring and Reporting Program No. R8-2007-0039 for Inland Empire Utilities Agency and Chino Basin Watermaster. Chino Basin Recycled Water Groundwater Recharge Program: Phase I and Phase II Projects, San Bernardino County, June 29, 2007.
- California Regional Water Quality Control Board, Santa Ana Region. Order No. R8-2009-0057 Amending Order No. R8-2007-0039 for Inland Empire Utilities Agency and Chino Basin Watermaster. Chino Basin Recycled Water Groundwater Recharge Program: Phase I and Phase II Projects, San Bernardino County, October 23, 2009.
- California Regional Water Quality Control Board, Santa Ana Region. Revised Monitoring and Reporting Program No. R8-2007-0039 for Inland Empire Utilities Agency and Chino Basin Watermaster. Chino Basin Recycled Water.

Watermaster prepares reports pertaining to the HCMP with IEUA review. IEUA prepares reports pertaining to the RWGRP with Watermaster review.<sup>17</sup>

**Scope of Work**

West Yost will review quarterly and annual reports prepared by the IEUA for the RWGRP as well as other reports prepared by the IEUA pursuant to the recharge permit. West Yost will also review other reports or as needed analyses prepared by IEUA per the direction of the Regional Board and the California Department of Drinking Water (DDW), such as five-year engineering reports, and additional monitoring orders or required analyses to demonstrate compliance. West Yost will provide comments and recommendations to the IEUA through the Watermaster as the co-permittee.

**Deliverables**

West Yost will provide comments on the reports and analyses within ten days of their receipt.

<sup>17</sup> This is a component of the “Bright-Line Agreement” between Watermaster and the IEUA.

**5965 – PE1: COMPREHENSIVE MONITORING PROGRAM**

**Support for Development and Implementation of Improved Data Collection and Visualization Tools**

	Cost Estimate
Consultant Labor	\$27,626
Other Direct Costs	\$0
<b>Total</b>	<b>\$27,626</b>

**Rationale**

Watermaster collects and manages multiple datasets from the Watermaster Parties (Parties) and the IEUA to support the management of the Chino Basin pursuant to the 1978 Judgement, the ongoing implementation of the OBMP, and the regulatory requirements of State and local agencies. Additionally, the IEUA requests and collects analogous datasets from some of the Parties located within IEUA’s service area. As such, the Parties receive multiple requests for duplicate data and information, and the datasets collected separately by Watermaster and the IEUA can contain discrepancies.

In FY 2019/20, Watermaster requested West Yost to develop a recommendation for an improved data collection and management process to eliminate duplicate data requests, avoid discrepancies between collected datasets, and create a centralized location for Watermaster and IEUA to access the data. The recommended process included a centralized portal and database where data are collected and managed by Watermaster monthly or annually using data templates customized for each Party. IEUA would have access to the portal and database to download and review information on its member agencies. From FY 2020/21 through 2025/26, Watermaster implemented the recommended approach to develop the Data Portal for data collection and management. In FY 2024/25 and FY 2025/26, Watermaster identified additional needs to support the development of online data visualization tools, such as ArcGIS Online, to support Watermaster with field monitoring operations and visualization of uploaded data.

Watermaster plans to launch the Data Portal in FY 2026/27. During this period, West Yost will continue to provide support to Watermaster including as needed requests to support the launch of the Data Portal and development of data visualization tools.

**Scope of Work**

Support Watermaster with as requested support with:

- Development of Data Portal including updating data-collection template, providing solutions to potential issues, and assisting with describing the new process to the Parties.
- Development of online data visualization tools such as ArcGIS Online and other as needed tools.

**Deliverables**

The deliverables and associated schedule will be defined by Watermaster staff.

**7202.2 & 6901.95 – PE2: COMPREHENSIVE RECHARGE PROGRAM**

**SWRCB and CDFW Water Rights Reporting**

	Cost Estimate
Consultant Labor	\$42,452
Other Direct Costs	\$0
<b>Total</b>	<b>\$42,452</b>

**Rationale**

Watermaster holds three diversion permits, issued by the SWRCB, that provide authorization to Watermaster to divert and recharge storm and dry-weather discharge. Under this permit, Watermaster is required to conduct the following reporting:

- Annual Streamflow Monitoring Report for Water Rights Permit 21225 to the CDFW, summarizing the findings of a specialized hydrologic assessment of the relative impacts of the diversions of storm water for recharge by Watermaster pursuant to Watermaster’s Permit 21225
- Annual Water Rights Reporting to the SWRCB, which includes documentation of water diversion for the prior water year.

**Scope of Work**

West Yost shall perform the following tasks:

- Task 1 – Annual Streamflow Monitoring Report for Water Rights Permit 21225. This task includes engineering services to prepare a specialized hydrologic assessment of the relative impacts of the diversions of storm water for recharge by Watermaster pursuant to Watermaster’s Permit 21225 issued by the State Water Resources Control Board. A report summarizing the analysis is due to the California Department of Fish and Wildlife each year by October 1<sup>st</sup>. This work involves estimating the discharge to the Santa Ana River from its tributaries that flow across the Chino Basin and where storm water is diverted for recharge. The discharge from these tributaries to the Santa Ana River is estimated with and without the Watermaster diversions for recharge, and the relative changes in discharge are computed. The latest version of the Chino Basin surface water model that was developed for the 2025 Safe Yield Reevaluation will be used for this effort.
- Task 2 – Annual Water Rights Reporting to the SWRCB. This task includes providing as-needed assistance to Watermaster staff to update the "Water Diversion Measurement" section of progress reports for Watermaster's water rights permits. For one of the permitted points of diversion, modeling is needed to estimate diversions. The latest version of the Chino Basin surface water model that was developed for the 2025 Safe Yield Reevaluation will be used for this effort.

**Deliverables**

West Yost shall deliver the following to Watermaster:

- Task 1 – Annual Streamflow Monitoring Report for Water Rights Permit 21225
  - A letter report entitled, Annual Streamflow Monitoring Report for Water Rights Permit 21225, Fiscal 2025/26, which Watermaster and its attorney will review and forward to the California Department of Fish and Wildlife and State Water Resources Control Board by October 1, 2026.

- The draft report will be delivered to Watermaster and its Attorney for review and comment by September 15, 2026.
- The final report will be delivered to Watermaster and its Attorney by September 27, 2026.
- Task 2 – Annual Water Rights Reporting to the SWRCB
  - Estimates of stormwater recharge, including maximum daily diversions by month by permit.
  - The “Water Diversion Measurement” section of Watermaster’s annual progress reports to the SWRCB.
  - Electronic data files required by SWRCB at time of filing.

DRAFT

**7202.2 – PE2: COMPREHENSIVE RECHARGE PROGRAM**

**General Engineering Services**

	Cost Estimate
Consultant Labor	\$176,604
Other Direct Costs	<u>\$636</u>
<b>Total</b>	<b><u>\$177,240</u></b>

**Rationale**

Watermaster and the IEUA began implementing the 2013 Amendment to the 2010 Recharge Master Plan (RMPU) in FY 2014/15. The services anticipated in FY 2026/27 include technical support (numerical model simulations, hydraulic calculations, project refinement, conceptual integrity review, etc.) to assist Watermaster and the IEUA in the start-up of the 2013 RMPU projects and evaluate non-2013 RMPU projects, monthly meetings with IEUA and Watermaster staff to review the progress of the RMPU projects, and supporting the implementation of the 2023 RMPU. At Watermaster’s request, West Yost will attend quarterly GRCC and RIPComm meetings.

**Scope of Work**

- Attend GRCC, RIPComm and other meetings with Watermaster and IEUA staff
- Conduct as-needed analysis to support recharge projects
- Support the implementation of the 2013 & 2023 RMPU, including:
  - Perform as-requested technical support for the start-up of the 2013 RMPU projects
  - Refine and implement of the Renewal and Replacement (R&R) Plan including: sharing updated R&R forecasts with Watermaster to obtain feedback and confirm assumptions, meeting with all recharge facilities owners to review assets in 10-year R&R forecast and identify needs for condition assessments, and develop a work plan for conducting condition assessments and other work identified through collaboration with Watermaster.

**Deliverables**

West Yost will provide guidance and support in the implementation of the 2013 and 2023 RMP. West Yost’s deliverables for as-need requests will be determined with each request.

**7202.2 – PE2: COMPREHENSIVE RECHARGE PROGRAM**

**2028 Recharge Master Plan**

	Cost Estimate
Consultant Labor	\$338,832
Other Direct Costs	<u>\$477</u>
<b>Total</b>	<b><u>\$339,309</u></b>

**Rationale**

Pursuant to the Peace II Agreement, Watermaster and the IEUA must update and/or amend the Recharge Master Plan for the Chino Basin no less than every five years. The most recent update, the 2023 Recharge Master Plan, was completed and submitted to the Court in October 2023. The next Recharge Master Plan update (RMPU) must be completed and submitted to the Court in 2028.

During FY 2025/26, the “Annual Finding of Substantial Compliance with the Recharge Master Plan” concluded that under low groundwater level conditions (Scenario 5 of the SYR, which represents high demands, high groundwater utilization, and hot/dry climate/hydrology) the supplemental wet-water recharge capacity is sufficient through 2050 if imported water is available every year. If imported water is available one out of five years, the supplemental wet-water recharge capacity will become insufficient to meet projected replenishment obligations after managed storage accounts reach zero (projected to occur around 2044 in Scenario 5). Additionally, there is a potential loss of recharge from the planned development at the existing Turner 4 Basin.

Based on this, Watermaster is interested in considering and evaluating new recharge projects in the 2028 RMPU. Consideration of new projects will likely result in a 2-year effort for completion the 2028 RMPU, and thus work needs to start in FY 2026/27.

**Scope of Work**

The scope of work for the 2028 RMPU for FY 2026/27 includes:

- Define objectives and refine scope of work. Under this task, Watermaster will review and refine the scope of the 2028 RMPU through a couple of workshops.
- Develop planning, screening, and evaluation criteria. Under this task Watermaster will develop criteria on how and where to conduct recharge, and to screen and evaluate projects (design, financial, operation, screening and selection criteria) and prepare corresponding section in 2028 RMPU report.
- Describe recharge enhancement opportunities. Under this task, Watermaster will identify potential recharge projects, screen them based on the defined criteria, and determine which project to analyze further.

The work to prepare the 2028 RMPU will continue through October 2028.

**Deliverables**

West Yost shall deliver the following to Watermaster:

- Workshop agendas, prep materials and notes.
- Documentation of the scope of work to prepare the 2028 RMPU through completion in October 2028.
- Description of the selected planning, screening, and evaluation criteria for project selection.

## 7303 – PE3/5: WATER SUPPLY PLAN – DESALTERS

### Engineering Support for Desalters

	Cost Estimate
Consultant Labor	\$21,760
Other Direct Costs	\$0
<b>Total</b>	<b>\$21,760</b>

### Rationale

The 2004 Basin Plan Amendment approved by the Regional Board and the State Water Resources Control Board established the “maximum benefit” objectives and established certain milestones that must be achieved by Watermaster and the IEUA. To demonstrate compliance with the Regional Board order, Watermaster and the IEUA agreed to achieve Hydraulic Control. The well fields of the Chino Basin Desalter Authority (CDA) are critical to the achievement and maintenance of Hydraulic Control and the demonstration of maximum benefit. The CDA periodically requests from the Watermaster technical assistance, data, information, and attendance at meetings with regulators to support desalter expansion and operations, and the development and implementation of a monitoring and reporting plan for the CDA clean-up project funded by Prop 1 Grant Agreement No. D1712507.

### Scope of Work

West Yost shall perform the following tasks at the discretion of the Watermaster General Manager:

- Review and prepare comments on CDA status reports.
- Perform ad hoc analyses requested by the Watermaster General Manager or the CDA.
- Fulfill requests for hydrologic data, model files, model analyses, PowerPoint presentations, maps, charts, technical reports, etc., as requested by the CDA or its consultants.
- Attend meetings and conference calls, as requested by the CDA or its consultants.

### Deliverables

West Yost shall deliver the following, at the discretion of the Watermaster General Manager:

- Written comments on the CDA status reports, as requested by the Watermaster general manager.
- PowerPoint presentations, maps, charts, model files, data, technical reports, and recommendations as requested by the CDA.
- Written summaries of meetings.

**7402 – PE4: MANAGEMENT ZONE STRATEGIES**

**MZ-1: Data Analyses, Reports, Meetings, and Administration**

	Cost Estimate
Consultant Labor	\$125,858
Other Direct Costs	\$364
<b>Total</b>	<b>\$126,222</b>

**Rationale**

Program Element 4 of the OBMP states that land subsidence and ground fissuring in MZ-1 are not acceptable and, to the extent that the cause is pumping, should be managed to tolerable levels. Watermaster conducts a ground-motion monitoring program to support Program Element 4 per the requirements of the Peace Agreement, the subsequently developed Court-approved MZ-1 Subsidence Management Plan (MZ-1 Plan) and its revisions (2015 Chino Basin Subsidence Management Plan), and the monitoring and mitigation requirements of the Peace II CEQA SEIR. The 2015 Chino Basin Subsidence Management Plan calls for the annual evaluation of data derived from the monitoring program and revisions to the Subsidence Management Plan and/or the monitoring program if necessary.

**Scope of Work**

West Yost shall perform the following tasks:

- Prepare the draft FY 2025/26 Annual Report for the Ground Level Monitoring Program (GLMP).
- Finalize the FY 2025/26 Annual Report for the GLMP based on comments received from the Ground Level Monitoring Committee (GLMC).
- Analyze all data collected during FY 2026/27 under the GLMP to support the preparation of the FY 2026/27 Annual Report for the GLMP. These data include groundwater levels, groundwater production, aquifer recharge, aquifer-system deformation, tectonic deformation, pumping test results, ground-level and GPS surveys, horizontal strain, and InSAR.
- Conduct meetings with the GLMC to review the data and analyses and develop a list of potential activities and cost estimates for FY 2027/28.

**Deliverables**

West Yost will deliver the following to Watermaster no later than the date or dates indicated:

- The FY 2025/26 Annual Report for the GLMP by November 2, 2026, featuring charts and maps of monitoring data, conclusions regarding the protective nature of the Subsidence Management Plan, the Watermaster-approved activities for the next fiscal year (FY 2026/27), and the revised Subsidence Management Plan, if revisions are necessary.
- Recommended scope of services and budget for the GLMP in FY 2027/28 by April 1, 2027, to support the Watermaster’s budgeting process.

**7402.1 – PE4: MANAGEMENT ZONE STRATEGIES**

**MZ-1: Develop a Subsidence Management Plan for Northwest MZ-1**

	Cost Estimate
Consultant Labor	\$107,696
Other Direct Costs	\$0
<b>Total</b>	<b>\$107,696</b>

**Rationale**

The MZ-1 Subsidence Management Plan (MZ-1 Plan) states that if data from existing monitoring efforts in the Areas of Subsidence Concern indicate the potential for adverse impacts due to subsidence, Watermaster will revise the MZ-1 Plan in an attempt to avoid adverse impacts. Land subsidence in Northwest MZ-1 was first identified as a concern in the MZ-1 Summary Report (2006) and in the MZ-1 Plan (2007). Since then, Watermaster has been monitoring subsidence in this area via InSAR, leveling surveys, and groundwater-levels with pressure transducers at selected wells. Of particular concern, subsidence in Northwest MZ-1 has occurred differentially across the San Jose Fault—the same spatial pattern of differential subsidence that occurred in the MZ1 Managed Area during the time of ground fissuring. Watermaster, consistent with input from the Ground Level Monitoring Committee (GLMC), determined that the MZ-1 Plan needs to be updated to include a *Subsidence Management Plan for Northwest MZ-1* with the long-term objective of minimizing or abating the occurrence of the differential land subsidence.

Developing a Subsidence Management Plan for Northwest MZ-1 is a multi-year effort. The GLMC oversees a work plan<sup>18</sup> to execute this effort. The scope of work below describes the next year of the work plan.

**Scope of Work**

West Yost shall perform the following tasks to implement the work plan to develop a Subsidence Management Plan for Northwest MZ-1:

- **Monitoring.** The established monitoring program of piezometric levels and pumping at wells in Northwest MZ-1 will continue through various techniques, including: (i) SCADA based monitoring by the Monte Vista Water District; (ii) monitoring of piezometric levels via sonar; (iii) monitoring of piezometric levels via pressure transducers at City of Pomona production wells; and (iv) manual measurements of piezometric levels. These data are collected under the Watermaster’s groundwater-level monitoring program but are analyzed under this task. Charts and data graphics of pumping, piezometric levels, and aquifer system deformation will be updated every three months, which will improve the understanding of the hydrogeology in Northwest MZ-1, will be used to develop the Subsidence Management Plan for Northwest MZ-1, and in the future, will be used to adapt the Chino Basin Subsidence Management Plan, as appropriate.

<sup>18</sup> [CBWM. 2015. Workplan to Develop a Subsidence Management Plan for the Northwest MZ-1 Area.](#)

- **Refine and Evaluate Subsidence-Management Alternatives.** The 2025 Safe Yield Reevaluation (2025 SYR) involves the development and evaluation of multiple projection scenarios of future hydrology, pumping, managed recharge, and use of managed storage in the Chino Basin. These projection scenarios are being simulated with an updated Chino Valley Model (CVM). The CVM results are being used to determine a tentative Safe Yield, which will be evaluated for MPI and then used to evaluate the current Safe Yield of the Chino Basin. The CVM results for piezometric levels (by CVM layer) will be used as input data for the 1D Model at PX to predict the potential for future subsidence associated with operating at the Safe Yield.

The results of the 1D model predictions of future subsidence can be used to inform “guidance criteria” for the Subsidence Management Plan for Northwest MZ-1. If the potential future subsidence is deemed significant and undesirable, then the Watermaster Engineer may recommend that up to two (2) additional Subsidence-Management Alternatives (SMAs) be developed and evaluated with the CVM and 1D Model to test the effectiveness of the SMAs at abating future subsidence or minimizing it to tolerable levels. This work will be performed and completed in FY 2025/26.

In FY 2026/27, the Watermaster Engineer will run the CVM and PX 1D Model under the additional SMAs. The assumptions underlying the SMA(s), including groundwater production and replenishment/recharge plans of the Chino Basin parties, will be reviewed and discussed with the GLMC before any modeling is performed. Verbal and written feedback from the GLMC will be incorporated to finalize the SMA(s).

Then, the CVM and 1D Model will be used to evaluate the potential future subsidence in Northwest MZ-1 under the SMAs. Again, the objective of this task is to test the effectiveness of the SMAs at abating future subsidence or minimizing it to tolerable levels. The model results, interpretations, and recommendations will be documented in a draft TM and distributed to the GLMC. A GLMC meeting will be held to review the draft TM and receive GLMC feedback. The verbal and written feedback from the GLMC will be used to finalize the TM. The final TM could be used to finalize the Subsidence Management Plan for Northwest MZ-1, and will be shared with all Watermaster Parties through the monthly Pool, Advisory Committee, and Board meetings.

## **Deliverables**

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

- Draft and final technical memoranda on the CVM and 1D model results, interpretations, and recommendations under the SMAs.

**7502 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT**

**Engineering Services**

	Cost Estimate <sup>19</sup>
Consultant Labor	\$280,622
Other Direct	
Costs	\$1,700
<b>Total</b>	<b>\$282,322</b>

**Rationale**

In the Judgment, Watermaster is provided with discretionary powers to address water quality issues in the basin: “Watermaster, with the advice of the Advisory and Pool Committees, is granted discretionary powers in order to develop an optimum basin management program for Chino Basin, including both water quantity and quality considerations.” In the Implementation Plan of the Peace Agreement, Watermaster committed to certain responsibilities under Program Elements 6 and 7.

**Program Element 6 - Develop and Implement Cooperative Programs with the Regional Board and Other Agencies to Improve Basin Management.** Pursuant to Program Element 6, Watermaster has committed resources to managing water quality contaminants as follows:

- Identify water-quality anomalies through monitoring and analysis.
- Assisting the Santa Ana Water Board in determining sources of the water quality anomalies.
- Establishing priorities for clean-up jointly with the Regional Board; and seeking funding from outside sources to accelerate detection and cleanup efforts.
- Identifying opportunities to remove organic contaminants through regional groundwater treatment projects in the southern half of the Basin; and collaborating with the Chino Desalter Authority to implement such solutions.
- Conducting investigations to assist the Santa Ana Water Board in accomplishing mutually beneficial objectives.

Much of the work listed above was started by the Chino Basin Water Quality Committee (WQC) from 2003 through 2010. Since 2010, Watermaster has supported ongoing monitoring and analysis to ensure the efforts to manage water quality contamination under Program Element 6 are achieving the intended outcomes and identify any outcomes that may be of concern. This primarily involves analyzing water quality data to assess the movement of identified plumes in the Basin, but also includes as-needed work to support the Santa Ana Water Board or others in assessing groundwater quality conditions in and around the plumes.

**Program Element 7 – Salt Management Program.** Pursuant to Program Element 7, the Watermaster and IEUA have been implementing the Chino Basin maximum-benefit salt and nutrient management plan (Maximum Benefit SNMP) since 2004. Implementation of the Maximum Benefit SNMP is a regulatory requirement defined in the Santa Ana River Basin<sup>20</sup> (Basin Plan). The Maximum Benefit SNMP and the

<sup>19</sup> This project includes a cost shared effort with IEUA. The shared cost of this total by IEUA is \$75,130.

<sup>20</sup>[http://www.swrcb.ca.gov/santaana/water\\_issues/programs/basin\\_plan/docs/chapter5.pdf](http://www.swrcb.ca.gov/santaana/water_issues/programs/basin_plan/docs/chapter5.pdf)

associated management commitments (Maximum Benefit Commitments) were developed to enable maximum beneficial use of recycled water in the Chino Basin. Watermaster and IEUA are required to implement the Maximum Benefit Commitments in accordance with the scheduled defined in Table 5-8a of the Basin Plan. If the Regional Board determines that Watermaster and IEUA are not being implementing the Maximum Benefit Commitments in accordance with Table 5-8a, then maximum benefit is not demonstrated, the Regional Board has the discretion to (1) impose the more stringent antidegradation objectives for Chino-1, Chino-2, and Chino-3 GMZs and (2) require Watermaster and IEUA to retroactively mitigate the use of recycled and imported waters with TDS concentrations that exceeded the antidegradation objectives for the GMZs since the adoption of the maximum benefit SNMP in 2004.

The Maximum Benefit Commitments include:

1. The implementation of a surface-water monitoring program.
2. The implementation of a groundwater monitoring program.
3. The expansion of the Chino-I Desalter to a capacity of 10 million gallons per day (mgd) and the construction of the Chino-II Desalter with a design capacity of 10 mgd.
4. The additional expansion of desalter capacity (to 40 mgd) pursuant to the OBMP and the Peace Agreement, the timing for which is tied to the IEUA's agency-wide effluent concentration)<sup>21</sup>
5. The completion of the groundwater recharge facilities included in the 2001 Watermaster Recharge Master Plan.
6. The management of recycled water quality to ensure that the IEUA agency-wide, 12-month volume-weighted running average effluent TDS concentration does not equal or exceed 550 mg/l and the TIN concentration does not equal or exceed 8 mg/l.
7. The management of basin-wide, volume-weighted TDS and nitrate concentrations in artificial recharge to less than or equal to the maximum-benefit objectives on a five-year volume-weighted basis.
8. The achievement and maintenance of the "hydraulic control" of groundwater outflow from the Chino Basin, specifically from the Chino-North GMZ, in order to protect Santa Ana River water quality and downstream beneficial uses.
9. The determination of ambient TDS and nitrate concentrations of Chino and Cucamonga GMZs every five years.

The majority of the ongoing work to comply with the Maximum Benefit Commitments is performed under other program elements, by IEUA, or CDA.

To demonstrate compliance, Watermaster prepares the Maximum Benefit Annual Report. The report describes the status of compliance with each of the Maximum Benefit Commitments defined in the Basin Plan. The annual report is due to the Regional Board by April 15<sup>th</sup> of each year.

---

<sup>21</sup> The expansion to provide an additional 20 mgd of desalter pumping capacity was initially required to occur when the 12-month running average for the IEUA agency-wide effluent TDS concentration exceeded 545 mg/l for three consecutive months. The expansion has occurred even though this water quality condition has never been triggered and has instead been driven by the implementation of the Peace II Agreement and achieving hydraulic control.

As part of the Basin Plan amendment (see Task 7510 description below), Watermaster is required to: (1) update the monitoring work plan for the Maximum Benefit SNMP, (2) prepare a work plan to improve the Chino Basin Groundwater Quality Model, and (3) project basin-wide TDS and nitrate concentrations every five years. These requirements were identified during the technical work conducted in support of the Basin Plan amendment and are also mandated by the State Water Resources Control Board's 2019 Recycled Water Policy.

Watermaster has initiated efforts to develop the 2025 Maximum Benefit Monitoring Program Work Plan and the Chino Basin Water Quality Model Improvement Work Plan. Both work plans are scheduled to be drafted by June 30, 2025. The next projection of basin-wide TDS and nitrate concentrations for the Chino Basin is due to the Regional Board by December 2028.

During the FY 2026/27 period, Watermaster plans to finalize the 2025 Maximum Benefit Monitoring Program Work Plan and Chino Basin Water Quality Model Improvement Work Plan, continue to coordinate with the Regional Water and other agencies with the management of basin groundwater quality, prepare the Maximum Benefit Annual Report, continue to update the monitoring work plan, and provide other as-needed support on Maximum Benefit SNMP implementation or compliance. Additionally, to support the projection of basin-wide TDS and nitrate projection, Watermaster will also initiate the effort to update the groundwater quality model and collect data as recommended in the Chino Basin Water Quality Model Improvement Work Plan.

## Scope of Work

For FY 2026/27, West Yost shall perform the following tasks:

- Consulting for Program Element 6 to continue efforts to track identified contaminant plumes in the Chino Basin.
  - South Archibald Plume and Chino Airport Plume. Subtasks include:
    - Prepare semi-annual plume status reports for the Watermaster Pools, Advisory Committee, and Board meetings.
    - Assist Watermaster with coordination and negotiation with the plume responsible parties and Santa Ana Water Board.
    - Provide technical oversight and review of plume investigation and remediation reports.
    - Prepare as-requested technical analyses, such as analyze groundwater-elevation and quality data, develop revised VOC plume maps, and/or perform groundwater model runs to demonstrate the capture of the plume by the desalter well fields.
  - Other point sources of concern. Other point sources of concern include but are not limited to, the General Electric Flatiron Facility, General Electric Test Cell Facility, Rialto-Colton perchlorate plume, the Alumax Recycling Facility, Kaiser Steel Mill, Milliken Landfill, and the Stringfellow site. Subtasks could include:
    - Provide technical oversight and review of investigations and remediation reports.
    - Prepare annual plume status report for the Watermaster Pools, Advisory Committee, and Board meetings.
    - Prepare as-requested technical analyses, such as analyze groundwater-elevation and quality data, review potential impacts to Chino Basin water quality, and/or develop revised plume delineations.

- Support for implementation of Program Element 7
  - Prepare the 2026 Maximum Benefit Annual Report. This includes:
    - Analyze and interpret the data and compare with metrics. All data required for reporting in the 2026 Maximum Benefit Annual Report shall be analyzed by West Yost and used to support the demonstration of compliance with the Maximum Benefit Commitments.
    - Reporting. West Yost shall prepare a draft 2026 Maximum Benefit Annual Report. This report will be submitted to Watermaster and the IEUA for review. Comments will be incorporated, and West Yost shall prepare the final 2026 Maximum Benefit Annual Report for submittal to the Santa Ana Water Board. West Yost will respond to comments from the Santa Ana Water Board and other stakeholders, as necessary.
    - Ad-hoc meetings. Prepare for and attend meetings with Watermaster, IEUA, and/or Santa Ana Water Board staff, as requested, to present the draft and final 2026 Maximum Benefit Annual Reports.
  - Finalize the 2025 Maximum Benefit Monitoring Program Work Plan, which includes:
    - Update the draft work plan based on comments by Watermaster and IEUA and submit the updated work plan to the Santa Ana Water Board.
    - Coordinate and address comments by the Santa Ana Water Board, if any.
  - Finalize the Chino Basin Groundwater Quality Model Improvement Work Plan and initiate efforts to support the basin-wide TDS and nitrate projection<sup>22</sup>, which includes:
    - Update the draft work plan based on comments by Watermaster and IEUA and submit the updated work plan to the Santa Ana Water Board
    - Coordinate and address comments by the Santa Ana Water Board, if any.
    - Perform model updates, collect planning data, and implement other efforts to support the basin-wide projection.
  - As-needed support for implementation of PE-6 and PE-7:
    - Prepare as-requested technical analyses
    - Prepare for and attend as-requested meetings with the Santa Ana Water Board and others

## **Deliverables**

West Yost will deliver the following to Watermaster:

- Semi-annual status reports for the Archibald and Chino Airport plumes in October 2026 and April 2027.
- Annual status reports for the remaining identified plumes in October 2026.
- Draft and final 2026 Maximum Benefit Annual Report by April 2026.
- Updated 2025 Maximum Benefit Monitoring Program Work by August 2026.
- Updated Chino Basin Groundwater Quality Model Improvement Work Plan by December 2026.
- Other as-needed deliverables.

---

<sup>22</sup> This effort is cost shared with IEUA. The cost of IEUA share for this effort is \$75,130.

**7510 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT**

**Update IEUA’s Recycled Water Permits/Maximum Benefit Salinity Management Plan – IEUA Cost Share**

	Cost Estimate <sup>23</sup>
Consultant Labor	\$15,525
Other Direct Costs	<u>\$3,600</u>
<b>Total</b>	<b>\$19,125</b>

**Rationale**

In 2004, the Santa Ana Water Board amended the Basin Plan to incorporate the Maximum Benefit SNMP for the Chino Basin to incorporate numerically higher, maximum-benefit-based TDS and nitrate objectives for the Chino-North groundwater management zone. The maximum benefit objectives created assimilative capacity and enables the cost-efficient, maximum reuse of recycled water for irrigation and recharge. The SNMP includes nine Maximum Benefit Commitments that Watermaster and IEUA must implement to obtain continued access to assimilative capacity.

The Chino Basin Maximum Benefit SNMP and related permits establish TDS and total inorganic nitrogen (TIN) limits for discharge and reuse of IEUA’s recycled water within the Chino Basin. The respective limits for TDS and TIN are 550 mg/l and 8 mg/l. Compliance is measured as the 12-month, flow-weighted running average concentration of the IEUA agency-wide effluent. Pursuant to Maximum Benefit Commitment No. 6, Watermaster and IEUA are required to prepare and implement a plan and schedule to improve effluent water quality and achieve compliance with the effluent compliance metrics when the 12-month flow-weighted running average TDS or TIN equals or exceeds the action limits of 545 mg/l TDS for three consecutive months or 8 mg/l TIN for any one month.

In 2015, the 12-month running average TDS concentration of the IEUA recycled water reached a historical high of 534 mg/l, which was only 11 mg/l below the action limit, for three consecutive months. Although the TDS concentration declined before exceeding the action limit, it was an important indicator that the TDS concentration of recycled water is likely to approach or exceed the limit and trigger the planning for recycled water quality improvements during the next prolonged dry period. Given the potential cost of implementing recycled water quality improvements for what might only be short-term exceedances of the action limit based on the 12-month flow-weighted running average, the IEUA and Watermaster petitioned the Santa Ana Water Board to modify the recycled water permits and the Basin Plan to allow for a longer-term averaging period for determining compliance with the TDS limit.

To obtain approval from the Santa Ana Water Board for the Basin Plan modifications, and any associated permit modifications, the IEUA and Watermaster began a detailed evaluation of the TDS and nitrate concentration impacts to Chino Basin by developing the 2020 Chino Basin Water Quality Model. The technical work was completed in December 2021, and the results were used to develop a proposed regulatory compliance plan. The Regulatory Compliance Proposal was submitted to the Santa Ana Water Board in March 2022. The Santa Ana Water Board approved the Regulatory Compliance Proposal in July 2022 and requested that Watermaster and IEUA coordinate with Jurupa Community Services District (JCSD), which had also completed a regulatory compliance proposal in 2022 that would require amendments to the Chino Basin Maximum Benefit SNMP in the Basin Plan. The extra costs to combine the Basin Plan efforts into one amendment are being covered directly by the JCSD.

<sup>23</sup> This project includes 50% cost shared with IEUA.

Since approval of the Regulatory Compliance Proposal in 2022, Watermaster and IEUA have worked with Santa Ana Water Board staff to prepare documents supporting the Basin Plan amendment. Watermaster and IEUA have developed the required amendment materials, including the Staff Report, Substitute Environmental Document (SED), Economic Analysis, Resolution, peer view package and responses to peer review comments. These draft documents are currently pending review by the Santa Ana Water Board staff. Due to evolving Basin Plan amendment requirements and limited staff availability, the Santa Ana Water Board's review period is ongoing and has been extended, resulting in corresponding delays to the overall Basin Plan amendment schedule.

Following completion of the Santa Ana Water Board's review, the remaining tasks will include finalizing the amendment documents, ensuring compliance with Americans with Disabilities Act (ADA), and providing as-needed support to the Santa Ana Water Board staff to advance the amendment through the adoption process.

Regional Board adoption of the Basin Plan amendment is anticipated in June 2026. After Santa Ana Water Board adoption, additional support will be required to assist with State Water Resources Control Board adoption and Office of Administrative Law (OAL) approval, which are anticipated by January 2027.

## **Scope of Work**

West Yost shall perform the following tasks in FY 2026/27. While some of these efforts may be completed in the current fiscal year, the tasks listed below represent the full scope of work required if the Regional Board adoption schedule is delayed to after June 2026:

- Finalize Staff Report, SED, Economic Analysis, Resolution, and responses to peer review comments based on input from the Santa Ana Water Board staff.
- Ensure that all Basin Plan amendment documents comply with the ADA, including selecting and coordinating with an ADA subconsultant.
- Prepare draft PowerPoint presentation for Santa Ana Water Board staff to present the Basin Plan amendment for Santa Ana Water Board adoption.
- Support development of the Administrative Record.
- Regular coordination with Santa Ana Water Board staff to keep the process moving forward.
- Perform monthly project management activities, including participating in progress status calls with Watermaster and IEUA staff.

## **Deliverables**

The FY 2026/27 deliverables for this work include:

- Final Basin Plan amendment support documents, including the SED, Staff Report, Economic Analysis, and other supporting documentation. Including, ADA compliant Basin Plan amendment documents.
- PowerPoint presentations and handout materials for any project team, Santa Ana Water Board, and stakeholder meetings.

**7511 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT**

**As-needed services to support Watermaster in its participation in Santa Ana Watershed Project Authority Task Force**

	Cost Estimate
Consultant Labor	\$33,010
Other Direct Costs	<u>\$580</u>
<b>Total</b>	<b>\$33,590</b>

**Rationale**

The Santa Ana Watershed Project Authority (SAWPA) administers various multi-stakeholder efforts to monitor and analyze water quality in the Santa Ana River Watershed in collaboration with Regional Board. Two of the task forces that generate information relevant to Chino Basin OBMP efforts under Program Element 6 and Program Element 7 are the Basin Monitoring Program Task Force (BMPTF) and the Emerging Constituents Task Force (ECTF). The BMPTF is focused on compliance with watershed-wide the salt and nutrient plan defined in the Basin Plan, such as computing ambient water quality and performing the Wasteload Allocation analysis. These activities have the potential to impact recycled water use permitting. The ECTF focuses on the investigation of emerging constituents, tracking regulations, and implementing collaborative approaches to compliance and water quality protection. IEUA and Watermaster are members of these Task Forces.

Some of the key activities performed by the Task Forces include:

- Collection and compilation of data used to support the management of water quality in the Santa Ana River Watershed.
- Preparation of the Annual Report of Santa Ana River water quality.
- Preparation of the Annual EC Sampling Report.
- Periodic recomputation of ambient water quality for the Santa Ana River Watershed groundwater management zones (GMZs).
- Periodic review and evaluation of the wasteload allocation for recycled water discharges to the Santa Ana River and its tributaries.
- Periodic assessment of monitoring gaps in the Watershed.
- Periodic assessment and/or review of proposed changes to the Basin Plan SNMP.
- Monthly Task Force meetings.

SAWPA contracts with technical and policy consultants to support the BMPTF and ECTF to implement various studies and activities. The technical and policy work is reviewed at monthly Task Force meetings. The outcomes of the work performed by the Task Forces have direct implications for the planning activities of the Watermaster and IEUA parties.

During FY 2026/27, the BMPTF will be performing the following activities:

- Periodic (monthly to quarterly) meetings to review and discuss current and future Basin Plan SNMP implementation activities.
- Implement groundwater and surface water monitoring plans.
- Develop tools in support of performing annual data collection.
- Collect and review 2022 through 2026 groundwater data.
- Update storage models for selected groundwater management zones.
- Other as-needed work to support the Task Force’s mission and objectives.

During FY 2026/27, the ECTF will be performing the following activities:

- Quarterly meetings to review and discuss current and future Basin Plan SNMP implementation activities.
- Implementation of EC monitoring program.
- Advancing discussions on PFAS regulations, and other emerging contaminant regulations.

## Scope of Work

West Yost will perform as-requested services to support the Watermaster and IEUA’s participation in the Task Force activities. The budget anticipates the following as-requested services for FY 2026/27:

- Attendance at up to 12 monthly Task Force meetings.
- Preparation of Task Force meeting summaries for information relevant to Watermaster.
- Review and comment on interim and final project deliverables prepared by the Task Forces or its consultants.
- Attendance at as-needed meetings with Watermaster and IEUA staff to discuss Task Force draft project deliverables.
- As-needed coordination with Watermaster and IEUA staff on Task Force activities that arise during the year.

## Deliverables

The FY 2026/27 deliverables for this work could include:

- Task Force meeting summaries.
- Draft and final review comments on interim and final deliverables prepared by the Task Force or its consultants.
- Other as-requested deliverables defined by Watermaster.

**7517 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT**

**Implement Chino Creek Monitoring Program – IEUA Cost Share**

	Cost Estimate <sup>24</sup>
Consultant Labor	\$64,423
Other Direct Costs	<u>\$3,540</u>
<b>Total</b>	<b><u>\$67,963</u></b>

**Rationale**

Pursuant to the Federal Clean Water Act (CWA) Section 303(d) and 305(b), the Regional Board is required to periodically assess the water quality of the surface water bodies in the Santa Ana Watershed and publish a list of surface waters that do not meet the water quality standards for beneficial uses and objectives defined in the Basin Plan. The current assessment and listing determinations for the Santa Ana Watershed are included in the 2024 California Integrated Report (2024 Integrated Report).

The Final 2024 Integrated Report concluded that there is insufficient data to determine water quality conditions within reach 1B of Chino Creek (Chino Creek 1B). Specifically, there is insufficient data to determine if water quality is consistent with Basin Plan objectives, which was established to support beneficial uses, but the limited data indicates that beneficial uses may be potentially threatened (305[b] Category 3). Without more data, Chino Creek 1B could be listed as impaired in future Integrated Reports, which will require an extensive, multi-stakeholder effort to develop and implement a Total Maximum Daily Loads (TMDL) program and could impact recycled water permits and uses in the Chino Basin. The Regional Board expressed that more data is needed to assess water quality conditions compared to objectives in future Integrated Reports. Recognizing the TMDL impact on IEUA and Watermaster’s recycled water activities, the Regional Board requested Watermaster and IEUA to develop a surface water monitoring program to characterize conditions along Chino Creek (Chino Creek Monitoring Program).

During FY 2022/23, Watermaster and IEUA collaborated with Regional Board staff to develop the Chino Creek Monitoring Program Work Plan and the Quality Assurance Project Plan (QAPP) that will satisfy the requirements of the California Clean Water Act Section 303 (d) List (Listing Policy) for Chino Creek. The QAPP and the work plan were submitted to the Regional Board in July 2024. The Chino Creek Monitoring Program includes: monthly surface water quality monitoring, annual data review and upload to California Environmental Data Exchange Network (CEDEN), and in-depth assessment of monitoring data and evaluation if ongoing monitoring is needed following the completion of 3-year monitoring period. Watermaster and IEUA have been implementing the work plan since August 2024. Watermaster and IEUA will continue to implement the work plan in FY 2026/27 to complete the 3-year of monitoring period. In-depth data analysis will be performed in FY 2027/28.

**Scope of Work**

In FY 2026/27, West Yost will perform the following tasks in accordance with the Chino Creek Monitoring Program Workplan:

- Perform 12 monthly surface water sampling events at the recommended surface water sites.
- Coordinate with the IEUA operation and laboratory teams on sampling.

<sup>24</sup> This project includes 50% cost shared with IEUA.

- Perform quality assurance/quality control (QA/QC) check, compile, and process laboratory results into centralized project database.
- Review data and prepare figures to characterize surface water conditions.
- Upload surface water quality data to CEDEN annually.
- Conduct as-needed meetings with Watermaster, IEUA, Basin Monitoring Program Task Force, and the Regional Board on project status and sampling results.

### **Deliverables**

- Figures and text characterizing surface water quality conditions.

### **Cost Estimate for FY 2027/28**

- The Class 3 cost estimate<sup>25</sup> to continue this work over FY 2027/28 is about \$60,000.

---

<sup>25</sup> Class 3 cost estimates have an expected accuracy of between -20% and +30% of the actual costs.

**7520 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT**

**Water Quality Management Program**

	Cost Estimate <sup>26</sup>
Consultant Labor	\$39,000
Other Direct Costs	\$250
<b>Total</b>	<b>\$39,250</b>

**Rationale**

As part of the 2020 OBMPU, the stakeholders identified several management activities necessary to achieve the goals of the 2020 OBMPU. Two of the 2020 OBMPU activities address groundwater quality:

- Develop and implement a water-quality management plan to address current and future water quality issues and protect beneficial uses.”
- Develop strategic regulatory-compliance solutions that achieve multiple benefits in managing water quality.

The specific action defined to encapsulate these activities within the 2020 OBMPU was the development of a Water Quality Management Plan that addresses emerging contaminants to better prepare the parties for addressing compliance with new State and Federal drinking water regulations and provides for the long-term maximum beneficial use of the basin. It was identified that reconvening the Watermaster’s Water Quality Committee (WQC) would be the ideal approach to guide the development and implementation of such a management plan to guide the activities over the next several years.

In FY 2023/24 Watermaster reconvened the WQC and conducted three meetings. The first meeting was to educate participants on historical water quality activities performed by Watermaster pursuant to the 2000 OBMP, review the successes of the WQC’s past work, and obtain feedback from the stakeholders on the opportunity and proposed scope and objectives for developing a water quality management plan, including development of an Emerging Contaminants Monitoring Plan (ECMP). The other two WQC meetings were to develop the ECMP and obtain stakeholder feedback and review its methods.

Based on feedback received through the WQC, the concept of a water quality management plan was re-envisioned into a simpler, more adaptable Water Quality Management Program (WQMP) led by the WQC, following the approach used from 2003 to 2010 under Program Element 6 of the 2000 OBMP. As re-envisioned, the WQMP is an ongoing process where the focus of the work performed each year will be defined/refined based on stakeholder input received through the WQC. Under the WQMP, the WQC would meet up to address some or all the following objectives:

- Informing stakeholders on the available data and information on water quality in the Chino Basin
- Regularly educating and sharing information on potential future water quality regulations
- Implementing an ECMP to monitor and characterize contaminant occurrence in the Chino Basin where data is not available to assess potential impacts of regulations

<sup>26</sup> The \$39,250 will be funded entirely with carryover from FY 2025/26.

- Tracking available grant funding and loan opportunities to advance water quality programs and projects
- Identifying opportunities for multi-agency and/or multi-benefit projects
- Enhancing the ability to characterize potential impacts to the Chino Basin as a result of Parties' operational/management responses to water quality regulations (e.g., impacts to Safe Yield or recycled water recharge program)
- Conducting other activities of interest to the stakeholders to address water quality management or concerns.

In FY 2024/25, West Yost assisted Watermaster staff in coordinating and implementing the sampling for the ECMP. This involved Watermaster conducting sampling for a list of emerging contaminants during routine sampling at monitoring wells, and additional voluntary sampling by the Appropriators for some emerging contaminants. There were no WQC meetings in FY 2024/25 and FY 2025/26. The Watermaster may conduct two WQC meetings in FY 2026/27.

### **Scope of Work**

For FY 2026/27, West Yost will support Watermaster Staff in implementing the WQMP by supporting the WQC process. The work will include:

- Prepare for and conduct up to two meetings of the WQC, including preparing supporting materials, such as agendas, handouts, meeting summaries, etc. The specific meeting topics will be identified by the Watermaster according to the parties' needs.

### **Deliverables**

- Meeting agendas, handouts, presentations, and meeting summaries for the WQC meetings
- Maps characterizing the extent of emerging contaminants in the Basin

**7614 – PE8/9: STORAGE MANAGEMENT/CONJUNCTIVE USE**

**Support Implementation of the Safe Yield Court Order**

	Task 1	Task 2	Total
Consultant Labor	\$118,679	\$102,548	\$221,227
Other Direct Costs	\$15,312	\$200	\$15,512
<b>Total</b>	<b>\$133,991</b>	<b>\$102,748</b>	<b>\$236,739</b>

**Rationale**

The Safe Yield of the Chino Basin was recalculated in May 2020 pursuant to the methodology approved by the Court on April 28, 2017. The Court adopted a Safe Yield of 131,000 acre-feet per year for the period of fiscal year 2020/21 through 2029/30. The Court-approved methodology was outlined in a Court Order from April 28, 2017 (2017 Court Order). The Court Order also included requirements for (1) annual data collection and evaluation, (2) a reevaluation of the current Safe Yield by June 30, 2025 (the 2025 Safe Yield Reevaluation, or 2025 SYR), and (3) peer review to support these efforts.

West Yost began the work to implement the 2017 Court Order in fiscal year 2021/22.<sup>27</sup> This work included updating the Safe Yield Reset methodology, developing annual data collection and evaluation reports covering the periods through FY 2024/25, and completing the 2025 SYR.

**Scope of Work**

The work required in FY 2025/26 will include the annual data collection and evaluation, supporting the implementation of the 2025 Safe Yield Reevaluation, and facilitating the associated peer review. This scope is broken down into the following tasks:

- **Task 1 – Annual data collection and evaluation.** Pursuant to pages 16 and 17 of the Court Order, Task 1 includes collecting data from the parties and other sources and analyzing the data in the context of West Yost’s groundwater modeling. Data collection will begin in July 2026 for fiscal year 2025/26. The scope of Task 1 assumes the following:
  - Existing data collection efforts (e.g., groundwater pumping measurements) will be collected via other Watermaster efforts and are not included in this scope.
  - Annual land use surveying will be completed by Land IQ, the subcontractor that has been preparing annual land use surveys in the Chino Basin for the past several years to support the annual data collection and agricultural production estimation.
  - West Yost will review the 2025 Urban Water Management Plans (UWMPs) for the major Appropriative Pool Parties and wholesale agencies and conduct outreach with these agencies to interpret projected water demands. This information will be used to develop revised projections of water use patterns for comparison with the 2025 SYR projection scenarios.
  - West Yost will develop exhibits to compare the collected data to previous historical and modeling data as necessary to document the data collection in an annual report and present the data to the peer review committee.

<sup>27</sup> All deliverables for the implementation of the 2017 Court Order can be found on Watermaster’s website here: [Chino Basin Watermaster - 2017 Safe Yield Court Order Implementation](#)

- West Yost will prepare a draft and final data collection report. The draft report will be reviewed with the Peer Review committee, comments will be incorporated, and the final report will be submitted to the Court no later than June 30, 2027.
- **Task 2 – Support Implementation of the 2025 Safe Yield Reevaluation.** Following the submittal of the 2025 SYR Report, Watermaster will require support to implement any of the findings of the 2025 SYR and respond to requests from the parties. The scope is anticipated to include:
  - Support for Court motions that may result from the 2025 SYR, including additional documentation (e.g., Court declarations) or Court appearances.
  - Additional simulations of the groundwater model or additional analysis of groundwater model results to respond to party or Watermaster staff requests.
  - Preparation of exhibits, presentation materials, and support to conduct workshops.

The specific scope of any support for implementation of the 2025 SYR will be defined and agreed upon with Watermaster staff prior to the execution of the scope.

## **Deliverables**

West Yost’s primary deliverables will be the following draft technical memoranda/reports:

- A draft and final report documenting the data collection process and the data collected through FY 2025/26.
- West Yost will prepare other deliverables as needed to support the technical workshops and meetings in Tasks 1 and 2.

## 7615 – PE8/9: STORAGE MANAGEMENT/CONJUNCTIVE USE

### Develop 2027 Storage Management Plan

	Cost Estimate
Consultant Labor	\$165,880
Other Direct Costs	\$200
<b>Total</b>	<b>\$166,080</b>

### Rationale

The 1978 Judgment established a Watermaster to administer the decree under the Court’s continuing jurisdiction and empowered it to manage and control the Basin’s available storage capacity and to enter into agreements for the storage of water. As a prerequisite to implementing the Optimum Basin Management Program (OBMP), the Parties executed the Peace Agreement, providing direction and guidance to Watermaster on how storage should be prioritized and managed. The OBMP addresses the management of groundwater pumping, recharge, storage and recovery, and the transfer of water.

The original OBMP included plans for storage management and conjunctive-use activities, including groundwater pumping, recharge, storage and recovery, and the transfer of water. As part of the 2020 OBMP Update (2020 OBMPU), Watermaster reviewed and refined the original storage management planning work and developed the 2020 Storage Management Plan (SMP). The 2020 SMP describes the existing and projected uses of storage by the Parties, agencies engaged in Storage and Recovery Programs, the need for recharge capacity to satisfy replenishment obligations, the Parties’ storage management activities, guidance for Storage and Recovery Programs, and the storage agreement application process.

The SMP is required to be reviewed and updated (1) at least every five years, (2) when the Safe Yield is recalculated, or (3) when Watermaster determines that a review is warranted based on new information or the needs of the Parties or the Basin. Because the 2020 SMP was completed in October 2020, it was originally scheduled for update in 2025. However, the delay in the Safe Yield Reevaluation, the results of which inform the SMP, has shifted the initiation of the SMP update to FY 2025/26, with completion anticipated in FY 2026/27.

In parallel with the SMP update, the 2020 OBMPU identified several management activities necessary to achieve the goals of the OBMPU. Activity B under Program Element 9 is to develop, implement, and optimize Storage and Recovery Programs to increase water supply reliability, protect or enhance Safe Yield, and improve water quality. Exhibit 7 of the 2020 OBMPU outlined a multi-year process for advancing this activity:

1. Convene the Storage and Recovery Program Committee (Committee), define objectives, and refine scope of work.
2. Develop conceptual alternatives for Storage and Recovery Programs at various scales.
3. Describe and evaluate reconnaissance-level facility plans and costs for Storage and Recovery Program alternatives.
4. Prepare a *Storage and Recovery Master Framework (SRMF)*.

Watermaster staff initiated Step 1 in FY 2023/24 by convening the Committee and conducting a kickoff meeting to discuss objectives and potential program concepts. This effort was paused in FY 2024/25 to allow the completion of the 2025 Safe Yield Reevaluation.

The SMP update provides an opportunity to reintegrate and advance the SRMF effort, ensuring that the updated storage management policies, projected storage demands, and future Storage and Recovery Programs are evaluated within a consistent planning framework.

## Scope of Work

The work in FY 2026/27 will continue development of the updated SMP using the latest planning information, technical understanding, and policy guidance regarding the use and management of storage in the Basin, including the results of the 2025 Safe Yield Reevaluation.

The SMP update will include stakeholder engagement and technical evaluation to assess current and projected storage use, recharge capacity needs, and storage management policies. This effort will include three workshops with the Parties to:

- Review the regulatory and technical requirements of the SMP update.
- Present and discuss updated storage projections and planning assumptions.
- Review the draft SMP and gather feedback from the Parties.

Consistent with the objectives of the 2020 OBMPU Activity B, the SMP update will also incorporate planning activities related to the development of the Storage and Recovery Master Framework (SRMF). The SRMF will provide a strategic planning framework for evaluating future Storage and Recovery Programs, including potential program concepts, infrastructure needs, operational considerations, and implementation pathways.

As part of this effort, West Yost will work with Watermaster staff and the Parties to define the next phase of work for the SRMF. This will include:

- Preparing and conducting one Storage and Recovery Program Committee meeting to review the outcomes and conclusions of the 2023 Committee kickoff meeting.
- Confirming objectives and priorities for advancing the SRMF.
- Developing a detailed scope of work and budget for Steps 2 through 4 of the SRMF process, including development of program alternatives, evaluation of reconnaissance-level facility concepts and costs, and preparation of the SRMF.

The resulting scope and budget for the SRMF will be presented through the Watermaster process for review and approval and will guide future work to support the implementation of Storage and Recovery Programs consistent with the updated SMP.

## Deliverables

West Yost's deliverables will include a draft and final version of the SMP, as well as presentation materials to support the workshops.

**Table 3: Variance Explanations for Engineering Costs  
FY 2026/27 versus FY 2025/26**

FY 2026/27 Account No(s).	Task	Change from FY 25/26	Variance Explanation
<b>General Optimum Basin Management Program/Judgment Administration</b>		<b>\$200,036</b>	
8306, 8506, 8406, 6206, 6306	Pool, Advisory, Watermaster Meetings	\$3,713	
6901.8, 5901.8	Other General Meetings as Requested	\$2,507	
5935	Material Physical Injury Requests	(\$5,572)	
5906.71	Miscellaneous Data Requests - GM/Watermaster Staff	\$3,528	
5906.72	Miscellaneous Data Requests - Non CBWM Staff/RFI	\$1,833	
6901.95	SGMA Reporting Requirement for WC Section 10720.8 (f)	\$790	
6906	Project Management	\$2,156	
6906.1	Watermaster Model Application and Required Demonstrations	\$20,769	The increase in cost compared to FY 2025/26 is due to the addition of the study for supplemental water recharge in MZ-1 (Peace II Agreement Section 8.4[e]) and the addition of FY 2025/26 to the historical period being modeled.
5945	Assist Watermaster in Preparing the 49th Annual Report	\$572	
6906.21	2026 State of the Basin Report	\$169,740	This is a biennial task that is to be completed in FY 2026/27.
<b>7100 Program Element 1: Comprehensive Monitoring Program</b>		<b>(\$103,017)</b>	
7502, 7505	Groundwater Quality Monitoring Program	(\$2,518)	
7104.3, 7104.8, 7104.9	Groundwater Level Monitoring Program	\$20,827	Increased cost due to budget added to hire outside contractors to perform rehab of an old well to convert it for monitoring water quality and water levels to fill a data gap required by the Regional Board.
7402, 7403, 7406, 7408	Ground Level Monitoring Program	(\$33,721)	Cost decrease compared to FY 2025/26 is primarily due to recommending GPS surveys instead of traditional benchmark leveling surveys. Additional savings result from final payoff for the GAMMA software to process InSAR data.
7302, 7306	PBHSP - Monitoring Program- IEUA Cost Share	(\$52,333)	The decrease in cost in FY 2026/27 is due to the triennial field vegetation surveys not being performed this year.
7202	Review Documents for Chino Basin Recycled Water GW Recharge Program	\$740	
5925	Agricultural Production Estimation	(\$36,336)	This task was completed in FY 2025/26.
5965	Support for Improved Data Collection and Visualization Tools	\$324	
<b>7200 Program Element 2: Comprehensive Recharge Program</b>		<b>\$279,742</b>	
6901.95	SWRCB and CDFW Water Rights Reporting	(\$312)	
7202.2	PE2: Comprehensive Recharge Program	(\$59,256)	The scope of work excludes the one-time Turner Basin analysis completed in FY2025/26 and the collection of MS4 data.
7202.2	2028 Recharge Master Plan Update	\$339,309	The Recharge Master Plan Update (RMPU) is due to the Court every five years. This budget assumes that the 2028 RMPU will evaluate new recharge projects
<b>7300 Program Elements 3 &amp; 5: Water Supply Plan - Desalter</b>		<b>\$680</b>	
7303	PE3-5: Engineering Support for Desalters	\$680	
<b>7400 Program Element 4: Mgmt Zone Strategies</b>		<b>(\$202,807)</b>	
7402	PE4/MZ-1: Data Analyses, Reports, Meetings, and Administration	(\$16,337)	The cost decrease compared to FY 2025/26 is primarily due to the completion of the Whispering Lakes Subsidence Study.
7402.1	PE4: Subsidence Management Plan for Northwest MZ-1	(\$186,470)	The cost decrease compared to FY 2025/26 is primarily due to completion of the PX refurbishment and the construction and calibration of the additional 1D compaction models.
<b>7500 Program Elements 6 &amp; 7: Coop Efforts/Salt Mgmt</b>		<b>(\$37,722)</b>	
7502	PE6-7: Consulting Services for Water Quality under PE 6/7	\$372	

**Table 3: Variance Explanations for Engineering Costs**  
**FY 2026/27 versus FY 2025/26**

FY 2026/27 Account No(s).	Task	Change from FY 25/26	Variance Explanation
7510	Update IEUA's Recycled Water Permits/Maximum Benefit Salinity Management Plan for the Chino Basin - 50% IEUA Cost Share	\$40	
7511	As Requested Services to Review of Work Performed by Santa Ana Watershed BMPTF	\$5,568	
7517	Implementation of Chino Creek Monitoring Program - 50% IEUA Cost Share	(\$4,452)	
7520	Water Quality Management Program	(\$39,250)	No work was initiated in FY 2025/26, and the remaining budget will carry over to FY 2026/27. The timing of WQC meetings and WQMP scope will be determined by Watermaster as-needed.
<b>7600 Program Elements 8 &amp; 9: Storage Mgmt/Conj Use</b>		<b>(\$308,270)</b>	
7610	Develop Storage and Recovery Master Framework	(\$21,720)	The scope in FY 2026/27 has been combined with Task 7615.
7614	Support Implementation of the Safe Yield Court Order	(\$314,814)	The 2025 Safe Yield Reevaluation was completed in FY 2025/26.
7615	Develop 2027 Storage Management Plan	\$28,264	The scope in FY 2026/27 is greater than the prior year because the majority of the work to complete the 2027 Storage Management Plan will take place in FY 2026/27 and will include initiating the Storage and Recovery Master Framework.
<b>Total</b>		<b>(\$171,357)</b>

**TECHNICAL MEMORANDUM**

DATE: May 1, 2026 Project No.: 941-80-25-21

TO: Ground-Level Monitoring Committee

FROM: West Yost Associates

REVIEWED BY: Andy Malone, PG

SUBJECT: Recommended Scope-of-Work and Budget for the Ground-Level Monitoring Program for Fiscal Year 2026/27 **(FINAL)**

---

**BACKGROUND AND PURPOSE**

Pursuant to the Optimum Basin Management Program Implementation Plan and the Peace Agreement, the Chino Basin Watermaster (Watermaster) implements a Subsidence Management Plan (SMP) for the Chino Basin to minimize or stop the occurrence of land subsidence and ground fissuring. The Court approved the SMP and ordered its implementation in November 2007 (2007 SMP). The 2007 SMP was updated in 2015 (2015 SMP) and can be downloaded from the Watermaster [website](#). The SMP outlines a program of monitoring, data analysis, and annual reporting. A key element of the SMP is its adaptive nature—Watermaster can adjust the SMP as warranted by the monitoring/testing data.

The Watermaster Engineer, with the guidance of the Ground-Level Monitoring Committee (GLMC), prepares annual reports which include: the results of the Ground-Level Monitoring Program (GLMP); interpretations of the data; recommendations for the GLMP for the following fiscal year (FY); and recommendations for adjustments to the SMP, if any.

This Technical Memorandum (TM) describes the Watermaster Engineer’s recommended activities for the GLMP for FY 2026/27 in the form of a proposed scope-of-work and budget.

Members of the GLMC are asked to:

- Review this draft TM prior to March 5, 2026.
- Attend a meeting of the GLMC at 10:00 am on March 5, 2026 to discuss the proposed scope-of-work and budget for FY 2026/27.
- Submit comments and suggested revisions on the proposed scope-of-work and budget for FY 2026/27 to the Watermaster by April 2, 2026.

7.4 Prepare a Recommended Scope and Budget for the GLMC for FY 2027/28		5.75	\$12,482						\$0	\$12,482	\$12,482	\$11,944	\$538
<b>Totals</b>			<b>\$400,272</b>						<b>\$61,760</b>	<b>\$462,032</b>	<b>\$462,032</b>	<b>\$573,772</b>	<b>-\$111,740</b>

Notes:

a Assumes in-person meetings.

A final recommended scope-of-work and budget that addresses the comments and suggested revisions of the GLMC will be included in the Watermaster staff's proposed budget for FY 2026/27. The final scope-of-work and budget for FY 2026/27 approved by the Watermaster will be included in Section 4 of the *2025/26 Annual Report for the GLMP*.

## **RECOMMENDED SCOPE-OF-WORK AND BUDGET – FY 2026/27**

A proposed scope-of-work and budget for the GLMP for FY 2026/27 is shown in Table 1 as a line-item cost estimate. The proposed scope-of-work is summarized below.

### **Task 1. Setup and Maintenance of the Monitoring Network**

The Chino Basin extensometer facilities are key monitoring facilities for the GLMP. They require regular and as-needed maintenance and calibration to remain in working order and to ensure the recording of accurate measurements.

#### ***Task 1.1. Maintain Extensometer Facilities***

This subtask includes performing monthly visits to the extensometer facilities at Ayala Park (APX), Chino Creek (CCX), and Pomona (PX) to ensure functionality and calibration of the monitoring equipment and data loggers. Two staff members are required for these visits due to safety concerns.

Non-routine efforts to be performed under this subtask during FY 2026/27 may include:

- As-needed adjustments to the extensometers to ensure the accuracy of the measurements of aquifer-system deformation.
- As-needed repair or replacement of linear potentiometers, transducers, and/or the CR1000X data loggers.

#### ***Task 1.2. Annual Lease Fees for the Chino Creek Extensometer Site***

The County of San Bernardino (County) owns the land the Chino Creek extensometer facility is located on. As such, the Watermaster entered into a lease agreement with the County in 2012 and pays the County an annual rental payment of \$1,596.

### **Task 2. Aquifer-System Monitoring and Testing**

This task involves the collection, compilation, and checking of hydraulic head and aquifer-system deformation data from the Ayala Park, Chino Creek, and PX extensometer facilities.

#### ***Task 2.1. Conduct Quarterly Monitoring at Extensometer Facilities***

This subtask involves quarterly data collection, processing, and checking from the three extensometer facilities. This frequency of data collection/checking is needed to ensure that the monitoring equipment is in good working order and to minimize the risk of losing data because of equipment malfunction. For this subtask, the complete extensometer and piezometer

records from the APX, CCX, and PX facilities are loaded to HydroDaVE<sup>SM</sup> (Hydrologic Database and Visual Explanations), the annual report figures are updated, and all the new data are checked for accuracy. If the data indicate malfunctioning equipment or inaccurate measurements, then any necessary adjustments to the monitoring equipment are made. Two staff members are required for these visits due to safety concerns.

### **Task 3. Basin-Wide Ground-Level Monitoring Program (InSAR)**

This task involves the annual collection and analysis of Synthetic Aperture Radar (SAR) scenes to estimate the vertical ground motion across the western portion of Chino Basin from March 2026 to March 2027.<sup>1</sup>

In this subtask, five SAR scenes that are acquired by the TerraSAR-X satellite from March 2026 to March 2027 are purchased from the German Aerospace Center. West Yost will use the SAR scenes to prepare 12 interferograms (InSAR) that describe the incremental and cumulative vertical ground motion that occurred from March 2026 to March 2027, and since 2011. The associated costs to task, acquire, purchase, and process the InSAR data is as follows:

- Task TerraSAR-X for five SAR acquisitions for the western Chino Basin (\$1,000)
- Purchase TerraSAR-X data (\$10,000)
- Prepare and check InSAR results, including the interferograms and GIS-generated rasters (\$76,448)

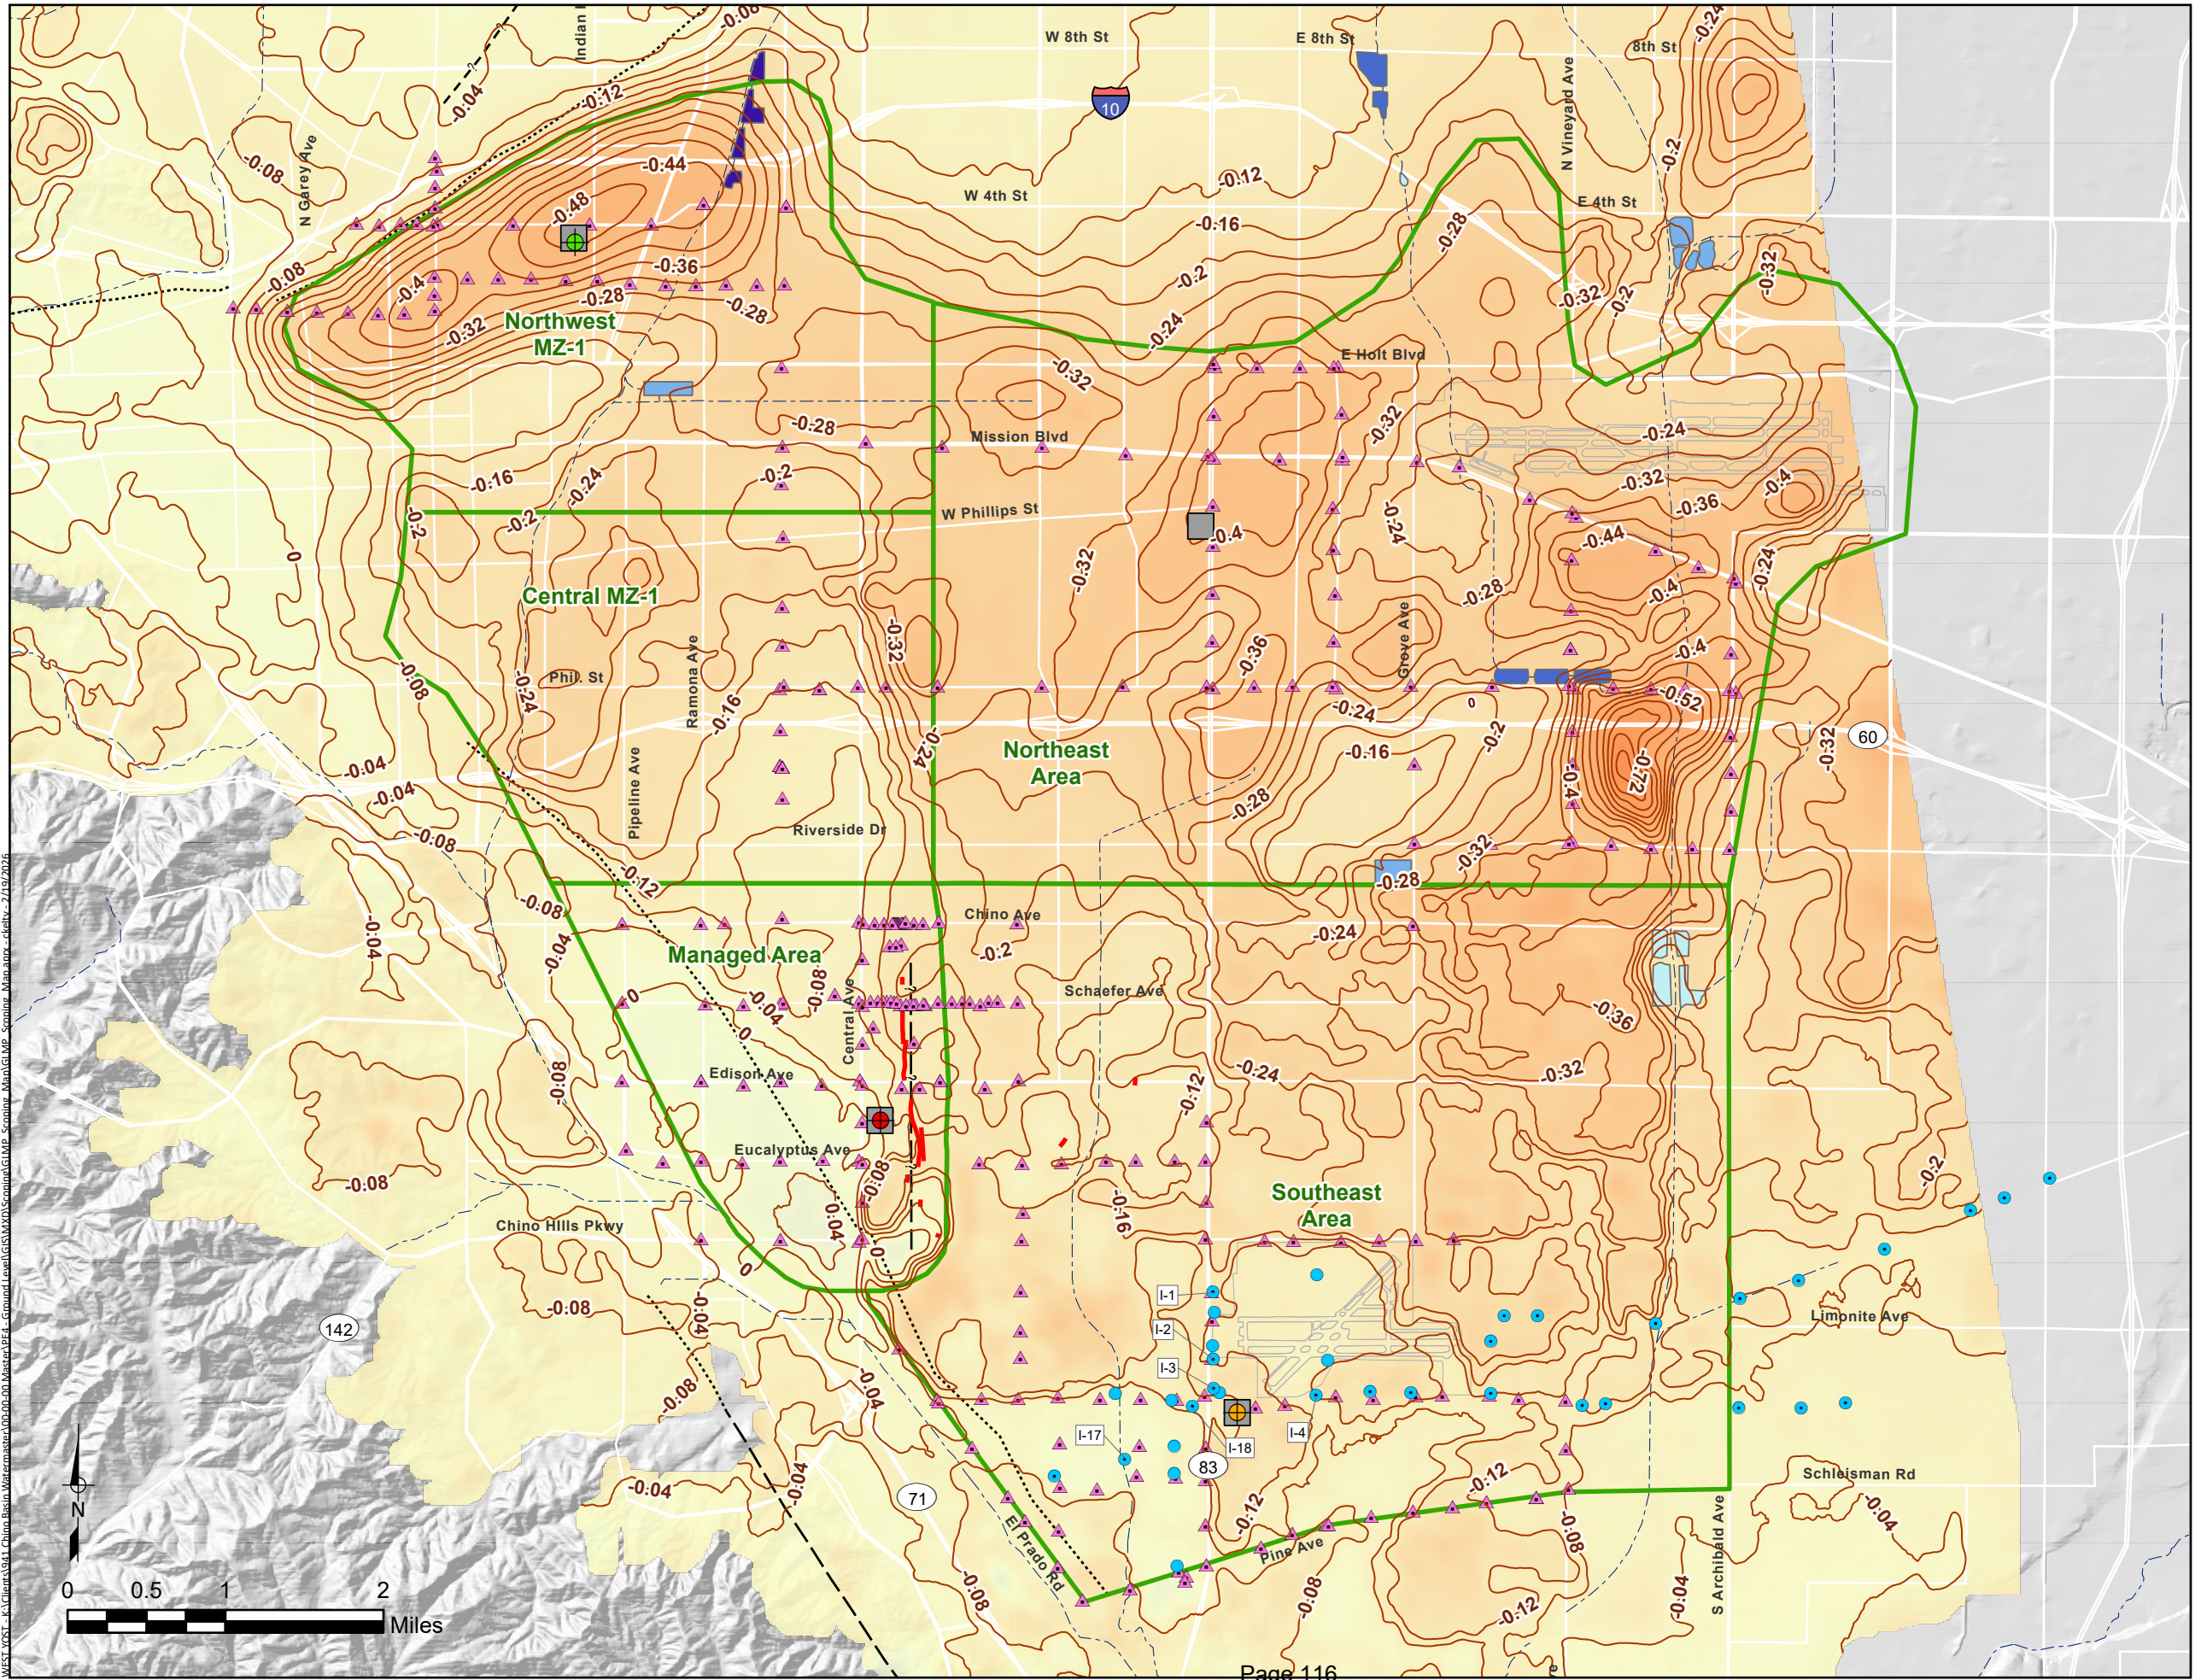

In addition, West Yost purchased and maintains the GAMMA software that is necessary to process the SAR data and prepare the InSAR estimates of vertical ground motion. The annual maintenance cost for the GAMMA software is \$6,600.

### **Task 4. Perform Ground-Level Surveys**

This task involves conducting traditional leveling and GPS elevation surveys at benchmark monuments across defined areas of western Chino Basin to estimate the vertical ground motion that occurred since the prior survey. Figure 1 shows the location of the benchmark monuments surveyed across the western Chino Basin. Electronic distance measurements (EDM surveys) are also performed periodically between monuments to estimate horizontal ground motion in areas where ground fissuring due to differential land subsidence is a concern. Table 2 documents the traditional leveling and GPS surveys conducted since 2018 as part of the GLMP.

---

<sup>1</sup> West Yost is performing this task internally instead of subcontracting the work. This was made possible by West Yost hiring the InSAR subconsultant directly and purchasing/maintaining the necessary hardware and software.

Chino Basin Watermaster  
Ground-Level Monitoring Program

**Figure 1**  
**Ground-Level Monitoring Program**  
**Fiscal Year 2026/27**

Ground-Level Survey Area	Ground-Level Survey Completed (Y/N)?									
	2018	2019	2020	2021	2022	2023	2024	2025	2026 <sup>(c)</sup>	2027 <sup>(d)</sup>
Managed Area	Y	N	N	N	N	N	Y	N	N	N
Fissure Zone Area <sup>(a)</sup>	Y	N	N	N	N	N	N	N	N	N
Central Area	N	N	N	N	N	N	N	N	N	N
Northwest Area	Y	Y	Y	Y	Y	Y	Y	Y	Y	N
San Jose Fault Zone Area <sup>(a)</sup>	Y	Y	Y	Y	Y	N	N	N	N	N
Southeast Area	Y	N	N	N	Y	N	N	N	N	N
Northeast Area	Y	Y	Y	N	N	N	N	N	N	N
GPS points in key areas <sup>(b)</sup>	-	-	-	-	-	-	-	-	-	Y

(a) Denotes EDM survey area (measurements of horizontal strain).  
(b) As an alternative to traditional ground-level surveys, a new recommendation for Spring 2027 is to conduct GPS surveys at four key control points in the Managed, Northwest, Northeast, and Southeast areas.  
(c) The 2026 surveys are scheduled to begin in March 2026.  
(d) The 2027 surveys are scheduled to begin in March 2027.

The surveys recommended for FY 2026/27 include the following:

***Task 4.5. Conduct GPS Surveys at Four Control Points in the Northwest, Northeast, Southeast, and Managed Areas***

As an alternative to traditional ground-level surveys, a new recommendation for Spring 2027 is to conduct GPS surveys at four key control points in the Managed, Northwest, Southeast, and Northeast areas:

- APEXO-1 at the Ayala Park Extensometer (Managed Area)
- MPEXO-1 at the Pomona Extensometer (Northwest Area)
- B-290 at the Chino Creek Extensometer (Southeast Area)
- A new control point near the 1D modeling location at Ontario Well 33 (Northeast Area)

These control points will be referenced to the Ayala Park elevation datum at the APX.

This strategy offers a more cost-effective approach, since the results of the GLMP indicate that InSAR monitoring is providing accurate estimates of vertical ground motion at high spatial resolution and across all Areas of Subsidence Concern. The GPS survey results will be used to verify InSAR estimates of vertical ground motion, support calibration of the 1D subsidence models, and provide reference elevations for any future differential leveling surveys in these four Areas of Subsidence Concern. This subtask also includes labor by field staff to escort the contractor to each GPS control point.

#### ***Task 4.6. Replace Destroyed Benchmarks (if needed)***

In this subtask, the surveyor replaces benchmark monuments that have been destroyed since the last survey, if any. If additional benchmarks are required, the surveyor will provide a cost estimate to complete the task.

#### ***Task 4.7. Process, Check, and Update Database***

In this subtask, the Watermaster Engineer receives and catalogs the survey results provided by the surveyor, prepares the data for display as a GIS layer, and performs checks against InSAR and extensometer data for reasonableness and accuracy.

#### ***Ground-Level Surveys Not Recommended for Spring 2027***

Ground-level surveys are **not** recommended for Spring 2027 in the Managed, Central, Northwest, Northeast and Southeast Areas. This recommendation is justified because:

- InSAR is proving to be an accurate, more efficient, higher-resolution method to monitor vertical ground motion across the western Chino Basin.
- Hydraulic heads and vertical ground motion in some of these areas are stable or increasing.
- The cost of conducting traditional leveling surveys has increased significantly in recent years.

### **Task 5. Data Analysis and Reporting**

#### ***Task 5.1. Prepare Draft 2025/26 Annual Report for the Ground-Level Monitoring Program***

Prepare the text, tables, and figures for a draft *2025/26 Annual Report for the GLMP* and submit the report to the GLMC by September 17, 2026, for review and comment.

#### ***Task 5.2. Prepare Final 2025/26 Annual Report for the Ground-Level Monitoring Program***

Update the text, tables, and figures based on the comments received from the GLMC and prepare a final *2025/26 Annual Report for the GLMP* by November 2, 2026. Responses to GLMC comments will be included as an appendix to the final report. The report will be included in the agenda packet for the November 2026 Watermaster meetings for approval.

#### ***Task 5.3. Compile and Analyze Data from the 2026/27 Ground-Level Monitoring Program***

During the winter and spring of 2027, the monitoring data generated from the GLMP during 2026/27 is checked, mapped, charted, and analyzed as the first step in the preparation of the subsequent annual report. Some of the maps, charts, and tables are shared with the GLMC at its meetings in early 2027 during the development of a recommended scope of services and budget for FY 2027/28.

### ***Future Reporting Frequency and Format***

Following completion of the 2025/26 Annual Report, the Watermaster Engineer recommends evaluating opportunities to improve reporting efficiency, including the potential to reduce the reporting frequency to bi-annual, which could be coordinated with the bi-annual State of the Basin Report, subject to Court approval.

Under this approach, the Watermaster Engineer would continue to provide annual data summaries and updates to the GLMC during a special meeting each spring. A written report would be prepared every two years and/or presented in coordination with the State of the Basin Report.

Any modification to the reporting frequency or format would be implemented only upon recommendation by the GLMC, the Watermaster Pools, Advisory Committee, and Board, and Court approval. This approach has the potential to reduce long-term administrative and reporting costs while maintaining annual oversight and GLMC collaboration.

### ***Task 5.4. Conduct Whispering Lakes Subsidence Investigation of the Northeast Area***

In the Northeast Area, the long-term and short-term InSAR estimates indicate that persistent downward ground motion has occurred in a concentrated area south of the Ontario International Airport between Vineyard Avenue and Archibald Avenue in the vicinity of Whispering Lakes Golf Course. This concentrated area of subsidence is herein referred to as the Whispering Lakes Subsidence Feature.

In FY 2021/22, the Watermaster Engineer conducted a Reconnaissance-Level Investigation that included the review and analysis of readily-available borehole and lithologic data, historical air photos, pumping and recharge data, hydraulic head data, and InSAR estimates of vertical ground motion. Figures and charts were prepared and analyzed to derive interpretations and recommendations for future investigations and monitoring. The investigation and recommendations were included in the *FY 2021/22 Annual Report for the GLMP*.

The investigation and subsequent monitoring show that the subsidence feature directly overlies the Whispering Lakes Golf Course, and hence, suggest that the most plausible mechanism for this subsidence feature is shallow soil consolidation associated with the golf course and/or the prior overlying land uses. If true, groundwater management will have no effect on the Whispering Lakes Subsidence Feature. However, the possibility remains that deeper aquifer-system compaction is at least a contributing mechanism for the land subsidence.

Based on these findings, the Watermaster Engineer does **not** recommend continuing the limited monitoring program in FY 2026/27 for the following reasons:

- Vertical ground motion in this area will continue to be evaluated using high-resolution InSAR analyses developed for the GLMP Annual Report.

- The Watermaster Engineer has been unsuccessful in outreach efforts to install transducers in nearby deep groundwater pumping wells at the Niagara Bottling Facility. However, pumping data reported for these wells will continue to be provided to Watermaster and summarized in the GLMP Annual Report.

Although the limited monitoring program is **not** recommended for FY 2026/27, it should be reconsidered in future fiscal years if InSAR patterns change substantially at the Whispering Lakes Subsidence Feature or if the Watermaster Engineer is granted permission to install and download transducer data at the nearby Niagara Bottling Facility. Such reassessment would help determine whether aquitard drainage and groundwater utilization are contributing factors to the observed subsidence.

### **Task 6. Develop a Subsidence-Management Plan for Northwest MZ-1**

The 2007 SMP called for ongoing monitoring and data analysis of the Managed Area; including annual reporting and adjustments to the SMP, as warranted by the data. The 2007 SMP also called for expanded monitoring of the aquifer-system and land subsidence in other areas of subsidence and ground fissuring concern. Figure 1 shows the location of these so-called Areas of Subsidence Concern: Central MZ-1, Northwest MZ-1, Northeast Area, and Southeast Area. The expanded monitoring efforts outside of the Managed Area are consistent with the requirements of OBMP Program Element 1 and its implementation plan contained in the Peace Agreement.<sup>2</sup>

The 2007 SMP stated that if data from existing monitoring efforts in the Areas of Subsidence Concern indicate the potential for adverse impacts due to subsidence, the Watermaster would revise the SMP to avoid those adverse impacts. The 2014 Annual Report of the GLMP recommended that the 2007 SMP be updated to better describe the Watermaster's land subsidence efforts and obligations, including areas outside of MZ-1. As such, the update included a name change to the 2015 Chino Basin Subsidence Management Plan (2015 SMP) and a recommendation to develop a subsidence management plan for Northwest MZ 1.

The Watermaster had been monitoring vertical ground motion in Northwest MZ-1 via InSAR during the development of the 2007 SMP. Land subsidence in Northwest MZ-1 was first identified as a concern in 2006 in the MZ-1 Summary Report and again in 2007 in the 2007 SMP. Of particular concern was the occurrence of concentrated differential subsidence across the San Jose Fault in Northwest MZ-1—the same spatial pattern of differential subsidence that occurred in the Managed Area during the time of ground fissuring. Ground fissuring is the main subsidence-related threat to infrastructure. The issue of differential subsidence, and the potential for ground fissuring in Northwest MZ-1, has been discussed at prior GLMC meetings, and the subsidence has been documented and described as a concern in the Watermaster's

---

<sup>2</sup> [http://www.cbwm.org/docs/legaldocs/Peace\\_Agreement.pdf](http://www.cbwm.org/docs/legaldocs/Peace_Agreement.pdf).

State of the Basin Reports, the annual reports of the GLMP, and in the *Initial Hydrologic Conceptual Model and Monitoring and Testing Program for the Northwest MZ-1 Area* (WEI, 2017). The Watermaster increased monitoring efforts in Northwest MZ-1 beginning in FY 2012/13 to include ground elevation surveys and electronic distance measurements (EDM) to monitor ground motion and the potential for fissuring.

In 2015, the Watermaster's Engineer developed the *Work Plan to Develop a Subsidence Management Plan for the Northwest MZ-1 Area* (Work Plan; WEI 2015b).<sup>3</sup> The Work Plan is characterized as an ongoing Watermaster effort and includes a description of a multi-year scope-of-work, a cost estimate, and an implementation schedule. The Work Plan was included in the 2015 SMP as Appendix B. Implementation of the Work Plan began in July 2015. On an annual basis, the GLMP analyzes the data and information generated by the implementation of the Work Plan. The results and interpretations generated from the analysis are documented in the annual report for the GLMP and used to prepare recommendations for future activities.

### ***Progress to Implement Work Plan through FY 2025/26***

The progress that has been made to implement the Work Plan through FY 2025/26 is described below:

- An initial hydrogeologic conceptual model of the Northwest MZ-1 Area was developed, and a report was published in 2017.<sup>4</sup> This report described the hydrogeology of the area, speculated on the causes of the observed land subsidence, and included a recommended monitoring program.
- A preliminary one-dimensional (1D) compaction model, based on hydrogeologic information from the MVWD-28 well site, was constructed, calibrated and used to explore the future occurrence of subsidence in Northwest MZ-1 under various basin-operation scenarios of groundwater production and artificial recharge and to identify potential subsidence mitigation strategies. A report<sup>5</sup> was published to document the results and interpretations of the modeling, which were: ***the deep aquifer system is most susceptible to future compaction and associated land subsidence, and hence, heads will need to increase in the deep aquifer system to minimize or abate future subsidence in Northwest MZ-1.*** The report also included a recommendation to construct the Pomona Extensometer.
- The initial monitoring program was implemented to closely track groundwater-levels, groundwater production, recharge, and ground motion across Northwest MZ-1. This

---

<sup>3</sup> [Work Plan to Develop a Subsidence-Management Plan for Northwest MZ-1](#)

<sup>4</sup> [https://www.cbwm.org/docs/engdocs/GLMC/nwmz1/Final\\_NWMZ1\\_Task1\\_Report.pdf](https://www.cbwm.org/docs/engdocs/GLMC/nwmz1/Final_NWMZ1_Task1_Report.pdf)

<sup>5</sup> <https://www.cbwm.org/docs/engdocs/GLMC/nwmz1/20171220%20Final%20NWMZ1%20Task3-4%20Tech%20Memo.pdf>

monitoring program included the construction of the Pomona Extensometer to measure and record depth-specific heads and aquifer-system deformation. Implementation of the monitoring program is ongoing.

- A new 1D model was constructed and calibrated using the hydrogeologic information collected at the Pomona Extensometer. The 1D model at MVWD-28 was also updated and recalibrated using current information. The objectives of this exercise were to: (i) describe the subsidence mechanisms and the pre-consolidation head by aquifer-system layer in Northwest MZ-1 and (ii) develop modeling tools that can be used to explore the future occurrence of subsidence in Northwest MZ-1 under various basin-operation scenarios of groundwater production and artificial recharge and to identify potential subsidence mitigation strategies. This work was reviewed by the GLMC, and additional model calibration refinements and sensitivity analyses were performed based on GLMC input. In November 2022, the Watermaster Engineer published a final report<sup>6</sup> on the 1D Model calibrations and sensitivity analyses (with review by the GLMC) and deemed the 1D Models sufficient to simulation future land subsidence under prospective plans for pumping and recharge.
- In 2023, the Watermaster Engineer, with review and input from the GLMC, developed an initial “Subsidence Management Alternative” for Northwest MZ-1 called SMA-1. SMA-1 is equivalent to the planning scenario that was simulated with the 2020 Chino Valley Model (CVM) to support the 2020 Safe Yield Recalculation (2020 SYR). The 2020 SYR was intended to represent and simulate the Parties’ projected pumping, recharge, and use of storage through 2050. The results of the 2020 SYR (*i.e.*, projected hydraulic heads by CVM layer) were used as input data for the 1D Model simulations to predict the potential future occurrence of subsidence through 2050. In September 2023, the Watermaster Engineer published a draft TM titled *1D Model Simulation of Subsidence in Northwest MZ-1—Subsidence Management Alternative #1*. The Watermaster’s recommendations from this work were the following:
  - a. Establish a *preliminary* “Northwest MZ-1 Guidance Level” of 630 ft-amsl for hydraulic heads in Layers 3 and 5 at the PX location. The *preliminary* Guidance Level is based on the physics of aquitard drainage and an aspirational Watermaster recommendation that, if achieved, would likely slow or stop aquitard compaction and land subsidence in Northwest MZ-1. While it is true that the rate of subsidence has slowed in Northwest MZ-1, the threat of future groundwater level declines and associated subsidence (and ground fissuring) remains, which is a reason why the Watermaster conducts the subsidence

---

<sup>6</sup> <https://www.cbwm.org/docs/engdocs/GLMC/nwmz1/TM%20-%20941%20-%201D%20Model%20-%20Final.pdf>

monitoring program and is developing a Subsidence Management Plan for Northwest MZ-1.

- b. Compliance with the Guidance Level should be measured at the PX-2/3 piezometer, which is generally representative of heads in Layers 3 and 5.
- c. The methods to achieve the Guidance Level could include but are not limited to: voluntary modification of pumping patterns; in-lieu recharge; wet-water recharge via spreading and/or injection; or a combination of methods. These methods might necessitate: voluntary modification of water-supply plans of the purveyors in the Chino Basin; modification of Watermaster practices for recharge and replenishment; and/or the implementation of regional-scale storage or conjunctive-use programs.
- d. Additional SMAs should be developed and evaluated with the 1D Models to generate the necessary information to finalize the Guidance Level and the *Subsidence Management Plan for Northwest MZ-1*. The additional SMAs could be developed during Watermaster’s groundwater modeling efforts associated with the 2025 Safe Yield Reevaluation and the development of the Storage and Recovery Master Plan. The GLMC should participate in the scenario building exercises associated with these Watermaster efforts to develop the SMAs, so that the scenarios include various methods to achieve the Guidance Level. Then, the 1D Models should be used to evaluate the potential future subsidence in Northwest MZ-1 under the SMAs. These model results and evaluations will support the establishment of a Guidance Level in the *Subsidence Management Plan for Northwest MZ-1*. It should be noted that future monitoring and analyses always hold the potential for revisions to the Guidance Level, consistent with the adaptive management approach called for in the Chino Basin Subsidence Management Plan.

Based on the expected progress through FY 2025/26, the following work is recommended for FY 2026/27 to develop the *Subsidence Management Plan for Northwest MZ-1*:

#### ***Task 6.1. Aquifer-System Monitoring***

The established monitoring program of piezometric levels and pumping at wells in Northwest MZ-1 will continue through various techniques, including: (i) SCADA-based monitoring by the Monte Vista Water District; (ii) monitoring of piezometric levels via sonar<sup>7</sup>; (iii) monitoring of piezometric levels via pressure transducers at City of Pomona production wells; and (iv) manual measurements of piezometric levels. These data, along with data collected from the PX in Task

---

<sup>7</sup> The use of sonar technology to measure piezometric levels in wells is currently being used in Monte Vista Water District wells 28 and 31.

2.1, will improve the understanding of the hydrogeology in Northwest MZ-1, will be used to develop the *Subsidence Management Plan for Northwest MZ-1*, and in the future, will be used to adapt the Chino Basin Subsidence Management Plan, as appropriate.

In this subtask, all data is collected, compiled, checked, and analyzed every three months. Charts and data graphics of pumping, piezometric levels, and aquifer-system deformation will be updated to support the data collection and analysis.

The Watermaster Engineer has previously reported that the PX monitoring facility is not recording accurate extensometer data. The primary causes of these inaccuracies include entanglement of the steel extensometer cables with transducer cables within the well casings, as well as malfunctioning linear potentiometers and/or data loggers. In FY 2025/26, the Watermaster Engineer refurbished the facility with assistance from an well rehab subcontractor, with completion expected in April 2026. For FY 2026/27, **no** additional funding is recommended for refurbishment of this facility, as periodic maintenance and repairs are included under Tasks 1 and 2.

#### ***Task 6.2. Refine and Evaluate Subsidence-Management Alternatives***

During FY 2025/26, the Watermaster is conducting the 2025 SYR, which involves the development and evaluation of multiple projection scenarios of future hydrology, pumping, managed recharge, and use of managed storage in the Chino Basin. These projection scenarios are being simulated with an updated CVM. The CVM results provide basin-scale projections of groundwater levels by model layer and are used to evaluate the Safe Yield and the potential for MPI in the future. The evaluation of MPI in the 2025 SYR is based on groundwater-level criteria (i.e., minimum historical groundwater elevations that, if exceeded, may cause new land subsidence).

The GLMP Task 6.2 is a more detailed, subsidence-focused evaluation of potential future subsidence in Northwest MZ-1, where projected groundwater levels from the 2025 SYR are used as input data for the 1D Model at the PX location to evaluate the potential for future subsidence in Northwest MZ-1. Based on the 1D Model results, the Watermaster Engineer may recommend that additional SMAs be developed and evaluated with the CVM and 1D Model to generate the necessary information to finalize the Guidance Level and the Subsidence Management Plan for Northwest MZ-1.

In this way, the GLMP work augments the 2025 SYR analysis by providing a more detailed evaluation of potential future subsidence in Northwest MZ-1 and will support the development of management criteria aimed at reducing the risk of future subsidence-related MPI.

During FY 2025/26, the Watermaster Engineer plans to complete the following:

- Run the PX 1D Model using the results from the 2025 SYR.
- Develop up to two (2) additional SMAs that would be designed to mitigate any potential future subsidence predicted in Northwest MZ-1. A draft TM will be prepared to describe

the 1D Model results and the proposed SMAs—including groundwater production and replenishment/recharge plans of the Chino Basin parties. The TM is expected to be prepared and distributed to the GLMC in June 2026.

During FY 2026/27, the Watermaster Engineer plans to complete the following:

- Hold a GLMC meeting in June 2026 to review the recommended SMA(s) and to receive feedback on the TM. The verbal and written feedback from the GLMC will be used to finalize the SMA(s) in FY 2026/27 (using carryover budget from FY 2025/26).
- Evaluate the potential future subsidence in Northwest MZ-1 under the SMAs using the CVM and PX 1D Model. Again, the objective of this task is to recommend a final Guidance Level for Northwest MZ-1 and the Subsidence Management Plan for Northwest MZ-1.
- Document model results, interpretations, and recommendations in a draft TM for distribution to the GLMC.
- Hold a GLMC meeting to review the draft TM and receive GLMC feedback. The verbal and written feedback from the GLMC will be used to finalize the TM. The final TM and its recommendations will be shared with all Watermaster Parties through the monthly Pool, Advisory Committee, and Board meetings.

It should be noted that future monitoring and analyses always hold the potential for revisions to the Guidance Level, consistent with the adaptive management approach called for in the Chino Basin Subsidence Management Plan.

## **Task 7. Meetings and Administration**

### ***Task 7.1. Prepare for and Conduct Two Meetings of the Ground-Level Monitoring Committee***

This subtask includes preparing for and conducting two meetings of the GLMC:

- October 2026 – Review the draft 2025/26 Annual Report for the GLMP.
- March 2027 – Review the draft recommended scope and budget for FY 2027/28.

### ***Task 7.2. Prepare for and Conduct One As-Requested Ad-Hoc Meeting***

This subtask includes preparing for and conducting one ad-hoc meeting of the GLMC, as requested by the GLMC or Watermaster staff.

### ***Task 7.3. Perform Monthly Project Management***

This subtask includes monthly project administration and management, including staffing, financial and schedule reporting to Watermaster and subcontractor coordination.

### ***Task 7.4. Prepare a Recommended Scope and Budget for the GLMC for FY 2027/28***

This subtask includes preparing a draft and final recommended scope of services and budget for FY 2027/28 for the GLMP to support the Watermaster's budgeting process.

# Appendix A Response to Comments

Listed below are:

- Comments received from the GLMC as of April 9, 2026 on the draft *Recommended Scope-of-Work and Budget for the Ground Level Monitoring Program for Fiscal Year 2026/27* (dated March 18, 2026)
- Watermaster staff responses to GLMC comments

## ***Comments from Monte Vista Water District (Justin Scott-Coe) – March 18, 2026***

### **Comment 1 – Overall comment. PX Data Use for Final Guidance Level.**

Issuance of a final guidance level is proposed for FY26/27 without some key inputs from monitoring and modeling efforts. The Pomona Extensometer (PX), where tangled datalogger cables have impeded extensometer monitoring for several years, has been rehabbed and may begin to collect data as early as April 2026. Extensometer data should be used to inform whether key hypotheses are correct (e.g. delayed dewatering in the deep aquifer from legacy dewatering, as a mechanism for current InSAR vertical ground motion in Northwest MZ-1.) The preliminary guidance level should be evaluated relative to the recent stabilization of vertical ground motion in Northwest MZ-1 prior to establishing a final guidance level.

### **Watermaster Response:**

The PX facility may begin generating improved data as early as April 2026; however, several months of data collection and evaluation will be needed to assess its accuracy and reliability. If the data prove reliable, they may help inform the FY 2026/27 work, although the period of record will likely be too short to fully support key conclusions. Accordingly, the FY 2026/27 analyses will primarily rely on the 2025 SYR results together with the updated CVM and 1D modeling framework to evaluate future subsidence and support a recommendation for a Guidance Level for Northwest MZ-1.

The intent of the FY 2026/27 scope is not to treat the Guidance Level as fixed irrespective of new information. Rather, the Guidance Level will continue to be evaluated in light of additional monitoring data and model results, with input from the GLMC, consistent with the adaptive management approach outlined in the Subsidence Management Plan.

### **Comment 2 – Task 6. Develop a Subsidence-Management Plan for Northwest MZ-1**

*“...the same pattern of differential subsidence that occurred in the Managed Area during the time of ground fissuring.”*

- As commented previously, the language suggests that conditions in Northwest MZ-1 are the same as the Managed Area during the time of ground fissuring. MVWD recommends

clarifying the language so as not to suggest the two areas are experiencing identical conditions.

#### Watermaster Response:

The phrase has been revised to read “spatial pattern of differential subsidence” to distinguish it from rates and magnitudes of subsidence.

#### Comment 3 – Task 6.2. Refine and Evaluate Subsidence-Management Alternatives

*“The CVM results are being used to evaluate the 2020 Safe Yield and the potential for MPI in the future. The evaluation for MPI associated with land subsidence in Northwest MZ-1 is being performed using the CVM results. However, the GLMP includes a more detailed evaluation where the CVM results (i.e., future groundwater levels by CVM layer) will be used as input data for the 1D Model at the PX location to predict the potential for future subsidence associated with the 2025 SYR. Based on the results of the 1D Modeling effort, the Watermaster Engineer may recommend that additional SMAs be developed and evaluated with the CVM and 1D Model to generate the necessary information to finalize the Guidance Level and the Subsidence Management Plan for Northwest MZ-1.”*

In the *Analysis of Material Physical Injury and Undesirable Results for the 2025 Safe Yield Reevaluation*, Watermaster Engineer defined the threshold for Material Physical Injury in Northwest MZ-1 as *“the historical rate of compaction measured by the interferometric synthetic aperture radar (InSAR) data between March 2011 and March 2024 (approximately 0.033 feet per year).”*

- Recommend including some additional discussion on the interrelation/timing between the Safe Yield Reevaluation and the scope of work here-in. How do the Guidance Level (to be established in FY26/27) and the threshold for Material Physical Injury relate/overlap in terms of this subsidence management scope? How will the SMAs proposed to evaluate Northwest MZ-1 inform the Safe Yield Reevaluation, or do they only inform the Guidance Level and Subsidence Management Plan?
- Why was the March 2011 to March 2024 period selected as a threshold for Material Physical Injury in the SYR work? That seems overly conservative given no Material Physical Injury occurred during that or earlier periods.

#### Watermaster Response:

- Regarding the first bulleted comment above:
  - The 2025 SYR/CVM work provides basin-scale projections of hydraulic heads by model layer and supports evaluation of Safe Yield and the potential for future MPI. The GLMP FY 2026/27 Task 6.2 effort then uses the projected heads as input to the 1D model at the Pomona Extensometer location to evaluate the potential for future subsidence in Northwest MZ-1 under the 2025 SYR scenarios and to

assess the potential need to develop and evaluate additional SMAs. In this way, the GLMP work augments the 2025 SYR analysis by providing a more detailed evaluation of potential future subsidence to support development of a Guidance Level and subsidence-management recommendations aimed at reducing the risk of potential future subsidence-related MPI in Northwest MZ-1 (i.e., finalize the Subsidence Management Plan for Northwest MZ-1). The description of the scope of work herein has been revised in Task 6.2 to provide additional clarification regarding the interrelationship and timing between the 2025 SYR and the GLMP scope of work.

- Regarding the second bulleted comment above:
  - The description of the MPI threshold based on the March 2011 to March 2024 InSAR-derived compaction rate reflects an earlier proposed approach. The 2025 SYR incorporates an updated metric for evaluating subsidence-related MPI that is based on groundwater levels rather than a historical subsidence rate. The revised approach to evaluate subsidence-related MPI using groundwater levels as a proxy for subsidence was made because the additional 1D models across all areas of subsidence concern were not available in time to utilize in the 2025 SYR. The revised approach was described in the first draft report for the 2025 SYR in October 2025.

#### Comment 4 – Task 6.2. Refine and Evaluate Subsidence-Management Alternatives

Previous scope discussion in FY 2025/26 included the development of SMAs to *“Evaluate the minimum recharge quantity of supplemental water in MZ-1, as required by the Peace II Agreement.”*

- MVWD’s understanding is that an evaluation of this recharge quantity has not been completed but mention of this purpose is absent from the scope of work for FY 2026/27. We recommend including language discussing recharge evaluation pursuant to Peace II obligations because, as commented previously, the Watermaster has yet to perform an assessment of minimum recharge quantity of supplemental water in MZ-1. It has taken Watermaster 15 years to finally fulfill this obligation under Peace II.
- MVWD also continues to recommend evaluating the existing model’s ability to predict the recent stabilization of subsidence trends in Northwest MZ-1 at current groundwater levels in the deep aquifer. Does the current model match the latest observed data and trends with additional recharge in Northwest MZ-1? Is the preliminary guidance level appropriate given the recent stabilization in vertical ground motion at lower water levels than the guidance level? Will this evaluation occur during FY26/27 prior to issuance of a final Guidance Level?

## Watermaster Response:

- Regarding the first bulleted comment above:
  - The omission of this language from the FY 2026/27 GLMP draft scope was not intended to suggest that the Peace II obligation no longer applies. The obligation will be fulfilled under a different CBWM FY 2026/27 task—*Model Update and Required Demonstrations*.
- Regarding the second bulleted comment above:
  - We agree that evaluation of the recent stabilization of subsidence trends, and the ability of the current modeling framework to reproduce those trends, is an important component of the FY 2026/27 effort. The 2024/25 Annual Report noted that the recent reductions in pumping and increases in recharge in Northwest MZ-1 functioned as an empirical test of the model simulations and generally confirmed the model results that decreased pumping and increased recharge could elevate hydraulic heads and minimize or abate ongoing subsidence.

FY 2026/27 Task 6.2 will use the updated CVM and 1D modeling framework, together with recent monitoring data, to further evaluate whether the model results are consistent with the observed slowing or stabilization of vertical ground motion and to reassess the preliminary Guidance Level before recommending a final Guidance Level.

Watermaster notes, however, that recent increases in groundwater levels and slowing of subsidence rates do not eliminate the risk of future subsidence if groundwater levels decline in the future.

## Comment 5 – Task 7.1. Prepare for and Conduct Two Meetings of the Ground-Level Monitoring Committee

This subtask includes preparing for and conducting two meetings of the GLMC: *“Section 6.2: Hold a GLMC meeting in June 2026 to review the recommended SMA(s) and to receive feedback on the TM. The verbal and written feedback from the GLMC will be used to finalize the SMA(s) in FY 2026/27.”*

- There is some conflict regarding the number and scheduling of GLMC meetings. The header discusses four meetings, the sub header identifies two meetings, and text in Section 6.2 mentions a GLMC meeting in June 2026 not identified in Section 7.1. Please resolve differences in scope.

## Watermaster Response:

- The final scope has been updated to resolve the inconsistency in the Task 7.1 header. The proposed meeting schedule for the remainder of FY 2025/26 and FY 2026/27 is as follows:
  - Task 6.2.3: (1) meeting in FY 2025/26, tentatively scheduled for June 2026, but may be held in July 2026 using carryover funds, to review PX 1D Model simulations using results from the 2025 SYR and to discuss SMA recommendations to be evaluated in FY 2026/27;
  - Task 6.2.6: (1) meeting in FY 2026/27 to present SMA modeling results and receive feedback. These results will be used to support recommendation of a final Guidance Level and the Subsidence Management Plan for Northwest MZ-1; and
  - Task 7.1: (2) meetings in FY 2026/27 to review the draft 2025/26 Annual Report for the GLMP (October 2026) and the draft recommended scope and budget for FY 2027/28 (March 2027).

## Memorandum

**DATE:** April 14, 2026  
**TO:** Watermaster Staff  
**FROM:** Brownstein Hyatt Farber Schreck, LLP  
**RE:** FY 2026-2027 Legal Counsel Budget Detail and Analysis

---

This worksheet has been prepared at your request to provide additional detail regarding the expected legal fees and costs that will be incurred if Watermaster implements its responsibilities under the Restated Judgment, pending Court Orders, including the Peace I and Peace II Agreements, and the Optimum Basin Management Program (OBMP). The Nine Member Board is expected to implement these measures. Additional fees and costs may be incurred in connection with actions that are within Watermaster's duties and implementation authority but outside the control of staff and counsel. That is, Parties to the Restated Judgment and persons not bound by the Restated Judgment may initiate actions that require a response from Watermaster.

This worksheet utilizes the budget as estimated by legal counsel as of the above date, and will be updated, as necessary, so that any adjustments in the budgeted amount can be made considering actual projections concerning time and level of activity associated with anticipated budget line items. The experience of Watermaster over the past more than twenty-five years since Brownstein Hyatt Farber Schreck (Brownstein) was retained as counsel provides a basis for the budget based upon a customary level of activity. These projections are included within the budget as requested to provide service as legal counsel to the Board. Thus, the proposed budget amount analyzed below is \$1,241,865, which includes a roughly \$41,000 allocation for unanticipated activities.

Budget Assumptions: The number of hours expended to provide the desired level of service is the primary factor in legal counsel expense. The budgeted amount includes reimbursement for out-of-pocket costs that include phone charges, electronic legal research charges, travel costs (including mileage, lodging, etc.) and other incidental costs. While these costs traditionally vary from month to month, they do not constitute a material portion of the budget. Typically, 2-5% of a monthly bill is cost recovery.

Brownstein has represented Watermaster for over 25 years and consequently, as a matter of Brownstein policy, Watermaster enjoys a continuing and gradually steepening discount against standard rates. In some cases, the discount approaches 45%.

Slater and Herrema are the principal lawyers assigned to the Watermaster matter. Over the years, Slater's activities are generally reserved to Watermaster Board meetings, assignments directed by the Board, and task driven.

Definition of “unanticipated expenses”: For the purposes of this memorandum, “unanticipated expenses” refers to an amount of money that is budgeted to account for legal issues that may arise post budget approval that were not anticipated in the budget, or to account for underestimates in the budget for the anticipated matters as a result of unforeseen complexity. Historically, the Watermaster budget preference had been to underfund all parts of the budget, including contingency, so as to not create an expectancy of higher expenditure. Experience suggests that the Watermaster Board and the Parties to the Restated Judgment have been more comfortable with assigning additional funding to a matter after the actual need has been identified. Such funds whose use requires a Board-approved budget transfer/amendment are sometimes identified as “contingency.” This analysis uses the term “unanticipated expenses” in the first sense to refer to an amount of money that is budgeted to account for unanticipated expenses.

Detail articulated below includes:

Regular Meeting Attendance	\$236,115
Board Briefings/Workshops	\$ 31,275
Court Coordination	\$ 80,400
Rules and Regs Rewrite	\$ 11,075
Personnel Matters	\$ 30,500
Interagency and Miscellaneous	\$236,400
Party Status Maintenance	\$ 14,950
 Total:	 \$640,715

**Regular Meeting Attendance (6275, 6375, 8375, 8475, 8575) \$236,115**

Assumptions: Three meeting days per month staffed by one attorney per meeting. Assumed hours commitment of 5 hours per Pool Committee meeting and 4 hours per Advisory Committee meeting, inclusive of attendance, travel and preparation. Assumption of regular attendance by Slater at the Board meeting (12 hours x 11 months = 132 hours), and by Herrema at Pool Committees and Advisory Committee (5 hours x 3 pool committees x 11 months + 4 hours x 11 months = 209 hours) for an approximate total of \$236,115.

**Board Briefings/Workshops (6375.1) \$ 31,275**

Over the past few years, Watermaster staff and legal counsel have conducted Board Briefings to provide Board members with information as to the legal background for Watermaster’s activities, the functions of the Pool Committees, Advisory Committee and Board, the role of Watermaster staff and current issues. This budget assumes that one or two briefings or workshops will take place in FY 2026-2027. Responsibility for this task is shared by Slater (20 hours) and Herrema (25 hours) for an approximate total of \$31,275.

**Court Coordination (6071)**

Activities:

**(1) Regular court hearings \$80,400**

Based on present trends in the motion practice before the Court, we anticipate a moderate level of effort in 2026-2027 in regard to interactions with the Court. Given that Court hearings require more preparation than regular monthly meetings, this category assumed an hour commitment of 30 hours per hearing inclusive of attendance, travel and preparation of reports or other filings. This category assumes one attorney per hearing, though it is often necessary to staff a hearing with more than one attorney. Responsibility for this task is shared equally between Slater (40 hours) and Herrema (40 hours) with assistance from associate attorney Ben Markham or an equivalent billing attorney (60 hours) for an approximate total of \$80,400.

**(2) Rules and Regulations Rewrite (6072) \$ 11,075**

The Watermaster Board has directed that the Rules and Regulations be reviewed for any necessary updates every other year. A planned update is proceeding during FY 2026-2027. This budget item presents the level of effort for such a rewrite. Responsibility for this task is shared by Slater (5 hours), Herrema (5 hours), and Markham (10 hours) for an approximate total of \$11,075.

**Personnel (6073)** \$ 30,500

It is not anticipated that any significant personnel issues will arise in FY 2026-2027, though some level of activity is the norm in any year. Thus, we have proposed a nominal budget for this item for employment and benefits counsel, Christine Samsel and Nancy Strelau of 50 hours, and an approximate total of \$30,500.

**Interagency Issues and Miscellaneous (6074 and 6078)** 236,400

There are always a variety of day-to-day matters that arise throughout a month concerning questions that require interpretation of the Restated Judgment, Rules, agreements, etc. Herrema (120 hours) is the attorney responsible for these matters, with assistance from Slater (80 hours) and Markham (120 hours), with an approximate cost of \$187,800.

To the extent that agreements between the parties arise, there will likely be nominal involvement from legal counsel. In addition, it is likely that several interagency agreements will be required in FY 2026-2027 as in past years. These activities assume the work will be done by Herrema (72 hours) for an approximate total of \$48,600.

**Party Status Maintenance (6077)** \$ 14,950

In each year, there is a small amount of work to do to regarding the proper placement of parties in Pools and the Pool and party rosters. The proposed budget assumes working with Watermaster staff to undertake this clean-up. The proposed budget assumes that Herrema will be the primary attorneys assigned to this task (10 hours) with assistance from Markham (20 hours), for an approximate total of \$14,950.

**Archibald South Plume (6907.31)** \$ 13,400

The proposed budget assumes that Slater will be the primary attorney assigned to the task of any necessary ABGL facilitation (5 hours) with input from Mark Mathews (5 hours) and involvement from Herrema (10 hours) for an approximate total of \$13,400.

**Chino Airport Plume (6907.32)** \$ 13,400

The proposed budget assumes that Slater will be the primary attorney assigned to the task of any facilitation related to the Chino Airport Plume (5 hours) with input from Mark Mathews (5 hours) and involvement from Herrema (10 hours) for an approximate total of \$13,400.

**Desalter/Hydraulic Control Issues (6907.33)** \$ 41,400

**Regional Water Quality Control Board (6907.38)** \$ 69,600

Given the significance of the Desalter and Hydraulic Control issues to the OBMP, legal counsel believes it is appropriate to expect continuing activity on this issue continuing into FY 2025-2026 – specifically in light of the reduced groundwater production in areas of the Basin due to water quality concerns. Given his participation in the CDA facilitation, Slater will be the primary attorney (20 hours) with assistance from Herrema (40 hours), for an approximate total of \$41,400.

Regarding the Regional Water Quality Control Board, a Basin Plan Amendment related to the revision to the Salt and Nutrient Management Plan is planned to be completed in FY 2026-2027. On this matter, work will be conducted by Slater (25 hours), Herrema (40 hours), and Markham (60 hours) for an approximate total of \$69,600.

**Santa Ana River Water Rights (6907.34)** \$ 22,425

Legal counsel is currently completing a process to extend the time in which Watermaster must seek to license its water right permit numbers 19895 and 20753 – a substantial amount of work was completed on this in FY 2017-2018, and additional progress was been made in FY 2021-2022 but it is likely that the SWRCB’s processing will not be completed until FY 2026.-2027. SWRCB staff have requested additional information in order to complete this process. Watermaster additionally is required to complete annual reporting to the Department of Fish and Wildlife and the SWRCB regarding its diversions under its permit 21225. In addition, given the history on the Santa Ana River it is prudent to account for some level of activity regarding water rights on the River. Work under this budget item is split 1/3 Herrema (15 hours) and 2/3 Markham or an equivalent billing attorney (30 hours) for an approximate total of \$22,425.

**Recharge Master Plan (6907.39)**

\$ 29,900

Each year, counsel spends a limited amount of time assisting with administration of the projects approved as part of the RMPUs. Additionally, an update to the Recharge Master Plan must be completed by October 2028, and this effort may begin in FY 2026-2027. It is anticipated that the effort in this regard will be spread among Herrema (20 hours) and Markham or an equivalent billing attorney (40 hours) for an approximate total of \$29,900.

**Prado Basin Habitat Sustainability (6907.41)**

\$ 10,850

The Peace II Subsequent Environmental Impact Report includes mitigation requirements as to the development of a Prado Basin Habitat Sustainability Committee and Program be developed. Watermaster and IEUA have entered into a cost sharing agreement as to the required mitigation and Watermaster will have ongoing obligations thereunder. It is anticipated that Herrema will provide (10 hours) and Markham (10 hours) for an approximate total of \$10,850.

**SGMA Compliance (6907.44)**

\$ 10,850

Based on the Chino Basin’s adjudicated status, Watermaster has certain obligations to annually report information to DWR. It is anticipated that there will also be a minimal amount of work associated with tracking and evaluating how new SGMA directives may affect the Basin or suggest changes to Basin management. This will include work by Herrema (10 hours) and Markham or an equivalent billing attorney (10 hours) for an approximate total of \$10,850.

**OBMP Update (6907.45)**

\$187,800

The Watermaster Board approved the 2020 OBMP in October 2020. The LSLs was approved in July. Work in 2026-2027 would include assistance with OBMPU implementation and assisting the parties with issues associated with potential amendments to the Peace Agreement and OBMPU Implementation Plan. This effort would include work by Slater (80 hours), Herrema (120 hours) and Markham or an equivalent billing attorney (120 hours) for an approximate total of \$187,800.

**2020 Safe Yield Reset (6907.47)**

\$159,900

The Court’s 2017, 2019, and 2020 orders as to future Safe Yield resets include processes for potential update to the reset methodology, peer review, and the outcome of the State’s process regarding water use efficiency requirements. There will be work in FY 2025-2026 associated with the implementation of these orders, including the completion of the 2025 Model Update and Safe Yield Evaluation and any ensuing action by the Parties and Watermaster. This will include work by Slater (60 hours), Herrema (100 hours), and Markham or an equivalent billing attorney (120 hours) for an approximate total of \$159,900.

**Unanticipated Activities (6907.9)**

\$ 41,625

Regarding the unanticipated activities that may occur during the year (please see the discussion on page 1, above), Slater has been budgeted at (25 hours) and Herrema is budgeted (35 hours) for an approximate total of \$41,625.

Notes: (A) Includes attorney and witness preparation, hearing attendance and potential post-hearing activities.  
 (B) Variety of day-to-day matters that arise throughout the month concerning the Judgment, Rules, agreements, etc.  
 (C) Activities related to clean-up and maintenance of Watermaster's roster of parties and Pool members, along with potential Court filings.  
 (D) Variety of day-to-day activities such as workshop reviews; research Pool membership issues; stormwater and new yield; review agreements and contracts; coordination of ongoing Watermaster projects; review of draft documents; special activities as requested by GM, etc.

General Notes:

- \* Brownstein maintains a 10% discount on all fees over \$100,000 as part of the original contract with Watermaster.
- \* Rather than attempt to project which budget items would be affected by the 10% discount, and which out-of-pocket cost items might be relevant to which budget items, the budget detail assumes they offset each other.
- \* Rates for most BHFS attorneys reflect an increase for the first time in several years.

DRAFT

Footnotes:

\* On quarterly invoices, IEUA will credit CBWM for an estimated pro rata cost share based on this cost sharing methodology  
At the conclusion of the fiscal year upon obtaining final budget actuals, IEUA will account for a pro rata credit/debit to be applied to the then current fiscal invoicing cycle.

# Recharge Water Program FY 2026/27 Proposed Debt Service & Operations and Maintenance Budget

---

Alexander Lopez

Treasurer

March 2026

## 2 Debt Service Summary

---

Debt Type	FY 2026/27 Budget	Funding from CBWM	Funding from IEUA
2020A Refunding Bonds (2008B Variable)	\$956,708	\$478,354	\$478,354
San Sevaie Basin Improvement (SRF loan)	101,947	50,973	50,974
Lower Day Basin Improvement (SRF Loan)	159,484	159,484	0
Wineville/Jurupa Improvement (SRF Loan)*	770,966	770,966	0
RP-3 Basin Recharge Improvement (SRF Loan)*	42,460	21,230	21,230
Interfund Loan Interest**	50,000	47,000	3,000
<b>Total Debt Service</b>	<b>\$2,081,565</b>	<b>\$1,528,007</b>	<b>\$553,558</b>

\*Payment amount per the SWRCB Amortization schedule as of 07/03/2024, amount is subject to change pending final loan disbursement.

\*\*FY 2026/27 budget includes interest on outstanding interfund loans of \$50,000, this amount is based on the average annual LAIF yield and is subject to change. Interfund loans used as bridge financing for the RMPU projects totaled \$10.1 million. As of fiscal year end 2025, the outstanding loan balance is \$5.1 million. Interfund loan principal of \$3.1 million is expected be repaid in FY 2025/26 and the remaining \$2 million to be repaid in FY 2026/27.

### 3 Bond Debt Service

---

<b>2020A Refunding (2008B Variable) \$5.7M 11 years @ 0.849% Matures 2032</b>	<b>FY 2026/27 Budget</b>	<b>Funding from CBWM</b>	<b>Funding from IEUA</b>

Interest Expense	13,400	13,400	0
<b>Debt Service</b>	<b>\$159,484</b>	<b>\$159,484</b>	<b>\$0</b>

## 5 SRF Loan Debt Service

---

<b>Wineville/Jurupa/RP-3 Basin Recharge Improvements (SRF Loan) \$15.4M 20 Years @ .55% Matures Mar. 2046</b>	<b>FY 2026/27 Budget*</b>	<b>Funding from CBWM</b>	<b>Funding from IEUA</b>
Wineville/Jurupa Improvements Project Principal Payment	\$692,628	\$692,628	\$0
Wineville/Jurupa Improvements Project Interest Expense	78,338	78,338	0
RP-3 Basin Recharge Improvements Project Principal Payment	38,146	19,073	19,073
RP-3 Basin Recharge Improvements Project Interest Expense	4,314	2,157	2,157
<b>Total Debt Service</b>	<b>\$813,426</b>	<b>\$792,196</b>	<b>\$21,230</b>

\*Payment amount per the SWRCB Amortization schedule as of 07/03/2024, amount is subject to change pending final loan disbursement.

## 6 Future SRF Loan Debt Service

---

<b>Montclair Basin Improvement (SRF Loan) \$2.06M 20 Years @ .55% Matures Dec. 2046</b>	<b>FY 2027/28 Budget</b>	<b>Funding from CBWM</b>	<b>Funding from IEUA</b>
Principal Payment	\$97,930	\$97,930	\$0
Interest Expense	11,354	11,354	0
<b>Debt Service</b>	<b>\$109,284</b>	<b>\$109,284</b>	<b>\$0</b>

Information is from SWRCB payment schedule dated 11/01/24, debt service amounts are subject to change. Projections are based on total project costs and related total loan draws.

## 7 Projected Pay-Go for Wineville/Jurupa/RP-3 Basin Improvements Projects

- First project costs incurred in 2017
- IEUA unreimbursed pay-go to date \$8,516,740
- Final SRF reimbursement of \$6.7 million projected after July 2026

Expense	FY 2026/27 Budget	Funding from CBWM (50%)	Funding from IEUA (50%)
RW15003.05 - RP-3 Basin Improvements Project Projected Pay-go*	\$803,255	\$401,627	\$401,628
<b>Total RW15003.05 Projected Pay-go</b>	<b>\$803,255</b>	<b>\$401,627</b>	<b>\$401,268</b>

Expense	FY 2026/27 Budget	Funding from CBWM (100%)	Funding from IEUA (0%)
RW15003.06 - Wineville/Jurupa/Force Main Improvements Project Projected Pay-go*	\$1,840,392	\$1,840,392	\$0
<b>Total RW15003.06 Projected Pay-go</b>	<b>\$1,840,392</b>	<b>\$1,840,392</b>	<b>\$0</b>
<b>Total Projected Pay-go</b>	<b>\$2,643,647</b>	<b>\$2,242,019</b>	<b>\$401,628</b>

\*Pay-Go amounts are subject to change pending final SRF allowable cost reimbursements and final total project costs.

## 8 Operations and Maintenance

Expense	FY 2026/27 Budget	Funding from CBWM*	Funding from IEUA*
SBCFCD	\$12,000	8,402	3,598
CBWCD	2,000	1,400	600
<i>IEUA – Operations &amp; Maintenance:</i>			
General Basin	1,514,938	637,065	877,873
GWR Administration	689,180	483,123	206,057
Specialty O&M	136,000	95,338	40,662
Utilities	153,000	102,170	50,830
General Allocation (10%)	250,712	175,752	74,960
<b>Total O&amp;M Expense</b>	<b>\$2,757,830</b>	<b>\$1,503,250</b>	<b>\$1,254,580</b>
AM26010 – Groundwater Recharge Condition Assessments (per task order 14)	\$50,000	\$25,000	\$25,000
<b>Total O&amp;M Project Expense</b>	<b>\$50,000</b>	<b>\$25,000</b>	<b>\$25,000</b>
<b>Total O&amp;M &amp; Project Expense</b>	<b>\$2,807,830</b>	<b>\$1,528,250</b>	<b>\$1,279,580</b>

\* Based on Groundwater Recharge Pro-Rata Cost Sharing Methodology Draft Budget

## STAFF REPORT

DATE: May 28, 2026  
TO: Board Members  
SUBJECT: Fiscal Year 2025/26 Assessment Package (Business Item II.B.)

Issue: To review the Chino Basin Watermaster Fiscal Year 2025/26 Assessment Package, based on Production Year 2024/25. [Within WM Duties and Powers]

Recommendation: Approve the final Fiscal Year 2025/26 Assessment Package and reconciliation as presented.

Financial Impact: Collection of assessments according to the Assessment Package provides funding for current fiscal year budgeted expenses and replenishment obligations (if required).

---

### ACTIONS:

**Appropriative Pool – May 14, 2026 [Final]:** Provided advice and assistance.  
**Non-Agricultural Pool – May 14, 2026 [Final]:** Provided advice and assistance.  
**Agricultural Pool – May 14, 2026 [Final]:** Provided advice and assistance.  
**Advisory Committee – May 21, 2026 [Final]:** Provided advice and assistance.  
**Watermaster Board – May 28, 2026 [Recommended]:** Approval.

## **BACKGROUND**

Watermaster issues an Assessment Package annually based on production during the previous production year (July 1 through June 30). Production information is generally collected quarterly, and other necessary information is collected annually or as it occurs. Assessments are used during the current fiscal year to fund budgeted expenses. Assessments are based on the approved budget allocated across the total assessable production in the Basin.

## **DISCUSSION**

### Normal Process for Development of Annual Assessment Package

The Parties of the Overlying (Non-Agricultural) Pool and the Appropriative Pool were each sent a copy of their Water Activity Report in August 2025 that summarized their water activities for the previous year, including production, Dry Year Yield (DYY), land use conversion, transfers, voluntary agreements, and assignments. Each Party was asked to verify the data gathered and summarized by Watermaster. The Water Activity Reports were received, compiled, and all necessary corrections were made.

Each Appropriative Pool Party's Water Activity Report was accompanied by a "Transfer from Storage to Satisfy Desalter Replenishment Obligation (DRO)" form, and summaries of DRO and Local Storage Accounts' balances. Using the form, the Parties submitted their preference on how they would like their share of DRO to be satisfied with stored water. Those transfers were then executed in September 2025 and the Parties' storage account balances were adjusted accordingly.

The total DRO for production year 2024/25 is 27,411.9 acre-feet. This includes the 10,000 acre-feet of DRO Contribution and 17,411.9 acre-feet of Remaining DRO. In August and September 2025, the Appropriative Pool Parties were given an opportunity to transfer water to satisfy their share of DRO. The Parties have submitted their requests and the DRO was satisfied with a combination of store water, annual water rights, and Exhibit "G" Form A transfers. These transfers resulted in 3.2 acre-feet of the residual DRO to be assessed.

Assessments generate funds to cover the current FY 2025/26 approved budget and reserves pursuant to existing reserve policies. The Assessment Package does not factor in unspent monies as those are returned to Parties through Watermaster's Excess Cash Reserve evaluation process. If credit is due, it will appear as a line item on the invoice which will be accompanied by a refund calculation table.

The total Operating Safe Yield (OSY) of the Appropriative Pool is 40,834 acre-feet. Backfill of declines in Safe Yield have first priority and Land Use Conversions have second priority ahead of Early Transfers in calculating the Agricultural Pool Safe Yield Reallocation.

The Assessment Package is based on the production-based assessments of \$9,015,057 from the FY 2025/26 Amended Budget and identifies total assessable production for all Pools as 96,228.6 acre-feet, resulting in assessments of \$37.86/acre-foot for Judgment Administration and \$55.82/acre-foot for OBMP & Program Elements 1-9, excluding recharge debt service, recharge improvement project expenses, "Pomona Credit" assessments, and assessments for replenishment and Cumulative Unmet Replenishment Obligation (CURO) water.

Since the FY 2025/26 Approved Budget was prepared before the end of the production year, the assessments were estimated based on a projected total production of 92,598.1 acre-feet, which resulted in projected assessments of \$39.34/acre-foot for Judgment Administration and \$57.02/acre-foot for OBMP & Program Elements 1-9. Once the actual production numbers were compiled, the resulting actual total production was higher than the projected production, causing the per acre-foot assessments to decrease by \$2.68/acre-foot, including the budget amendment that was approved in July 2025 which increased the total budget by \$92,000.

In September 2025, Watermaster received an RTS invoice from IEUA in the amount of \$62,834.35. The

Readiness to Serve (RTS) assessment is for water purchased during FY 2016/17 and FY 2017/18 through IEUA. A portion of the RTS is the eighth of ten annual installments for the 5,767.037 acre-feet of water purchased during FY 2016/17. The other portion is the seventh of ten annual installments for the 1,145.9 acre-feet of water purchased during FY 2017/18. The 85/15 Rule is applied where applicable for the RTS charges.

The additional assessments approved as part of the budget, allocated amongst the Appropriators based on their percentage of OSY, are the Pomona Credit assessment of \$66,667.00, recharge debt payment assessment of \$687,653, and recharge improvement project assessment of \$1,751,140.

The storage loss rate applied to water held in storage accounts continues to be 0.07%. This rate is reflected in the Assessment Package and has been applied to the beginning balances of locally stored water accounts.

In cases where the ending balances of a storage account have increased from the beginning balance on July 1, 2025, a new storage agreement is required. Parties with increased storage balances as of the approval of the Assessment Package have already submitted storage applications to Watermaster. The application submitted by the Overlying (Non-Agricultural) Pool was approved by the Watermaster Board on July 24, 2025, and the application submitted by the Appropriative Pool was approved by the Watermaster Board on December 18, 2025. Following the approval of the FY 2025/26 Assessment Package, a new storage agreement will be sent for signature to those Parties with increased balances.

#### Decision to Levy a Partial-Year Assessment for FY 2025/26

Watermaster held two Assessment Package Workshops: one on October 21, 2025, and the other on October 28, 2025. The purpose of the workshops was to provide the Parties with information pertaining to the Assessment Package and opportunities to raise questions, concerns, and provide feedback.

The FY 2025/26 Assessment Package was presented to the Pool Committees for advice and assistance on November 13, 2025. It was also scheduled for presentation to the Advisory Committee for advice and assistance, and to the Watermaster Board for approval on November 20, 2025. However, due to the unresolved DYY matter, and issues raised in the FY 2025/26 Assessment Package that could be resolved along with the Revised FY ended 2022 and 2023 Assessment Packages, the three Pool Committees moved to defer the approval of the FY 2025/26 Assessment Package until the matter has been resolved. In the meantime, and at the Pool Committees' recommendation, partial assessments were instead approved by the Advisory Committee and Watermaster Board with the direction that there will be a reconciliation following the resolution on the DYY matter later in the fiscal year.

In addition to the line items detailed within the FY 2025/26 Partial Assessments, additional credits and charges were added to assessment invoices as directed by specific action(s) of the Pool(s), or by action of Watermaster per past practice; these items are not dependent on the Board's approval of the Assessment Package. Charges for Pool Administration/Legal Services were also included on the FY 2025/26 Partial Assessment invoices as approved by each Pool Committee.

For the production year 2024/25, there is a replenishment obligation of 46.7 acre-feet for overproduction, and 3.2 acre-feet for DRO. When the FY 2025/26 Partial Assessment invoices were sent to the Parties, the replenishment obligation was assessed at 100%. The replenishment rate at that time was \$929 per acre-foot, which is MWD's 2025 Untreated rate at \$912 plus OCWD's \$2 connection fee plus TVMWD's \$15 surcharge. Since the FY 2025/26 Assessment Package had been deferred, replenishment water purchase was also deferred. Three Valleys Municipal Water District began charging their own 2026 Tier 1 untreated water at the rate of \$1,016 per acre-foot this year. Replenishment water is anticipated to be purchased and delivered later this year, and the price change will be reconciled in the next Assessment Package.

On March 26, 2026, the Watermaster Board approved the FY 2021/22 and 2022/23 Corrected and Amended Assessment Packages, which brought the DYY matter to a stage where the current FY 2025/26 Assessment Package can once again be presented to the Pool Committees for advice and assistance. It is included as Attachment 1 and is scheduled to be presented to the Advisory Committee on May 21, 2026,

and then to the Watermaster Board on May 28, 2026. If approved by the Board, the assessments will be reconciled (Attachment 2), and the remaining balance will be invoiced to the Parties immediately following the Board's approval. Payments will be due to Watermaster within 30 days of the invoice date.

Throughout the reconciliation process, Watermaster has received various questions and comments. The responses to those questions/comments are included in Attachment 3.

The Fiscal Year 2025/26 Assessment Package was presented to the Pool Committees for advice and assistance on May 14, 2026. The Appropriative Pool Committee, by a majority vote with Cucamonga Valley Water District and the City of Ontario voting against, moved the item forward to the Advisory Committee for its consideration. Further, Watermaster requested clarification from the Appropriative Pool about the application of the 85/15 rule and whether or not Watermaster's application in this assessment package is supported by the Pool. The Appropriative Pool confirmed that their action included the support for the current application of the Rule in the assessment package. The Overlying (Non-Agricultural) Pool Committee deferred their action to their Advisory Committee representatives. During the Overlying (Agricultural) Pool Committee meeting, a discussion ensued and concluded with support to move the item forward to the Advisory Committee.

On May 21, 2026, the Fiscal Year 2025/26 Assessment Package was presented to the Advisory Committee where a discussion ensued and concluded with a volume vote taken to approve the Fiscal Year 2025/26 Assessment Package by majority 71.034 votes in favor. Cucamonga Valley Water District, Fontana Union Water Company, and the City of Ontario voted against.

Notes:

- 1) The 2025 replenishment rate includes MWD's Full Service Untreated volumetric cost of \$912/AF, a \$15/AF surcharge from Three Valleys Municipal Water District, and a \$2/AF connection fee from Orange County Water District.
- 2) MWD's 2014 Purchase Order contract was not renewed and expired on December 31, 2024. As a result, MWD has a single supply rate for the 2025 and 2026 calendar years.

Notes:  
 1) IEUA is collecting the eighth of ten annual RTS charges for water purchased in FY 2016/17, and seventh of ten annual RTS charges for water purchased in FY 2017/18.  
 2) "Other Adjustments" (Column [8R]) includes adjustments from replenishment purchase for DRO. If water was not available for purchase in the previous year, this adjustment is based on the previous year's obligation, multiplied by the current replenishment rate, minus the fund balance, similar to the CURO.

Notes:

Other Adjustments:

- 1) CDA provided 35.3 AF to JCSD for irrigation at Orchard Park.
- 2) Monte Vista Water District received a credit of 11.7 AF after evaporative loss due to Pump-to-Waste activities in which the water was recaptured into a recharge basin.
- 3) Santa Ana River Water Company exceeded its allotment with Jurupa Community Services District by 39.8 AF.
- 4) City of Upland received a credit of 104.0 AF after evaporative loss due to Pump-to-Waste activities in which the water was recaptured into a recharge basin.

- Notes:
- 1) BlueTriton Brands, Inc. transferred 301.6 AF out of their ECO account to offset their Production Year 2024/25 overproduction obligations.
  - 2) Cucamonga Valley Water District transferred 7,105.4 AF out of their Quantified Supplemental account to offset their Production Year 2024/25 overproduction obligations.
  - 3) Cucamonga Valley Water District lost 142.3 AF of their purchased FY 2024/25 Recharged Recycled water, which was used to replenish their production year 2024/25 overproduction, to evaporative losses.
  - 4) Niagara Bottling, LLC transferred 1,338.1 AF out of their ECO account to offset their Production Year 2024/25 overproduction obligations.

Notes:  
 1) The 2025 replenishment rate includes MWD's Full Service Untreated volumetric cost of \$912/AF, a \$15/AF surcharge from Three Valleys Municipal Water District, and a \$2/AF connection fee from Orange County Water District.  
 2) MWD's 2014 Purchase Order contract was not renewed and expired on December 31, 2024. As a result, MWD has a single supply rate for the 2025 and 2026 calendar years.

Notes:  
<sup>1</sup> Original table format and content: WEI, Response to Condition Subsequent Number 7, November 2008. Table has since been revised as a result of the March 15, 2019 Court Order.  
<sup>2</sup> Peace II Desalter Expansion was anticipated to have an annual production of approximately 10,000 AF.  
<sup>3</sup> 3,956.877 acre-feet + 316.177 acre-feet added as Non-Ag dedicated stored water per Paragraph 31 Settlement Agreements. Per Agreements, the water is deemed to have been dedicated as of June 30, 2007.  
<sup>4</sup> Six years of Desalter tracking (Production Year 2000-2001 through Production Year 2005/2006) may have incorrectly assumed that a significant portion of Desalter production was being offset by Desalter Induced Recharge. Condition Subsequent 7 included an adjustment of 29,070 AF against Desalter replenishment in Production Year 2008/2009.  
<sup>5</sup> Pursuant to section 7.2(e)(ii) of the Peace II Agreement, the initial schedule for the Peace II Desalter Expansion controlled overdraft of 175,000 acre-feet had been amended to be allocated to Desalter replenishment over a 17-year period, beginning in 2013/14 and ending in 2029/30.  
<sup>6</sup> For the first 10 years following the Peace II Agreement (2006/2007 through 2015/2016), the Non-Ag "10% Haircut" water is apportioned among the specific seven members of the Appropriative Pool, per PIIA 9.2(a). In the eleventh year and in each year thereafter, it is dedicated to Watermaster to further offset desalter replenishment. However, to the extent there is no remaining desalter replenishment obligation in any year after applying the offsets set forth in 6.2(a), it will be distributed pro rata among the members of the Appropriative Pool based upon each Producer's combined total share of OSY and the previous year's actual production.  
<sup>7</sup> Per the Peace II Agreement, Section 6.2(b)(iii) (as amended by the March 15, 2019 Court Order), the Remaining Desalter Replenishment Obligation is to be assessed against the Appropriative Pool, pro-rata based on each Producer's combined total share of OSY and their Adjusted Physical Production.  
<sup>8</sup> Due to the Re-Operation Schedule amendments in 2019, the Pre-Peace II Controlled Overdraft is left with a balance of 1,288.054 AF, which may be utilized at a later date to offset a future Desalter Replenishment Obligation.

Notes:  
 Section 6.2(b)(ii) of the Peace II Agreement as the amendment is shown in the March 15, 2019 Court Order states: "The members of the Appropriative Pool will contribute a total of 10,000 afy toward Desalter replenishment, allocated among the Appropriative Pool members as follows: 1) 85% of the total (8,500 afy) will be allocated according to the Operating Safe Yield percentage of each Appropriative Pool members; and 2) 15% of the total (1,500 afy) will be allocated according to each land use conversion agency's percentage of the total land use conversion claims. The formula is to be adjusted annually based on the actual land use conversion allocations of the year."

Notes:

<sup>1</sup> Due to the timing of when the Budget and the Assessment Package are prepared, actual production numbers on this page may differ from the Budget depending on any last minute corrections during the Assessment Package preparation process.

<sup>2</sup> Total costs are allocated to Pools by actual production percentages. Does not include Recharge Debt Payment, Recharge Improvement Projects, Replenishment Water Purchases, or RTS charges.

<sup>3</sup> Judgment Administration excludes OAP, AP, and ONAP specific legal services, meeting compensation, or Special Funds. These items invoiced separately on the Assessment invoices.

<sup>4</sup> June 30th fund balance (estimated) less funds required for Operating Reserves, Agricultural Pool Reserves, and Carryover replenishment obligations.

<sup>5</sup> The previous fiscal year's budget numbers are from the previously approved Assessment Package and does not reflect numbers from any amended budget that may have followed.

Fontana Union Water Company Annual Account - Desalter Replenishment Obligation	Cucamonga Valley Water District Annual Account - Transfer (To) / From	All	0.00	<i>Transfer of FUWC DRO</i>

**Notes:**

- 1) The Water Transaction between Fontana Water Company and Cucamonga Valley Water District submitted on 4/22/2025 for the amount of 7,500 AF had been split because the amount purchased exceeds what is required to satisfy overproduction; the 85/15 Rule only applies to the portion that satisfies overproduction per the direction of the Appropriate Pool on November 2, 2011.
- 2) The Water Transaction between Golden State Water Company and City of Upland submitted on 5/30/2025 for the amount of 400 AF had been split because the amount purchased exceeds what is required to satisfy overproduction; the 85/15 Rule only applies to the portion that satisfies overproduction per the direction of the Appropriate Pool on November 2, 2011.
- 3) Cucamonga Valley Water District is utilizing their Recharged Recycled Water purchase of 4,583.6 AF (before evaporative loss) to replenish their production year 2024/25 overproduction. This transaction had been split because the amount purchased exceeds what is required to satisfy overproduction; the 85/15 Rule only applies to the portion that satisfies overproduction per the direction of the Appropriate Pool on November 2, 2011.

Assessment Year 2025-2026 (Production Year 2024-2025)

Analysis of the 85/15 Rule Application to Water Transfers

To	(Over)/Under Production Excluding Water Transfer(s)	From	Date of Submittal	Transfer Quantity	Is Buyer an 85/15 Party?	Is Transfer Being Placed into Annual Account?	Is Purpose of Transfer to Utilize SAWCO or West End Shares?	Amount of Transfer Eligible for 85/15 Rule
Cucamonga Valley Water District	(4,046.8)	Inland Empire Utilities Agency	6/30/2025	4,046.8	Yes	Yes	No	4,046.8

Notes:  
1) This year's RTS includes the eighth of ten annual RTS charges for water purchased in FY 2016/17, and seventh of ten annual RTS charges for water purchased in FY 2017/18.

# Assessment Year 2025-2026 (Production Year 2024-2025) Assessment Package Notes

Page	Note
All (a)	A change in a Party's name will be reflected in the Assessment Package for the production year in which the name change occurred. For example, if a Party changed its name on June 30, 2025, it will be reflected in the FY 2025/2026 Assessment Package (for Production Year 2024/2025). Additionally, if a Party changed its name on July 1, 2025, it will be reflected in the FY 2026/2027 Assessment Package (for Production Year 2025/2026).
All (b)	To avoid the possibility of being mistakenly identified as one of other similarly named organizations, the Chino Basin Desalter Authority is referred to as Desalter Authority.
pg01	"Agricultural Total Pool Production" includes Voluntary Agreements between Appropriators and Agricultural Pool Parties.
pg02-07	ANG II (Multi) LLC temporarily leased their rights to 9W Halo Western OpCo L.P. (as successor to Angelica) beginning on March 2010 through January 2030.
pg04 (a)	Transfers in Column [4E] include the annual transfer of 10% of the Non-Ag Safe Yield to be utilized to offset the overall Desalter Replenishment Obligation in accordance with the Peace II Agreement Section 6.2, and also the Exhibit "G" physical solution.
pg04 (b)	Column [4H], "Actual Fiscal Year Production," includes physical production and Assignments between Appropriators and Non-Ag Pool Parties.
pg04 (c)	"Net Over Production" does not include evaporative loss. Additional water will be purchased in order to adequately cover evaporative losses. The rates are 1.5% from November through March, 4.2% from April through October.
pg05 (a)	Hydraulic Control was achieved on February 1, 2016. Pursuant to Paragraph 7.4(b) of the Peace II Agreement, Storage Loss is now calculated at 0.07%.
pg05 (b)	When applicable, Column [5C] includes the Exhibit "G" physical solution transfers to the Appropriative Pool.
pg06	Transfers in Column [6C] is the annual transfer of 10 percent of the Non-Ag Safe Yield to be utilized to offset the overall Desalter Replenishment Obligation in accordance with the Peace II Agreement Section 6.2.
pg07 (a)	The financial Outstanding Obligations are reconciled on pages 7.1 and 17.1.
pg07 (b)	Fund Balance is maintained on a spreadsheet by Watermaster.
pg07 (c)	Outstanding Obligation (\$) is calculated by multiplying Outstanding Obligation (AF) by the current rate, reduced by the Fund Balance (\$).
pg07 (d)	Fund Balance is the money collected by Watermaster, Outstanding Obligation (\$) is the money owed by the Parties or credited to the Parties.
pg08 (a)	Recharge Debt Payment expenses [8O] and Recharge Improvement Project expenses [8P] are each allocated on % OSY, based on the approved budget.
pg08 (b)	Pursuant to Paragraph 5.4(b) of the Peace Agreement, the City of Pomona shall be allowed a credit of up to \$2 million against OBMP Assessments through 2030. This equates to \$66,667 per year. TVMWD elected to discontinue payment of the "Pomona Credit," effective FY 2012/2013. It is now paid by the Appropriative Pool Parties, allocated on % OSY (Column [8N]).
pg09 (a)	Other Adjustments [9D] include water provided to another Appropriator, pump-to-waste that has been captured in a recharge basin (as verified by IEUA), and other miscellaneous recharge / injection of native water.
pg09 (b)	Evaporative Losses will be applied to recharged water from Pump-to-Waste activities beginning in October 2017. (Evaporative Loss Rates: 1.5% Nov - Mar; 4.2% Apr - Oct)
pg10 (a)	The Restated Judgment allowed an accumulated overdraft of 200,000 AF over 40 years. The total Operating Safe Yield is now 40,834 AF, allocated by percentage of Operating Safe Yield.
pg10 (b)	Column [10I], "Actual Fiscal Year Production," includes physical production, Voluntary Agreements, Assignments, and, if applicable, other adjustments. A detailed breakdown can be found on Page 9.1.

# Assessment Year 2025-2026 (Production Year 2024-2025) Assessment Package Notes

Page	Note
pg10 (c)	"Net Over Production" does not include evaporative loss. Additional water will be purchased in order to adequately cover evaporative losses. The rates are 1.5% from November through March, 4.2% from April through October.
pg11 (a)	The Assessment Package database is set up so that all water must go through the Party Annual Accounts on the way to or from ECO Storage Accounts, and through the ECO Storage Accounts on the way to or from Supplemental Storage Accounts (does not apply to water dedicated to offset the Desalter Replenishment Obligation).
pg11 (b)	Column [11C] includes transfers to the Desalter Replenishment Obligation.
pg12 (a)	The Assessment Package database is set up so that all water must go through the Party Annual Accounts on the way to or from ECO Storage Accounts, and through the ECO Storage Accounts on the way to or from Supplemental Storage Accounts (does not apply to water dedicated to offset the Desalter Replenishment Obligation).
pg12 (b)	Columns [12C], [12H], and [12M] include transfers to the Desalter Replenishment Obligation.
pg12 (c)	The first 3,000 AF of City of Fontana's recharged recycled water transfers to the City of Ontario, and all of the City of Montclair's recharged recycled water transfers to MVWD.
pg13 (a)	"Re-Operation Offset: Pre-Peace II Desalters" had an original beginning balance of 225,000.000 AF. The 29,070 AF correction required by Condition Subsequent 7 is included. (See Page 18.1)
pg13 (b)	"Re-Operation Offset: Peace II Expansion" had an original beginning balance of 175,000.000 AF. It will now be allocated to Desalter replenishment over a 17-year period, beginning in 2013/14 and ending in 2029/30, according to a schedule. (See Page 18.1)
pg13 (c)	There is no loss assessed on the native Basin water allocated to offset Desalter production as a result of Basin Reoperation as approved in the Peace II Agreement.
pg13 (d)	"Non-Ag Dedication" was used in a prior Assessment Package to indicate the Paragraph 31 Settlement Agreements Dedication.
pg13 (e)	The "Non-Ag" OBMP Special Assessment", also referred to as the "10% Haircut", will indicate the movement of water when it is being utilized to further offset the Desalter Replenishment Obligation. See [18L] on Page 18.1.
pg13 (f)	Columns [13C] and [13D] under "Dedicated Replenishment" include transfers of water from an Annual Account to DRO, including Party to Party transfers such as those executed with the Exhibit "G" Form A.
pg14	Transfers in Column [14A] include annual water transfers/leases between Appropriators and/or from Appropriators to Watermaster for replenishment purposes, and also the Exhibit "G" physical solution transfers from the Non-Ag Pool.
pg15 (a)	Most of the remaining eligible parcels for Land Use Conversion are within the Conversion Area 1 boundary.
pg15 (b)	"Unlikely to Convert Parcels" regardless of eligibility are not likely to convert due to pre-existing land use. Eligibility will be determined on a case by case basis.
pg16	Beginning with the 2015/16 Assessment Package, the Agricultural Pool Safe Yield Reallocation is now being calculated with a new formula in accordance with the March 15, 2019 Court Order.
pg17 (a)	The financial Outstanding Obligations are reconciled on pages 7.1 and 17.1.
pg17 (b)	Fund Balance is maintained on a spreadsheet by Watermaster.
pg17 (c)	Outstanding Obligation is calculated by multiplying Outstanding Obligation (AF) by the current rate, reduced by the Fund Balance.
pg17 (d)	Fund Balance is the money collected by Watermaster, Outstanding Obligation (\$) is the money owed by the Parties or credited to the Parties.
pg21 (a)	Any balance in a Dedicated Replenishment Account is utilized first to satisfy new or carried over Desalter Replenishment Obligation beginning with the fiscal year such water was made available. The balance, if any, can be found on page 13.1.

# Assessment Year 2025-2026 (Production Year 2024-2025) Assessment Package Notes

Page	Note
pg21 (b)	Due to an agreement between CVWD and FUWC, all of FUWC's rights are automatically transferred to CVWD. A recurring transaction was created so that a portion of that water gets returned to FUWC to satisfy their share of DRO.
pg22	The table on this page is a replica of the table found in the Watermaster Budget.
pg24	The column titled "(Over)/Under Production Excluding Water Transfer(s)" excludes Exhibit "G" water sales and water transfers between Appropriators and to Watermaster (if any). ([10B] + [10C] + [10D] + [10E] + [14B] - [10K])
pg25 (a)	The "15% Water Transaction Debits" total is the "Total 15% Credits from all Transaction" from Page 23.1.
pg25 (b)	"Replenishment Obligation" does not include evaporative loss. Additional water will be purchased in order to adequately cover evaporative losses. The rates are 1.5% from November through March, 4.2% from April through October.
pg26 (a)	Beginning with fiscal year 2016/17, water purchased through the IEUA will be charged with an annual RTS fee over a ten year period commencing two years after the initial purchase. This fee will vary year to year based on a ten-year rolling average.
pg26 (b)	RTS will be allocated based on the total RTS charge for the year and not on the calculated cost per acre-foot.

DRAFT

**Assessment Year 2025-2026 (Production Year 2024-2025)**

**Assessment Package References and Definitions**

Column	Title Description
2A	<b>AF Production</b> Actual fiscal year production by each Party. Copied from [4H].
2B	<b>Non-Agricultural Pool - AF/Admin</b> Production [2A] <times> per acre-foot Admin fee.
2C	<b>Non-Agricultural Pool - AF/OBMP</b> Production [2A] <times> per acre-foot OBMP fee.
2D	<b>Replenishment Assessments - AF Exceeding Annual Right</b> Over-production for each Party beyond their annual production right. Copied from [4I].
2E	<b>Replenishment Assessments - \$929 Per AF</b> Amount overproduced [2D] <times> the current replenishment rate.
2F	<b>CURO Adjustment</b> Monetary amount needed (or to be credited) for each Party's Cumulative Unmet Replenishment Obligation (CURO). Calculated on Page 7.1.
2G	<b>RTS Charges</b> Annual Readiness to Serve charges for water purchased in prior years.
2H	<b>Other Adjustments</b> Used as necessary for any other monetary adjustments needed to the Assessment Package.
2I	<b>Total Assessments Due</b> Total fees assessed based on Party production. [2B] + [2C] + [2E] + [2F] + [2G] + [2H].
3A	<b>Physical Production</b> Fiscal year physical production by each Party.
3B	<b>Assignments</b> Total of water received from an Appropriator by each Party.
3C	<b>Other Adjustments</b> Any other adjustments that result in off-set of the fiscal year's production.
3D	<b>Actual FY Production (Assmnt Pkg Column 4H)</b> Total adjusted production for the fiscal year. Also known as Assessable Production. [3A] + [3B] + [3C].
4A	<b>Percent of Safe Yield</b> The Party's yearly percentage of Safe Yield.
4B	<b>Carryover Beginning Balance</b> The beginning balance in each Annual Account. This number carries forward from the ending balance in the previous period Assessment Package.
4C	<b>Prior Year Adjustments</b> This number reflects the adjusted production rights from a previous Assessment Package, in the event that corrections are needed.
4D	<b>Assigned Share of Safe Yield (AF)</b> The Party's yearly volume of Safe Yield.
4E	<b>Water Transaction Activity</b> Total of one-time water transfers between Parties for this period, including the annual transfer of 10 percent of the Non-Ag Safe Yield to be utilized to offset the overall Desalter Replenishment Obligation, as stated in the Peace II Agreement, and Exhibit "G" physical solution transfers to the Appropriative Pool.
4F	<b>Other Adjustments</b> This number reflects adjusted production rights, in the event that corrections are needed.
4G	<b>Annual Production Right</b> Current Year Production Right. [4B] + [4C] + [4D] + [4E] + [4F].

Assessment Year 2025-2026 (Production Year 2024-2025)

# Assessment Package References and Definitions

Column	Title	Description
4H	<b>Actual Fiscal Year Production</b>	Fiscal year production, including Assignments, from CBWM's production system (as verified by each Party on their Water Activity Report). Also known as Assessable Production.
4I	<b>Net Over Production</b>	Over-production, if any, for each Party beyond their annual production right. $[4H] <minus> [4G]$ , equaling more than zero.
4J	<b>Under Production Balances - Total Under-Produced</b>	Production rights $[4G] <minus>$ production $[4H]$ , equaling more than zero.
4K	<b>Under Production Balances - Carryover: Next Year Begin Bal</b>	Either total under-produced $[4J]$ or share of Safe Yield $[4D]$ , whichever is less.
4L	<b>Under Production Balances - To Excess Carryover Account</b>	Total under-produced $[4J] <minus>$ Carryover to next year $[4K]$ , equaling more than zero.
5A	<b>Local Excess Carry Over Storage Account (ECO) - Beginning Balance</b>	The beginning balance in each ECO account. This number will carry forward from the ending balance in the previous period Assessment Package.
5B	<b>Local Excess Carry Over Storage Account (ECO) - 0.07% Storage Loss</b>	Beginning balance $[5A] <times> -0.0007$ .
5C	<b>Local Excess Carry Over Storage Account (ECO) - Transfers To / (From)</b>	Total of water transferred to and from the ECO Account.
5D	<b>Local Excess Carry Over Storage Account (ECO) - From Under-Production</b>	Total of water transferred from the Annual Account due to under production. Copied from $[4L]$ .
5E	<b>Local Excess Carry Over Storage Account (ECO) - Ending Balance</b>	The current balance in each ECO account. $[5A] + [5B] + [5C] + [5D]$ .
5F	<b>Local Supplemental Storage Account - Beginning Balance</b>	The beginning balance in each Supplemental Account. This number will carry forward from the ending balance in the previous period Assessment Package.
5G	<b>Local Supplemental Storage Account - 0.07% Storage Loss</b>	Beginning balance $[5F] <times> -0.0007$ .
5H	<b>Local Supplemental Storage Account - Transfers To / (From)</b>	Total of water transferred to and from the Annual and/or ECO Account.
5I	<b>Local Supplemental Storage Account - Ending Balance</b>	The current balance in each Supplemental Account. $[5F] + [5G] + [5H]$ .
5J	<b>Combined - Ending Balance</b>	The combined amount in all local storage accounts. $[5E] + [5I]$ .
6A	<b>Percent of Safe Yield</b>	The Party's yearly percentage of Operating Safe Yield.
6B	<b>Assigned Share of Safe Yield (AF)</b>	The Party's yearly volume of Operating Safe Yield.
6C	<b>Water Transactions - 10% of Operating Safe Yield ("Haircut")</b>	Operating Safe Yield $[6B] <times> -0.1$ .
6D	<b>Water Transactions - Transfers (To) / From ECO Account</b>	Total of water transferred between the Annual Account and ECO Account.
6E	<b>Water Transactions - General Transfers / Exhibit G Water Sales</b>	Total of water transfers between Parties for this period including Exhibit G Water Sales.
6F	<b>Water Transactions - Total Water Transactions</b>	Total water transactions. $[6C] + [6D] + [6E]$ . This column is used to populate $[4E]$ .

**Assessment Year 2025-2026 (Production Year 2024-2025)**

**Assessment Package References and Definitions**

Column	Title Description
7A	<b>Outstanding Obligation (AF)</b> The amount of obligation carried over from prior Assessment Package(s) that were not met due to various reason, including but not limited to MWD not having replenishment water available to purchase.
7B	<b>Fund Balance (\$)</b> The amount of money collected or owed for replenishment assessments from prior Assessment Package(s).
7C	<b>Outstanding Obligation (\$)</b> The amount of money that each Party owes or is credited based on current replenishment rate. [7A] <times> [CURRENT RATE] <minus> [7B].
8A	<b>AF Production and Exchanges</b> Total production and exchanges. Copied from [10K].
8B	<b>Appropriative Pool - AF/Admin</b> Production and Exchanges [8A] <times> per acre-foot Admin fee.
8C	<b>Appropriative Pool - AF/OBMP</b> Production and Exchanges [8A] <times> per acre-foot OBMP fee.
8D	<b>Ag Pool SY Reallocation - AF Total Reallocation</b> Reallocation of Ag Pool Safe Yield. Copied from [10E] and [16E].
8E	<b>Ag Pool SY Reallocation - AF/Admin</b> Party Ag Pool reallocation [8D] <divided by> Total Ag Pool Reallocation [8D Total] <times> total dollar amount needed for Ag Pool Administration.
8F	<b>Ag Pool SY Reallocation - AF/OBMP</b> Party Ag Pool reallocation [8D] <divided by> Total Ag Pool Reallocation [8D Total] <times> total dollar amount needed for Ag Pool OBMP.
8G	<b>Replenishment Assessments - AF/15%</b> For Parties participating in the 85/15 Rule: Percentage of total 85/15 participant production <times> required credit amount. Copied from Page 25.1.
8H	<b>Replenishment Assessments - AF/85%</b> For parties participating in the 85/15 Rule: Total volume overproduced [10L] <times> 85% of the replenishment rate.
8I	<b>Replenishment Assessments - AF/100%</b> For parties not participating in the 85/15 Rule: Total volume overproduced [10M] <times> 100% of the replenishment rate.
8J	<b>85/15 Water Transaction Activity - 15% Producer Credits</b> For parties participating in the 85/15 Rule: Credit amount equals 15% of the cost of the water purchased. Total to be credited copied from Page 23.1.
8K	<b>85/15 Water Transaction Activity - 15% Pro-rated Debits</b> For parties participating in the 85/15 Rule: Percentage of total 85/15 participant production <times> required credit amount. Copied from Page 25.1.
8L	<b>CURO Adjustment</b> Monetary amount needed (or to be credited) for each Party's Cumulative Unmet Replenishment Obligation (CURO). Calculated on Page 17.1.
8M	<b>ASSESSMENTS DUE - Total Production Based</b> Total fees assessed based on Party production. [8B] + [8C] + [8E] + [8F] + [8G] + [8H] + [8I] + [8J] + [8K] + [8L].
8N	<b>ASSESSMENTS DUE - Pomona Credit</b> Debit amount to Pomona <times> -1 <times> percent share of Operating Safe Yield [10A].
8O	<b>ASSESSMENTS DUE - Recharge Debt Payment</b> Total recharge debt payment <times> percent share of Operating Safe Yield [10A].
8P	<b>ASSESSMENTS DUE - Recharge Improvement Project</b> Total Recharge Improvement Project <times> Percent Share of Operating Safe Yield [10A].

**Assessment Year 2025-2026 (Production Year 2024-2025)**

**Assessment Package References and Definitions**

Column	Title Description
8Q	<b>ASSESSMENTS DUE - RTS Charges</b> Annual Readiness to Serve charges for water purchased in prior years. Copied from [26T].
8R	<b>ASSESSMENTS DUE - Other Adjustments</b> Used as necessary for any other monetary adjustments needed to the Assessment Package.
8S	<b>ASSESSMENTS DUE - DRO</b> Total assessments due for Desalter Replenishment. Copied from [21L].
8T	<b>ASSESSMENTS DUE - Total Due</b> Total assessments. [8M] + [8N] + [8O] + [8P] + [8Q] + [8R] + [8S].
9A	<b>Physical Production</b> Fiscal year physical production by each Party.
9B	<b>Voluntary Agreements (w/ Ag)</b> Total of water provided to Agricultural Pool Parties.
9C	<b>Assignments (w / Non-Ag)</b> Total of water provided to Non-Agricultural Pool Parties.
9D	<b>Other Adjustments</b> Total of water received from, or provided to, another Appropriator. Also includes production off-sets.
9E	<b>Actual FY Production (Assmnt Pkg Column 10I)</b> Total adjusted production for the fiscal year. [9A] + [9B] + [9C] + [9D].
10A	<b>Percent of Operating Safe Yield</b> The Party's yearly percentage of Operating Safe Yield.
10B	<b>Carryover Beginning Balance</b> The beginning balance in each Annual Account. This number carries forward from the ending balance in the previous period Assessment Package.
10C	<b>Prior Year Adjustments</b> This number reflects the adjusted production rights from a previous Assessment Package, in the event that corrections are needed.
10D	<b>Assigned Share of Operating Safe Yield</b> The Party's yearly volume of Operating Safe Yield.
10E	<b>Net Ag Pool Reallocation</b> Reallocation of Ag Pool Safe Yield. Copied from [16E]. The calculations that lead to this are made on Page 16.1.
10F	<b>Water Transaction Activity</b> Water transactions. Copied from [14E]. The calculations that lead to this are made on Page 14.1.
10G	<b>Other Adjustments</b> This number reflects adjusted production rights, in the event that corrections are needed.
10H	<b>Annual Production Right</b> Current Year Production Right. [10B] + [10C] + [10D] + [10E] + [10F] + [10G].
10I	<b>Actual Fiscal Year Production</b> Fiscal year production, including Assignments and Voluntary Agreements, from CBWM's production system (as verified by each Party on their Water Activity Report). Includes a sub note subtracting Desalter production.
10J	<b>Storage and Recover Program(s)</b> Total exchanges for the period (July 1 - June 30) including MZ1 forbearance and DYY deliveries (as reported to CBWM by IEUA and TVMWD and as verified by each Party on their Water Activity Report). A DYY in-lieu "put" is shown as a positive number and a DYY "take" is shown as a negative number.
10K	<b>Total Production and Exchanges</b> Actual production [10I] <plus> Storage and Recovery exchanges [10J]. Includes a sub note subtracting Desalter production. Also known as Assessable Production.

Assessment Year 2025-2026 (Production Year 2024-2025)

# Assessment Package References and Definitions

Column	Title Description
10L	<b>Net Over-Production - 85/15%</b> For 85/15 Rule participants: Production rights [10H] <minus> total production and exchanges [10K], equaling less than zero.
10M	<b>Net Over-Production - 100%</b> For non-85/15 Rule participants: Production rights [10H] <minus> total production and exchanges [10K], equaling less than zero. Includes a sub note subtracting Desalter production.
10N	<b>Under Production Balances - Total Under-Produced</b> Production rights [10H] <minus> total production and exchanges [10K], equaling more than zero.
10O	<b>Under Production Balances - Carryover: Next Year Begin Bal</b> Either total under-produced [10N] or share of Operating Safe Yield [10D], whichever is less.
10P	<b>Under Production Balances - To Excess Carryover Account</b> Total under produced [10N] <minus> Carryover to next year [10O], equaling more than zero.
11A	<b>Excess Carry Over Account (ECO) - Beginning Balance</b> The beginning balance in each ECO account. This carries forward from the ending balance in the previous period Assessment Package.
11B	<b>Excess Carry Over Account (ECO) - 0.07% Storage Loss</b> Beginning balance [11A] <times> -0.0007.
11C	<b>Excess Carry Over Account (ECO) - Transfers To / (From)</b> Total of water transferred to and from ECO and the Annual Account. Also includes Desalter Replenishment Obligation transfers.
11D	<b>Excess Carry Over Account (ECO) - From Supplemental Storage</b> Total of water transferred to and from Local Supplemental Storage accounts, as shown on Page 12.1.
11E	<b>Excess Carry Over Account (ECO) - From Under-Production</b> Total of water transferred from the Annual Account due to under production. Copied from [10P].
11F	<b>Excess Carry Over Account (ECO) - Ending Balance</b> The current balance in each ECO account. [11A] + [11B] + [11C] + [11D] + [11E].
12A	<b>Recharged Recycled Account - Beginning Balance</b> The beginning balance in each Recharged Recycled Account. This number carries forward from the ending balance in the previous period Assessment Package.
12B	<b>Recharged Recycled Account - 0.07% Storage Loss</b> Beginning balance [12A] <times> -0.0007.
12C	<b>Recharged Recycled Account - Transfers To / (From)</b> Total recharged recycled water credited to each Party for the year, as provided by IEUA. Also includes Desalter Replenishment Obligation transfers.
12D	<b>Recharged Recycled Account - Transfer to ECO Account</b> Total of water transferred to the ECO Account, as shown on Page 11.1.
12E	<b>Recharged Recycled Account - Ending Balance</b> The current balance in each Recharged Recycled account. [12A] + [12B] + [12C] + [12D].
12F	<b>Quantified (Pre 7/1/2000) Account - Beginning Balance</b> The beginning balance in each Quantified Supplemental Account. This number carries forward from the ending balance in the previous period Assessment Package.
12G	<b>Quantified (Pre 7/1/2000) Account - 0.07% Storage Loss</b> Beginning balance [12F] <times> -0.0007.
12H	<b>Quantified (Pre 7/1/2000) Account - Transfers To / (From)</b> Total of water transferred to and from the Annual Account. Also includes Desalter Replenishment Obligation transfers.
12I	<b>Quantified (Pre 7/1/2000) Account - Transfer to ECO Account</b> Total of water transferred to the ECO Account, as shown on Page 11.1.

Assessment Year 2025-2026 (Production Year 2024-2025)

# Assessment Package References and Definitions

Column	Title Description
12J	<b>Quantified (Pre 7/1/2000) Account - Ending Balance</b> The current balance in each Quantified Supplemental account. [12F] + [12G] + [12H] + [12I].
12K	<b>New (Post 7/1/2000) Account - Beginning Balance</b> The beginning balance in each New Supplemental Account. This number carries forward from the ending balance in the previous period Assessment Package.
12L	<b>New (Post 7/1/2000) Account - 0.07% Storage Loss</b> Beginning balance [12K] <times> -0.0007.
12M	<b>New (Post 7/1/2000) Account - Transfers To / (From)</b> Total of water transferred to and from the Annual Account. Also includes Desalter Replenishment Obligation transfers.
12N	<b>New (Post 7/1/2000) Account - Transfer to ECO Account</b> Total of water transferred to the ECO Account, as shown on Page 11.1.
12O	<b>New (Post 7/1/2000) Account - Ending Balance</b> The current balance in each New Supplemental Account. [12K] + [12L] + [12M] + [12N].
12P	<b>Combined - Ending Balance</b> The combined amount in all supplemental storage accounts [12E] + [12J] + [12O].
13A	<b>Dedicated Replenishment - Beginning Balance</b> The beginning balances in each Dedicated Replenishment account. These numbers carry forward from the ending balances in the previous period Assessment Package.
13B	<b>Dedicated Replenishment - Water Purchases</b> Where applicable, the total of water purchased by each Dedicated Replenishment account.
13C	<b>Dedicated Replenishment - Transfers To</b> Where applicable, the total of water transferred to each Dedicated Replenishment account. Includes transfers from Exhibit "G" Section 10 Form A, and transfers from the Annual Account.
13D	<b>Dedicated Replenishment - Transfers From</b> Total of water transferred from each Dedicated Replenishment account. The inverse amounts in this column goes to column [21D] on page 21.1.
13E	<b>Dedicated Replenishment - Ending Balance</b> The current balances in each Dedicated Replenishment account. [13A] + [13B] + [13C] + [13D].
13F	<b>Storage and Recovery - Beginning Balance</b> The beginning balance in the Storage and Recovery (DYY) Account. This number carries forward from the ending balance in the previous period Assessment Package.
13G	<b>Storage and Recovery - Storage Loss</b> Beginning balance [13F] <times> -0.0007.
13H	<b>Storage and Recovery - MWD "Puts"</b> Total of water transferred to the Storage and Recovery Account ("puts").
13I	<b>Storage and Recovery - In-Lieu "Puts" / (Takes)</b> Total of water transferred from the Storage and Recovery Account ("takes").
13J	<b>Storage and Recovery - Ending Balance</b> The current balance in the Storage and Recovery Account. [13F] + [13G] + [13H] + [13I].
14A	<b>Water Transactions - Assigned Rights</b> Total of assigned transactions for this period, including annual water transfers/leases between Appropriators and/or from Appropriators to Watermaster for replenishment purposes, and also the Exhibit "G" physical solution transfers from the Non-Ag Pool.
14B	<b>Water Transactions - General Transfer</b> Total of water transfers between Parties for this period.
14C	<b>Water Transactions - Transfers (To) / From ECO Account</b> Total of water transferred between the Annual Account and ECO Account.

**Assessment Year 2025-2026 (Production Year 2024-2025)**

Column	Title	Description
14D	<b>Water Transactions - Transfers (To) Desalter Replenishment</b>	Total of water transferred from the Annual Account to the Desalter Replenishment Account.
14E	<b>Water Transactions - Total Water Transactions</b>	Total water transactions. [14A]+ [14B] + [14C] + [14D]. This column is used to populate [10F].
15A	<b>Prior Conversion</b>	Prior Land Use Conversion in acre-feet.
15B	<b>Conversion @ 1.3 af/ac - Acres</b>	Converted parcels in acres at 1.3 acre-feet per acre.
15C	<b>Conversion @ 1.3 af/ac - Acre-Feet</b>	Converted parcels in acre-feet at 1.3 acre-feet per acre. [15B] <times> 1.3.
15D	<b>Total Prior to Peace Agrmt Converted AF</b>	Total Land Use Conversion in acre-feet prior to the Peace Agreement. [15A] + [15C].
15E	<b>Conversion @ 2.0 af/ac - Acres</b>	Converted parcels in acres at 2.0 acre-feet per acre.
15F	<b>Conversion @ 2.0 af/ac - Acre-Feet</b>	Converted parcels in acre-feet at 2.0 acre-feet per acre. [15E] <times> 2.0.
15G	<b>Total Land Use Conversion Acre-Feet</b>	Total Land Use Conversion in acre-feet for each Party. [15D] + [15F].
16A	<b>% Share of Operating Safe Yield</b>	The Party's yearly percentage of Operating Safe Yield. Copied from [10A].
16B	<b>Reallocation of Agricultural Pool Safe Yield - Safe Yield Reduction</b>	The Party's percent share of Operating Safe Yield [16A] multiplied by 9,000.
16C	<b>Reallocation of Agricultural Pool Safe Yield - Land Use Conversions</b>	Total land use conversions claimed on Page 15.1 (as verified by each Party on their Water Activity Report). Copied from [15G].
16D	<b>Reallocation of Agricultural Pool Safe Yield - Early Transfer</b>	The remaining Agricultural Pool Safe Yield (82,800 <minus> Agricultural Pool Production <minus> Safe Yield Reduction <minus> Land Use Conversion) multiplied by percent share of Operating Safe Yield [16A].
16E	<b>Reallocation of Agricultural Pool Safe Yield - Total Ag Pool Reallocation</b>	Each Party's Agricultural Pool Reallocation. [16B] + [16C] + [16D]. This column is used to populate [10E].
17A	<b>Outstanding Obligation (AF)</b>	The amount of obligation carried over from prior Assessment Package(s) that were not met due to various reasons, including but not limited to MWD not having replenishment water available to purchase.
17B	<b>Fund Balance (\$)</b>	The amount of money collected or owed for replenishment assessments from prior Assessment Packages(s).
17C	<b>Outstanding Obligation (\$)</b>	The amount of money that each Party owes or is credited based on current replenishment rate. [17A] <times> [CURRENT RATE] <minus> [17B].
17D	<b>AF Production and Exchanges</b>	Each Party's total production and exchanges. Copied from [10K].
17E	<b>85/15 Producers</b>	The total production and exchanges of 85/15 Producers only.
17F	<b>Percent</b>	The percentage of each 85/15 Producer's total production and exchanges [17E] divided by the sum of [17E].

**Assessment Year 2025-2026 (Production Year 2024-2025)**

**Assessment Package References and Definitions**

Column	Title	Description
17G	15%	If an 85/15 Producer, then the 85/15 Producers' total Outstanding Obligation (\$) at 15%, multiplied by their production and exchanges percentage. [17C] total of 85/15 Producers <times> 15% <times> [17F].
17H	85%	If an 85/15 Producer, then the Outstanding Obligation (\$) at 85%.
17I	100%	If not an 85/15 Producer, then the Outstanding Obligation (\$) at 100%.
17J	<b>Total</b>	The total CURO for the year. [17G] + [17H] + [17I].
18A	<b>Desalter Production - Pre-Peace II Desalter Production</b>	Production from the Pre-Peace II Desalter Wells.
18B	<b>Desalter Production - Peace II Desalter Expansion Production</b>	Production from the Peace II Desalter Expansion Wells.
18C	<b>Desalter Production - Total</b>	The combined production from all Desalter Wells. [18A] + [18B].
18D	<b>Desalter Replenishment - Desalter (aka Kaiser) Account PIIA, 6.2 (a)(i)</b>	Credit applied to the total Desalter Production from the Kaiser account.
18E	<b>Desalter Replenishment - Paragraph 31 Settlement Agreements Dedication PIIA, 6.2(a)(ii)</b>	Credit applied to the total Desalter Production from "dedication of water from the Overlying (Non-Agricultural) Pool Storage Account or from any contribution arising from an annual authorized Physical Solution Transfer in accordance with amended Exhibit G.
18F	<b>Desalter Replenishment - "Leave Behind" Losses PIIA, 6.2(a)(iv)</b>	Credit applied to the total Desalter Production from "any declared losses from storage in excess of actual losses enforced as a "Leave Behind".
18G	<b>Desalter Replenishment - Safe Yield Contributed by Parties PIIA, 6.2(a)(v)</b>	Credit applied to the total Desalter Production from "Safe Yield that may be contributed by the parties."
18H	<b>Desalter Replenishment - Controlled Overdraft / Re-Op, PIIA, 6.2(a)(vi) - Allocation to Pre-Peace II Desalters</b>	The 225,000 AF portion of the 400,000 AF Controlled Overdraft that was originally allocated to the Pre-Peace II Desalter production.
18I	<b>Desalter Replenishment - Controlled Overdraft / Re-Op, PIIA, 6.2(a)(vi) - Allocation to All Desalters</b>	The 175,000 AF portion of the 400,000 AF Controlled Overdraft that was originally allocated to the Peace II Desalter Expansion production but is now allocated to all Desalter production per set schedule.
18J	<b>Desalter Replenishment - Controlled Overdraft / Re-Op, PIIA, 6.2(a)(vi) - Balance</b>	The remaining balance of the 400,000 AF Controlled Overdraft.
18K	<b>Desalter Replenishment - Appropriative Pool DRO Contribution PIIA, 6.2(b)(ii)</b>	The 10,000 AF contribution to the Desalter Replenishment Obligation by the Appropriative Pool.
18L	<b>Desalter Replenishment - Non-Ag OBMP Assessment (10% Haircut) PIIA, 6.2(b)(i)</b>	The 10% of the Non-Agricultural Pool Safe Yield used to offset the total Desalter Replenishment Obligation beginning with production year 2016/2017.
18M	<b>Remaining Desalter Replenishment Obligation PIIA, 6.2(b)(iii)</b>	Total Desalter Production minus Desalter Replenishment. [18C] - [18D] - [18E] - [18F] - [18G] - [18H] - [18I] - [18K] - [18L].
19A	<b>Percent of Operating Safe Yield</b>	The Party's yearly percentage of Operating Safe Yield. Copied from [10A].
19B	<b>Land Use Conversions</b>	Total Land Use Conversion in acre-feet for each Party. Copied from [15G].
19C	<b>Percent of Land Use Conversions</b>	Each Party's pro rata share of Land Use Conversions [19B] from the total of [19B].

20B	<b>Physical Production Adjustment Calculation - Physical Production</b> Fiscal year physical production by each Party. Copied from [9A].
20C	<b>Physical Production Adjustment Calculation - 50% of Voluntary Agreements with Ag</b> Total of water provided to Agricultural Pool Parties multiplied by 50%. $[9B] \times 0.50$ .
20D	<b>Physical Production Adjustment Calculation - Assignments with Non-Ag</b> Total of water provided to Non-Agricultural Pool Parties. Copied from [9C].
20E	<b>Physical Production Adjustment Calculation - Storage and Recovery Programs</b> Total exchanges for the period (July 1 - June 30) including MZ1 forbearance and DYY deliveries (as reported to CBWM by IEUA and TVMWD and as verified by each Party on their Water Activity Report). Copied from [10J].
20F	<b>Physical Production Adjustment Calculation - Other Adjustments</b> Total of water received from, or provided to, another Appropriator. Also includes production off-sets. Copied from [9D] but does not include production adjustments to prevent a negative annual production to a Party.
20G	<b>Physical Production Adjustment Calculation - Total Adjusted Production</b> Each Party's Adjusted Physical Production. $[20B] + [20C] + [20D] + [20E] + [20F]$ .
20H	<b>RDRO Calculation - Total Production and OSY Basis</b> The sum of each Party's Adjusted Physical Production and Assigned Share of Operating Safe Yield. $[20A] + [20G]$ .
20I	<b>RDRO Calculation - Percentage</b> The percentage of each Party's Adjusted Physical Production and Assigned Share of Operating Safe Yield basis. $[20H]$ divided by the sum of $[20H]$ .
20J	<b>RDRO Calculation - Individual Party RDRO</b> Each Party's pro rata share of the Remaining Desalter Replenishment Obligation. $[20I] \times \text{Total RDRO}$ .
21A	<b>Desalter Replenishment Obligation in AF - Desalter Replenishment Obligation Contribution (DROC)</b> Each Party's share of the 10,000 AF Desalter Replenishment Obligation Contribution. Copied from [19F].
21B	<b>Desalter Replenishment Obligation in AF - Remaining Desalter Replenishment Obligation (RDRO)</b> Each Party's pro rata share of the Remaining Desalter Replenishment Obligation. Copied from [20J].
21C	<b>Desalter Replenishment Obligation in AF - Total Desalter Replenishment Obligation</b> The sum of Desalter Replenishment Obligation Contribution, and Remaining Desalter Replenishment Obligation. $[21A] + [21B]$ .
21D	<b>Total DRO Fulfillment Activity - Transfer from Dedicated Replenishment Account</b> Total of water transferred from Desalter Dedicated Replenishment Account to satisfy the desalter replenishment obligation.
21E	<b>Total DRO Fulfillment Activity - Transfer from Excess Carry Over Storage Account</b> Total of water transferred from Excess Carry Over Storage Account to satisfy the desalter replenishment obligation.
21F	<b>Total DRO Fulfillment Activity - Transfer from Recharged Recycled Storage Account</b> Total of water transferred from Recharged Recycle Storage Account to satisfy the desalter replenishment obligation.
21G	<b>Total DRO Fulfillment Activity - Transfer from Quantified Storage Account</b> Total of water transferred from Quantified Storage Account to satisfy the desalter replenishment obligation.

Assessment Year 2025-2026 (Production Year 2024-2025)

Assessment Package References and Definitions

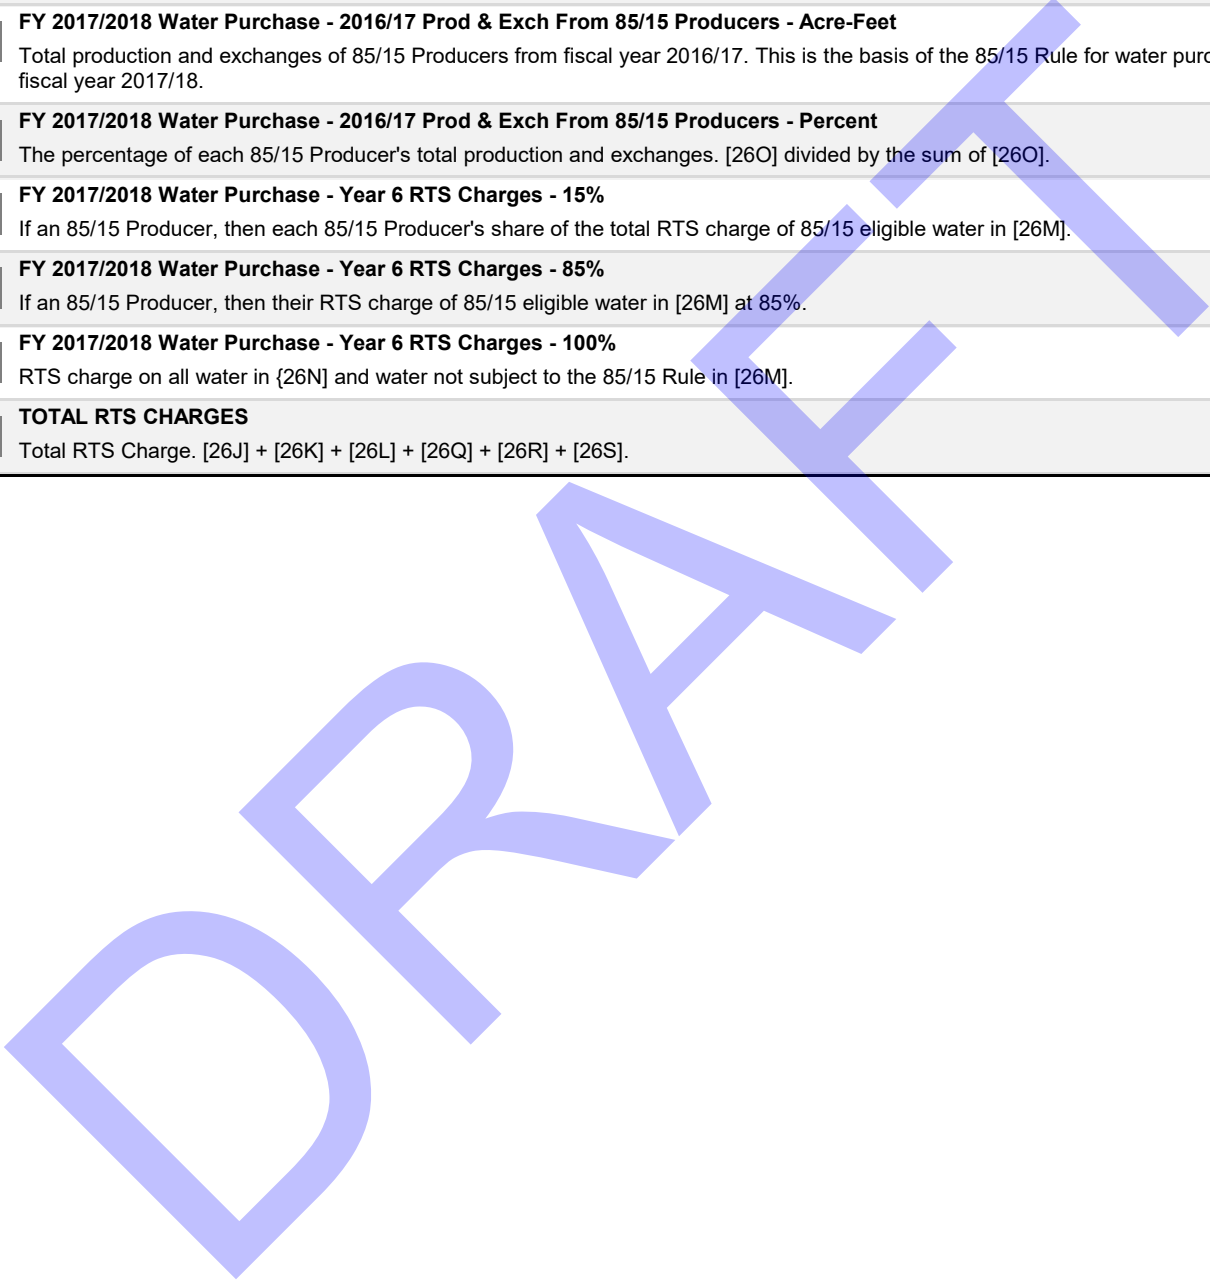

Column	Title Description
21H	<b>Total DRO Fulfillment Activity - Transfer from Post 7/1/2000 Storage Account</b> Total of water transferred from Post 7/1/2000 Storage Account to satisfy the desalter replenishment obligation.
21I	<b>Total DRO Fulfillment Activity - Replenishment Water Purchase</b> Total of water purchased to satisfy the desalter replenishment obligation.
21J	<b>Total DRO Fulfillment Activity - Total Transfers and Water Purchases</b> The sum of all transfers and purchases to satisfy the desalter replenishment obligation. [21D] + [21E] + [21F] + [21G] + [21H] + [21I].
21K	<b>Assessments - Residual DRO (AF)</b> Total residual Desalter Replenishment Obligation after transfers and purchases. [21C] + [21J].
21L	<b>Assessments - Assessments Due On Residual DRO (\$)</b> Total assessments due for Desalter Replenishment. [21K] <times> [Current Replenishment Rate]. This column is used to populate [8S].
26A	<b>FY 2016/2017 Water Purchases - Purchased Water in AF - 20160623 - RO</b> The amount of water purchased to satisfy the accumulated replenishment obligation through the end of production year 2014/15. Water was delivered in October 2016.
26B	<b>FY 2016/2017 Water Purchases - Purchased Water in AF - 20160623 - DRO</b> The amount of water purchased to be used towards the Desalter Replenishment Obligation. Water was delivered in October 2016.
26C	<b>FY 2016/2017 Water Purchases - Purchased Water in AF - 20161216 - DRO</b> The amount of water purchased to be used towards the Desalter Replenishment Obligation. Water was delivered in December 2016.
26D	<b>FY 2016/2017 Water Purchases - Purchased Water in AF - 20170418 - RO</b> The amount of water purchased to satisfy production year 2015/16 replenishment obligation. Water was delivered in April 2018.
26E	<b>FY 2016/2017 Water Purchases - Purchased Water in AF - 85/15 Breakdown - AF @ 100%</b> The amount of water purchased subject to 100% RTS rate. This applies to: DRO water; RO water of non-85/15 Pool 3 producers; and RO water of Pool 2 producers. 1) Pool 3, 85/15 Ineligible: [26A] + [26B] + [26C] + [26D]. 2) Pool 3, 85/15 Eligible: [26B] + [26C]. 3) Pool 2: [26A] + [26D].
26F	<b>FY 2016/2017 Water Purchases - Purchased Water in AF - 85/15 Breakdown - AF @ 85/15</b> The amount of water purchased subject to the 85/15 Rule. This applies to RO water of 85/15 Pool 3 producers. 1) Pool 3, 85/15 Eligible: [26A] + [26D].
26G	<b>FY 2016/2017 Water Purchases - Purchased Water in AF - 85/15 Breakdown - AF Total</b> Total water purchased by each Appropriative Pool or Non-Agricultural Pool Party. [26E] + [26F].
26H	<b>FY 2016/2017 Water Purchases - 2015/16 Prod &amp; Exch From 85/15 Producers - Acre-Feet</b> Total production and exchanges of 85/15 Producers from fiscal year 2015/16. This is the basis of the 85/15 Rule for water purchased in fiscal year 2016/17.
26I	<b>FY 2016/2017 Water Purchases - 2015/16 Prod &amp; Exch From 85/15 Producers - Percent</b> The percentage of each 85/15 Producer's total production and exchanges. [26H] divided by the sum of [26H].
26J	<b>FY 2016/2017 Water Purchases - Year 7 RTS Charges - 15%</b> If an 85/15 Producer, then each 85/15 Producer's share of the total RTS charge of 85/15 eligible water. "Total RTS Charge" <divided by> "Total Water Purchased" <times> 0.15 <times> [26F] Total <times> [26I].
26K	<b>FY 2016/2017 Water Purchases - Year 7 RTS Charges - 85%</b> If an 85/15 Producer, then their RTS charge of 85/15 eligible water at 85%. "Total RTS Charge" <divided by> "Total Water Purchased" <times> [26F] <times> 0.85.
26L	<b>FY 2016/2017 Water Purchases - Year 7 RTS Charges - 100%</b> RTS charge on all water not subject to the 85/15 Rule. "Total RTS Charge" <divided by> "Total Water Purchased" <times> [26E].
26M	<b>FY 2017/2018 Water Purchase - Purchased Water in AF - 20171211 - RO</b> The amount of water purchased to satisfy replenishment obligations through the end of production year 2014/15. Water was delivered in December 2017.

**CHINO BASIN WATERMASTER**

To: Pool Committee Members  
 From: Watermaster Staff and Legal Counsel  
 Date: May 14, 2026  
 RE: Responses to Fiscal Year 2025-26 Assessment Package Questions

Watermaster (WM) has received requests and questions in the form of letters from the Cucamonga Valley Water District (CVWD) (dated 10/27/25 & 11/19/25) and the City of Ontario (Ontario) (dated 11/10/25 & 12/23/25) and a comment made during a meeting from the Monte Vista Water District (MVWD) regarding WM’s justification to the methodologies used in the preparation of the Fiscal Year (FY) 2025-26 Assessment Package materials. The subject matter of the requests for a written response from WM can be summarized as follows:

CVWD	Requests information regarding the Appropriative Pool (AP) production that has been excluded from AP production assessments and classified as Agricultural Pool (Ag Pool) production as a Voluntary Agreement pursuant to Section 5.3(i) of the Peace Agreement.
CVWD	Requests supporting documentation Watermaster relied upon to determine the historical maximum annual quantity of water previously used on each property claimed under a Voluntary Agreement in the FY 25/26 Assessment Package.
CVWD	Requests WM limit current and future application of Voluntary Agreement credits to non-groundwater supplies, absent written justification citing specific provisions in the Judgment or Peace Agreement authorization and revise past assessment packages if not justified.
CVWD	Requests clarification regarding the basis for excluding Chino Desalter Authority (CDA) production from the annual production-based assessment calculation.
Ontario	Requests WM clarify its interpretation and application of the 2011 “85-15 Rule” policy to preemptive replenishment, particularly where the policy only involves transfers of unused Operating Safe Yield and stored supplemental water.
Ontario	Requests WM clarify whether stored supplemental water is being Produced and assessed as part of the FY 2025/26 Assessment Package and provide specific provisions and authorities to support WM implementation.
Ontario	Requests WM consider whether Judgment, Paragraph 49 should be adhered to considering the basin has ample water in storage and a historic declining safe yield.
MVWD	Requests WM clarify the source of authority to the calculation of a Desalter Replenishment Obligation in excess of 40,000 acre-feet per year.

The matters raised in the letters and comments received can be grouped in four subject categories: Voluntary Agreements, 85-15 Rule, CDA Production assessments, CDA production replenishment obligation limit.

**Voluntary Agreements**

Voluntary Agreements were established under Section 5.3(i) “Transfers” of the 2000 Peace Agreement. This provision grants members of the Agricultural Pool, including the State of California, the right to enter into voluntary agreements with

appropriators whose service areas are contiguous with or inclusive of agricultural land. The appropriator can provide the required water to the overlying land on behalf of the member of the Ag Pool. The appropriator providing the service is then entitled to receive a credit to off-set Production to the extent it is serving the overlying land up to the historical maximum annual quantity of water previously used on the property.

Comments request that WM limit the application of Voluntary Agreements to situations in which the appropriator providing service to the agricultural property provides groundwater to the property.

Since WM was ordered by the Court to implement the Peace Agreement, it has not attempted to characterize the molecules of water provided to the agricultural property that is the subject of the Voluntary Agreement. Many appropriators rely on a mix of water supplies (e.g., groundwater, purchased water, recycled water), and it may be impracticable to trace the origin of supplies provided under a Voluntary Agreement. The Assessment Packages accounting for Voluntary Agreement since the date of the Peace Agreement have similarly not limited the credit against Assessable Production (which is offset by an Assessable Production quantity assigned to the Ag Pool) based on the character of the water provided to an Agricultural Property.<sup>1</sup> No Assessment Package has been challenged or revised on this basis.

Ultimately, WM is required by court order to implement the Peace Agreement but is not itself a party to that agreement. Therefore, if the parties elect to amend the provisions regarding Voluntary Agreements, WM will implement the Agreement as amended.

#### The 85-15 Rule

Ontario has requested that WM clarify its interpretation and application of the 85-15 Rule as it pertains to the application of the Rule to an 85-15 Rule party's purchase of recycled water from the Inland Empire Utilities Agency to replenish its overproduction in a Production Year. The 85-15 Rule originates in the Appropriative Pool Pooling Plan, which is Exhibit "H" to the Judgment. The Rule and its application are the subject of Watermaster Policy 5.1, which was promulgated by the Appropriative Pool in November 2011. Both the 85-15 Rule itself and Policy 5.1 appear silent as to the application of the Rule to specific sources of water purchased to offset overproduction, such as recycled water, as well as any cap on the cost of supplies purchased to offset overproduction. Given the Rule's origin and the Appropriative Pool's policy, WM believes it is appropriate to ask the Pool to direct it as to how to apply the Pool's Rule in regard to these issues and asks that the Pool do so that WM may effectuate the Rule in the 2025-26 Assessment as the Pool believes is appropriate.

#### Land Use Conversions

The allocation of the right to Produce water associated with the conversion of land from being subject to service from the Overlying (Agricultural) Pool ("Ag Pool") to being subject to service by an Appropriator similarly originates in the Appropriative Pool Pooling Plan, which is Exhibit "H" to the Judgment. Conversion claims were the subject of a 1995 Land Conversion Amendment to the 1978 Judgment, replacing Paragraph 10(b) of the Pooling Plan, as well as Paragraph 5.3(h) of the Peace Agreement.<sup>2</sup>

Historically, fallow parcels were eligible for Land Use Conversion claims. In October 25, 2007, a requirement was added that a parcel must have an issued grading permit to qualify. This requirement has only been applied prospectively, and certain fallow parcels have been allowed to remain the subject of claims if those claims had been approved pursuant to earlier rules.

---

<sup>1</sup> In Fiscal Years 2011-12 through 2015-16, when the City of Chino provided a quantity of water to agricultural property that exceeded the volume of groundwater it pumped from the Basin, the Assessment Packages did limit the offset credit against Assessable Production to the total volume pumped.

<sup>2</sup> The Peace II Agreement required that Watermaster, by resolution, "ratify all current Watermaster accounting practices with regard to Land Use Conversions...and continue to implement such provisions in a consistent manner." (Peace II Agreement, Attachment "F", I.D.)

As Land Use Conversions arise out of the Appropriative Pooling Plan, and the continuing approval of conversion claims for fallow parcels that were originally approved under the previously approved rules has continued for 18 years without challenge, WM seeks the Appropriative Pool's direction as to whether it should apply the Pooling Plan in a different manner.

### Desalter Pumping

The comments raise two issues regarding the Assessment Package's treatment of pumping by the Desalters: (1) whether Desalter Pumping should be subject to a Production Assessment, and (2) whether the parties' Desalter Replenishment Obligation (DRO) should extend to Desalter pumping beyond 40,000 acre-feet in any Production Year.

### *Assessment of Desalter Pumping*

The Assessment Package does not propose to treat Desalter pumping as Assessable Production. This is consistent with every approved Assessment Package since the inception of Desalter pumping.<sup>3</sup> Desalter pumping is conducted by the Chino Basin Desalter Authority (CDA), which is not, and has never been required to be, a party to the Judgment. Desalter pumping is performed for multiple purposes: it provides water supply to CDA members but also provides basin wide benefits associated with addressing water quality concerns and the achievement and maintenance of hydrologic control – which are WM obligations pursuant to permits issued by the Regional Water Quality Control Board. WM has not been presented with any evidence that would compel a change in the Assessment Package treatment of Desalter pumping in the FY 2025-26 Assessment Package.

### *DRO*

The Assessment Package does not propose to limit the parties' DRO obligation to only 40,000 acre-feet of the 40,646.9 acre-feet pumped by the Desalters in FY 2024-25. The concept of DRO originates in paragraph 7.5 of the Peace Agreement, and its allocation among the parties is described in paragraph 6.2 of the Peace II Agreement. The specific manner in which the Appropriative Pool parties would collectively fulfill the Pool's DRO was additionally the subject of negotiated resolution and a court order approving the agreed upon sharing mechanism in 2019. None of these documents indicate an intention to limit the obligation to the first 40,000 AF of water pumped by the Desalters in any Production Year<sup>4</sup>, and DRO has been applied to pumping in excess of 40,000 AF in each of the applicable Production Years since FY 2020-21. WM has not been presented with any evidence that would support revising this approach in the Assessment Package treatment of DRO in this regard in the FY 2025-26 Assessment Package.

---

<sup>3</sup> At least six Assessment Packages approved during that timeframe have subsequently been amended or required to be amended and none of these amendments provided for the treatment of Desalter pumping as Assessable Production.

<sup>4</sup> Watermaster notes that there are instances in the Peace Agreement where anticipated expanded Desalter pumping is described as either "about" or "approximately" 40,000 acre-feet per year. (Peace II Agreement, section 5.1, Attachment A.

## STAFF REPORT

DATE: May 28, 2026  
TO: Board Members  
SUBJECT: Resolution 2026-02 to Levy Remaining Replenishment and Administrative Assessments for Fiscal Year 2025/26, Based on Production Year 2024/25 (Business Item II.C.)

Issue: A Resolution is required for the Chino Basin Watermaster to levy remaining administrative, special project, and replenishment assessments for Fiscal Year 2025/26. [Within WM Duties and Powers]

Recommendation: Adopt Resolution 2026-02 as presented.

Financial Impact: Collection of assessments according to the Assessment Package provides funding for current fiscal year budgeted expenses and replenishment obligations (if required).

---

### ACTIONS:

**Appropriative Pool – May 14, 2026 [Final]:** Provided advice and assistance.  
**Non-Agricultural Pool – May 14, 2026 [Final]:** Provided advice and assistance.  
**Agricultural Pool – May 14, 2026 [Final]:** Provided advice and assistance.  
**Advisory Committee – May 21, 2026 [Final]:** Provided advice and assistance.  
**Watermaster Board – May 28, 2026 [Recommended]:** Adoption.

## **BACKGROUND**

Watermaster issues an Assessment Package annually based on the previous production year (July 1 through June 30). Production information is generally collected quarterly, and other necessary information is collected annually. Watermaster calculates the proposed assessments in the annual Assessment Package which are charged and collected to fund current fiscal-year budgeted expenses. Assessments are based on the approved budget divided by the total assessable production of the previous fiscal year in the Basin.

Watermaster has authorized powers to levy and collect administrative, special project, and replenishment assessments necessary to maintain water levels and to fund the costs of administering the Chino Basin Restated Judgment. A resolution of the Watermaster Board is needed to levy the assessments and issue invoices to parties for Fiscal Year 2025/26. On November 20, 2025, Resolution 2025-03 was adopted by the Watermaster Board, directing Watermaster to levy partial assessments to the parties. Resolution 2026-02 will direct Watermaster to collect the remaining assessments for Fiscal Year 2025/26. Pursuant to the Restated Judgment, each party has thirty (30) days from the date of invoice to remit the payment for assessments due. Thereafter, interest will accrue on any portion which was due as provided for in Section 55(c) of the Restated Judgment.

## **DISCUSSION**

The FY 2025/26 Assessment Package was presented to the Pool Committees for advice and assistance on November 13, 2025. It was also scheduled for presentation to the Advisory Committee for advice and assistance, and to the Watermaster Board for approval on November 20, 2025. However, due to the unresolved DYY matter and questions raised about the FY 2025/26 Assessment Package, the three Pool Committees moved to defer the FY 2025/26 Assessment Package to provide time for the matters to be resolved. In the meantime, and at the Pool Committees' recommendation, partial assessments were instead approved by the Advisory Committee and Watermaster Board with the direction that there will be a reconciliation following the resolution on the DYY matter later in the FY 2025/26 fiscal year. Resolution 2025-03, as adopted on November 20, 2025, directed Watermaster to collect those partial assessments.

The draft FY 2025/26 Assessment Package is being presented once again to the Committees for advice and assistance and approval by the Board this month under Business Item II.C. The corresponding Resolution 2026-02 to levy the remaining assessments has been drafted for the Watermaster Board's consideration as shown in Attachment 1. A summary of what has been collected and what remains to be collected from the total FY 2025/26 assessments is shown in Attachment 2. Resolution 2025-03 is also included as Attachment 3 for reference.

If Resolution 2026-02 and the draft Fiscal Year 2025/26 Assessment Package are approved through the Watermaster process this month, the invoices to collect the remaining assessments will be emailed immediately, and payment will be due 30 days later.

Resolution 2026-02 was presented to the Pool Committees for advice and assistance on May 14, 2026. The Appropriate Pool Committee, by a majority vote with Cucamonga Valley Water District voting no and an abstention from the City of Ontario, moved the item forward to the Advisory Committee. The Overlying (Non-Agricultural) Pool Committee deferred their action to their representative in the Advisory Committee. During the Overlying (Agricultural) Pool Committee meeting, a discussion ensued and concluded with support to move the item forward to the Advisory Committee. On May 21, 2026, the item was then presented to the Advisory Committee for its consideration and was supported by majority 71.034 votes in favor with Cucamonga Valley Water District, Fontana Union Water Company, and the City of Ontario voting against.

**ATTACHMENTS**

1. Resolution 2026-02: A Resolution of the Chino Basin Watermaster Levying Remaining Administrative, Replenishment, and Special Project Assessments for Fiscal Year 2025/26
2. Reconciliation of Outstanding Fiscal Year 2025/26 Assessments
3. Resolution 2025-03: A Resolution of the Chino Basin Watermaster Levying Partial Administrative, Replenishment, and Special Project Assessments for Fiscal Year 2025/26

**RESOLUTION 2026-02**

**A RESOLUTION OF THE CHINO BASIN WATERMASTER  
LEVYING REMAINING ADMINISTRATIVE, REPLENISHMENT, AND SPECIAL PROJECT  
ASSESSMENTS FOR FISCAL YEAR 2025-2026**

WHEREAS, the Chino Basin Watermaster was appointed on January 27, 1978, under Case No. RCVRS 51010 (formerly case No. SCV 164327) entitled Chino Basin Municipal Water District v. City of Chino, et al., with powers to levy and collect administrative and replenishment assessments necessary to maintain water levels and to cover the cost of administering the Chino Basin Judgment; and

WHEREAS, the Watermaster Advisory Committee approved and the Watermaster Board adopted the Fiscal Year 2025-2026 Budget on May 22, 2025 and subsequently amended on July 24, 2025, to carry out the necessary Watermaster functions under the Judgment; and

WHEREAS, the production-based assessments to be collected for the Fiscal Year 2025-2026 Budget is \$9,015,057, of which \$5,359,302 was previously collected, covering Judgment Administration and OBMP & Program Elements 1 through 9; and

WHEREAS, the partial assessments previously collected were based on production year 2023/24 for the Appropriative Pool and production year 2024/25 for the Overlying (Non-Agricultural) Pool,

WHEREAS, the parties named in this Judgment have pumped 46.7 acre-feet of water in excess of the operating safe yield, which the parties have been previously assessed in accordance with the assessment formulas for the respective pools,

WHEREAS, on November 20, 2025, the Watermaster Board unanimously voted to adopt Resolution 2025-03, authorizing Watermaster to “Levy Fiscal Year 2025/26 Interim Assessments” for the collection of partial assessments approved by each of the Pool Committees.

NOW, THEREFORE, BE IT RESOLVED that the Chino Basin Watermaster reconciles and levies the respective assessments based on production year 2024/25 for each pool effective May 28, 2026 as shown on Exhibit “A” attached hereto.

BE IT FURTHER RESOLVED, that pursuant to the Judgment, each party has thirty (30) days from the date of invoice to remit the amount of payment for assessments due. After that date, interest will accrue on that portion which was due as provided for in Section 55 (c) of the Restated Judgment.

THE FOREGOING RESOLUTION was  
**ADOPTED** by the Watermaster Board on the 28<sup>th</sup> day of May 2026.

**RESOLUTION 2025-03**

**A RESOLUTION OF THE CHINO BASIN WATERMASTER  
LEVYING PARTIAL ADMINISTRATIVE, REPLENISHMENT, AND SPECIAL PROJECT  
ASSESSMENTS  
FOR FISCAL YEAR 2025-2026**

WHEREAS, the Chino Basin Watermaster was appointed on January 27, 1978, under Case No. RCVRS 51010 (formerly case No. SCV 164327) entitled Chino Basin Municipal Water District v. City of Chino, et al., with powers to levy and collect administrative and replenishment assessments necessary to maintain water levels and to cover the cost of administering the Chino Basin Judgment; and

WHEREAS, the Watermaster Advisory Committee approved and the Watermaster Board adopted the Fiscal Year 2025-2026 Budget on May 22, 2025 and subsequently amended on July 24, 2025, to carry out the necessary Watermaster functions under the Judgment; and

WHEREAS, the production-based assessments to be collected for the Fiscal Year 2025-2026 Budget is \$9,015,057, covering Judgment Administration and OBMP & Program Elements 1 through 9; and

WHEREAS, the parties have agreed to be partially assessed until issues relating to the Court of Appeals ruling on the DYY Program, the assessment of CDA production, the application of the 85/15 Rule to recycled water, the replenishment of CDA production in excess of 40,000 acre-feet, and the provision of recycled water pursuant to Voluntary Agreements have been resolved; and

WHEREAS, the parties named in this Judgment have pumped 46.7 acre-feet of water in excess of the operating safe yield, which is required to be replaced at the expense of the parties in accordance with the assessment formulas for the respective pools.

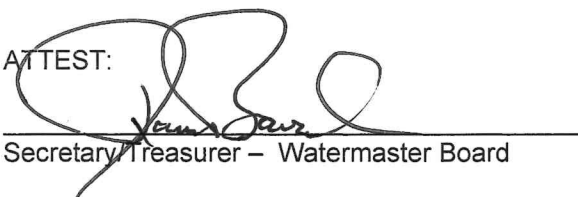

NOW, THEREFORE, BE IT RESOLVED that the Chino Basin Watermaster levies the respective assessments for each pool effective November 20, 2025 as shown on Exhibit "A" attached hereto.

BE IT FURTHER RESOLVED, that pursuant to the Judgment, each party has thirty (30) days from the date of invoice to remit the amount of payment for assessments due. After that date, interest will accrue on that portion which was due as provided for in Section 55 (c) of the Restated Judgment.

THE FOREGOING RESOLUTION was

**ADOPTED** by the Watermaster Board on the 20<sup>th</sup> day of November 2025.

CHINO BASIN WATERMASTER

  
Secretary

Date: November 20, 2025

Wineville Rubber Dam

New Wineville Pumps

Pump flow into Jurupa

New SW Diversion at Jurupa

New Jurupa Pump

Added Basin at RP3

# Project Status: Wineville/Jurupa/RP3 Basin Improvements

## Budget:

- Authorized capital budget: \$28,846,016

## Available Funding:

- \$15.4 M in SRF Loan at 0.55%
- \$10.8 M is State and Federal Grants

## Cost Summary:

- Actual/POs Cost: **\$28,673,459**
- Remaining Budget: **\$172,557 (finalizing cost)**

## Completed scope items (all project items completed)

- New added basin at RP3 Basin
- Rubber dam system at Wineville Basin’s spillway
- Control slide gates within Wineville Basin
- Basin grading for a new pump station at Wineville
- Power, controls, and communication systems at Wineville
- 2-miles of 30-Inch Pipeline passing through Fontana and Ontario.
- Stormwater diversion to Jurupa Basin.
- All new pumps fully installed and tested
- All system controls and SCADA connections tested and functional.

## Updates:

- March 30, 2026, the contract work with SCW for the final phase of the Project—the installation and testing of the new pumps at the Wineville and Jurupa Basins—was substantially completed/closing out the project
- April 2, 2026, IEUA completed a final inspection with the State Water Resources Control Board to verify compliance for the \$15 million State Revolving Fund Loan and \$9.8 million Storm Water Grant.
- IEUA staff will host the U.S. Bureau of Reclamation for its final inspection of the Wineville and Jurupa Basin Improvements on May 5, 2026, for which USBR provided \$740,000 in construction funding.
